2206	SV4-WLS-PHW-861335	INSTALLATION OF WLS PIPE SUPPORTS FOR ISOMETRIC SV4-WLS-PLW-364
2207	SV3-ME01-P0W-860980	INSTALLATION OF CONDENSER B HEATER DRAIN PIPING
2208	SV4-WRS-P0W-861358	INSTALLATION OF PIPING FOR ISOMETRICS SV4-WRS-PLW-660, -664 & -665
2209	SV4-FWS-P0W-860897	INSTALLATION AND FABRICATION OF MAIN AND STARTUP FEEDWATER SYSTEM (FWS) PIPING SUPPORT

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Package ID	Description
2210	SV4-MT71-C0W-850004	WASTE WATER RETENTION BASIN WALL POUR # 4
2211	SV4-MSS-PHW-860359	INSTALLATION AND FABRICATION OF MAIN STEAM SYSTEM (MSS) PIPING SUPPORT
2212	SV4-WRS-PHW-861359	INSTALLATION OF PIPE SUPPORTS FOR ISOMETRICS SV4-WRS-PLW-660, 664 & 665
2213	SV4-4033-SSW-850000	STRUCTURAL STEEL, 1ST TIER COLUMNS, AREA 3
2214	SV4-WLS-P0W-861339	INSTALLATION OF WLS PIPING FOR ISOMETRICS SV4-WLS-PLW-445, 936
2215	SV3-2051-SHW-860262	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, BELOW ELEV 169'-0" AREA 1 FROM COLUMNS 14 TO 16 & P.1 TO P.2
2216	SV3-ML05-MLW-861324	FABRICATION/INSTALLATION OF PIPE PENETRATIONS FOR ISO SV3-ML05-V2-317
2217	SV3-RNS-PHW-861420	FABRICATION/INSTALLATION OF SUPPORTS FOR ISO SV3-RNS-PLW-141
2218	SV3-SFS-P0W-ME6692	FABRICATION/INSTALLATION OF ISOMETRIC SV3-SFS-PLW-789 (LINE NUMBERS SFS-PL-L038, -L052, -L140)
2219	SV3-PXS-P0W-861014	INSTALL ISOMETRIC SV3-PXS-PLW-946 LARGE BORE PIPING
2220	SV3-PXS-P0W-ME2963	ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC SV3-PXS-PLW-01B (LINE NUMBERS PXS-PL-L128A & L131A)
2221	SV3-PXS-PHW-ME5584	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-PXS-PLW-640
2222	SV3-2054-SHW-860263	CABLE TRAY SUPPLEMENTAL STEEL, UNIT 3 TURBINE, BELOW EL 169'-0", AREA 4 NORTH OF 12.1, K.5-L.5
2223	SV3-R219-ERW-861315	INSTALLATION OF ELECTRICAL CABLE TRAY AND TRAY GROUNDING IN MODULE R219
2224	SV4-CA01-S4W-861376	CA01-GUIDE PIN INSTALL
2225	SV0-010-EWW-861550	ITP ELECTRICAL ASSISTANCE FOR BUILDING 315
2226	SV4-4042-SSW-850000	116'-10" ELEV FLOOR STRUCTURAL STEEL AREA 2
2227	SV4-4052-SSW-850000	134'-7" ELEV FLOOR STRUCTURAL STEEL AREA 2
2228	SV4-PXS-P0W-885600	ASME III – FABRICATION/INSTALLATION OF CA03 SMALL BORE PIPE FOR ISOMETRICS SV4-PXS-PLW-293 & SV4-PXS-PLW-294
2229	SV3-CWS-PLW-ME2507	INSTALLATION OF CWS PIPING ISO'S 70X, 70Y, 70Z, 71D
2230	SV3-2030-SHW-860274	ELECTRICAL CABLE TRAY SUPPORT INSTALLATION IN THE TURBINE BUILDING,ELEVATION 100",AREA 0,ROOM 20300(TRAPEZE
2231	SV4-CA01-S4W-CV6506	CA01-40 SUM MODULE INSTALLATION
2232	SV4-4041-SSW-850000	116'-0" ELEV FLOOR STRUCTURAL STEEL, AREAS 1
2233	SV3-DOS-PHW-861516	INSTALL PIPE SUPPORTS(SPIDERS) ON THE DESIEL FUEL OIL LINES FROM THE DESIEL GENERATOR

Exhibit V – Legacy, WIP, and Completed Work Packages**Table 3. In-Progress Work Packages (as of October 17, 2017)**

2234	SV4-WLS-P0W-861507	INSTALLATION OF PIPING FOR SV4-WLS-PLW-281 & -931
2235	SV4-CAS-P0W-861510	INSTALLATION OF PIPING FOR SV4-CAS-PLW-330 & -891
2236	SV0-DFS-THW-861460	HYDRO TEST THE DIESEL FUEL OFFLOADING SYSTEM (DFS) PIPING
2237	SV0-DFS-THW-861461	PNEUMATIC TEST OF DIESEL FUEL OFFLOADING SYSTEM (DFS) PIPING
2238	SV4-WLS-P0W-861341	INSTALLATION OF WLS PIPING FOR ISOMETRICS SV4-WLS-PLW-33A & 870
2239	SV4-CA01-CAW-850000	CA01 MODULE INSTALLATION
2240	SV4-CA20-S4W-CV5118	Realignment of Unit 4 CA20 Single-Sided Walls
2241	SV4-WLS-P0W-861509	INSTALLATION OF PIPING FOR SV4-WLS-PLW-93A & -990
2242	SV4-VWS-PHW-861173	FABRICATION/ INSTALLATION OF VWS PIPING SUPPORTS (ISOMETRIC DRAWINGS SV4-VWS-PLW-270, -484 AND -489
2243	SV4-CA20-CAW-850101	CA20 WATERTIGHT DOOR
2244	SV4-2100-SSW-850000	First Bay, Bolt Qualification
2245	SV3-CVS-MLW-861034	ASME SECTION III - INSTALLATION OF CONTAINMENT VESSEL PENETRATION SV3-CVS-PY-C01 (P05)
2246	SV3-RNS-PHW-861207	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-RNS-PLW-380
2247	SV3-SGS-MLW-861043	ASME SECTION III - INSTALLATION OF CONTAINMENT VESSEL PENETRATION SV3-SGS-PY-C05A (P44)
2248	SV4-PXS-P0W-861450	ASME SECTION III – FABRICATION/INSTALLATION OF CA03 SMALL BORE PIPE FOR ISOMETRIC SV4-PXS-PLW-290
2249	SV4-CA05-CAW-850000	CA05 MODULE INSTALLATION
2250	SV4-PXS-P0W-885602	ASME SECTION III – FABRICATION/INSTALLATION OF CA03 SMALL BORE PIPE FOR ISOMETRICS SV4-PXS-PLW-297 & SV4-PXS-PLW-298
2251	SV4-WRS-P0W-861357	INSTALLATION OF PIPING FOR ISOMETRICS SV4-WRS-PLW-59R & 59V
2252	SV4-ML05-MLW-861465	INSTALLATION OF ASME CA03 PENETRATIONS SV4-11305-ML-P19 AND SV4-11305-ML-P20
2253	SV4-PXS-PHW-885603	FABRICATION/INSTALLATION OF CA03 PIPE SUPPORTS FOR ISOMETRICS SV4-PXS-PLW-781 & SV4-PXS- PLW-801
2254	SV4-ML05-MLW-861463	INSTALLATION OF ASME CA03 PENETRATION SV4-11305-ML-P16
2255	SV4-PXS-PHW-885611	FABRICATION/INSTALLATION OF CA03 PIPE SUPPORTS FOR ISOMETRICS SV4-PXS-PLW-295 & SV4-PXS- PLW-296
2256	SV0-DFS-P0W-860237	DFS PIPING FROM NEAR BUILDING 306 TO PAD 321
2257	SV0-DFS-P0W-860238	DFS FIBERCAST LEAK CONTAINMENT JACKET PIPING FROM NEAR BUILDING 306 TO PAD 321
2258	SV4-SFS-P0W-861517	ASME III – FABRICATION/INSTALLATION OF CA20 LARGE BORE PIPE FOR ISOMETRIC SV4-SFS-PLW-170

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
2259	SV4-PXS-PHW-885610	ASME III – FABRICATION/INSTALLATION OF CA03 PIPE SUPPORTS FOR ISOMETRICS SV4-PXS-PLW-293 & SV4-PXS-PLW-294
2260	SV3-WRS-MTW-861416	INSTALLATION OF WRS-MT-02A/02B TANKS
2261	SV3-MH20-EYW-860385	15 TON SECONDARY BRIDGE CRANE MAINLINE STSTEM ASSEMBLY FOR THE TURBINE BUILDING IN ROOM 20600 (CONDUCTOR BARS)
2262	SV3-1210-CEW-CV1262	UNIT 3 AUXILIARY BUILDING-EL. 66'6" EMBED PLATES FOR CONCRETE WALL PLACEMENTS #5, #21, #22, #23, & #24
2263	SV3-1130-SSW-850001	UNIT 3, Q2-23 BEAM SEAT FABRICATION
2264	SV3-PWS-P0W-ME4946	INSTALLATION OF ANNEX POTABLE WATER SYSTEM (PWS) PIPING INCLUDING ISOMETRICS: SV3-PWS-PLW-104, -136, -196, THRU 198, -453 & -470
2265	SV3-4030-AMW-850000	100' ELEV. MASONRY, BATTERY ROOMS
2266	SV3-WWS-P0W-861592	FABRICATE AND INSTALL THE HDPE WASTE WATER SYSTEM (WWS) PIPING AROUND
2267	SV4-PXS-P0W-885593	ASME III - FABRICATION/INSTALLATION OF CA03 SMALL BORE PIPE FOR ISOMETRICS SV4-PXS-PLW-781 & SV4-PXS-PLW-801
2268	SV4-ML05-MLW-861464	INSTALLATION OF ASME CA03 PENETRATIONS SV4-11305-ML-P14 AND SV4-11305-ML-P15
2269	SV4-PXS-P0W-885596	ASME III - FABRICATION/INSTALLATION OF CA03 LARGE BORE PIPE FOR ISOMETRICS SV4-PXS-PLW-220 & SV4-PXS-PLW-221
2270	SV4-PXS-PHW-885604	ASME III – FABRICATION/INSTALLATION OF CA03 PIPE SUPPORTS FOR ISOMETRICS SV4-PXS-PLW-791 & SV4-PXS-PLW-796
2271	SV4-PXS-P0W-885595	ASME III - FABRICATION/INSTALLATION OF CA03 LARGE BORE PIPE FOR ISOMETRICS SV4-PXS-PLW-223 & SV4-PXS-PLW-230
2272	SV3-CA20-C0W-850003	CA20 FLOOR SLABS 34-37
2273	SV3-1130-SSW-850002	Q2-33 BEAM SEAT FABRICATION
2274	SV3-4052-SAW-850004	Unit 3, Annex Supplemental Steel 135'-3" Elev., Area 2 from CL 7-7.1 & H-F
2275	SV3-CH77-CHW-850000	CH77 Structural Steel Installation
2276	SV3-PXS-P0W-ME3238	ASME SECTION III- FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-025 (LINE NUMBER PXS-PL-L021B)
2277	SV4-1130-C0W-850011	CONTAINMENT BUILDING-WEST CONCRETE-ELEV 83'-0" & 84'-6" TO 87'-6"
2278	SV3-PXS-P0W-861164	ASME SECTION III – FABRICATION/INSTALLATION OF PIPING FOR ISOMETRIC SV3-PXS-PLW-01V (LINE NUMBERS L015A, L016A, L017A)
2279	SV4-ML05-MLW-861462	INSTALLATION OF ASME CA03 PENETRATIONS SV4-11305-ML-P10& SV4-11305-ML-P11

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Package ID	Description
2280	SV4-WRS-P0W-861649	INSTALLATION OF PIPING FOR SV4-WRS-PLW-654
2281	SV4-CA02-S4W-860168	CA02-05 OLPs and Welded Attachments
2282	SV4-WWS-P0W-861552	INSTALLATION AND FABRICATION OF WASTE WATER SYSTEM(WWS) PIPING FOR 140"SLAB 4
2283	SV3-DWS-P0W-861096	FABRICATION/INSTALLATION OF PIPING AND SUPPORTS FOR ISOME
2284	SV4-PXS-P0W-885594	ASME III - FABRICATION/INSTALLATION OF CA03 SMALL BORE PIPE FOR ISOMETRICS SV4-PXS-PLW-791 & SV4-PXS-PLW-796
2285	SV4-CA01-S4W-861189	CA01-SA03 -ELEV 96' TO 107' OLPs AND WELDED ATTACHMENTS
2286	SV4-WLS-P0W-861522	Fabrication/Installation of WLS Piping (Includes Isometric Drawings SV4-WLS-PLW-33K, -357 and -35F)
2287	SV4-WLS-PHW-861456	INSTALLATION OF PIPE SUPPORTS FOR SV4-WLS-PLW-93A- & 990
2288	SV4-WLS-PHW-861454	INSTALLATION OF PIPE SUPPORTS FOR SV4-WLS-PLW-281 & -931
2289	SV3-1124-SPW-850013	SPL13 Main Support Beam Installation
2290	SV4-2050-C0W-850020	141'3" ELEVATION EQUIPMENT PADS AND CURBS
2291	SV3-PXS-PHW-ME4501	Fabrication/Installation of Pipe Supports for Isometric Drawing SV3-PXS-PLW-01X
2292	SV4-PXS-PHW-885606	ASME III – FABRICATION/INSTALLATION OF CA03 PIPE SUPPORTS FOR ISOMETRIC SV4-PXS-PLW-221
2293	SV4-4051-SSW-850000	134'7" ELEV FLOOR STRUCTURAL STEEL AREAS 1
2294	SV3-4051-SAW-850000	Unit 3,Annex Supplemental Steel Area 1,Ei.135'3 CL 11.15-13 &E-I.1
2295	SV3-4051-SAW-850003	Supplementary Steel,EL.135',Area 1CL H/E & 9'10.05
2296	SV3-4051-SAW-850002	Supplementary Steel, El. 135'-3" ,Area 1 CL H/E & 10.5/11.09
2297	SV3-2052-SHW-860953	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 141'-3", AREA 2, BETWEEN COLUMNS 16 TO 17, & BETWEEN P.2 TO R
2298	SV3-DWS-P0W-861099	FABRICATION/ INSTALLATION OF PIPING AND SUPPORTS FOR ISOMETRIC SV3-DWS-PLW-723 (LINE NUMBER L260)
2299	SV3-CAS-P0W-861438	FABRICATION/ INSTALLATION OF PIPING AND SUPPORTS FOR ISOMETRIC SV3-CAS-PLW-845 (LINE NUMBER L016)
2300	SV3-MS85-MEW-ME4799	INSTALLATION OF THE LUBE OIL SYSTEM FLUSHING UNIT
2301	SV4-1211-ERW-861224	INSTALL DESIGN ROUTED CONDUIT AND CONDUIT SUPPORTS IN BATTERY ROOM "B", ROOM 12104 EL. 66'-6"
2302	SV4-2038-SHW-860265	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION FROM COLUMNS 14 TO 16 IN AREA 8OF THE UNIT 4 TURBINE BUILDING, BELOW ELEVATION 119'-9"
2303	SV3-DWS-P0W-861098	FABRICATION/ INSTALLATION OF PIPING AND SUPPORTS FOR ISOMETRIC SV3-DWS-PLW-720 (LINE NUMBER L260)

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
2304	SV4-1120-CCW-CV4121	UNIT 4 CONTAINMENT PLACEMENT, CURING & REPAIR OF CONCRETE FROM EL 80'0" TO 80'6" TO EL 83'-0" TO 84'-6"
2305	SV3-DWS-P0W-861097	FABRICATION/ INSTALLATION OF PIPING AND SUPPORTS FOR ISOMETRIC SV3-DWS-PLW-721 (LINE NUMBER L260)
2306	SV3-RNS-PHW-861208	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-RNS-PLW-194
2307	SV4-2020-MEW-860399	CONDENSER C CONNECTION PIECE ASSEMBLY
2308	SV4-2020-MEW-860397	CONDENSER A CONNECTION PIECE ASSEMBLY
2309	SV4-WLS-PHW-861365	INSTALLATION OF PIPE SUPPORTS FOR ISOMETRICS SV4-WLS-PLW-33B, -33G, & -33H
2310	SV3-CAS-P0W-861432	FABRICATION/ INSTALLATION OF PIPING AND SUPPORTS FOR ISOMETRIC SV3-CAS-PLW-724 (LINE NUMBERS L205 & L279)
2311	SV3-CAS-P0W-861437	FABRICATION/ INSTALLATION OF PIPING AND SUPPORTS FOR ISOMETRIC SV3-CAS-PLW-843 (LINE NUMBER L239)
2312	SV4-MT71-C0W-850005	WWS Basin Wall, Pour # 5
2313	SV4-CWS-PHW-ME5469	INSTALLATION OF PIPE SUPPORTS FOR WP SV4-CWS-P0W-ME5456
2314	SV3-2053-SHW-860954	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 156'-0", AREA 3, BETWEEN COLUMNS 19 TO 20, BETWEEN L.1 TO R
2315	SV3-1150-ERW-861713	FABRICATION AND INSTALLATION OF HYDROGEN IGNITER CONDUIT SUPPORTS ATTACHING TO THE CONTAINMENT VESSEL AT 175' TO 275' ELEVATION.
2316	SV3-2057-SHW-860955	ELECTRICAL CABLW TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 156'-0", AREA 7, BETWEEN COLUMNS 19 & 20, & BETWEEN K.5 TO L.1
2317	SV4-1000-C0W-850001	CONCRETE UNDER CONTAINMENT VESSEL, 8BY
2318	SV4-2060-SPW-850012	TB12 GRATING / DECKING
2319	SV3-PXS-P0W-ME3378	ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-02L (LINE NUMBERS PXS-PLL021B, L025B, L026B, L127B)
2320	SV3-2070-C0W-850001	Unit 3, Turbine Building, Roof Elevated Slab, Pour # 1
2321	SV3-2070-C0W-850004	UNIT 3 TURBINE BUILDING, ROOF ELEVATED SLAB, POUR # 4
2322	SV3-DWS-P0W-861103	FABRICATION/ INSTALLATION OF PIPING AND SUPPORTS FOR ISOMETRICS SV3-DWS-PLW-724 (LINE NUMBER L260/L521)
2323	SV3-DWS-P0W-861102	FABRICATION/INSTALLATION OF PIPING AND SUPPORTS FOR ISOMETRIC SV3-DWS-PLW-72C (LINE NUMBER L260)
2324	SV4-1220-CPW-CV5123	UNIT 4 NUCLEAR ISLAND AUX BUILDING - INSTALLATION OF FLOOR PRE-CAST PANELS AT ELEV 82'-6"

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Package ID	Description
2325	SV3-SFS-P0W-ME8755	FABRICATION/ INSTALLATION OF PIPING SUPPORTS FOR ISOMETRIC SV3-SFS-PLW-757
2326	SV3-PXS-P0W-861751	REMOVE MODULE Q223 VALVE OPERATORS
2327	SV3-1235-ERW-861444	INSTALL CONDUIT SLEEVES FOR PENETRATIONS IN UNIT 3 AUX BUILDING FLOOR SLABS, EL 100'-0" AREA 5 RM. 12361 & AREA 6 RM. 12372
2328	SV4-CA02-S4W-860170	CA02- BASEMAT CONNECTION PLATES
2329	SV3-4043-SPW-850000	115'-8" ELEVATION. DECKING AND GRATING, AREA 3
2330	SV3-2050-SUW-850513	156' ELEV, WALL STEEL, RM 20513
2331	SV4-4052-SAW-850002	SUPPLEMENTAL STEEL 135'-3" ELEV., AREA 2 FROM CL 4.1-7 & G-F
2332	SV3-1225-CSW-850100	S04 STAIR TOWER FROM ELEV. 66'-6" TO 135'-3"
2333	SV4-4052-SAW-850004	UNIT 4, ANNEX SUPPLEMENTAL STEEL 135'-3" ELEV., AREA 2 FROM CL 7-7.1 & H-F
2334	SV4-WWS-P0W-861593	FABRICATE AND INSTALL THE HDPE WASTE WATER SYSTEM (WWS) PIPING AROUND THE UNIT 4 WASTER WATER RETENTION BASIN
2335	SV4-FPS-PHW-860896	INSTALLATION OF FPS PIPING SUPPORTS ELEVATION 100'
2336	SV3-Q233-Q2W-861062	INSTALLATION OF MECHANICAL MODULE 1124-Q2-33
2337	SV3-2043-SHW-861332	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 120'-6", AREA 3, COLUMNS 18 TO 19 & P.1 TO P.2
2338	SV3-1242-SSW-850000	Auxiliary Building Structural Steel from Elev. 100'-0' to 117'-6", Area 2
2339	SV4-4052-SAW-850005	SUPPLEMENTAL STEEL 135'-3" ELEV. ANNEX BUILDING, AREA 2 FROM CL 7.1-9 & G-H
2340	SV4-WRS-THW-861642	HYDROSTATIC TESTING FOR WRS IN ANNEX BUILDING
2341	SV3-CAS-P0W-861434	FABRICATION/ INSTALLATION OF PIPING AND SUPPORTS FOR ISOMETRIC SV3-CAS-PLW-840 (LINE NUMBERS L016 & L240)
2342	SV3-RNS-PHW-861488	FABRICATION/IINSTALLATION OF RNS LARGE BORE PIPE SUPPORTS FOR ISO RNS-PLW-172
2343	SV3-RNS-P0W-861490	FABRICATION/INSTALLATION OF RNS LARGE BORE PIPE FOR ISO SV3-RNS-PLW-177
2344	SV3-PXS-PHW-ME3366	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-015
2345	SV3-0150-ERW-EL4954	CONDUIT AND EQUIPMENT FOR TRANSFORMER AREA NORTH OF TURBINE BUILDING
2346	SV4-ML05-MLW-861468	INSTALLATION OF CA03PENETRATION SV4-11305-ML-P21
2347	SV4-ML05-MLW-861467	INSTALLATION OF CA03 PENETRATION SV4-11305-ML-P09
2348	SV4-ML05-MLW-861466	INSTALLATION OF CA03 PENETRATION SV4-11305-ML-P03
2349	SV4-WRS-P0W-861449	SV4-WRS-P0W-861449

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Package ID	Description
2350	SV4-4051-SAW-850002	SUPPLEMENTAL STEEL, EL.135'-3", AREA 1 CL H/E & 10.5/11.09
2351	SV3-4052-SAW-850007	SUPPLEMENTAL STEEL, EL.135'-3", AREA 1 CL H/E & 10.5/11.09
2352	SV4-R155-ERW-861346	U4 MODULE R155 ELECTRICAL CABLE TRAY AND TRAY GROUNDING INSTALLATION
2353	SV4-R161-ERW-861348	U4 MODULE R161 ELECTRICAL CABLE TRAY AND TRAY GROUNDING INSTALLATION
2354	SV4-R104-ERW-861349	U4 MODULE R104 ELECTRICAL CABLE TRAY AND TRAY GROUNDING INSTALLATION
2355	SV4-PXS-PHW-885612	ASME III - FABRICATION/INSTALLATION OF CA03 PIPE SUPPORTS FOR ISOMETRICS SV4-PXS-PLW-297 & SV4-PXS-PLW-298
2356	SV3-DWS-P0W-861553	INSTALLATION OF ANNEX BLDG DWS PIPING (ISO-SV3-DWS-PLW-199, 200 & 202)
2357	SV3-WWS-THW-861594	HYDRO TEST UNIT 3 WASTE WATER SYSTEM (WWS) HDPE PIPING
2358	SV3-2046-SHW-860985	TURBINE BUILDING, AREA 6, EL. 120'-6" CABLE TRAY SUPPLEMENTAL STEEL COLUMNS 17 TO 18, & I.2 TO J.15
2359	SV4-4030-C0W-850006	100'-0" Elev Wall, Wall 6
2360	SV4-WLS-P0W-ME6239	INSTALLATION OF SMALL BORE CA01 WLS EMBEDDED PIPING (INCLUDE ISOMETRICS SV4-WLS-PLW-576, -577, -578, & -579)
2361	SV4-SFS-PHW-885608	FABRICATION/INSTALLATION OF CA03 PIPE SUPPORTS FOR ISOMETRIC SV4-SFS-PLW-604
2362	SV4-PXS-PHW-885609	FABRICATION/INSTALLATION OF CA03 PIPE SUPPORTS FOR ISOMETRIC SV4-PXS-PLW-299
2363	SV4-PXS-PHW-885607	FABRICATION/INSTALLATION OF CA03 PIPE SUPPORTS FOR ISOMETRIC SV4-PXS-PLW-603
2364	SV4-SFS-P0W-885598	FABRICATION/INSTALLATION OF CA03 SMALL BORE PIPE FOR ISOMETRIC SV4-SFS-PLW-604
2365	SV4-PXS-P0W-885599	FABRICATION/INSTALLATION OF CA03 SMALL BORE PIPE FOR ISOMETRIC SV4-PXS-PLW-299
2366	SV3-PXS-P0W-ME3381	ASME SECTION III – FABRICATION/INSTALLATION OF ISOMETRIC #SV3-PXS-PLW-02Z (LINE NUMBERS PXS-PL-L113B & L129B)
2367	SV3-PXS-P0W-ME3372	ASME SECTION III – FABRICATION/INSTALLATION OF ISOMETRIC #SV3-PXS-PLW-02A (LINE NUMBERS PXS-PL-L128B, L131B, & L132B)
2368	SV3-4031-ERW-861318	INSTALLATION OF SCHEDULED CONDUIT IN ROOM 40309, ANNEX BUILDING, AREA 1, ELEVATION 100'-0"
2369	SV4-4042-SAW-850001	UNIT 4, ANNEX SUPPLEMENTAL STEEL, AREA 2, 117'-6", CL 4.1 - 6
2370	SV4-WLS-PHW-861453	FABRICATION/INSTALLATION OF WLS PIPING SUPPORTS (ISOMETRICS DRAWINGS SV4-WLS-PLW-265 AND -275)
2371	SV4-WLS-P0W-861520	INSTALLATION OF PIPING FOR SV4-WLS-PLW-35 & -359

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Package ID	Description
2372	SV4-CA01-CCW-850000	CA01 MODULE GUIDE PINS
2373	SV3-RNS-PHW-861481	FABRICATION/INSTALLATION OF RNS LARGE BORE PIPE SUPPORTS FOR ISO SV3-RNS-PLW-17C
2374	SV4-REFDOC-RW4-850000	REINFORCED CONCRETE FOREMAN'S BOOK
2375	SV3-2070-C0W-850006	TURBINE ROOF ELEV. SLAB, POUR #6
2376	SV4-WLS-PHW-861340	INSTALLATION OF WLS PIPE SUPPORTS FOR ISOMETRICS SV4-WLS-PLW-445, 936, 93C & 940
2377	SV4-CA20-C0W-850002	CA20-66 FLOOR
2378	SV3-2047-SHW-861708	ELECTRICAL CABLE TRAY TRAPEZE SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 120'6", AREA 7
2379	SV3-2060-X4W-850001	UNIT 3, TURBINE DECK SURVEY MARKERS INSTALLATION
2380	SV3-VWS-P0W-860833	INSTALL TURBINE BUILDING LARGE BORE VWS PIPING (ISOMETRICS SV3-VWS-PLW-107, 108, 20AA, 20AB & 206)
2381	SV3-2060-X4W-850000	UNIT 3, TURBINE DECK SURVEY MARKERS INSTALLATION
2382	SV4-1210-CCW-CV3157	UNIT 4 AUX BUILDING WEDGE AND N-LINE (WALL PLACEMENT #0) CONCRETE PLACEMENT FROM 66'-6" TO 82'-6"
2383	SV4-CAS-PHW-861457	INSTALLATION OF PIPE SUPPORTS FOR SV4-CAS-PLW-330 & -891
2384	SV4-4041-SAW-850001	ANNEX SUPPLEMENTAL STEEL, AREA 2, 117'-6", CL 9-10.5
2385	SV3-FWS-PHW-ME3826	INSTALLATION AND FABRICATION OF FEED WATER SYSTEM (FWS)
2386	SV3-2043-SHW-861608	ELECTRICAL CABLE TRAY TRAPEZE SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 120'6", AREA 3
2387	SV3-RMS-JDW-EL6225	INSTALL (RMS) RADIATION MONITORING SYSTEM EQUIPMENT FOR ANNEX COMPUTER ROOM "A" -40410 ELEV. 118'-6"
2388	SV4-ME01-PHW-861724	UNIT 4 CONDENSER A: INSTALLATION OF WATER CURTAIN SPRAY PIPING SUPPORTS
2389	SV4-MT71-C0W-850007	Waste Water Retention Basin Wall Pour # 7
2390	SV4-4052-SAW-850006	UNIT 4, ANNEX SUPPLEMENTAL STEEL 135'-3", ELEV., AREA 2 FROM CL 7.1-9 & G-F
2391	SV4-ME01-PHW-861726	UNIT 4 CONDENSER C: INSTALLATION OF WATER CURTAIN SPRAY PIPING SUPPORT
2392	SV4-WLS-PHW-861546	INSTALLATION OF PIPE SUPPORTS FOR SV4-WLS-PLW-261 & -267
2393	SV3-PLS-JDW-EL6229	INSTALL (PLS) PLANT CONTROL SYSTEM EQUIPMENT FOR ANNEX COMPUTER ROOM "B" -40411, ELEV. 118'6"
2394	SV3-4031-ERW-861244	INSTALL CABLE TRAY IN RMS 40307-40310 ANNEX BLDG. AREA 1, ELEV. 100' (WP4)

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
2395	SV3-4031-ERW-861241	INSTALL CABLE TRAY IN RMS 40307-40310 ANNEX BLDG. AREA 1, ELEV. 100' (WP1)
2396	SV3-4050-EGW-861863	INSTALLATION OF EGS GROUNDING FOR THE ANNEX BUILDING, AREAS 1, 2 & 3 ELEV.135'-3"- BETWEEN COLUMN LINES 2/13
2397	SV3-EDS3-DBW-861178	INSTALLATION OF BATTERIES & ASSOCIATED HARDWARE FOR "EDS3" 125V NON-CLASS 1E DC & UPS SYSTEM (GROUP I) IN ANNEX BLDG. ROOM 40307
2398	SV3-EDS2-DBW-861177	INSTALLATION OF BATTERIES & ASSOCIATED HARDWARE FOR "EDS2" 125V NON-CLASS 1E DC & UPS SYSTEM (GROUP II) IN ANNEX BLDG. ROOM 40307
2399	SV4-CAS-P0W-861564	FABRICATION/INSTALLATION OF CAS PIPING SHOWN ON ISOMETRIC DRAWINGS SV4-CAS-PLW-326, -327 & -360
2400	SV4-WLS-P0W-861558	FABRICATION/INSTALLATION OF WLS PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-961
2401	SV3-4031-ERW-861243	INSTALL CABLE TRAY IN ROOMS 40307- 40310 ANNEX BLDG. AREA 1 , ELVE. 100' (WP3)
2402	SV4-4041-SAW-850002	UNIT 4 - ANNEX SSUPPLEMENTARY STEEL MODULAR ASSEMBLY), ELEV. 117'-6", AREA 1, CL 10.05 TO CL 11.09
2403	SV3-2039-SHW-861793	ELECTRICAL CABLE TRAY SUPPORT INSTALLATION IN THE TURBINE BUILDING, ELEVATION 100', AREA 9, ROOM 20300 (TRAPEZE & VF)
2404	SV3-1150-EGW-861819	INSTALL GROUNDING IN CONTAINMENT & SHIELD WALLS FROM ELEV. 117'-6" - 135'-3" EXCLUDING AREAS WHERE SHIELD WALL & AUXILIARY BUILDING MEET
2405	SV4-KB13-KBW-861735	MECHANICAL MODULE KB13 STRUCTURAL FABRICATION
2406	SV4-CAS-PHW-861458	INSTALLATION OF PIPE SUPPORTS FOR SV4-CAS-PLW-33A & -895
2407	SV4-1110-ERW-861804	FABRICATION & INSTALLATION OF DESIGN CONDUIT SUPPORTS IN ROOM 11104
2408	SV4-1130-EGW-861818	INSTALL GROUNDIN IN CONTAINMENT & SHIELD WALLS FROM ELEV. 100'-0" - 117'-6" EXCLUDING AREAS WHERE SHIELD WALL & AUXILIARY BUILDING MEET
2409	SV4-SDS-THW-861643	HYDROSTATIC TESTING FOR SDS IN ANNEX BUILDING
2410	SV4-ME01-PHW-861725	UNIT 4 CONDENSER B: INSTALLATION OF WATER CURTAIN SPRAY PIPING SUPPORTS
2411	SV3-2070-C0W-850003	UNIT 3, TURBINE BUILDING, ROOF ELEVATED SLAB POUR #3
2412	SV3-2030-SUW-850308	100' ELEV., WALL STEEL, ROOM 20308
2413	SV3-DDS-JDW-EL6228	INSTALL (DDS) DATA DISPLAY AND PROCESSING SYSTEM EQUIPMENT FOR ANNEX COMPUTER ROOM "B" -40411, ELEV. 118' 6"
2414	SV3-RNS-PHW-881161	Fabrication/Installation of Pipe Supports for Isometric Drawing SV3-RNS-PLW-191
2415	SV4-0000-C0W-850008	TRANSFORMER FOUNDATION WALL POUR #8

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
2416	SV3-4043-SPW-850001	UNIT 3 - ANNEX, 126' - 3" ELEV., DECKING INSTALLATION
2417	SV3-1240-ERW-861046	INSTALL CONDUIT PENETRATIONS FOR AUXILIARY BUILDING SHIELD WALL, FROM ELEVATION 117' - 6" - 135' - 3"
2418	SV4-CA01-S5W-CV6394	CA01-10 UNSAT IRs / N&DS / E&DCRs / LOOSE PARTS - STRUCTURAL
2419	SV3-1134-SPW-850009	SPL09 INSTALLATION
2420	SV0-DFS-C0W-850003	DIESEL FUEL TRANSFER STATION, DFS-MS003 EQUIPMENT PAD
2421	SV4-2060-SSW-850000	TB-12 THRU -16 STRUCTURAL STEEL REWORK / REPAIR
2422	SV4-2060-C0W-850006	170' ELEV. FLOOR SLAB, POUR # 6
2423	SV3-ECS-EKW-EL7174	INSTALL TURBINE BLDG ECS EQUIPMENT LV LOAD CENTER ECS-EK-41, ROOM 20501 ELEV 141'-3"
2424	SV3-4031-SHW-EL5450	FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG AREA 1, ELEV 100' PARTIAL OF BATTERY CHARGER ROOM 40310 W OF ROW LINE G
2425	SV3-ECS-EKW-EL7180	INSTALL TURBINE BLDG ECS EQUIPMENT LV LOAD CENTER ECS-EK-31 ROOM 20502 ELEV 141'-3"
2426	SV0-ZRS-C0W-850004	COMMUNICATIONS SUPPORT CENTER, ZRS-MS004 EQUIPMENT PAD
2427	SV4-CA01-S5W-CV6414	CA01-15 UNSAT IRs/N&DS/E&DCRs/LOOSE PARTS - STRUCTURAL
2428	SV4-0000-C0W-850006	TRANSFORMER FOUNDATION WALL POUR #6
2429	SV3-EDS-DSW-EL3120	INSTALL ANNEX BLDG NON CLASS 1E DC AND UPS SYSTEM - LOAD GROUP 3, ROOM 40308
2430	SV3-PXS-PHW-ME3789	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-02N
2431	SV4-CA01-S5W-CV6466	CA01-29 UNSAT IRs / N&Ds / E&DCRs / LOOSE PARTS - STRUCTURAL
2432	SV4-0000-C0W-850005	TRANSFORMER FOUNDATION WALL POUR #5
2433	SV4-1000-C0W-850003	UNDER CONTAINMENT VESSEL INNER 10.2 CONCRETE PLACEMENT
2434	SV3-ECS-EBW-EL7602	INSTALL ANNEX BLDG LOW VOLTAGE NON-SEGREGATED BUS FOR CROSS TIES BETWEEN SV3-ECS-EK-14/24 LOAD CENTERS ELEV 100 ROOM 40326
2435	SV3-ECS-EBW-EL7601	INSTALL ANNEX BLDG LOW VOLTAGE NON-SEGREGATED BUS FOR CROSS TIES BETWEEN SV3-ECS-EK-13/23 LOAD CENTERS ELEV 100 ROOM 40326
2436	SV4-0000-C0W-850022	TRANSFORMER FOUNDATION WALL POUR #22
2437	SV4-CA05-CRW-CV5200	UNIT 4 CA05 WELDABLE COUPLER REINFORCEMENT
2438	SV0-4000-MUW-850000	MASONRY MOCK-UP
2439	SV4-CA01-S5W-CV6430	CA01-19 UNSATISFACTORY IRs/N&Ds/ E&DCRs AND LOOSE PARTS -STRUCTURAL

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
2440	SV4-CA01-S4W-CV6452	SUBMODULE CA01-25, CA01-47 AND CA01-48 INSTALLATION
2441	SV4-CA01-S5W-CV6536	SA4 LEAK CHASE FABRICATION
2442	SV4-CA01-S4W-CV6571	U4-CA01- LIFTING FRAMES AND BRACING SUBMODULES 01, 02, 03, 20 THRU 24, & 35
2443	SV4-CA01-S4W-CV6572	U4-CA01 LIFTING FRAMES AND BRACING SUBMODULES 04, 11, 12, 17, THRU 19, 25, 47 & 48
2444	SV4-CA01-S4W-CV6573	U4-CA01 LIFTING FRAMES AND BRACING SUBMODULES 05 THRU 10
2445	SV4-CA01-S4W-CV6575	U4-CA01 LIFTING FRAMES AND BRACING SUBMODULES 13 THRU 16, 32, 33, 36, & 39
2446	SV3-MH20-MHW-860956	ASSEMBLY AND INSTALLATION OF 220 T TURBINE CRANE
2447	SV3-CA20-EGW-860291	INSTALL GROUND CABLE FOR NON ELECTRICAL COMPONENTS SUCH AS CA20 TANKS AND HEAT EXCHANGERS, ELEVATION 100'-0" TO 107'-0"
2448	SV3-1213-ERW-EL3166	AUXILARY BUILDING UNIT 3, EL 66'-6", AREA 3, FABRICATE AND INSTALL DESIGNED TRAY AND CONDUIT SUPPORTS
2449	SV4-CA20-S4W-CV6878	CA20-47 TEMPORARY ATTACHMENTS - FLOOR & LEDGER ANGLES FOR CA20-47, 48, 49, 50.
2450	SV4-CA20-S4W-CV6879	INSTALLATION OF CA20 SA3 FLOOR (SUBMODULES 47, 48, 49, 50))
2451	SV4-CA20-S4W-CV6882	CA20-48 Temporary Attachments
2452	SV3-ZAS-ERW-EL3254	INSTALL CABLE TRAY & RACEWAY AUX TRANSFORMER ZAS-ET-4A IN TRANSFORMER AREA NORTH OF TURBINE BLDG
2453	SV4-CA20-S4W-CV6886	CA20-49 Floor Temporary Attachments
2454	SV3-ZAS-ERW-EL3255	INSTALL CABLE TRAY & RACEWAY AUX TRANSFORMER ZAS-ET-4B IN TRANSFORMER AREA NORTH OF TURBINE BLDG
2455	SV4-CA20-S4W-CV6890	CA20-50 Temporary Attachments
2456	SV4-CA20-S4W-CV6956	CA20-66 Temporary Attachments
2457	SV4-CA20-S4W-CV6957	INSTALLATION OF CA20 SA4 FLOOR (SUBMODULES CA20-66)
2458	SV4-CA20-S5W-CV6973	CA20 Rebar Fabrication, Torqueing and Testing
2459	SV4-2060-SPW-850013	TB13 GRATING/DECKING
2460	SV4-CA20-S4W-CV6981	SV4-CA20 POST WELDING SURVEY DATA/VERIFICATIONS
2461	SV4-CA05-S4W-CV7025	CA05-01 Temporary Wall Attachments
2462	SV4-CA05-S4W-CV7027	CA05-03 Temporary Attachments
2463	SV4-CA05-S4W-CV7029	CA05-05 Temporary Attachments
2464	SV4-CA05-S4W-CV7030	CA05-06 Temporary Attachments
2465	SV4-CA05-S4W-CV7031	CA05-07 TEMPORARY WALL ATTACHMENTS

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
2466	SV4-CA05-S4W-CV7032	CA05-08 Temporary Attachments
2467	SV4-CA05-S4W-CV7033	CA05 POST WELDING SURVEY DATA / VERIFICATIONS
2468	SV4-WLS-THW-ME7099	LIQUID RADWASTE SYSTEM (WLS) PIPING HYDROSTATIC TESTING - DRAIN LINE
2469	SV4-CAS-P0W-ME7166	FABRICATE AND INSTALL CAS PIPING SHOWN IN PHASE 7
2470	SV4-2060-C0W-850008	196'-3 ELEV. FLOOR SLAB POUR # 8B
2471	SV3-MS10-MEW-860244	INSTALLATION OF SWITCHGEAR ROOM #2 AHUs
2472	SV4-4033-ERW-860383	INSTALLATION OF EMBEDDED CONDUIT ANNEX BUILDING AREA 3 ELEV 100'-0" & 107'-2"
2473	SV4-ML05-MLW-ME7167	INSTALLATION OF UNIT 4 CA20 PENETRATIONS IN ROOMS 12365, 12454, 12463
2474	SV4-ML05-MLW-ME7321	INSTALLATION OF CA20 SUBMODULE 20 WALL PENETRATIONS ELEVATION 100'0"
2475	SV4-ML05-MLW-ME7322	INSTALLATION OF CA20 SUBMODULE 22 WALL PENETRATION ELEVATION 114'6"
2476	SV4-CA01-S4W-CV6472	CA01-31 SUB MODULE INSTALLATION
2477	SV4-CA20-S5W-CV7373	SA-3 LEAK CHASE FABRICATION
2478	SV4-8200-MHW-CV7385	MISC MAB WORK
2479	SV4-CA01-S5W-CV7389	CA01 LANDING PLATE FABRICATION AND INSTALLATION
2480	SV4-WLS-THW-ME7477	HYRDO TESTING OF KB15 WLS PIPING
2481	SV3-PSS-P0W-ME7502	ASME SECTION III Fabrication/Installation of Isometric SV3-PSS-PLW-716 (Line Number PSS-PL-T081B)
2482	SV3-PSS-P0W-ME7504	ASME SECTION III Fabrication/Installation of Isometric SV3-PSS-PLW-714 (line Number PSS-PL-T081B)
2483	SV3-PSS-P0W-ME7505	ASME SECTION III Fabrication/Installation of Isometric SV3-PSS-PLW-713 (Line Number PSS-PL-T081B)
2484	SV4-WRS-P0W-ME7554	INSTALLATION OF ANNEX BLD WRS EMBEDDED PIPING (ISOMETRIC SV4-WRS-PLW-410, 434, 456, 459, 45A, 45B, 45C, 45D, 468, 46B, 45V, 46D, 47A, 47B)
2485	SV4-WLS-THW-ME7682	HYDRO TESTING OF KB28 WLS PIPING
2486	SV4-CA20-V2W-CV8064	POST LOAD INSPECTION OF SPARE SUPER LIFT LUGS
2487	SV4-CA01-S4W-CV8679	CA01-01 TEMPORARY WALL ATTACHMENTS
2488	SV4-CA01-S4W-CV8680	CA01-02 TEMPORARY WALL ATTACHMENTS
2489	SV4-CA01-S4W-CV8681	CA01-03 TEMPORARY WALL ATTACHMENTS
2490	SV4-CA01-S4W-CV8689	CA01-11 TEMPORARY WALL ATTACHMENTS
2491	SV3-ECS-EKW-EL3149	INSTALL ANNEX BLDG, AC LOAD CENTER, ECS-EK-14, ROOM 40413
2492	SV3-ECS-EKW-EL3138	INSTALL ANNEX BLDG, AC LOAD CENTER, ECS-EK-23, ROOM 40414

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
2493	SV3-ECS-EKW-EL3137	INSTALL ANNEX BLDG, AC LOAD CENTER, ECS-EK-22, ROOM 40414
2494	SV3-ECS-EKW-EL3148	INSTALL ANNEX BLDG, AC LOAD CENTER, ECS-EK-13, ROOM 40413
2495	SV3-2036-SHW-860241	ELECTRICAL CABLE TRAY SUPPORT INSTALLATION IN THE TURBINE BUILDING, ELEVATION 100' , AREA 6, ROOM 20300 (TRAPEZE)
2496	SV3-ECS-EKW-EL3136	INSTALL ANNEX BLDG, AC LOAD CENTER ECS-EK-21, ROOM 40414
2497	SV4-CA01-S4W-CV8690	CA01-12 TEMPORARY WALL ATTACHMENTS
2498	SV3-2031-SHW-860275	ELECTRICAL CABLE TRAY SUPPORT NSTALLATION IN THE TURBINE BUILDING, ELEVATION 100' AREA 1, ROOM 20300 (TRAPEZE)
2499	SV3-2038-SHW-860273	ELECTRICAL CABLE TRAY TRAY SUPPORT NSTALLATION IN THE TURBINE BUILDING, ELEVATION 100' AREA 8, ROOM 20300 (TRAPEZE)
2500	SV4-CA01-S4W-CV8691	CA01-13 TEMPORARY WALL ATTACHMENTS
2501	SV4-CA01-S4W-CV8692	CA01-14 Temporary Wall Attachments
2502	SV4-CA01-S4W-CV8693	CA01-15 TEMPORARY WALL ATTACHMENTS
2503	SV4-CA01-S4W-CV8694	CA01-16 TEMORARY WALL ATTACHMENTS
2504	SV4-CA01-S4W-CV8695	CA01-17 TEMPORARY WALL ATTACHMENTS
2505	SV4-CA01-S4W-CV8696	CA01-18 TEMPORARY WALL ATTACHMENTS
2506	SV4-CA01-S4W-CV8697	CA01-19 TEMPORARY WALL ATTACHMENTS
2507	SV4-CA01-S4W-CV8703	CA01-25 TEMPORARY WALL ATTACHMENTS
2508	SV4-CA01-S4W-CV8724	CA01-47 TEMPORARY WALL ATTACHMENTS
2509	SV4-CA01-S4W-CV8725	CA01-48 TEMPORARY WALL ATTACHMENTS
2510	SV3-SFS-PLW-ME0922	FABRICATE AND INSTALL SFS EMBEDDED PIPING ISO SV3-SFS-PLW-604
2511	SV4-CA01-S4W-CV8698	CA01_20 TEMPORARY ATTACHMENT INSTALLATION
2512	SV3-1160-SSW-CV3061	C8 Circular Trunk SPL28, 29, 30
2513	SV3-PXS-PHW-ME3363	FABRICATION /INSTALLATIN OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-011
2514	SV4-CA20-S4W-CV4011	CA20 WALL3 SOUTH FACE - OLP"S AND WELDED ATTACHMENTS INSTALLATION
2515	SV4-CA20-S4W-CV4019	CA20 WALL 4 SOUTH FACE - OLP"S AND WELDED ATTACHMENTS INSTALLMENT
2516	SV4-CA20-S5W-CV4018	CA20-05 UNSATISFACTORY IRs/N&Ds/E&DCRs AND LOOSE PARTS - STRUCTURAL
2517	SV4-CA20-S4W-CV5287	INSTALLATION OF SUBMODULE CA20-10
2518	SV4-CA20-S5W-CV5290	CA20-11 UNSATISFACTORY IRs/N&Ds/E&DCRs AND LOOSE PARTS - STRUCTURAL

Exhibit V – Legacy, WIP, and Completed Work Packages**Table 3. In-Progress Work Packages (as of October 17, 2017)**

2519	SV3-MS83-MEW-ME5589	INSTALLATION OF STATOR COIL COOLING UNIT (TCS-MS-01)
2520	SV3-4031-SSW-850001	STRUCTURAL STEEL, BATTERY ROOM WALLS
2521	SV3-DWS-P0W-861074	INSTALLATION OF DWS PIPING ON MODULE R251
2522	SV3-R251-MDW-861082	INSTALLATION OF HVAC DUCT ON MODULE R251
2523	SV4-CA20-S4W-CV5286	CA20 WALL J2 EAST FACE - OLP'S AND WELDED ATTACHMENTS INSTALLATION
2524	SV3-1210-CEW-855000	POST-INSTALLED EMBED PLATES AT 66'-6" ELEV
2525	SV4-CAS-PHW-ME1934	INSTALLATION OF SMALL BORE CAS PIPING SUPPORTS (INCLUDING ISOMETRIC SV4-CAS-PLW-501 AND 504)
2526	SV3-ECS-EKW-EL3139	INSTALL ANNEX BLDG AC LOAD CENTER ECS-EK-24 ROOM 40414
2527	SV3-PXS-PHW-ME3782	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-024
2528	SV0-XR01-S8W-CV0280	Railroad Installation
2529	SV0-SDS-EWW-EL0307	ELECTRICAL INSTALLATION OF SDS GRINDER PUMPS MS-600E, MS-600F AND MS-602D
2530	SV0-ZRS-EWW-TP1081	13.8KV Power Feed to West Side of NOI 7
2531	SV4-FWS-P0W-ME1669	Unit 4 Turbine Building El 100'-0": Fabrication & Installation of Embedded FWS Piping
2532	SV4-CB24-CBW-850000	CB24 MODULE INSTALLATION
2533	SV3-EDS-DSW-EL3124	INSTALL ANNEX BLDG NON CLASS 1E DC AND UPS SYSTEM - LOAD GROUP 4, ROOM 40310
2534	SV3-ECS-EKW-EL3147	INSTALL ANNEX BLDG, AC LOAD CENTER ECS-EK-12 ROOM 40413
2535	SV3-ECS-EKW-EL3146	INSTALL ANNEX BLDG AC LOAD CENTER ECS-EK-11 ROOM 40413
2536	SV4-CA01-S4W-CV6460	CA01-28 SUB MODULE INSTALLATION
2537	SV4-CA01-S4W-CV6496	CA01-37 SUB MODULE INSTALLATION
2538	SV3-1134-SPW-850010	SPL10 Installation
2539	SV4-2060-SSW-850012	TB-12 STEEL ERECTION
2540	SV3-2060-C0W-850600	170' Elevation, Grout
2541	SV3-PXS-PHW-ME3784	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-02A
2542	SV3-1208-SCW-CV4921	COURSE 12 UNIT 3 SHIELD BUILDING
2543	SV4-CA20-S4W-CV4007	CA20 WALL 2 NORTH FACE - OLPs AND WELDED ATTACHMENT INSTALLATION
2544	SV3-1208-CCW-851004	COURSE 4 CONCRETE PLACEMENT
2545	SV3-ECS-EAW-EL3134	INSTALL ANNEX BLDG ECS-EA DISTRIBUTION PANEL ROOM 40414

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
2546	SV3-1130-C0W-850008	CONTAINMENT CONCRETE PLACEMENT REFUEL CAVITY ELEV 87'-6" TO ELEV 95'
2547	SV3-4031-ERW-861109	Installation of all Unscheduled Conduit for Lighting / Power Annex Bldg. Area 1, Elev. 100', Battery Charger Room 40308
2548	SV3-4031-ERW-861110	Installation of all Unscheduled Conduit for Lighting / Power Annex Bldg. Area 1, Elev. 100', Battery Charger Room 40310
2549	SV3-4031-ERW-861111	Installation of all Unscheduled Conduit for Lighting / Power Annex Bldg. Area 1, Elev. 100', Battery Room 40307
2550	SV3-4031-ERW-861112	Installation of all Unscheduled Conduit for Lighting / Power Annex Bldg. Area 1, Elev. 100', Battery Room 40309
2551	SV3-1230-EGW-860944	INSTALL GROUNDING FOR AUXILIARY BUILDING SHIELD WALL 100'-0" - 117'-6"
2552	SV4-WWS-P0W-860931	INSTALLATION AND FABRICATION OF WASTE WATER SYSTEM (WWS) PIPING
2553	SV3-WWS-P0W-ME4629	FABRICATION AND INSTALLATION OF WWS I.E. PIPING ELEVATION 100'
2554	SV4-CA01-S4W-CV6528	CA01 ELEV 87.5' TO 94' OLPS AND WELDED ATTACHMENTS
2555	SV3-CA02-S5W-CV6271	CA02 MISC. WORK, MISC. UNSAT. IRS / N&DS AND E&DCRS
2556	SV3-PXS-PHW-ME3358	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-01B
2557	SV3-R365-R3W-ME1694	R365 MECHANICAL MODULE INSTALLATION
2558	SV4-ML05-MLW-ME6810	INSTALLATION OF UNIT 4 CA20 WALL PENETRATIONS
2559	SV4-CA20-S4W-CV6827	Installation of CA20 SA 1 Floor (Submodules 34,35,36,37)
2560	SV0-8200-MHW-CV7169	MAB 50 TON OVERHEAD CRANE GIRDER CHANNEL WELDS
2561	SV4-WLS-THW-ME7680	HYDRO TESTING OF KB27 WLS PIPING
2562	SV3-CA02-S5W-CV8034	CA02 ON-SITE BASEMAT FABRICATION
2563	SV4-CA01-S4W-CV8682	CA01-04 TEMPORARY WALL ATTACHMENTS
2564	SV3-WLS-PLW-ME0872	Fabricate and Install WLS Piping Lines WLS-PL-L062, & L110B of Iso SV3-WLS-PLW-731
2565	SV3-CB47-S5W-860988	CB47 UNSATISFACTORY IRs / N&Ds / E&DCRs AND LOOSE PARTS - STRUCTURAL
2566	SV4-CA01-S4W-CV6484	CA01-34 SUB MODULE INSTALLATION
2567	SV4-0000-C0W-850021	TRANSFORMER FOUNDATION WALL POUR #21
2568	SV4-WRS-P0W-ME5327	Fabrication/Installation of Small Bore WRS Leak Chase Piping Including SV4-WRS-PLW-80D, -80E, -80F, -86M
2569	SV3-2035-SHW-860253	ELECTRICAL CABLE TRAY SUPPORT INSTALLATION IN THE TURBINE BUILDING ELEVATION 100' AREA 5 ROOM 20300
2570	SV4-0150-ERW-860386	INSTALLATION OF CONDUIT SLEEVES FOR PENETRATION IN UNIT 4 TRANSFORMER AREA
2571	SV3-PXS-PHW-ME5539	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-PXS-PLW-298

Exhibit V – Legacy, WIP, and Completed Work Packages

Work Package ID	Work Package Name	Description
2572	SV3-PXS-PHW-ME3783	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-025
2573	SV3-PXS-PHW-ME3362	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-01Z
2574	SV3-PXS-PHW-ME3360	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-01K
2575	SV3-PXS-PHW-ME3786	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-02E
2576	SV3-VWS-P0W-861115	Install Isometric SV3-VWS-PLW-05A Large Bore Piping
2577	SV3-VWS-P0W-861116	Install Isometric SV3-VWS-PLW-05K Large Bore Piping
2578	SV3-VWS-P0W-861117	Install Isometric SV3-VWS-PLW-50A Large Bore Piping
2579	SV3-VWS-P0W-861119	Install Isometric SV3-VWS-PLW-50L Large Bore Piping
2580	SV3-VWS-P0W-861120	Install Isometric SV3-VWS-PLW-50W Large Bore Piping
2581	SV3-VWS-P0W-861121	Install Isometric SV3-VWS-PLW-50X Large Bore Piping
2582	SV3-VWS-P0W-861122	Install Isometric SV3-VWS-PLW-50Y Large Bore Piping
2583	SV3-VWS-P0W-861123	Install Isometric SV3-VWS-PLW-50Z Large Bore Piping
2584	SV3-VWS-P0W-861124	Install Isometric SV3-VWS-PLW-51A Large Bore Piping
2585	SV3-VWS-P0W-861125	INSTALL ISOMETRIC SV3-VWS-PLW-51B LARGE BORE PIPING
2586	SV3-VWS-P0W-861126	Install Isometric SV3-VWS-PLW-52A Large Bore Piping
2587	SV3-VWS-P0W-861128	Install Isometric SV3-VWS-PLW-52L Large Bore Piping
2588	SV3-VWS-P0W-861129	Install Isometric SV3-VWS-PLW-502 Large Bore Piping
2589	SV3-VWS-P0W-861130	Install Isometric SV3-VWS-PLW-513 Large Bore Piping
2590	SV3-VWS-P0W-861131	INSTALL ISOMETRIC SV3-VWS-PLW-519 LARGE BORE PIPING
2591	SV3-VWS-P0W-861134	Install Isometric SV3-VWS-PLW-532 Large Bore Piping
2592	SV3-VWS-P0W-861135	Install Isometric SV3-VWS-PLW-533 Large Bore Piping
2593	SV3-VWS-P0W-861136	Install Isometric SV3-VWS-PLW-537 Large Bore Piping
2594	SV3-VWS-PHW-861139	Install Isometric SV3-VWS-PLW-50A Large Bore Pipe Supports
2595	SV3-VWS-PHW-861140	Install Isometric SV3-VWS-PLW-50B Large Bore Piping Supports
2596	SV3-VWS-PHW-861141	Install Isometric SV3-VWS-PLW-50L Large Bore Piping Supports
2597	SV3-VWS-PHW-861143	Install Isometric SV3-VWS-PLW-50X Large Bore Pipe Supports
2598	SV3-VWS-PHW-861144	Install Isometric SV3-VWS-PLW-50Y Large Bore Pipe Supports
2599	SV3-VWS-PHW-861145	Install Isometric SV3-VWS-PLW-50Z Large Bore Pipe Supports
2600	SV3-VWS-PHW-861146	Install Isometric SV3-VWS-PLW-51A Large Bore Pipe Supports
2601	SV3-VWS-PHW-861148	Install Isometric SV3-VWS-PLW-52A Large Bore Pipe Supports

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
2602	SV3-VWS-PHW-861151	Install Isometric SV3-VWS-PLW-502 Large Bore Pipe Supports
2603	SV3-VWS-PHW-861152	Install Isometric SV3-VWS-PLW-513 Large Bore Pipe Supports
2604	SV3-VWS-PHW-861156	Install Isometric SV3-VWS-PLW-532 Large Bore Pipe Supports
2605	SV3-VWS-PHW-861157	Install Isometric SV3-VWS-PLW-533 Large Bore Pipe Supports
2606	SV3-VWS-PHW-861158	Install Isometric SV3-VWS-PLW-537 Large Bore Pipe Supports
2607	SV0-ZRS-EWW-TP1795	Temporary Power for NOI 7
2608	SV3-VCS-SHW-ME2331	INSTALLATION OF CONTAINMENT VCS HVAC SUPPORTS FOR AZIMUTH 240 - 285
2609	SV3-PSS-P0W-ME7503	ASME SECTION III Fabrication/Installation of Isometric SV3-PSS-PLW-715 (Line Number PSS-PL-T081B)
2610	SV3-1210-CEW-CV7695	NDE OF JOSEPH OAT EMBED PLATES WITH WELDABLE COUPLERS
2611	SV0-0000-M0W-MU7690	Mock-up for Qualification of ASME Tube Bending
2612	SV0-0000-MYW-CT7674	MECHANICAL/ABRASIVE CLEANING OF MISCELLANEOUS STEEL & EQUIPMENT.
2613	SV3-FPS-PHW-860506	INSTALLATION OF FIRE PROTECTING SYSTEM SUPPORTS (FPS)
2614	SV0-CE01-CEW-CV7471	NDE OF CIVES EMBEDS WITH WELDABLE COUPLERS
2615	SV4-WRS-THW-ME7465	TESTING OF CA20 WALL LEAK CHASES AND CONNECTED PIPING
2616	SV0-CA20-CCW-MU6307	CA20 CONCRETE PLACEMENT MOCK UP FOR CONSTRUCTION JOINT AT ELEV. 85'-0"
2617	SV3-RNS-MLW-860363	ASME SECTION III - INSTALLATION OF CONTAINMENT VESSEL PENETRATION SV3-RNS-PY-C01 (P19)
2618	SV3-RNS-MLW-860364	ASME SECTION III - INSTALLATION OF CONTAINMENT VESSEL PENETRATION SV3-RNS-PY-C02 (P20)
2619	SV3-SFS-MLW-860365	ASME SECTION III - INSTALLATION OF CONTAINMENT VESSEL PENETRATION SV3-SFS-PY-C02 (P22)
2620	SV3-CAS-P0W-ME6006	INSTALLATION OF ANNEX BLDG CAS PIPING (ISO SV3-CAS-PLW-20J, 20K, 20L, & 20M)
2621	SV0-0000-CCW-CV5530	Miscellaneous Grouting in 300 series Buildings/Yard
2622	SV3-MT2D-MEW-ME5377	INSTALLATION OF MSR SHELL DRAIN TANK HDS-MT-02A/B
2623	SV3-1130-SLW-855000	UPENDER PIT, FABRICATION
2624	SV4-CA01-S4W-CV6476	CA01-32 SUBMODULE INSTALLATION
2625	SV4-1220-CCW-MU5102	UNIT 4 MOCK-UP FOR CORE DRILLING IN CONCRETE PLACEMENT OUTSIDE THE CVBH AT ELEVATION 72'-6"
2626	SV3-CA20-S4W-CV4804	SURVEY ROOMS FOR PLUMBNESS/LEVEL/WALL FLATNESS FOR SUB-ASSEMBLIES 1, 2, 3 & 4
2627	SV3-CA01-V2W-CV4802	INSTALL CA01 GUIDE PIN COLLAR MOUNTING PLATES
2628	SV3-ML05-MLW-ME4786	INSTALLATION OF 100'0" AREA 3,4,5 PIPING PENETRATIONS

Exhibit V – Legacy, WIP, and Completed Work Packages**Table 3. In-Progress Work Packages (as of October 17, 2017)**

2629	SV3-WRS-P0W-ME4753	INSPECTION OF CASK WASHDOWN PIT LEAK CHASE PIPING
2630	SV3-1130-C0W-850004	CONTAINMENT CONCRETE PLACEMENT REFUEL CAVITY ELEV 95' TO 98' 1/2"
2631	SV3-WRS-P0W-ME4752	INSPECTION OF CASK LOADING PIT LEAK CHASE PIPING
2632	SV3-PXS-PHW-ME3780	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-021
2633	SV3-WRS-P0W-ME4751	INSPECTION OF FUEL TRANSFER CANAL LEAK CHASE PIPING
2634	SV3-WRS-P0W-ME4750	INSPECTION OF SPENT FUEL POOL LEAK CHASE PIPING
2635	SV3-WRS-P0W-ME4563	SV3-WRS-GNR-000054 REPAIR WORK FOR SV3-WRS-PLW-838
2636	SV3-VYS-PHW-ME4479	, FABRICATE AND INSTALL ANNEX HOT WATER HEATING SYSTEM (VYS) PIPING SUPPORTS FOR SV3-VYS-P0W-ME4478 ,
2637	SV3-CAS-PHW-ME4475	The installation of the Annex CAS Piping Support for WP (SV3-CAS-P0W-ME4474)
2638	SV3-WRS-PLW-ME4462	INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-84A)
2639	SV3-WRS-P0W-ME4456	SV3-WRS-GNR-000056 REPAIR WORK FOR SV3-WRS-PLW-847
2640	SV3-WRS-P0W-ME4451	SV3-WRS-GNR-000057 REPAIR WORK FOR SV3-WRS-PLW-83C
2641	SV3-WRS-PLW-ME4449	INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-81F)
2642	SV3-WRS-PLW-ME4448	INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-81E)
2643	SV3-WRS-P0W-ME4430	INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-80B, 80C AND 80U
2644	SV3-VWS-P0W-ME4426	ASME SECTION III- FABRICATION/ INSTALLATION OF ISOMETRIC# SV3-VWS-PLW-910 (LINE# VWS-PL-L032
2645	SV3-WRS-P0W-ME4423	INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-801, 80S, -86E
2646	SV3-SS01-Z0W-CV4377	UNIT 3 STRUCTURAL STEEL SAFETY CLASS E REQUIREMENTS
2647	SV3-ASS-PHW-ME4294	FABRICATE/INSTALL OF AUXILIARY STEAM (ASS) SUPPORTS (PORTION 5)
2648	SV4-1000-Z0W-CV3912	UNIT 4 SHIELD BUILDING REINFORCED CONCRETE REQUIREMENTS
2649	SV3-CAS-P0W-ME3429	INSTALLATION OF SMALL BORE CAS PIPING (INCLUDES SV3-CAS-PLW-336)
2650	SV4-MSS-P0W-860357	INSTALLATION AND FABRICATION OF MAIN STEAM SYSTEM (MSS) PIPING
2651	SV4-MSS-P0W-860358	INSTALLATION AND FABRICATION OF MAIN STEAM SYSTEM (MSS) PIPING
2652	SV3-WRS-P0W-ME3858	SV3-WRS-GNR-000055 REPAIR WORK FOR SV3-WRS-PLW-872
2653	SV3-WRS-P0W-ME3857	SV3-WRS-GNR-000060 REPAIR WORK FOR SV3-WRS-PLW-83G

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
2654	SV3-WRS-P0W-ME3637	SV3-WRS-GNR-000049 REPAIR WORK FOR SV3-WRS-PLW-81Q
2655	SV3-DTS-PHW-ME3582	INSTALLATION OF PIPE SUPPORTS ON ISO SV3-DTS-PLW-01AP AND SV3-DTS-PLW-01AN
2656	SV3-PXS-P0W-ME3508	ASME SECTION III - PERFORM RADIOGRAPHY TEST ON SV3-PXS-PLW-014 SHOP WELD 15
2657	SV3-PGS-CCW-CV3426	UNIT 3 JACK & BORE AND PGS ENCASEMENT CONSTRUCTION
2658	SV4-CCS-P0W-ME3112	INSTALLATION OF LARGE BORE CCS PIPING (INCLUDES ISOMETRIC SV4-CCS-PLW-740, 750)
2659	SV3-CVS-PHW-ME2926	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CVS-PLW-110
2660	SV4-CA20-S4W-CV4004	CA20-01-MAP OUT TEMPORARY ATTACHMENTS
2661	SV3-WWS-PHW-ME3074	INSTALLATION OF ANNEX WWS PIPING SUPPORTS (FOR WP SV3-WWS-P0W-ME2693)
2662	SV3-PXS-PHW-ME4508	FABRICATION/INSTALLATION OF PIPE SUPPORTS FO ISOMETRIC SV3-PXS-PLW-02V
2663	SV3-PXS-P0W-861007	INSTALL ISOMETRIC SV3-PXS-PLW-934 LARGE BORE PIPING
2664	SV4-1000-XEW-CV2913	UNIT 4 POWER BLOCK EXCAVATION AND BACKFILL OF UTILITIES
2665	SV3-PXS-P0W-ME2890	ASME SECTION III- FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-018 (LINE NUMBERS PXS-PL-L112A)
2666	SV3-0000-EGW-EL2804	PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (SV3-SITE STATION GROUNDING GRID) FOR GROUND GRID AREA, M1300
2667	SV3-VWS-PHW-ME2800	INSTALLATION OF VWS SUPPORTS FOR ISOMETRICS SV3-VWS-PLW-20L
2668	SV3-PXS-P0W-ME2751	ASME Section III-Fabrication/Installation of Isometric# SV3-PXS-PLW-02R (Line Numbers PXS-PL-L136B)
2669	SV3-MS10-MEW-ME2472	Install TB Sampling Rooms AHU (VTS-MS-01A/1B)
2670	SV4-1000-CRW-CV2374	FABRICATION OF REBAR FOR UNIT 4 NUCLEAR ISLAND
2671	SV3-2053-SHW-EL8560	Electrical Cable Tray Support Installation in the Turbine Building, Elevation 141'-3", Area 2, Room 20500
2672	SV3-ML05-MLW-ME1982	ATTACHMENT OF WELDED COUPLINGS 82'-6" FLOOR PENETRATIONS
2673	SV4-RWS-MEW-TP1980	REWORK ASSOCIATED WITH NONCONFORMANCE V-ND-11-0181
2674	SV0-1208-SCW-MU1894	MOCKUP-SHIELD WALL PANEL MOCKUP
2675	SV0-CA05-MHW-RI1887	CONSTRUCTION OF CA05 PLATEN
2676	SV4-CWS-THW-ME1722	UNIT 4 CIRCULATING WATER SYSTEM (CWS) HYDRO TEST FROM PRE CAST CONCRETE PIPE (PCCP) TO TURBINE BUILDING
2677	SV3-WLS-PLWP-ME1655	Fabricate And Install WLS Piping Iso SV3-WLS-PLW-750

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
2678	SV3-1220-CEW-CV1605	Auxiliary Building Embed Plates & Anchor Bolts-EL 82'6" - Area 5&6
2679	SV0-0000-M0W-MU1585	Mock-up for Qualification of Cleaning Methods
2680	SV3-CWS-XEW-CV0056	GROUTING OF PHASE 2 CWS PIPE JOINTS (PCCP) AND FLOWABLE FILL PLACEMENT
2681	SV3-ML05-MLW-ME6134	ASME SECTION III - ATTACH CODE DATA PLATES ON CA20 PENETRATIONS
2682	SV3-2054-SHW-EL8954	Electrical Cable Tray Supplemental Steel Installation in the Turbine Building, Below Elevation 169'-0"
2683	SV3-ME01-PLW-ME1167	Condenser C-1st Extraction Piping (Extraction Steam)
2684	SV3-CA20-S4W-CV0436	Installation of CA20 SA3 Overlay Plates RESERVED FOR RUSSELL FINDLEY
2685	SV4-CA20-MHH-040	INSTALLATION OF UNIT 4 CA20 MODULE
2686	SV3-2070-SAW-850000	ROOF ELEV. FLOOR SLAB. STUD INSTALLATION
2687	SV3-SGS-P0W-ME6695	ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC SV3-SGS-PLW-080, -81 (LINE NUMBERS SGS-PL-L009B), ,
2688	SV3-Q240-Q2W-861063	INSTALLATION OF MECHANICAL MODULE 1120-Q2-40
2689	SV4-2020-MEW-860398	CONDENSER B CONECTION PIECE ASSEMBLY
2690	SV4-4032-ERW-860382	INSTALLATION OF EMBEDDED CONDUIT, ANNEX BUILDING, AREA 2, ELEV. 100'-0"
2691	SV4-CWS-PHW-ME7146	INSTALLATION OF PIPE SUPPORTS FOR PIPING PACKAGAE SV4-CWS-P0W-ME7145
2692	SV3-MT02-MHH-004	LIFTING OF UNIT 3 ACCUMULATOR TANKS
2693	SV4-WLS-THW-861171	PNEUMATIC TEST OF THE HDPE PORTION OF THE UNIT 4 WLS SYSTEM NORTH OF THE VEHICLE BARRIER DITCH
2694	SV3-WLS-THW-861170	PNEUMATIC TEST OF THE HDPE PORTION OF UNIT 3 WLS SYSTEM NORTH OF THE VEHICLE BARRIER DITCH
2695	SV4-0000-C0W-850007	TRANSFORMER FOUNDATION, WALL POUR #7
2696	SV3-WLS-P0W-861168	INSTALL ELECTRO-FUSION COUPLINGS ON UNIT 3 WLS LINE ISOMETRICS SV3-WLS-PLW-80GD, 80GE, 80GF, 80GG, 80GH, 80GJ, 80GK, 80GL, 80GM, 80GN
2697	SV3-FPS-P0W-860729	INSTALLATION OF FIRE PROTECTION PIPING
2698	SV4-CA01-S4W-CV6574	U4-CA01 LIFTING FRAMES AND BRACING SUBMUDULES 27 THRU 31, -34 & -46
2699	SV3-PXS-PHW-ME5672	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-320
2700	SV3-PXS-PHW-881160	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-PXS-PLW-284
2701	SV4-WLS-P0W-861169	INSTALL ELECTRO-FUSION COUPLINGS IN UNIT 4 WLS LINE ISOMETRICS SV4-WLS-PLW-81GP, 81GQ, 81GR, 81GS, 81GU, 81GV, 81GW, 81GX, 81Y

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
2702	SV4-ML05-MLW-ME7944	INSTALL CA01 ASME PROCESS PIPE PENETRATION SV4-11300-ML-P78 & SV4-11300-ML-P79
2703	SV4-ML05-MLW-ME7942	INSTALL CA01 PENETRATION SV4-11300-ML-P41
2704	SV4-2101-C0W-850403	122' ELEVATION WALLS POUR 2NW
2705	SV4-VWS-P0W-860370	Fabrication/Installation of VWS Piping (Isometric Drawings SV4-VWS-PLW-260, -384 and -389)
2706	SV4-CA01-S4W-CV6498	CA01-38 SUB MODULE INSTALLATION
2707	SV3-MSS-P0W-ME4647	INSTALLATION OF MSS PIPING
2708	SV3-PXS-PHW-ME3790	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-02P
2709	SV3-PXS-P0W-861009	INSTALL ISOMETRIC SV3-PXS-PLW-936 LARGE BORE PIPING
2710	SV3-PXS-P0W-861012	INSTALL ISOMETRIC SV3-PXS-PLW-944 LARGE BORE PIPING
2711	SV4-MSS-P0W-860355	INSTALLATION OF MAIN STEAM SYSTEM (MSS) PIPING
2712	SV4-CB25-CBW-850000	CB25 MODULE INSTALLATION
2713	SV4-CA03-S4W-860271	CA03 INSTALL & REMOVE TEMPORARY WALL ATTACHMENTS
2714	SV4-ML05-MLW-ME7693	INSTALL CA01 PENETRATION SV4-11202-ML-P04
2715	SV4-DWS-P0W-860369	FABRICATION/INSTALLATION OF DWS PIPING (INCLUDING ISOMETRIC DRAWINGS SV4-DWS-PLW-60D, -624 AND -625)
2716	SV4-VWS-PHW-860400	INSTALLATION OF LARGE BORE VWS PIPING SUPPORTS (INCLUDES ISOMETRICS: SV4-VWS-PLW-486)
2717	SV3-SFS-P0W-861166	ASME SECTION III – FABRICATION/INSTALLATION OF PIPING FOR ISOMETRICS SV3-SFS-PLW-786 AND SV3-SFS-PLW-787 (LINE NUMBER L037)
2718	SV3-PXS-P0W-861015	INSTALL ISOMETRIC SV3-PXS-PLW-947 LARGE BORE PIPING
2719	SV3-PXS-PHW-ME3359	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-01H
2720	SV3-PXS-PHW-861021	INSTALL ISOMETRIC SV3-PXS-PLW-938 LARGE BORE PIPE SUPPORTS
2721	SV3-PXS-PHW-861017	INSTALL ISOMETRIC SV3-PXS-PLW-934 LARGE BORE PIPE SUPPORTS
2722	SV3-2030-CCW-CV0123	100 Ft Elevation Slabs (Includes Elevated Slabs and Roof Slabs for Elev. 94"3 & 100')
2723	SV3-CA01-S5W-CV4238	INSTALLATION OF CA01 SUB-MODULE INTERNAL LEAK CHASE CAPS
2724	SV3-CA01-S5W-CV4251	CA01 BEND TESTING OF STUDS REMOVED FOR WELD ISSUES
2725	SV3-CA02-S5W-CV6127	CA02 REBAR FABRICATION, TORQUEING AND TESTING
2726	SV3-2043-SHW-861333	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING ELEVATION 120' - 6", AREA 3, COLUMNS 18 TO 19 & L1 TO P.1

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Package ID	Description
2727	SV4-MT71-C0W-850013	Waste Water Retention Basin Wall Pour # 13
2728	SV3-2070-C0W-850002	UNIT 3, TURBINE BUILDING ROOF SLAB, POUR #2
2729	SV4-1103-ERW-861803	FABRICATION AND INSTALLATION OF EMBEDDED 11208 RNS VALVE ROOM X CONDUITS
2730	SV3-1000-ATW-850000	UNIT 3, AUXILIARY BUILDING, PHYZITE SEAL
2731	SV4-4042-SAW-850002	UNIT 4 - ANNEX SUPPLEMENT STEEL, ELEV 117' - 6", AREA 2, CL 6 TO CL 7.1
2732	SV3-4031-ERW-861317	INSTALLATION OF SCHEDULED CONDUIT IN ROOM 40308, ANNEX BUILDING, AREA 1, ELEVATION 100' - 0"
2733	SV3-4031-ERW-861242	INSTALL CABLE TRAY IN RMS 40307-40310 ANNEX BLDG, AREA 1, ELEV. 100'(WP2)
2734	SV4-1231-ERW-EL7203	INSTALL CONDUIT SLEEVES FOR PENETRATIONS IN UNIT 4 AUX BUILDING FLOOR SLABS, EL 100'-0"AREA 1 RMS. 12304 & 12305
2735	SV4-1232-ERW-EL7205	INSTALL CONDUIT SLEEVES FOR PENETRATIONS IN UNIT 4 AUX BUILDING FLOOR SLABS, EL 100'-0"AREA 2 RMS. 12301, 12302, 12303 & 12311
2736	SV4-1231-EYW-EL7204	INSTALL CONDUIT SLEEVES FOR PENETRATIONS IN PRECAST CONCRETE PANEL. AND CAST-IN-PLACE CONCRETE (ABOVE PRECAST CONCRETE PANELS) UNIT 4, AUXILIARY BUILDING, ELEVATION 100'-0", AREA 1. WORK THIS PACKAGE IN CONJUNCTION WITH CIVIL WORK PACKAGE SV4-1230-CPW-XX
2737	SV4-CA02-S8W-860171	CA02 Install Lifting Lugs for NI Set
2738	SV4-1154-ERW-861816	FABRICATION AND INSTALLATION OF CABLE TRAY SUPPORTS FOR AREA 4 ON RING2 OF THE CONTAINMENT VESSEL AT ELEVATION131'-9" TO 170'-0"
2739	SV4-4030-SSW-850012	100'- ELEV. S02. STAIRS
2740	SV4-WWS-THW-861595	HYDRO TEST THE UNIT 4 WASTE WATER SYSTEM (WWS) HDPE PIPING
2741	SV4-1153-ERW-861814	FABRICATION AND INSTALLATION OF CABLE TRAY SUPPORTS ATTACHING TO THE CONTAINMENT VESSEL IN AREA 3 AT ELEVATION 170' TO 176'
2742	SV4-1153-ERW-861811	FABRICATION & INSTALLATION OF CABLE TRAY SUPPORTS FOR AREA 3 ON RING 2 OF THE CONTAINMENT VESSEL AT ELEVATION 131'-9" TO 170'-0"
2743	SV4-1154-ERW-861807	FABRICATION & INSTALLATION OF CONDUIT SUPPORTS FOR AREA 4 ON RING 2 OF THE CONTAINMENT VESSEL AT ELEVATION 131'-9" TO 170'-0"
2744	SV4-1152-ERW-861809	FABRICATION & INSTALLATION OF CABLE TRAY SUPPORTS FOR AREA 2 ON THE RING 2 OF THE CONTAINMENT VESSEL AT ELEVATION 131'-9" TO 170'
2745	SV3-4051-SAW-850001	SUPPLEMENTARY STEEL, ELEVATION 135'-3", AREA 1 CL E/I.1 & 11.09/11.15

Exhibit V – Legacy, WIP, and Completed Work Packages

Table 3. In-Progress Work Packages (as of October 17, 2017)		
2746	SV4-1151-ERW-861805	FABRICATION & INSTALLATION OF CONDUIT SUPPORTS FOR AREA 1 & 2 ON THE RING 2 OF THE CONTAINMENT VESSEL AT ELEVATION 131'-9" TO 170'-0"
2747	SV4-1150-ERW-861808	FABRICATION & INSTALLATION OF HYDROGEN IGNITER CONDUIT SUPPORTS ATTACHING TO THE CONTAINMENT VESSEL AT ELEVATION 170' TO 176'
2748	SV4-1153-ERW-861813	FABRICATION & INSTALLATION OF CABLE TRAY SUPPORTS FOR AREA 3 ON RING 2 OF THE CONTAINMENT VESSEL AT ELEVATION 131'-9" TO 170'-0"
2749	SV3-CA35-ERW-861470	FABRICATION AND INSTALLATION OF ELECTRICAL PENETRATIONS WITHIN THE CA35 MODULE
2750	SV4-1152-ERW-861810	FABRICATION AND INSTALLATION OF CABLE TRAY SUPPORTS ATTACHING TO THE CONTAINMENT VESSEL IN AREA 2 AT ELEVATION 170' TO 176'
2751	SV3-4031-ERW-861319	Installation of Scheduled Conduit in Room 40310, Annex Building, Area 1, Elevation 100'-0"
2752	SV4-1153-ERW-861806	FABRICATION AND INSTALLATION OF CONDUIT SUPPORTS FOR AREA 3 ON RINGS 2 OF THE CONTAINMENT VESSEL AT EL. 131'-9" TO 170'-0"
2753	SV4-1154-ERW-861817	FABRICATION AND INSTALLATION OF CABLE TRAY SUPPORTS ATTACHING TO THE CONTAINMENT VESSEL IN AREA 4 AT ELEVATION 170' TO 176'
2754	SV4-CA03-S4W-861518	CA03 POST WELDING SURVEY DATA/VERIFICATIONS
2755	SV3-4031-ERW-861245	Install Cable Tray in Rms 40307-40310 Annex Bldg. Area 1, Elev. 100' (WP5)
2756	SV3-4031-ERW-861246	Install Cable Tray in Rms 40307-40310 Annex Bldg. Area 1, Elev. 100' (WP6)
2757	SV3-2070-SAW-850001	UNIT 3 TURBINE BUILDING ELEVATION 230'-9" SHEAR STUD INSTALLATION
2758	SV4-4030-SSW-850014	100' ELEV. S04 STAIR
2759	SV4-CB11-CBW-850000	CONTAINMENT BUILDING-INSTALLATION OF MODULE CB11 AT ELEV 84'-6"
2760	SV3-4052-SAW-850003	Unit 3, Supplemental Steel for Annex Elev 135'-3"
2761	SV3-4052-SAW-850005	Supplemental Steel 135'-3" Elev. Annex Bldg, Area 2 from CL 7.1-9 & G-H
2762	SV3-R251-ERW-861194	Module R251 Electrical Cable Tray and Tray Grounding Installation
2763	SV3-2141-SAW-850000	UNIT 3, FIRST BAY , 117'-6" ELEV., STUD INSTALLATION
2764	SV4-1160-SPW-850031	SPL31, SPL32 & SPL33 Installation
2765	SV4-CA20-C0W-850001	Auxiliary Building-Submodule CA20-Elev 75'-6"- Concrete Floors 64 & 65 FLOORS
2766	SV4-1160-SPW-850028	SPL28, 29 & 30 Structural Steel Installation
2767	SV3-2070-C0W-850005	ROOF ELEV FLOOR SLAB, POUR #5

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
2768	SV4-1150-EGW-861819	INSTALL GROUNDING IN CONTAINMENT & SHIELD WALLS FROM EL. 117'-6" - 135'-3" EXCLUDING AREAS WHERE SHIELD WALL & AUXILIARY BUILDING MEET
2769	SV3-MSS-PHW-ME4676	INSTALLATION AND FABRICATION OF MAIN STEAM SYSTEM(MSS) PIPING SUPPORT
2770	SV4-WWS-P0W-861605	INSTALLATION OF ANNEX BUILDING WWS PIPING (ISO SV4-WWS-PLW-414,415,416,417,974,975 & 976)
2771	SV4-1130-C0W-850010	CONTAINMENT BLDG - EAST CONCRETE - ELEV 83'-0" & 84'-6" TO 87'-6"
2772	SV3-MP80-MEW-861785	LUBE OIL TRANSFER PUMP INSTALLATION
2773	SV3-EDS2-EAW-EL6230	INSTALL (EDS2) EA - LOW VOLTAGE DISTRIBUTION PNL EQUIPMENT FOR ANNEX COMPUTER ROOM "B" - 40411 ELEV. 118'- 6"
2774	SV4-MT6Z-MEW-ME8562	MAIN LUBE OIL TANK
2775	SV4-MT71-C0W-850009	Waste Water Retention Basin Wall Pour # 9
2776	SV4-CB21-CBW-850000	CONTAINMENT BUILDING-INSTALLATION OF MODULE CB21
2777	SV4-1200-T2W-CV5940	HSB ASSEMBLY & INSTALLER QUALIFICATION FOR U4 AUXILIARY BUILDING
2778	SV3-1208-CCW-851005	SV3 SHIELD BLDG COURSES 5 & 6 CONCRETE
2779	SV0-863-THW-ME7837	TEST UNDERGROUND PIPING UTILITIES POTABLE WATER, SANITARY SEWER, FIRE SUPPRESSION FOR BUILDING 304
2780	SV4-CB12-CBW-850000	CONTAINMENT BUILDING-INSTALLATION OF MODULE CB12 AT ELEV 84'-6"
2781	SV3-CA36-ERW-861471	FABRICATION AND INSTALLATION OF ELECTRICAL PENETRATIONS WITHIN THE CA36 MODULE
2782	SV3-2052-SHW-861954	INSTALLATION OF CABLE TRAY SUPPORTS IN TURBINE BUILDING (ELEV. 141'-3" AREA 2)
2783	SV0-8200-MHW-861992	MISC. MAB WORK
2784	SV0-CA00-S5W-862025	CAxx FLOOR REPAIRS
2785	SV4-RNS-P0W-861702	ASME III FABRICATION/INSTALLATION OF CA20 LARGE BORE PIPING FOR ISOMETRICS SV4-RNS-PLW-176
2786	SV3-2040-SHW-861918	ELECTRICAL CABLE TRAY TRAPEZE SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 120'-6", AREA 0
2787	SV3-2042-SHW-861748	INSTALLATION OF TRAPEZE CABLE TRAY SUPPORTS IN TURBINE BUILDING (ELEV. 120'-6" AREA 2)
2788	SV3-CVS-P0W-860234	COMPLETE INSTALLATION OF CVS PIPING ON MODULE KQ23
2789	SV3-2048-SHW-861896	ELECTRICAL CABLE TRAY TRAPEZE SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING,ELEVATION 120 6,AREA8
2790	SV3-2053-SHW-861956	Installation of Cable Tray Supports in Turbine Buliding (Elev.141'3"ARREA)

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Package ID	Description
2791	SV4-R151-ERW-861347	U4 Module R151 Electrical Cable Tray and Tray Grounding Installation
2792	SV3-2046-SHW-861851	ELECTRICAL CABLE TRAY TRAPEZE SUPPORTS FABRAICATION AND INSTALLATION IN THE UNIT 3 TURBINE BULIDING,ELEVATION 120'6" ,AREA 6
2793	SV3-4031-SHW-861536	FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG. AREA 1, ELEV. 100', BETWEEN COLUMN LINES 11.15/13 & E/F.
2794	SV3-RNS-PHW-861491	FABRICATION/INSTALLATION OF RNS LARGE BORE PIPE SUPPORTS FOR ISO SV3-RNS-PLW-175
2795	SV3-2131-CSW-850091	UNIT 3, TURBINE BUILDING, STAIR MODULE 2131-CS-91
2796	SV3-4030-SSW-850011	S01 Stair Tower
2797	SV4-CA20-S4W-CV5126	UNIT 4 CA20 SA1 FLOOR INSTALLATION AT ELEV 92'-6"
2798	SV4-CA03-S4W-860189	CA03 FloorLeak Chase Assembly
2799	SV4-1208-CCW-851005	SV4 SHIELD BLDG COURSES 5&6 CONCRETE
2800	SV3-2047-SHW-861334	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 120' - 6", AREA 7, cOLUMNS 18 TO 19 & K.1 TO L.1
2801	SV3-1230-C0W-850021	AUX BUILDING WALL, CL 4.8, ELEV 107'-2" TO 117'-6" (WALL 95)
2802	SV3-HDS-PHW-860540	INSTALLATION AND FABRICATION OF HDS SUPPORTS
2803	SV3-PXS-PHW-ME8739	Fabrication/Installation of Pipe Supports for Isometric Drawing SV3-PXS-PLW-680
2804	SV3-RNS-P0W-ME5055	ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRICS SV3-RNS-PLW-181, SV3-RNS-PLW-180, & SV3-RNS-PLW-18A (LINE NUMBERS RNS-PL-L015, -L016, -017, L082),
2805	SV3-RNS-P0W-ME5057	ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC SV3-RNS-PLW-370 (LINE NUMBER RNS-PL-L047), ,
2806	SV3-RNS-P0W-ME5058	ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC SV3-RNS-PLW-380 (LINE NUMBER RNS-PL-L046), ,
2807	SV4-ME2L-MEW-861645	VYS HEAT EXCHANGERS
2808	SV3-ME01-P0W-860979	INSTALLATION OF CONDENSER A HEATER DRAIN PIPING
2809	SV4-CA22-CAW-850001	CA22 MODULE INSTALLATION
2810	SV4-2141-SSW-850000	117'-6" ELEV. STRUCTURAL STEEL
2811	SV4-2141-SPW-850000	117'-6" ELEV.DECKING/GRATING
2812	SV4-5030-C0W-850001	UNIT 4 RADWASTE SUMP MUDMATS
2813	SV0-0000-XGW-CV0276	Erosion Control - NOI 20
2814	SV0-0000-XPW-CV0616	Utility Trench Crossing

Exhibit V – Legacy, WIP, and Completed Work Packages

Table 3. In-Progress Work Packages (as of October 17, 2017)		
2815	SV0-847-SSW-TP1813	MAB End Wall Removal And Re-Installation
2816	SV0-SDS-CCW-CV0156	Grinder Pump/Lift Station Concrete Foundations
2817	SV0-SDS-CKW-ME1529	Install Sanitary Drain Manholes SV0-SDS-MH-41, SV0-SDS-MH-43, SV0-SDS-MH-44, & SV0-SDS-MH-45
2818	SV0-SDS-CKW-ME1530	Rework SDS Manholes MH-46 and MH-47
2819	SV0-SDS-CKW-ME1531	INSTALL SANITARY DRAIN MANHOLE SV0-SDS-MH-42.
2820	SV3-1000-XEW-CV1907	Unit 3 Power Block Excavation and Backfill of Utilities
2821	SV3-1200-CRW-CV1409	Unit 3 Auxiliary Building Walls Elevation 66'-6" to 82'-6" Reinforcing Steel For Walls #21,22,23,& 24
2822	SV3-1200-CRW-CV1413	UNIT 3 AUXILIARY BUILDING EL 66-6 TO 82-6 REBAR FOR WALLS 8, 9, 10, 11, 12, 13, 14, 16, 17, AND 18.
2823	SV3-1210-CEW-CV1260	UNIT 3 AUXILIARY BUILDING-EL. 66'6" EMBED PLATES FOR CONCRETE WALL PLACEMENT #2
2824	SV3-CAS-PHW-ME1033	Fabrication/Installation of Pipe Supports for Isometric Drawing CAS-PLW-773
2825	SV3-CAS-PLW-ME0928	Fabricate and Install Small Bore Elevation 1 DWS Piping Iso SV3-DWS-PLW-773
2826	SV3-CDS-PLW-ME2304	INSTALLATION OF CDS PIPING FOR ISOMETRIC SV3-CDS-PLW-01AR, SV3-CDS-PLW-01AQ, SV3-CDS-PLW-01AP, SV3-CDS-PLW-013 SPOOL #1-4.
2827	SV4-1000-CCW-850000	Unit 4 Outside The CVBH Concrete Placement X from Elev. 82'-6" to 94'-0"
2828	SV3-2052-SHW-861860	INSTALLATION OF CABLE TRAY WELDED SUPPORTS IN TURBINE BUILDING (ELEV. 141' 3" AREA 2)
2829	SV3-CA33-S5W-862270	CA33 OLP'S AND EMBEDMENT PLATES
2830	SV3-ME01-PHW-860973	CONDENSER A HEATER DRAIN PIPE SUPPORTS
2831	SV4-WLS-P0W-861960	FABRICATION/INSTALLATION OF WLS PIPING SHOWN ON ISOMETRIC DRAWINGS SV4-WLS-PLW-35C, -215, -376, -380 AND -904
2832	SV4-ASS-PHW-860317	INSTALLATION AND FABRICATION OF AUXILLIARY STEAM SYSTEM(ASS) PIPING SUPPORT
2833	SV4-CDS-P0W-860328	INSTALLATION OF CDS PIPING (PORTION 3)
2834	SV3-1210-CEW-CV1073	UNIT 3 AUXILIARY BUILDING EL 66FT. 6IN. EMBED PLATES FOR CONCRETE WALL PLACEMENTS #1 & #4
2835	SV3-1210-CEW-CV1261	UNIT 3 AUXILIARY BUILDING-EL. 66'-6" EMBED PLATES FOR CONCRETE WALL PLACEMENTS #3, #11, #12, #13 (RM 12103), & #14
2836	SV3-1210-CEW-CV1263	UNIT 3 AUXILIARY BUILDING-EL. 66'-6" EMBED PLATES FOR CONCRETE WALL PLACEMENTS #6, #19, & #20
2837	SV3-1210-CEW-CV1264	UNIT 3 AUXILIARY BUILDING-EL. 66'-6" EMBED PLATES FOR CONCRETE WALL PLACEMENTS #7, #8, #9, #10, #13 (ROOM 12104), #15, #16, #17, & #18

2907	SV3-PCS-P0W-850054	INSTALL LARGE BORE PIPE ISOMETRIC SV3-PCS-PLW-054
2908	SV3-PXS-PHW-851932	INSTALL ISOMETRIC SV3-PXS-PLW-932 LARGE BORE PIPE SUPPORTS

Exhibit V – Legacy, WIP, and Completed Work Packages

Work Package ID	Work Package Description	Task Description
2909	SV3-PXS-PHW-852930	INSTALL ISOMETRIC SV3-PXS-PLW-930 LARGE BORE PIPE SUPPORTS
2910	SV4-1220-C0W-862491	INSTALLATION OF REBAR, EMBED PLATES, CONCRETE AND FORMWORK FOR U4 AUXILIARY BUILDING CONCRETE BEAMS AT ELEV 82'-6"
2911	SV3-CVS-P0W-860231	INSTALLATION OF CVS PIPING ON MODULE KQ22
2912	SV4-ME01-PHW-861882	UNIT 4 CONDENSER C: INSTALLATION OF PIPING HANGERS & SUPPORTS FOR 4TH EXTRACTION STEAM PIPING
2913	SV4-MT71-C0W-850016	Waste Water Retention Basin Wall Pour # 16
2914	SV4-MT71-C0W-850018	Waste Water Retention Basin Wall Pour # 18
2915	SV4-ME01-PHW-861880	UNIT 4 CONDENSER C: INSTALLATION OF PIPING HANGERS & SUPPORTS FOR 2ND EXTRACTION STEAM PIPING
2916	SV4-ME01-PHW-861878	UNIT 4 CONDENSER B: INSTALLATION OF PIPING HANGERS & SUPPORTS FOR 4TH EXTRACTION STEAM PIPING
2917	SV3-4030-SSW-850014	100' ELEV. S04 STAIR
2918	SV4-ME01-PLW-861884	UNIT 4 CONDENSER A: FABRICATION & INSTALLATION OF 2ND EXTRACTION STEAM PIPING
2919	SV4-ME01-PHW-861876	UNIT 4 CONDENSER B: INSTALLATION OF PIPING HANGERS & SUPPORTS FOR 2ND EXTRACTION STEAM PIPING
2920	SV4-ME01-PHW-861877	UNIT 4 CONDENSER B: INSTALLATION OF PIPING HANGERS & SUPPORTS FOR 3RD EXTRACTION STEAM PIPING
2921	SV3-4000-SHW-862351	FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS, DETAIL C-56, ANNEX BUILDING, ALL AREAS/ELEVATIONS. BOOK 1
2922	SV4-R151-R1W-862032	R151 COMMODITY MODULE INSTALLATION
2923	SV4-ME01-MEW-862139	UNIT 4 CONDENSER B: INSTALLATION OF FEEDWATER HEATERS
2924	SV4-ME01-PHW-861719	UNIT 4 CONDENSER B INSTALLATION OF VACUUM PIPING SUPPORTS
2925	SV4-ASS-PHW-860319	INSTALLATION AND FABRICATION OF AUXILIARY STEAM SYSTEM(ASS) PIPING SUPPORT
2926	SV4-WRS-MTW-862030	INSTALLATION OF LEAK CHASE POTS SV4-WRS-MT-02A / 02B
2927	SV4-ME01-MEW-862138	UNIT 4 CONDENSER A: INSTALLATION OF FEEDWATER HEATERS
2928	SV4-CA04-S8W-CV4095	U4 INSTALLATION OF CA04 MODULE AT ELEV. 71'-6"
2929	SV4-ME01-PHW-861718	UNIT 4 CONDENSER A: INSTALLATION OF VACUUM PIPING SUPPORTS
2930	SV4-ME01-PHW-861720	UNIT 4 CONDENSER C: INSTALLATION OF VACUUM PIPING SUPPORTS
2931	SV3-MH01-ASW-850001	UNIT 3 CONTAINMENT- INITIAL POLAR CRANE RAIL INSTALLATION
2932	SV4-WWS-P0W-862362	INSTALLATION AND FABRICATION OF WASTE WATER N(WWS) PIPING FOR SLAB 2

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
2933	SV4-ME01-MEW-862140	UNIT 4 CONDENSER C: INSTALLATION OF FEEDWATER HEATERS
2934	SV3-MH20-MHW-861869	220T CRANE INITIALIZATION PACKAGE
2935	SV4-4041-AGW-800000	Annex Building, Wall Insulation and Gypsum Board, 117'-6" Elev., Rooms 40410,40411,40412
2936	SV3-CDS-P0W-ME1392	INSTALL LB CONDENSATE PIPING FROM CONDENSATE PUMPS TO CONDENSATE POLISHING SYSTEM
2937	SV3-CDS-PLW-ME2503	INSTALLATION OF CDS PIPING FOR ISO'S SV3-CDS-PLW-100, -101, -102, -743, -910
2938	SV3-ZAS-ERW-862234	INSTALLATION OF CABLE TRAY SOUTH OF UNIT 3 TRANSFORMERS (24" AND 36")
2939	SV3-PXS-P0W-850941	INSTALL ISOMETRIC SV3-PXS-PLW-941 LARGE BORE PIPING
2940	SV3-RNS-PHW-850162	INSTALL LARGE BORE SUPPORTS FOR ISOMETRICS V3-RNS-PLW-162
2941	SV3-SFS-MLW-861036	ASME SECTION III - INSTALLATION OF CONTAINMENT VESSEL PENETRATION SV3-SFS-PY-C01 (P21)
2942	SV3-RNS-PHW-861874	ASME SECTION III - FABRICATION/ INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-01B
2943	SV3-1221-SHW-861903	INSTALL TYPE 01 CABLE TRAY SUPPORTS RM 12205 82'-6" UNIT 3 AUX
2944	SV4-CVS-P0W-861600	INSTALLATION OF CVS PIPING IN ANNEX U4
2945	SV3-PWS-PHW-861979	INSTALLATION OF PWS PIPING SUPPORTS IN ANNEX 3 (PORTION 7)
2946	SV4-0000-C0W-850013	TRANSFORMER FOUNDATION WALL POUR #13
2947	SV4-0000-C0W-850010	TRANSFORMER FOUNDATION, TRANSFORMER PAD 10
2948	SV4-CVS-PHW-861601	INSTALLATION OF CVS PIPE SUPPORTS IN ANNEX U4
2949	SV3-1212-ERW-EL4748	AUXILARY BUILDING UNIT 3, EL 66'-6", AREA 2, FABRICATE AND INSTALL DESIGNED TRAY SUPPORTS
2950	SV3-MSS-P0W-ME4675	INSTALLATION AND FABRICATION OF MAIN STEAM SYSTEM(MSS) PIPING
2951	SV3-HDS-PHW-860538	FABRICATION AND INSTALLATION OF HDS SUPPORTS
2952	SV4-0000-C0W-850024	TRANSFORMER FOUNDATION, WALL POUR #24
2953	SV3-5030-C0W-850005	UNIT 3 RADWASTE BUILDING, PIT FOUNDATIONS
2954	SV3-4051-C0W-850000	UNIT 3, ANNEX BUILDING, 135' -3" ELEV. FLOOR SLAB, AREA 1
2955	SV4-RNS-P0W-850186	INSTALL LARGE BORE PIPE ISOMETRIC SV4-RNS-PLW-186
2956	SV4-0000-C0W-850011	TRANSFORMER FOUNDATION WALL POUR # 11
2957	SV3-CA05-C0W-850000	CA05 CONCRETE PRE-PLACEMENT AND PLACEMENT UP TO 105' - 2"
2958	SV3-1237-SHW-860292	INSTALL CONDUIT SUPPORTS ON SHIELD WALL AZ 270 ₆ TO AZ-325 ₆ 100'-0"

Exhibit V – Legacy, WIP, and Completed Work Packages

Table 3. In-Progress Work Packages (as of October 17, 2017)		
2959	SV4-WRS-PHW-861737	KB13 INSTALLATION OF PIPE SUPPORTS & LEVEL TRANSMITTER MOUNT
2960	SV3-RNS-PHW-861880	ASME SECTION III - FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-402
2961	SV3-1230-C0W-850020	WALL 97 (TOP TO 117')
2962	SV3-4033-ERW-862033	INSTALLATION OF CONDUIT PENETRATION SLEEVES, ANNEX BUILDING, AREA 3, ELEV. 100'-0", 107'-2", 121'-0' & 126'-3"
2963	SV3-2052-ERW-861852	ELECTRICAL CABLE TRAY RACEWAY FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 141'-3" AREA 2
2964	SV3-2052-ERW-861891	ELECTRICAL CABLE TRAY RACEWAY FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 141'-3", AREA 2
2965	SV3-2056-ERW-861930	INSTALLATION OF CABLE TRAY RACEWAY IN THE UNIT 3 TURBINE BUILDING, ELEVATION 141' - 3", AREA 6
2966	SV3-2053-SHW-862020	ELECTRICAL CABLE TRAY SUPPORTS FABRICATION, AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 141' - 3", AREA 3
2967	SV3-PXS-P0W-850932	INSTALL ISOMETRIC SV3-PXS-PLW-932 LARGE BORE PIPING
2968	SV3-RNS-PHW-861873	ASME SECTION III – FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-01A
2969	SV3-CA34-S5W-861655	CA34 MODULE FABRICATION/ASSEMBLY OF LOOSE PARTS
2970	SV3-TDS-PHW-860614	INSTALLATION AND FABRICATION OF TURBINE ISLAND VENTS DRAINS AND RELIEF SYSTEMS (TDS) PIPING SUPPORT
2971	SV3-CAS-P0W-ME3430	INSTALLATION OF SMALL BORE CAS PIPING (INCLUDES SV3-CAS-PLW-33A)
2972	SV3-2070-MLW-862023	INSTALLATION OF MECHANICAL PIPING PENETRATIONS ON ELEVATION 255' (ROOF)
2973	SV3-2070-MLW-862022	INSTALLATION OF MECHANICAL PIPING PENETRATIONS ELEVATION 230'
2974	SV3-ML05-MLW-ME4785	INSTALLATION OF 100'0" AREA 1 PIPING PENETRATIONS
2975	SV3-PWS-P0W-861978	INSTALLATION OF PWS PIPING IN ANNEX 3 (PORTION 7)
2976	SV4-CA01-S4W-888358	UNIT 4 CA01 B-PLATE FABRICATION
2977	SV3-2037-ERW-862158	INSTALLATION OF ELECTRICAL CABLE TRAY RACEWAY IN THE UNIT 3 TURBINE BUILDING, EL. 100'-0" AREA 7
2978	SV3-2044-SHW-861963	ELECTRICAL CABLE TRAY TRAPEZE SUPPORTS
2979	SV3-2052-ERW-861890	ELECTRICAL CABLE TRAY RACEWAY FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 141'-3", AREA 2
2980	SV3-2048-ERW-862151	INSTALLATION ON CABLE TRAY RACEWAY IN THE UNIT 3 TURBINE BUILDING ELEVATION 120'-6"

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
2981	SV3-2052-ERW-861887	ELECTRICAL CABLE TRAY RACEWAY FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 141'-3", AREA 2
2982	SV3-2040-SHW-861920	ELECTRICAL CABLE TRAY TRAPEZE SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 120' - 6", AREA 0
2983	SV3-RNS-PHW-861882	ASME SECTION III - FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-422
2984	SV4-MT71-C0W-850012	Waste Water Retention Basin Wall Pour # 12
2985	SV3-2052-ERW-861888	ELECTRICAL CABLE TRAY RACEWAY FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 141'-3", AREA 2
2986	SV4-0000-C0W-850012	TRANSFORMER FOUNDATION, TRANSFORMER PAD POUR # 12
2987	SV4-WLS-PHW-861523	Fabrication/Installation of WLS Piping Supports shown on Isometric Drawings SV4-WLS-PLW-33K, -357 and -35F
2988	SV3-4032-SHW-EL4034	INSTALL CABLE TRAY SUPPORTS ANNEX BLDG AREA 2, ROOMS 40355, 40354 & 40360
2989	SV3-4032-SHW-EL4033	INSTALL CABLE TRAY SUPPORTS ANNEX BLDG AREA 2, ROOM 40352
2990	SV3-PXS-PHW-851943	INSTALL ISOMETRIC SV3-PXS-PLW-943 LARGE BORE PIPE SUPPORTS
2991	SV3-1232-ERW-861442	INSTALL CONDUIT SLEEVES FOR PENETRATIONS IN UNIT 3 AUX BUILDING FLOOR SLABS, EL 100'-0" AREA 2 RMS. 12312 & 12313
2992	SV4-VAS-P0W-861614	INSTALLATION OF PIPING FOR SV4-VAS-PLW-300, 310, -320 & -330
2993	SV4-CA20-S4W-CV5121	UNIT 4 CA20 MODULE BRACING, SHORING & FORMWORK
2994	SV4-4033-C0W-850000	UNIT 4 ANNEX BUILDING CONCRETE PUMP TOWER FOUNDATION IN AREA 3 AT ELEV 100'-0"
2995	SV3-CA00-S5W-862198	SV3-CA MODULES - COUPLER/REBAR ASSEMBLY FABRICATION
2996	SV4-4043-SPW-850001	UNIT 4 - ANNEX, 126'3 " ELEV., DECKING INSTALLATION
2997	SV4-4030-CYW-850000	100' ELEV. GROUT, COLUMN BASES
2998	SV4-ME2G-MEW-862057	FEEDWATER HEATERS SV4-FWS-ME-07A/B
2999	SV3-KQ10-KQW-ME0568	KQ10 REACTOR COOLANT DRAIN TANK (WLS-MT-01) INSTALLATION
3000	SV3-CA20-C0W-850002	CA20 FLOOR SLAB, 66
3001	SV3-4030-SSW-850012	100'- ELEV. S02. STAIRS
3002	SV4-VAS-PHW-861615	INSTALLATION OF PIPE SUPPORTS FOR SV4-VAS-PLW-300 & -320
3003	SV3-5000-EGW-861864	INSTALLATION OF RADWASTE BUILDING GROUNDING FOR AREAS 1, 2, & 3 AT THE 100'-0" ELEVATION

Exhibit V – Legacy, WIP, and Completed Work Packages

Work Package ID	Work Package Description	Work Package Details
3004	SV3-2059-SHW-861056	ELECTRICAL CABLE TRAY SUPPORT INSTALLATION IN THE TURBINE BUILDING, ELEVATION 141'3", AREA 9, ROOM 20500 (TRAPEZE)
3005	SV3-MSS-P0W-860794	MAIN STEAM TURBINE BYPASS PIPING INSTALLATION
3006	SV3-1000-CYW-850000	UNIT 3, NUCLEAR ISLAND BASE MAT REPAIR
3007	SV4-1000-CYW-850000	UNIT 4, NUCLEAR ISLAND BASEMAT REPAIR
3008	SV3-PXS-PHW-851942	INSTALL ISOMETRIC SV3-PXS-PLW-942 LARGE BORE PIPE SUPPORTS
3009	SV4-PXS-P0W-851012	INSTALL SV4 RING PIPE ISOMETRIC SV4-PXS-PLW-944
3010	SV3-PXS-PHW-851931	INSTALL ISOMETRIC SV3-PXS-PLW-931 LARGE BORE PIPE SUPPORTS
3011	SV3-PXS-PHW-851940	INSTALL ISOMETRIC SV3-PXS-PLW-940 LARGE BORE PIPE SUPPORTS
3012	SV4-5030-C0W-850000	UNIT 4 RADWASTE BUILDING MUDMAT
3013	SV3-5030-ERW-861865	INSTALLATION OF RADWASTE BUILDING CONDUIT FOR AREAS 1,2, & 3 AT THE 100' - 0" ELEVATION
3014	SV3-MSS-PHW-860570	MAIN STEAM TURBINE BYPASS PIPE SUPPORTS
3015	SV3-WWS-P0W-860880	FABRICATION AND INSTALLATION OF WWS PIPING AND PIPING DRAINS IN FIRST BAY
3016	SV3-WWS-P0W-861107	INSTALLATION OF ANNEX BLDG WWS PIPING (ISO SV3-WWS-PLW-434, 435, 436, 476 & 967)
3017	SV3-2068-SHW-800003	Install welded cable tray supports in turbin building (elevation 170'0" and 193'6" area 8)
3018	SV3-5030-C0W-850001	UNIT 3 RADWASTE BUILDING SUMP MUDMATS
3019	SV3-5030-C0W-850000	UNIT 3 RADWASTE BUILDING MUDMAT
3020	SV4-DWS-PHW-861603	INSTALLATION OF ANNEX BLDG DWS PIPE SUPPORTS (ISO SV4-DWS-PLW-131)
3021	SV3-SFS-PHW-861791	FABRICATION/INSTALLATION OF B31.1 SUPPORTS FOR ISOMETRIC SV3-SFS-PLW-780
3022	SV3-EDS-DSW-EL3125	INSTALL ANNEX BLDG. NON CLASS 1E DC AND UPS SYSTEM - DC BUS JUNCTION CABINET LOAD GROUP SPARE, ROOM 40310,
3023	SV3-EDS-DSW-EL3121	INSTALL ANNEX BLDG. NON CLASS 1E DC AND UPS SYSTEM - LOAD GROUP SPARE, ROOM 40308,
3024	SV4-KB10-KBW-861732	MODULE KB10 STRUCTURAL FABRICATION
3025	SV4-1212-ERW-861217	INSTALL DESIGN ROUTED CABLE TRAY AND SUPPORTS FOR DIVISION "A" BATTERY ROOM 12101 EL. 66'-6"
3026	SV3-4031-ERW-861247	Install Cable Tray in Rms 40307-40310 Annex Bldg. Area 1, Elev. 100' (WP7)
3027	SV3-HDS-PHW-ME3765	INSTALLATION AND FABRICATION OF HEATER DRAIN SYSTEM(HDS) PIPING SUPPORTS.
3028	SV3-HDS-P0W-ME3740	INSTALLATION AND FABRICATION OF HDS PIPING

Exhibit V – Legacy, WIP, and Completed Work Packages**Table 3. In-Progress Work Packages (as of October 17, 2017)**

3029	SV3-MSS-P0W-ME4653	INSTALLATION OF MSS PIPING
3030	SV4-2000-P0W-861999	INSTALLATION OF TEMPORARY FIRE PROTECTION SYSTEM STANDPIPE

3035	SV4-CB33-CBW-850000	CB33 MODULE INSTALLATION
3036	SV4-2060-C0W-850000	UNIT 4, TURBINE GENERATOR DECK. 170' ELEV
3037	SV3-WWS-PHW-ME6703	WASTE WATER SYSTEM 140' ELEVATION
3038	SV4-MSS-PHW-860360	INSTALLATION AND FABRICATION OF MAIN STEAM SYSTEM(MSS) PIPE SUPPORTS
3039	SV4-4030-C0W-850002	100'-0" ELEV. WALL, POUR #2
3040	SV4-4030-C0W-850001	100'-0" ELEV. WALL, POUR #1
3041	SV3-MV90-MVW-862062	INSTALLATION OF WLS WASTE PRE-/AFTER MODULE (WLS-MV-06 AND 07
3042	SV3-CA01-CCW-850001	Unit 3 CA01 Concrete Placement, Walls #1 through #4 from Elev. 87'-6" to 146'-10-1/2"
3043	SV3-MV90-MVW-862061	INSTALLATION OF DEMINERALIZER OUTLET FILTER ALPHA AND BRAVO (SFS-MV-02A AND 02B)
3044	SV3-ME2L-MEW-ME5893	INSTALLATION OF VYS HEAT EXCHANGER (VYS-ME-01A/B) AT ELEVATION 120'-6"
3045	SV3-4050-C0W-850019	UNIT 3- ANNEX CONCRETE WALLS, CENTRAL W10 WALL, POUR #19
3046	SV3-HDS-P0W-ME3739	INSTALLATION AND FABRICATION OF HDS PIPING
3047	SV3-1232-ERW-861441	INSTALL CONDUIT SLEEVES FOR PENETRATIONS IN UNIT 3 AUX BUILDING FLOOR SLABS, EL 100'-0" AREA 2 RMS. 12301, 12302, 12303 & 12311
3048	SV3-CVS-PHW-ME0808	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CVS-PLW-506
3049	SV4-WWS-P0W-862031	INSTALLATION AND FABRICATION OF WASTE WATER (WWS) SYSTEM PIPING FOR SLAB 2
3050	SV3-2101-C0W-850402	122' ELEV WALLS, POUR 2NE
3051	SV3-2101-C0W-850403	122' ELEV WALLS, POUR 2NW
3052	SV3-MSS-PHW-ME4674	INSTALLATION AND FABRICATION OF MAIN STEAM SYSTEM(MSS) PIPING SUPPORT
3053	SV3-2101-C0W-850401	122' ELEV. WALLS, POUR 2SE
3054	SV3-HDS-PHW-ME3754	TURBINE BUILDING HDS PIPE SUPPORT INSTALLATION
3055	SV3-2101-C0W-850404	122' Elev., Walls, Pour2SW

Exhibit V – Legacy, WIP, and Completed Work Packages

Work Package ID	Work Package Description	Task Description
3056	SV3-MSS-PHW-ME4684	INSTALLATION AND FABRICATION FO MAIN STEAM SYSTEM(MSS) PIPING SUPPORTS
3057	SV3-PXS-P0W-ME2951	ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-410 (LINE NUMBERS PXS-PL-L121A), ,
3058	SV3-RNS-PHW-861881	ASME SECTION III – FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-411
3059	SV3-PXS-P0W-850940	INSTALL ISOMETRIC SV3-PXS-PLW-940 LARGE BORE PIPING
3060	SV3-RNS-PHW-861877	ASME SECTION III – FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-021
3061	SV0-SES-ERW-EL1842	INSTALLATION OF ELECTRICAL UNDERGROUND COMMODITIES (MANHOLES AND DUCT BANKS) FOR THE (SES) PLANT SECURITY SYSTEM EAST OF THE ANNEX BLDG. - PHASE 1
3062	SV0-ZFS-ERW-EL1797	INSTALLATION OF UNDERGROUND COMMODITIES (MANHOLES AND DUCTBANKS) FOR THE (EFS/ZFS) COMMUNICATIONS SYSTEM FROM THE ANNEX BLDG. TO MANHOLE NZM026 - PHASE 1
3063	SV3-0000-EGW-EL2236	PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (EGS-GROUNDING) FOR THE TRANSFORMER AREA, ELEV. 100'
3064	SV4-MT2Y-MEW-861646	HDS LOW PRESSURE DRAIN TANKS (MT-04A/B/C)
3065	SV3-MSS-PHW-ME4693	INSTALLATION OF MSS PIPE SUPPORTS
3066	SV4-WRS-P0W-861604	INSTALLATION OF ANNEX BLDG WRS PIPING (ISO SV4-WRS-PLW-411, 412, 413, 414, 420, 421 & 430
3067	SV4-2030-SHW-861086	INSTALLATION OF TURBINE 4 CABLE TRAY SUPPLEMENTARY STEEL ON THE 100'-0" ELEVATION AREAS 0, 1 & 4, FROM COLUMNS K.1 TO R AND 12.1 TO 14.
3068	SV3-2043-SHW-861331	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 120'-6", AREA 3, COLUMNS 18 TO19 & P.2 TO R
3069	SV3-RNS-PHW-861878	ASME SECTION III - FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-190
3070	SV3-CB00-S5W-CV2819	INSTALLATION OF SHEAR STUD FOR CB MODULES
3071	SV3-ME01-PLW-ME1534	UNIT 3 CONDENSER B: INSTALLATION OF WATER CURTAIN PIPING
3072	SV3-SWS-PLW-ME1484	INSTALLATION OF SWS LARGE BORE PIPING (INCLUDES ISOMETRICS SV3-SWS-PLW-010, 020)
3073	SV3-CA32-CAW-850000	Unit 3, CA32 Module Fabrication
3074	SV3-SGS-P0W-ME6693	ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC SV3-SGS-PLW-070 (LINE NUMBERS SGS-PL-L009A)
3075	SV3-2042-SHW-861327	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 120' - 6", AREA 2, SOUTH OF COLUMN 18 & P.1 TO R

Exhibit V – Legacy, WIP, and Completed Work Packages

Table 3. In-Progress Work Packages (as of October 17, 2017)		
3076	SV3-4040-AMW-850001	MASONRY WALLS, SWITCH GEAR ROOM 40414 AND 40413
3077	SV3-1200-C0W-850002	S02 STAIR TOWER TREADS, CONCRETE PLACEMENT
3078	SV3-WWS-C0W-850001	UNIT 3 WWS OIL SEPARATOR, RETAINING WALLS AND EQUIP PADS POUR #1
3079	SV4-WWS-C0W-850001	UNIT 4, WWS OIL SEPARATOR, RETAINING WALLS AND EQUIP PADS POUR #1
3080	SV3-CA36-S5W-861650	CA36-Module Fabrication/Assembly of Loose parts
3081	SV4-1212-ERW-861219	INSTALL DESIGN ROUTED CABLE TRAY AND SUPPORTS FOR DIVISION "C" BATTERY ROOM 12102 EL. 66'-6"
3082	SV3-4050-C0W-850020	UNIT 3, ANNEX CONCRETE WALLS, W09 AND NORTH W10 WALLS, POUR #20
3083	SV4-0000-C0W-850009	Transformer Foundation, Wall Pour # 9
3084	SV4-2060-SSW-850013	TB13 STEEL ERECTION
3085	SV3-PXS-PHW-862100	AMSE SECTION III - FABRICATION/ INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-740
3086	SV3-RNS-PHW-861886	ASME SECTION III - FABRICATION/ INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-014
3087	SV3-PXS-P0W-851930	INSTALL ISOMETRIC SV3-PXS-PLW-930 LARGE BORE PIPING
3088	SV3-PXS-P0W-850930	INSTALL ISOMETRIC SV3-PXS-PLW-93A SMALL BORE PIPING
3089	SV3-PXS-P0W-850949	INSTALL ISOMETRIC SV3-PXS-PLW-949 SMALL BORE PIPING
3090	SV3-PXS-P0W-850931	INSTALL ISOMETRIC SV3-PXS-P0W-850931
3091	SV4-SFS-P0W-850757	INSTALL ASME PIPE FROM ISOMETRIC SV4-SFS-PLW-757
3092	SV3-1212-ERW-EL4749	AUXILARY BUILDING UNIT 3, EL 66'-6", AREA 2, FABRICATE AND INSTALL DESIGNED TRAY SUPPORTS
3093	SV3-CVS-PHW-ME3336	INSTALLATION OF BORIC ACID CVS PIPING SUPPORTS FOR WP (SV3-CVS-P0W-ME3327).
3094	SV3-RNS-P0W-850017	INSTALL ISOMETRIC SV3-RNS-PLW-17A
3095	SV4-RNS-PHW-861621	ASME III FABRICATION/INSTALLATION OF CA20 PIPE SUPPORTS FOR ISOMETRIC SV4-RNS-PLW-141
3096	SV3-PXS-P0W-862101	ASME SECTION III – FABRICATION/INSTALLATION OF PIPING FOR ISOMETRIC SV3-PXS-PLW-012
3097	SV4-RNS-PHW-861624	ASME III FABRICATION/INSTALLATION OF CA20 PIPE SUPPORTS FOR ISOMETRICS SV4-RNS-PLW-210 & -214
3098	SV3-2131-SHW-862185	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNI 3 TURBINE BUILDING, FIRST BAY AREA1. EL. 100'-0", COLUMNS 11 TO 12.1 AND COLUMNS P.2 TO R.
3099	SV3-2131-SHW-862187	ELECTRICAL CABLE TRAY SUPPLEMENTAL TRAY STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, FIRST BAY AREA 1, EL. 100'-0", COLUMNS 11 TO 12.1 AND WEST OF 1.2

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
3100	SV3-2053-SHW-861210	Electrical Cable Tray Welded (floor stand) Support Installation in the Unit 3 Turbine Building, Elevation 141'3", Area 3
3101	SV3-FPS-P0W-850055	INSTALL LARGE BORE PIPE PER ISO SV3-FPS-PLW-55MM
3102	SV3-TDS-P0W-861539	INSTALLATION AND FABRICATION OF TURBINE ISLAND DRAINS VENTS AND RELIEF SYSTEM(tds)PIPING
3103	SV4-1212-ERW-861220	INSTALL DESIGN ROUTED CONDUIT AND CONDUIT SUPPORTS IN BATTERY ROOM "C", ROOM 12102 EL. 66'-6"
3104	SV3-2131-SHW-862186	ELECTRICAL CABLE TRAY SUPPLEMENT STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING FIRST BAY AREA 1, EL. 100'-0", COLUMNS 11 TO 12.1 AND COLUMNS K.5 TO L.5
3105	SV4-1212-ERW-861222	INSTALL DESIGN ROUTED CONDUIT AND CONDUIT SUPPORTS IN "SPARE" BATTERY ROOM 12103 EL. 66'
3106	SV3-WWS-P0W-ME6281	WWS PIPING TO THE UNIT 3 WASTE WATER RETENTION BASIN
3107	SV3-PWS-PHW-862040	INSTALLATION OF ANNEX BLDG PWS PIPE SUPPORTS (ISO SV3-PWS-PLW-111, 112, 116, 142, 143, 145, 151, 152, 441 & 459)
3108	SV3-MH20-MHW-861870	15T Crane Initialization Package
3109	SV3-4000-SHW-862352	FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS, DETAIL C-58A, ANNEX BUILDING, ALL AREAS/ELEVATIONS, BOOK 1
3110	SV3-PWS-P0W-862039	INSTALLATION OF ANNEX BLDG PWS PIPING (ISO SV3-PWS-PLW-111, 112, 116, 142, 143, 145, 151, 152, 441 & 459)
3111	SV4-RNS-P0W-861667	ASME III FABRICATION/INSTALLATION OF CA20 LARGE BORE PIPING FOR ISOMETRIC SV4-RNS-PLW-17C
3112	SV3-PXS-P0W-850942	INSTALL ISOMETRIC SV3-PXS-PLW-942 LARGE BORE PIPING
3113	SV3-PCS-P0W-850810	INSTALL PIPING PER ISO SV3-PCS-PLW-810
3114	SV3-1214-JCW-862429	STAGE GRAB SAMPLE PANEL PACKAGE (SV3-PSS-MS-01) IN ROOM 12152M AREA 4, ELEV. 66'-6"
3115	SV0-SES-ERW-862488	INSTALL CONDUIT IN SES DUCT BANK/TRENCH FOR SECURITY LOCATED BETWEEN SITE GRID J1603-K1402
3116	SV4-1120-EJW-861993	FABRICATION AND INSTALLATION OF EX-CORE DETECTOR PMS JUNCTION BOX SUPPORTS IN ROOMS 11202 & 1104 EL 84'-6"
3117	SV4-PWS-P0W-800001	Install Small Bore Pipe & Supports Per SV4-PWS-PLW-053
3118	SV3-ZBS-EWW-861313	Cable Pull from Switchyard Control House to Unit 3 Turbine
3119	SV4-CA01-CCW-850004	CA01 CONCRETE WALL PLACEMENT SEC 6 A, B, C, & D AND 9
3120	SV3-CA01-CCW-850004	CA01 CONCRETE WALL PLACEMENT SEC 6 A, B, C, & D AND 9
3121	SV4-PWS-P0W-862369	INSTALLATION OF ANNEX BLDG PWS PIPING (ISO SV4-PWS-PLW-115, - 457 & -458)

Exhibit V – Legacy, WIP, and Completed Work Packages**Table 3. In-Progress Work Packages (as of October 17, 2017)**

3122	SV4-CAS-PHW-800001	Install Small Bore Supports per Isometric SV4-CAS-PLW-839
3123	SV3-VWS-PLW-ME2798	INSTALL PIPING FOR ISO #S SV3-VWS-PLW-20K, SV3-VWS-PLW-20L, SV3-VWS-PLW-20M.
3124	SV3-2151-SSW-800000	First Bay, 135'-3" Elev. Structural Steel
3125	SV3-FPS-PHW-851055	INSTALL PIPE SUPPORTS FOR ISO SV3-FPS-PLW-55M
3126	SV4-MT71-C0W-850015	Waste Water Retention Basin Wall Pour # 15
3127	SV4-MT71-C0W-850017	Waste Water Retention Basin Wall Pour # 17
3128	SV3-1222-CSW-850100	S01 STAIR TOWER FOR NI 3, AUX BUILD, AREA 2
3129	SV4-RNS-P0W-861628	ASME III FABRICATION/INSTALLATION OF CA20 SMALL BORE PIPING FOR ISOMETRICS SV4-RNS-PLW-211, -216 & -218
3130	SV3-PCS-P0W-850833	INSTALL ASME III LB PIPING FROM ISOMETRIC SV3-PCS-PLW-833
3131	SV3-PCS-P0W-850830	INSTALL ISOMETRIC SV3-PCS-PLW-830
3132	SV4-RNS-PHW-861629	ASME III FABRICATION/INSTALLATION OF CA20 PIPE SUPPORTS FOR ISOMETRICS SV4-RNS-PLW-211 & -216
3133	SV3-PXS-P0W-850933	INSTALL ISOMETRIC SVE-PXS-PLW-933 LARGE BORE PIPING
3134	SV3-PWS-P0W-862367	INSTALLATION OF ANNEX BLDG PWS PIPING (ISO SV3-PWS-PLW-115, -457 & 458
3135	SV3-HDS-P0W-860763	INSTALLATION AND FABRICATION OF HDS PIPING
3136	SV4-CA20-C0W-850003	CA20 FLOOR SLABS 34 thru 37
3137	SV3-4040-AMW-850003	MASONRY WALLS, ROOMS 40412 AND 40411
3138	SV3-CDS-PHW-860479	INSTALLATION OF CDS PIPING SUPPORTS
3139	SV3-WWS-PHW-860657	FABRICATION AND INSTALLATION OF WWS PIPING SUPPORTS
3140	SV3-WWS-PHW-860656	FABRICATION AND INSTALLATION OF WWS PIPING HANGERS
3141	SV3-1000-TIW-862440	BIG SPAN CV COVER TEMPORARY ELECTRICAL
3142	SV3-WWS-PHW-861108	Installation of Annex WWS Piping Supports
3143	SV4-WLS-PHW-861363	INSTALLATION OF PIPE SUPPORTS FOR ISOMETRICS SV4-WLS-PLW-33D & 33E
3144	SV4-WLS-PHW-861361	INSTALLATION OF PIPE SUPPORTS FOR ISOMETRICS SV4-WLS-PLW-980 & -981
3145	SV3-40302-AEW-800000	Architectural Ceiling System, Room 40302
3146	SV4-2020-ERW-861800	INSTALLATION OF CABLE TRAY RACEWAY ON THE 82'-9" ELEVATION OF THE TURBINE BUILDING
3147	SV3-2037-ERW-862159	INSTALLATION OF ELECTRICAL CABLE TRAY RACEWAY IN THE UNIT 3 TURBINE BUILDING, EL. 100'-0" AREA 7
3148	SV4-CB41-CBW-800000	CB41 Module Installation

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
3149	SV4-CB37-CBW-800000	CB37 Module Installation
3150	SV4-CB43-CBW-800000	CB43 Module Installation
3151	SV4-1130-C0W-800001	Reinforced Concrete inside Containment, Reactor Cavity, from 87'-6" to 98'-0" Elev.
3152	SV4-1130-C0W-800002	Reinforced Concrete inside Containment, Refuel Cavity up to 95' Elev.
3153	SV3-PCS-P0W-850051	INSTALL PIPE ISOMETRIC SV3-PCS-PLW-051 LARGE BORE PIPE
3154	SV4-ME01-PLW-861889	UNIT 4 CONDENSER B: FABRICATION & INSTALLATION OF 3RD EXTRACTION STEAM PIPING
3155	SV4-ME01-PLW-861887	UNIT 4 CONDENSER B: FABRICATION & INSTALLATION OF 1ST EXTRACTION STEAM PIPING
3156	SV4-0000-ELW-862490	INSTALLATION OF CONDUIT FOR UNIT 4 STANDARD PLANT YARD TRANSFORMER AREA LIGHTING
3157	SV4-2060-EGW-862155	EMBEDDED GROUNDING INSTALLATION FOR TURBINE 4 AT ELEVATIONS 148'-10", 158'-7" AND 170'-0"
3158	SV4-0000-ELW-862487	CABLE PULL AND FIXTURES FOR UNIT 4 STANDARD PLANT TRANSFORMER AREA LIGHTING
3159	SV3-FPS-P0W-850521	INSTALL LARGE BORE FPS PIPING ISO SV3-FPS-PLW-521
3160	SV4-ME01-PLW-861890	UNIT 4 CONDENSER B: FABRICATION & INSTALLATION OF 4TH EXTRACTION STEAM PIPING
3161	SV4-RNS-P0W-861697	ASME III FABRICATION/INSTALLATION OF CA20 LARGE BORE PIPING FOR ISOMETRIC SV4-RNS-PLW-173
3162	SV4-RNS-PHW-861678	ASME III FABRICATION/INSTALLATION FO PIPE SUPPORTS FOR SV4-RNS-PLW-175
3163	SV4-RNS-PHW-861703	ASME III FABRICATION/INSTALLATION OF CA20 PIPE SUPPORTS FOR ISOMETRIC SV4-RNS-PLW-176
3164	SV3-R261-ERW-862645	INSTALLATION OF ELECTRICAL CABLE TRAY AND TRAY GROUNDING IN MODULE R261
3165	SV3-SGS-MLW-861041	ASME SECTION III - INSTALLATION OF CONTAINMENT VESSEL PENETRATION SV3-SGS-PY-C03A (P27)
3166	SV3-SGS-MLW-861042	ASME SECTION III - INSTALLATION OF CONTAINMENT VESSEL PENETRATION SV3-SGS-PY-C03B (P28)
3167	SV3-FPS-P0W-854200	INSTALL SPOOLS FOR SV3-FPS-PLW-55A, 55B, 55C, 559, 55U, 558, 55X, 55T, 556
3168	SV3-4031-SHW-861532	FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG. AREA 1, ELEV. 100', WEST OF BATTERY CHARGER ROOMS, BETWEEN COLUMN LINES 9/10.05.
3169	SV3-5030-C0W-850006	UNIT 3 RADWASTE BUILDING, REBAR FABRICATION FOR GRADE BEAMS & TRENCHES
3170	SV4-ME01-PLW-862149	UNIT 4 CONDENSER B TO C INTERCONNECTION PIPING
3171	SV4-0000-C0W-850025	TRANSFORMER MSU PEDESTAL
3172	SV4-1208-C0W-800011	100'-0" - Cylindrical Wall - RC02
3173	SV3-CA33-S5W-862273	CA33- SEAM WELDS

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Package ID	Description
3174	SV3-WWS-PHW-860658	INSTALLATION OF WWS PIPE SUPPORTS
3175	SV3-RNS-PHW-861875	ASME SECTION III – FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-013
3176	SV3-CA33-S5W-862462	CA33 MODULE - INSTALL SHIPPED LOOSE PARTS
3177	SV3-WLS-P0W-ME3726	INSTALLATION OF LARGE BORE WLS PIPING (ISOMETRICS SV3-WLS-PLW-534,-535,-536,-53A)
3178	SV4-WLS-PHW-861367	INSTALLATION OF PIPE SUPPORTS FOR ISOMETRICS SV4-WLS-PLW-35L, -35K, -35M & -90B
3179	SV3-2042-SHW-861328	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING AREA 2, EL. 120'-6", NORTH OF COLUMN 17 AND BETWEEN COLUMNS P.1 TO R
3180	SV4-MT71-C0W-850014	Waste Water Retention Basin Wall Pour # 14
3181	SV4-1160-SPW-800000	SPL22, 23 & 24 Installation
3182	SV4-WRS-P0W-800005	Install Large Bore Pipe per Isometric SV4-WRS-PLW-59P
3183	SV3-WSS-PHW-ME4397	FABRICATION/INSTALLATION OF SMALL BORE WSS PIPING SUPPORTS (INCLUDES ISOMETRICS SV3-WSS-PLW-510, 511, 512)
3184	SV3-CA01-CCW-850002	CA01 Concrete, Wall Placements #2 through #4 from Elev. 146'-10-1/2" to 153'-0", and #17 and #18 to Elev. 158'-0"
3185	SV4-WRS-P0W-800006	Install Large Bore Pipe per Isometric SV4-WRS-PLW-59Y
3186	SV4-1208-CCW-851002	UNIT 4 SHIELD BUILDING COURSE 2 CONCRETE FILL
3187	SV4-CA20-C0W-850009	90'-3" & 92'-6" ELEV CA20 FLOOR SLABS, CA20-43 THRU 46 FLOORS, ROOM 12463 & 12365
3188	SV3-2131-SHW-800004	Electrical Cable Tray Supports Turbine Building First Bay Elevation 100'0" Area 1
3189	SV4-RNS-PHW-861666	ASME III FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR SV4-RNS-PLW-17B
3190	SV4-PXS-PHW-851021	INSTALL SV4 RING 2 SUPPORTS FROM PIPE ISOMETRIC SV4-PXS-PLW-938
3191	SV3-4031-AWW-850000	UNIT 3 - ANNEX BUILDING, WALL FRAMING, 100' EL., ROOMS 40300 AND 40302
3192	SV3-4051-ERW-862397	INSTALLATION OF CONDUIT PENETRATION SLEEVES, ANNEX BUILDING, AREA 1, ELEV. 135'-3"
3193	SV3-CA01-CCW-850013	UNIT 3 CA01 CONCRETE WALL PLACEMENT SECTION #16 UP TO 116'-6"
3194	SV3-2058-SHW-800000	Elec Cable Tray Welded Support Fab & Install in Unit 3 Turbine Building, Elevation 141' 3", Area 8
3195	SV4-RNS-P0W-800003	Install LB Pipe from ISO SV4-RNS-PLW-17F
3196	SV4-CAS-P0W-800002	Install small bore pipe and supports per SV4-CAS-PLW-86C
3197	SV4-2070-C0W-850005	ROOF ELE. FLOOR SLAB, POUR #5
3198	SV3-1208-C0W-850007	UNIT 3 CYLINDRICAL WALL - POUR RC07A

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Package ID	Description
3199	SV4-CA20-S4W-850005	CA20, ROOMS 12362 & 12363, SUBMODULE 52, 53, 54 & 55 INSTALLATION
3200	SV3-2131-SHW-800006	Electrical Cable Tray Supports Turbine Building First Bay Elevation 100'0" Area 1
3201	SV4-RNS-PHW-861626	ASME III FABRICATION/INSTALLATION OF CA20 PIPE SUPPORTS FOR ISOMETRIC SV4-RNS-PLW-161
3202	SV4-1208-CEW-800000	100'-0" - Cylindrical Wall - Fabricate Electrical EPA's
3203	SV4-1235-EYW-862722	INSTALL CONDUIT SLEEVES FOR PENETRATIONS THROUGH PRECAST CONCRETE PANEL 1225-CP-S01 UNIT 4 AUXILIARY BUILDING ELEVATION 81'-6" AREA 5
3204	SV4-PXS-P0W-860287	INSTALL LARGE BORE PIPING ISOMETRICS (SV4-PXS-PLW-187, -188, -189)
3205	SV4-DWS-P0W-860989	INSTALL SMALL BORE DWS PIPING and SUPPORTS (ISOMETRIC: SV4-DWS-PLW-772)
3206	SV4-DWS-P0W-860297	INSTALL SMALL BORE DWS PIPING and SUPPORTS (INCLUDES ISOMETRICS: SV4-DWS-PLW-770, -771)
3207	SV4-DWS-P0W-862430	INSTALL SMALL BORE DWSPIPING AND SUPPORTS (INCLUDES ISOMETRICS: SV4-DWS-PLW-771)
3208	SV3-4041-AWW-850000	UNIT 3- ANNEX BUILDING, WALL FRAMING, 117'-6" ELEV, ROOMS 40410, 40411, 40412
3209	SV4-WLS-PHW-850750	FABRICATE AND INSTALL SUPPORTS FOR ISO SV4-WLS-PLW-750
3210	SV4-2060-SAW-862812	UNIT 4 TURBINE BUILDING 170'-0" ELEVATION STUD INSTALLATION
3211	SV3-1208-C0W-850017	UNIT 3 CYLINDRICAL WALL - POUR RC07B
3212	SV3-2131-SHW-800008	Electrical Cable Tray Supports Turbine Building First Bay Elevation 100'0" Area 1
3213	SV4-4051-SAW-850001	SUPPLEMENTARY STEEL EL135'-3" AREA 1 GL E/I.1 & 11.09/11.15
3214	SV4-1211-ERW-861223	INSTALL DESIGN ROUTED CABLE TRAY AND SUPPORTS FOR DIVISION "B" BATTERY ROOM 12104 EL. 66'-6"
3215	SV3-2031-SHW-800000	Installation of Welded Cable Tray Supports in Turbine Building (Elev. 100' 3" Area 1)
3216	SV4-4030-C0W-850007	UNIT 4 ANNEX BUILDING REINFORCING STEEL FOR AREA 1 WALLS FROM ELEV. 100'-0" TO 117'-6"
3217	SV3-CA02-CCW-850000	UNIT 3 CONTAINMENT WALL MODULE CA02 CONCRETE PLACEMENT
3218	SV4-2050-CCW-862816	UNIT 4 TURBINE BUILDING GROUTING ACTIVITIES AT ELEVATION 141'-3"
3219	SV4-0000-C0W-850026	TRANSFORMER FOUNDATION MSU NORTH WALLS
3220	SV4-WRS-P0W-861736	INSTALLATION OF WRS PIPING ON MODULE KB13
3221	SV3-CA37-ERW-861472	FABRICATION AND INSTALLATION OF ELECTRICAL PENETRATIONS WITHIN THE CA37 MODULE

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Package ID	Description
3222	SV3-TDS-PHW-860618	INSTALLATION AND FABRICATION OF TURBINE ISLAND VENTS AND DRAINS AND RELIEF SYSTEMS (TDS) PIPING SUPPORTS
3223	SV3-PWS-PHW-861414	INSTALLATION OF PWS PIPE SUPPORTS
3224	SV4-RNS-PHW-861690	ASME III FABRICATION/INSTALLATION OF CA20 PIPE SUPPORTS FOR ISOMETRIC SV4-RNS-PLW-142
3225	SV4-RNS-PHW-861674	ASME III FABRICATION/INSTALLATION OF CA20 PIPE SUPPORTS FOR ISOMETRIC SV4-RNS-PLW-17Q
3226	SV4-CA01-S4W-861775	CA01-SA07 - ELEV. 107' - 119' DIRECT WELDED ATTACHMENTS (DWA)
3227	SV3-2042-SHW-861329	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT3 TURBINE BUILDING, ELEVATION 120'-6", AREA 2, COLUMNS 16 TO 17 & BETWEEN P.1 TO R
3228	SV3-2044-SHW-860224	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT3 TURBINE BUILDING, ELEVATION 120'-6", AREA 4, COLUMNS 13.05 TO 13.1 & BETWEEN I.2 TO K.1
3229	SV3-2070-EGW-861658	ELECTRICAL GROUNDING FOR UNIT 3 TURBINE BUILDING ROOF, AREA ROOF, ELEVATION 254'-0"
3230	SV3-1130-C0W-850009	CONCRETE PRE-PLACEMENT & PLACEMENT IN THE UNIT 3 CONTAINMENT TOC EL. 107'-2"
3231	SV3-11206-CYW-800000	Grout PXS Accumulator Tank, 87'-6" Elev., Room 11206
3232	SV3-11207-CYW-800000	Grout PXS Accumulator Tank B, Room 11207
3233	SV4-4030-C0W-850008	UNIT 4 ANNEX BUILDING EMBEDMENTS AND CONCRETE FOR AREA 1 WALLS FROM ELEV 100'-0" TO 117'-6"
3234	SV4-1130-C0W-850000	REINFORCED CONCRETE INSIDE CONTAINMENT 87'-6" TO 96'-0" WEST SIDE (LAYER 6V AND 7V)
3235	SV3-1121-JRW-855000	INSTALL INSTRUMENT RACK 1121-JR-001
3236	SV4-CA02-CCW-850000	UNIT 4 CONTAINMENT WALL MODULE CA02 CONCRETE PLACEMENT
3237	SV3-HDS-P0W-ME3738	INSTALLATION AND FABRICATION OF HEATER DRAIN SYSTEM PIPING
3238	SV3-2131-SHW-800003	Electrical Cable Tray Supports Turbine Building First Bay Elevation 100'0" Area 1
3239	SV3-2056-SHW-800001	Elect Cable Tray Welded Support Fab & Install in Unit 3 Turbine Building, Elevation 141' 3", Area 6
3240	SV4-2000-C0W-862917	Unit 4 Turbine Building 100'-0" Elev. Temporary Elevator Foundation
3241	SV4-WWS-P0W-862177	INSTALL ISO SV4-WWS-PLW-437, 438, 439, 441, 442 AND 443
3242	SV3-CA35-S5W-862208	CA35 ASSEMBLY AND SHIP LOOSE MATERIAL INSTALL
3243	SV4-RNS-PHW-861631	ASME III FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR SV4-RNS-PLW-090
3244	SV4-RNS-PHW-861696	ASME III FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR SV4-RNS-PLW-172

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
3245	SV4-PXS-PHW-851019	INSTALL SV4 RING 2 SUPPORTS FROM PIPE ISOMETRIC SV4-PXS-PLW-936
3246	SV4-PXS-PHW-851025	INSTALL SV4 RING 2 SUPPORT FROM PIPE ISOMETRIC SV4-PXS-PLW-947
3247	SV3-1123-JRW-862534	ERECT INSTRUMENT RACK 1123-JR-001
3248	SV4-12155-CYW-800000	Room 12155 Grout, R155 - WLS Equipment Room Supply Balancing Damper
3249	SV4-12162-CYW-800000	Room 12162 Grout, RNS Residual Heat Removal Pump A Stand (RNS-MZ-12A)
3250	SV4-12163-CYW-800000	Room 12163 Grout, RNS Residual Heat Removal Pump B Stand (RNS-MZ-12B)
3251	SV4-2060-CEW-862913	UNIT 4 TURBINE BUILDING 170'-0" ELEVATION PENETRATION SLEEVES
3252	SV3-PXS-P0W-862102	ASME SECTION III - FABRICATION/INSTALLATION OF PIPING FOR ISOMETRIC SV3-PXS-PLW-022
3253	SV4-RNS-P0W-861623	ASME III FABRICATION/INSTALLATION OF CA20 SMALL BORE PIPING FOR ISOMETRICS SV4-RNS-PLW-210, -214 & -217
3254	SV4-PXS-P0W-850410	INSTALL PIPE FOR IS0-PXS-PLW-410
3255	SV4-RNS-PHW-861701	ASME III FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR SV4-RNS-PLW-175
3256	SV4-1208-C0W-850103	92'-6" TO 100'-0" ELEV, CONCRETE PRE-PLACEMENT AND PLACEMENT, POUR #12S
3257	SV4-WWS-P0W-862179	INSTALLATION OF ANNEX BLDG WWS PIPING (ISO SV4-WWS-PLW-419, 420, 421, 422, 423, 424, 440, 470, 471, 472, 473, 474, 475 & 950)
3258	SV4-WWS-PHW-862180	INSTALLATION OF ANNEX BLDG WWS PIPE SUPPORTS (WWS-PLW-419, 420, 421, 422, 423, 424, 440, 470, 471, 472, 473, 474, 475 & 950)
3259	SV4-1208-C0W-850101	UNIT 4 CYLINDRICAL WALL, POUR # 11A ELEV 90'-6" TO 100'-0"
3260	SV4-1208-C0W-850102	90'-6" TO 100'-0" ELEV CONCRETE PRE-PLACEMENT AND PLACEMENT POUR # 12N
3261	SV4-4051-SAW-850000	Unit 4, Annex Supplemental Steel Area 1, Elev 135'3"
3262	SV3-2141-ERW-862700	THE INSTALLATION OF CONDUIT PENETRATION SLEEVES IN THE 117'6" ELEV WALLS OF THE FIRST BAY
3263	SV4-2053-SHW-862446	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE TURBINE BUILDING, ELEVATION 141'-3", AREA 3 FROM COLUMNS 19 TO 20 & P.2 TO R
3264	SV4-ME01-PLW-862141	UNIT 4 CONDENSER A: INSTALLATION OF FLASHBOX PIPING
3265	SV4-FPS-PHW-860893	INSTALLATION AND FABRICATION OF FIRE PROTECTION SYSTEM(FPS) PIPING SUPPORT

Exhibit V – Legacy, WIP, and Completed Work Packages

Table 3. In-Progress Work Packages (as of October 17, 2017)		
3266	SV3-2052-ERW-861892	ELECTRICAL CABLE TRAY RACEWAY FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 141'-3", AREA 2
3267	SV3-2053-ERW-861866	ELECTRICAL CABLE TRAY RACEWAY FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 141'3", AREA 3
3268	SV3-2053-ERW-861825	SV3-2053-ERW-861825
3269	SV3-2053-ERW-861824	ELECTRICAL CABLE TRAY RACEWAY FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 141'3", AREA 3
3270	SV3-2053-ERW-861867	ELECTRICAL CABLE TRAY RACEWAY FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 141'3", AREA 3
3271	SV3-2053-ERW-861865	ELECTRICAL CABLE TRAY RACEWAY FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING ELEVATION 141'3" AREA 3
3272	SV3-2053-ERW-861949	ELECTRICAL CABLE TRAY RACEWAY FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING ELEVATION 141'3", AREA 3
3273	SV3-0000-EGW-EL2315	PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (SV3-SITE STATION GROUNDING GRID) FOR GROUND GRID AREA, K1400.
3274	SV3-ASS-PLW-ME1476	FABRICATE AND INSTALL AUXILIARY STEAM SYSTEM(ASS) PIPING PORTION 4 FOR 100-0
3275	SV3-CA01-S4W-CV4224	CA01-38 SUBMODULE ERECTION
3276	SV3-CA01-S4W-CV4237	CA01 TEMPORARY ATTACHMENTS
3277	SV3-CA01-V1W-CV5039	U3 INSTALLATION AND REMOVAL OF CA01 MODULE GUIDE PINS AT ELEV. 83'-0"
3278	SV3-CA05-S4W-CV3013	INSTALLATION OF OPEN WORK ITEMS FOR CA05 MODULE TO BE INSTALLED AFTER SET AT NUCLEAR ISLAND NI 3.
3279	SV4-2000-SUW-CV1819	CH80 MODULE ASSEMBLY & ERECTION
3280	SV0-YFS-P0W-ME1884	FABRICATE AND INSTALL THE YARD FIRE WATER PIPING FROM THE BLDG. 301 CAPPED FUTURE SNC CONNECTION TO VISITOR CENTER.
3281	SV3-1220-CCW-CV1890	CONCRETE IN AUXILIARY BUILDING WALLS (21,22,23, AND 24) UP TO ELEVATION 82'-6"
3282	SV3-1220-CEW-CV1608	U3 AUXILIARY BUILDING EMBED PLATES & TEMPOARY FORMWORK-AREA 3 & 4-EL 82'-6" WALLS (WALL PLACEMENTS #28,41,42,48,49,51,& 52)
3283	SV3-1220-CRW-CV2575	UNIT 3 AUXILIARY BUILDING A3 (82'-6" TO 100'-0") INTERIOR WALL REBAR - AREAS 3, 4, 5, &6
3284	SV3-1220-SSW-CV1591	Auxiliary Building Structural Steel Framing Elevation 82'-6"
3285	SV3-2101-CCW-CV3347	UNIT 3 TURBINE FIRST BAY WALLS
3286	SV3-4000-SSW-CV2708	RE-WORK ANNEX BUILDING AREA 4 STRUCTURAL STEEL

Exhibit V – Legacy, WIP, and Completed Work Packages

3287	SV3-4000-T2W-CV2231	HSB ASSEMBLY & INSTALLER QUALIFICATION FOR ANNEX BUILDING AREAS 1-3
3288	SV3-4001-SSW-CV3904	Annex Building Area 1 Supplemental Steel Installation
3289	SV3-4002-SSW-CV3869	ANNEX BUILDING AREA 2 SUPPLEMENTARY STEEL INSTALLATION
3290	SV3-4040-SSW-CV2286	ANNEX BUILDING STRUCTURAL STEEL AREA 1 SEQUENCE
3291	SV3-4040-SSW-CV2287	ANNEX BUILDING STRUCTURAL STEEL AREA 2 SEQUENCE
3292	SV3-CA01-S4W-CV2152	INSTALL CA01-08 PERMANENT WELDED ATTACHMENTS
3293	SV3-CA01-S4W-CV2154	INSTALL CA01-10 PERMANENT WELDED ATTACHMENTS
3294	SV3-CA01-S4W-CV2155	CA01-SUB-ASSEMBLY 1 BASEMAT CONNECTION PLATES
3295	SV3-CA01-S4W-CV2245	INSTALL CA01-28 PERMANENT WELDED ATTACHMENTS
3296	SV3-CA01-S4W-CV2246	INSTALL CA01-29 PERMANENT WELDED ATTACHMENTS
3297	SV3-CA01-S4W-CV2941	CA01-01 OVERLAY PLATES AND ATTACHMENTS
3298	SV3-CA01-S4W-CV3697	CA01-03 OVERLAY PLATES AND ATTACHMENTS
3299	SV3-CA01-S4W-CV4075	CA01-04 OLP'S AND PERMANENT WELDED ATTACHMENTS
3300	SV3-CA01-S4W-CV4078	CA01-13 OLPs AND PERMANENT WELDED ATTACHMENTS
3301	SV3-CA01-S4W-CV4081	CA01-17 OLP AND ATTACHMENTS
3302	SV3-CA01-S4W-CV4082	CA01-18 Overlay Plates and Permanent Welded Attachments
3303	SV3-CA01-S4W-CV4151	CA01 SUBASSEMBLY 2 BASEMAT CONNECTION PLATES
3304	SV3-CA01-S4W-CV4233	INSTALL ACCESSIBLE CA01 SUB-ASSEMBLY 3 BASEMAT CONNECTION PLATES IN MAB
3305	SV3-CA01-S4W-CV4234	CA01-SUB ASSEMBLY _4 Basemat Connection Plates
3306	SV3-CA01-S4W-CV4235	SUB ASSEMBLY 5 ACCESSIBLE BASEMAT CONNECTION PLATE INSTALLATION IN MAB
3307	SV3-CA01-S4W-CV4236	SUB ASSEMBLY 6 BASEMENT CONNECTION, ACCESSIBLE B-PLATE INSTALLATION IN MAB
3308	SV3-CA01-S4W-CV4278	INSTALL CA01-38 PERMANENT WELDED ATTACHMENTS
3309	SV3-CA01-S4W-CV4284	INSTALL SV3-CA01-25,-47 & -48 PERMANENT WELDED ATTACHMENTS
3310	SV3-CA01-S4W-CV5581	CA01 OVERLAY PLATES - TORQUEING AND TESTING
3311	SV3-CA01-S4W-CV5692	CA01-14 PERMANANT WELDED ATTACHMENTS
3312	SV3-CA01-S5W-CV4146	CA01 MISCELLANEOUS UNSATISFACTORY IRS AND N&D REWORK/REPAIRS
3313	SV3-CA04-S5W-CV3778	REWORK N&D SV3-CA04-GNR-000033 FOR UNIT 3 CA04
3314	SV3-CA20-S4W-CV2075	EXTERIOR TEMPORARY ATTACHMENTS @ COLUMN LINE 2
3315	SV3-CA20-S4W-CV2077	EXTERIOR TEMPORARY ATTACHMENTS @ COLUMN LINE J1

Exhibit V – Legacy, WIP, and Completed Work Packages**Table 3. In-Progress Work Packages (as of October 17, 2017)**

3316	SV3-CA20-S4W-CV2106	INTERIOR TEMPORARY ATTACHMENTS FOR SUB-ASSEMBLY 1
3317	SV3-CA20-S4W-CV2107	INTERIOR TEMPORARY ATTACHMENTS FOR SUB-ASSEMBLY 2
3318	SV3-CA20-S4W-CV2198	CA20 SUB ASSEMBLY 1 REWORK FOR CLOSURE OF N&Ds
3319	SV3-CA20-S4W-CV2325	CA20 SUB ASSEMBLY 2 WORK LIST ITEMS WB-W00003, WB-W00004, WB-W00017, WB-W00023, WB-W00031, WB-W00038, WB-W00042, WB-W00043 & WB-W00044
3320	SV3-CA20-S4W-CV2560	CA20 MODULE WALL BRACING FOR CONCRETE PLACEMENT
3321	SV3-CA20-S4W-CV2599	CA20 WLS MONITOR TANKS MODIFICATIONS PER APP-CA20-GEF-1266
3322	SV3-CA20-S5W-CV1501	CA20 Installation of Rebar Couplers Removed for Testing
3323	SV3-CA20-S8W-CV2878	INSTALL COMMODITIES IN CA20 MODULE FROM ELEVATION 82'6" TO 92'6" FOR ROOMS 12166, 12167, 12262, 12264, 12265 AND 12268
3324	SV3-CB00-S8W-CV3227	INSTALLATION OF CB MODULES 61, 62, 63 & 64 AT ELEVATION 80'0
3325	SV3-R151-ERW-EL3772	INSTALLATION OF ELECTRICAL CABLE TRAY IN MODULE R151
3326	SV3-R155-ERW-EL2805	INSTALLATION OF ELECTRICAL CABLE TRAY IN MODULE R155
3327	SV3-SDS-PHW-ME2548	INSTALLATION OF ANNEX SDS SUPPORTS (FOR WP SV3-SDS-P0W-ME2421)
3328	SV3-WWS-PHW-ME3044	INSTALLATION OF WWS PIPE SUPPORTS FOR SLAB 3 AT 120' 6" ELEVATION PORTION 2
3329	SV3-CVS-P0W-ME2661	INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRIC: SV3-CVS-PLW-802)
3330	SV3-CVS-P0W-ME2824	INSTALLATION OF LARGE BORE CVS PIPING (INCLUDES ISOMETRICS: SV3-CVS-PLW-011)
3331	SV3-CVS-P0W-ME2827	Installation of Large Bore CVS Piping (Includes Isometrics: SV3-CVS-PLW-195)
3332	SV3-CVS-PHW-ME2921	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CVS-PLW-04J
3333	SV3-CVS-PHW-ME2927	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CVS-PLW-290
3334	SV3-CVS-PHW-ME2928	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CVS-PLW-292
3335	SV3-CVS-PHW-ME2929	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CVS-PLW-800
3336	SV3-CWS-P0W-ME2179	FABRICATION AND INSTALLATION OF CWS PIPING FROM STRAINERS SV3-CWS-PY-C01A/B/C TO HEAT EXCHANGERS SV3-TCS-ME-01A/B/C.
3337	SV3-CWS-P0W-ME2197	FABRICATION AND INSTALLATION OF CWS PIPING IN TURBINE ROOM 20309 FROM CWS HEADER TO CMS-ME-01A/B/C/D (ELEVATION 90FT TO 101 FT)

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
3338	SV3-CWS-P0W-ME2214	Farbrication And Installation of CWS Piping In Turbine Room 20309 From CWS Header To CMS-ME-01A/B/C/D (Elevation 101 FT To 129 FT)
3339	SV3-CWS-PHW-ME2180	FABRICATION AND INSTALLATION OF CWS PIPING SUPPORTS FROM STRAINERS SV3-CWS-PY-C01A/B/C TO HEAT EXCHANGERS SV3-TCS-ME-01A/B/C.
3340	SV3-CWS-PLW-ME2505	INSTALLATION OF CWS PIPING FOR ISOMETRICS SV3-CWS-PLW-737
3341	SV3-DOS-EWW-EL2623	INSTALL (PULL) ELECTRICAL LEAK DETECTION CABLES FOR THE (DOS) DIESEL OIL SYSTEM
3342	SV3-DOS-PHW-ME2312	Install Pipe Supports (Spiders) on the Diesel Fuel Oil Lines East of Unit 3 Annex.
3343	SV3-DTS-PHW-ME1515	Fabricate and Install Demineralized Water Treatment System (DTS) supports portion 1-(Raw Water Supply to DTS-MS-01)
3344	SV3-DTS-PLW-ME1514	Fabricate and Install Demineralized Water Treatment System (DTS) piping (DTS-MT-02 DRAIN)
3345	SV3-DWS-P0W-ME2606	FABRICATE AND INSTALL DWS SMALL BORE PIPING SHOWN ON THE ISOMETRIC DRAWING SV3-DWS-PLW-067
3346	SV3-DWS-P0W-ME2607	FABRICATE AND INSTALL DWS SMALL BORE PIPING SHOWN ON ISOMETRIC DRAWINGS SV3-DWS-PLW-732 & SV3-DWS-PLW-733
3347	SV3-DWS-P0W-ME2608	FABRICATE AND INSTALL DWS SMALL BORE PIPING SHOWN ON ISOMETRIC DRAWINGS SV3-DWS-PLW-755 & SV3-DWS-PLW-756
3348	SV3-DWS-P0W-ME6351	INSTALLATION OF ANNEX BLDG DWS PIPING (ISOMETRICS SV3-DWS-PLW-139 & -143
3349	SV3-DWS-PHW-ME3339	FABRICATE AND INSTALL DEMINERALIZED WATER PIPING SUPPORT IAW SV3-DWS-PLW-150, SV3-DWS-PLW-247
3350	SV3-DWS-PHW-ME4473	INSTALLATION OF ANNEX DWS PIPING SUPPORT FOR WP (SV3-DWS-P0W-ME4472)
3351	SV3-DWS-PHW-ME6675	INSTALLATION OF ANNEX BLDG DWS PIPE SUPPORTS (ISOMETRICS SV3-DWS-PLW-140, -141)
3352	SV3-ECS-ERW-EL2717	SV3- INSTALL ECS DUCT BANKS FROM MANHOLES NXM010, NXM011 TP FIRE PUMPS/ FIRE WATER TANKS- PHASE 3A
3353	SV3-ECS-ERW-EL2718	SV3-INSTALL ECS DUCT BANKS FROM NORTH SIDE OF UNIT 3 TURBINE BLDG. TO CHEMICAL FEED STORAGE BLDG. - PHASE 3/4
3354	SV3-ECS-ERW-EL2719	SV3 - INSTALL ECS DUCT BANKS FROM SWS COOLING TOWERS TO PASSIVE CONTAINMENT COOLING TANK/DTS/WESTSIDE OF TURBINE BLDG. - PHASE 3/4
3355	SV3-FPS-P0W-ME4957	FABRICATE AND INSTALL THE UNIT 3 FIRE PROTECTION SYSTEM (FPS) PIPING ON ISOMETRICS (SV3-FPS-PLW-956, 957, 95AM, 95AN)
3356	SV3-FPS-P0W-ME6783	FABRICATE AND INSTALL THE UNIT 3 FIRE PROTECTION SYSTEM (FPS) ON ISOMETRICS (SV3-FPS-PLW-958, 959, 95AQ, 95AS, 95AT)

Exhibit V – Legacy, WIP, and Completed Work Packages

Work Package ID	Work Package Description	Task Description
3357	SV4-SWS-PLW-ME2362	INSTALLATION OF SWS PIPING FOR ISOMETRICS SV4-SWS-PLW-040, SV4-SWS-PLW-041, SV4-SWS-PLW-042, SV4-SWS-PLW-043,
3358	SV4-SWS-PLW-ME2364	INSTALLATION OF SWS PIPING FOR ISOMETRICS SV4-SWS-PLW-050, SV4-SWS-PLW-051, SV4-SWS-PLW-052, SV4-SWS-PLW-053,
3359	SV3-FPS-PHW-ME2474	INSTALLATION OF ANNEX FPS PIPING SUPPORTS FOR WP (SV3-FPS-PLW-ME2471)
3360	SV3-FPS-PHW-ME2480	INSTALLATION OF ANNEX FPS PIPING SUPPORTS FOR WP (SV3-FPS-PLW-ME2479)
3361	SV3-FPS-PHW-ME2577	INSTALLATION OF ANNEX FPS PIPING SUPPORTS FOR WP (SV3-FPS-PLW-ME2574)
3362	SV3-FPS-PLW-ME2471	INSTALLATION OF ANNEX FPS PIPING PACKAGE #1
3363	SV4-WRS-PLW-ME1761	INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV4-WRS-PLW-59W, 593, 59E, 59F AND 59X)
3364	SV3-FPS-PLW-ME2479	INSTALLATION OF ANNEX FPS PIPING PACKAGE #2
3365	SV3-FPS-PLW-ME2573	INSTALLATION OF ANNEX FPS PIPING PACKAGE #3
3366	SV3-FPS-PLW-ME2574	INSTALLATION OF ANNEX FPS PIPING PACKAGE #4
3367	SV3-FPS-THW-ME2128	HYDRO TEST PACKAGE FOR UNIT 3 PHASE 1 FIRE PROTECTION SYSTEM (FPS)
3368	SV3-1110-ADW-CV4326	INSTALLATION OF RCDT COMPARTMENT REACTOR CAVITY SHIELD DOOR
3369	SV3-1120-CEW-CV5777	U3 CONTAINMENT CONCRETE CA01 BASEMAT CONNECTION EMBED PLATES EL 87'-6" TO 107'-3"
3370	SV3-1210-ERW-EL3170	AUXILIARY BUILDING UNIT 3, EL 66'-6", AREA 6, INSTALL SCHEDULED CONDUIT AND TYPICAL SUPPORTS.
3371	SV3-1220-ERW-EL2744	Conduit Sleeves, Unit 3 Auxiliary Building Floor Slab, Elevation 82'-6", Area 1 & 2
3372	SV3-1220-ERW-EL3188	INSTALL ELECTRICAL PENETRATIONS IN AUX BUILDING SHIELD WALL FROM 82'-6" TO 100'-0"
3373	SV3-1220-ERW-EL3285	INSTALL ELECTRICAL CONDUIT SLEEVES IN UNIT 3 AUXILIARY BUILDING FLOOR SLAB, 82'-6", SECTION 2, IN ROOMS 12211 & 12212.
3374	SV3-1224-EYW-EL3326	INSTALL CONDUIT SLEEVES FOR PENETRATIONS IN PRECAST CONCRETE PANEL. AND CAST-IN-PLACE CONCRETE (ABOVE PRECAST CONCRETE PANELS) UNIT 3, AUXILIARY BUILDING, ELEVATION 92'-6", AREA 4
3375	SV3-1230-EGW-EL2883	INSTALL GROUNDING GRID AND FLOOR PLATES FOR 100'-0" SLAB AREAS 1, 2 & 3
3376	SV3-1230-EGW-EL2884	INSTALL GROUNDING GRID AND FLOOR PLATES FOR 100'-0" SLAB AREAS 4, 5 & 6
3377	SV3-1230-SSW-CV4311	AUX BLD STRUCTURAL STEEL 82'-6" TO 100'-0" AREA 1 AND 2
3378	SV3-2000-SSW-CV3088	TURBINE BLDG. HOUSE STEEL IN-PROCESS REPAIR/REWORK (SEQ7-SEQ11)

Exhibit V – Legacy, WIP, and Completed Work Packages

Table 3. In-Progress Work Packages (as of October 17, 2017)		
3379	SV3-2020-ERW-EL4488	ELECTRICAL CABLE TRAY INSTALLATION FOR THE TURBINE BUILDING AT ELEVATION 82'-9"
3380	SV3-2033-SHW-EL6791	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE TURBINE BLDG, ELEV 100'-0" AREA 3 FROM COLUMNS 18 TO 19 & L.1 TO P.2
3381	SV3-2038-SHW-EL6796	Electrical Cable Tray Steel Installation in the Turbine Building, Elevation 100'-0", Area 8 from Colmns 12.1 to14 & H.05 to 1.2
3382	SV3-2040-EGW-EL3352	ELECTRICAL GROUNDING TERMINATIONS FOR THE UNIT # 3 TURBINE BUILDING AT ELEVATIONS 117'-6" AND 120'-6".
3383	SV3-2060-CEW-CV4838	UNIT 3 TURBINE BLDG CA81 STEAM TURBINE GENERATOR FOUNDATION ANCHOR BOLT INSTALLATION AT EL. 170'-0"
3384	SV3-2060-SSW-CV7041	TURBINE BLDG HOUSE STEEL IN-PROCESS REPAIR/REWORK (SEQUENCE 12 - SEQUENCE 16)
3385	SV3-2130-CCW-CV5214	UNIT 3 TURBINE BUILDING FIRST BAY MISCELLANEOUS GROUTING AT ELEVATION 100'-0"
3386	SV3-2131-EYW-EL2912	ELECTRICAL WALL PENETRATIONS FOR THE FIRST BAY TURBINE BUILDING AT ELEVATION 100'-0"
3387	SV3-4030-CCW-CV2187	Annex Mat Foundation - Areas 1,2, & 3
3388	SV3-ASS-P0W-ME4206	FABRICATE AND INSTALL AUXILIARY STEAM SYSTEM(ASS) PIPING PORTION 5 FOR 100'-0"
3389	SV3-CA00-S4W-CV5035	UNIT 3 NUCLEAR ISLAND SMC1 OVERLAY PLATE COUPLER TENSILE TESTING FOR STRUCTURAL MODULES
3390	SV3-CA01-V2W-CV5875	CA01 POST LOAD INSPECTIONS FOR SPARE SUPER LIFTING LUGS
3391	SV3-CA20-S4W-CV4395	TEMPORARY ATTACHMENTS FOR CA20 FLOOR ASSEMBLIES
3392	SV3-CAS-PHW-ME2783	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS SV3-CAS-PLW-759
3393	SV3-CCS-PHW-ME2916	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CCS-PLW-091
3394	SV3-CDS-PHW-ME2504	INSTALLATION OF CDS SUPPORTS FOR ISOMETRICS SV3-CDS-PLW-100, SV3-CDS-PLW-101, SV3-CDS-PLW-102, SV3-CDS-PLW-743, SV3-CDS-PLW-910.
3395	SV3-CVS-P0W-ME2825	INSTALLATION OF LARGE BORE CVS PIPING (INCLUDES ISOMETRICS: SV3-CVS-PLW-021, 183)
3396	SV3-CVS-P0W-ME2826	INSTALLATION OF LARGE BORE CVS PIPING (INCLUDES ISOMETRICS: SV3-CVS-PLW-091, 094)
3397	SV3-FPS-P0W-ME2670	FABRICATE AND INSTALL PHASE 5 FIRE PROTECTION SYSTEM (FPS) SOUTH OF THE RAD WASTE BUILDING. (ISO'S SV3-FPS-PLW-951,95BC,95AC,95AD,95AB)
3398	SV3-FPS-PLW-ME4839	INITIAL ENERGIZATION - INSTALLATION OF ANNEX FIRE PROTECTION SYSTEM (FPS) PIPING IAW (ISOMETRICS SV3-FPS-PLW-343, -295)
3399	SV3-HDS-P0W-ME3748	INSTALLATION AND FABRICATION OF HEATER DRIN SYSTEM(HDS) PIPING

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
3400	SV3-ML05-MLW-ME2818	ATTACHMENT OF COLLAR RING FOR SV3-12365-ML-P48, SV3-12365-ML-P03, AND SV3-12365-ML-P25
3401	SV3-ML05-MLW-ME4784	INSTALLATION OF PENETRATION 11205-ML-P03 (CA01)
3402	SV3-ML05-MLW-ME4822	CA01 Penetration 11504-ML-P03 (ASME)
3403	SV3-ML05-MLW-ME4824	INSTALLATION OF PENETRATION 11205-ML-P01 (CA01)
3404	SV3-ML05-MLW-ME5037	INSTALLATION OF CA01 PENETRATIONS
3405	SV3-ML05-MLW-ME5038	INSTALLATION OF CA01 PENETRATIONS
3406	SV3-MS01-MEW-ME4612	INSTALLATION OF WATER-COOLED CENTRIFUGAL WATER CHILLERS SV3-VWS-MS-01A & 01B
3407	SV3-MS19-MEW-ME2639	Install MB Condensate Polisher Spent Resin Holdup Tank (CPS-MV-02)
3408	SV3-MS30-MEW-ME2638	INSTALL TB CHEMICAL SKIDS (CFS-MS-02D/-05C/-06)
3409	SV3-PWS-P0W-ME4944	INITIAL ENERGIZATION - INSTALLATION OF ANNEX PORABLE WATER SYSTEM (PWS) PIPING INCLUDING ISOMETRICS: SV3-PWS-PLW-170, -193, -406, -475, -493, -495 THRU 499
3410	SV3-PXS-P0W-ME2674	Installation of Small Bore PXS Piping (Includes Isometric: SV3-PXS-PLW-66X)
3411	SV3-PXS-P0W-ME2732	ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-01L (LINE NUMBERS PXS-PL-L022A)
3412	SV3-PXS-P0W-ME2733	ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-01M (LINE NUMBERS PXS-PL-L024A)
3413	SV3-PXS-P0W-ME2734	ASME Section III - Fabrication/Installation of Isometric # SV3-PXS-PLW-01N (Line Numbers PXS-PL-L023A)
3414	SV3-PXS-P0W-ME2736	ASME SECTION III- FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-01W (LINE NUMBERS PXS-PL-L059A)
3415	SV3-PXS-P0W-ME2738	ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-01Y (LINE NUMBERS PXS-PL-L136A)
3416	SV3-PXS-P0W-ME2886	ASME SECTION III- FABRICATION/INSTALLATION OF ISOMETRIC#SV3-PXS-PLW-011 (LINE NUMBERS PXS-PL-L015A)
3417	SV3-SWS-PHW-ME5446	FABRICATION AND INSTALLATION OF PIPE SUPPORTS FOR ISOS SV3-SWS-PLW-051, -052, -062, -063
3418	SV3-SWS-PHW-ME5447	FABRICATION AND INSTALLATION OF PIPE SUPPORTS FOR SWS SYSTEM
3419	SV3-SWS-THW-ME6788	HYDRO TEST THE SERVICE WATER SYSTEM (SWS) IN PHASE 3A.
3420	SV3-VAS-MDW-ME4772	FABRICATION AND INSTALLATION OF VAS DUCT IN ROOM 12153

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
3421	SV3-VYS-P0W-ME4478	FABRICATE AND INSTALL ANNEX HOT WATER HEATING SYSTEM (VYS) PIPING IAW (ISOMETRICS SV3-VYS-PLW-431, -432, 433, -434, -438, -439, -444, -445)
3422	SV3-WLS-P0W-ME2908	FABRICATE AND INSTALL UNIT 3 WLS PIPING FROM RADWASTE BUILDING THROUGH PHASE 5
3423	SV3-WLS-PHW-ME3031	INSTALLATION OF SMALL BORE WLS PIPE SUPPORTS ON R104 MODULE
3424	SV3-WRS-P0W-ME2991	INSTALLATION OF SMALL BORE WRS PIPING ON R104 MODULE
3425	SV3-WRS-P0W-ME4429	INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-80A, -80W, -865)
3426	SV3-WRS-PHW-ME4385	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-WRS-PLW-594
3427	SV3-WRS-PHW-ME4386	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-WRS-PLW-65R, 651
3428	SV3-WRS-PLW-ME4452	INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-833, 873)
3429	SV3-WRS-PLW-ME4458	INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-84N, 86M)
3430	SV3-WRS-PLW-ME4469	CA20 LEAK CHASE TESTING PROCEDURE FOR CHANNELS CONNECTING TO THE FUEL TRANSFER CANAL (FHS-MT-02)
3431	SV3-WRS-PLW-ME4470	CA20 LEAK CHASE TESTING PROCEDURE FOR CHANNELS CONNECTING TO THE CASK LOADING PIT (FHS-MT-05)
3432	SV3-WRS-PLW-ME4471	CA20 LEAK CHASE TESTING PROCEDURE FOR CHANNELS CONNECTING TO THE CASK WASHDOWN PIT (FHS-MT-06)
3433	SV3-WWS-P0W-ME2633	ANNEX BUILDING - ELEVATION 115+ WWS PIPING #1
3434	SV3-WWS-P0W-ME2662	WWS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRIC SV3-WWS-PLW-020)
3435	SV3-WWS-P0W-ME2692	Annex Building - Elevation 100+ WWS Piping #3
3436	SV3-WWS-P0W-ME2693	ANNEX BUILDING- ELEVATION 100+ WWS PIPING #4
3437	SV3-WWS-P0W-ME4627	INSTALLATION OF TURBINE BUILDING WWS PIPING FOR SLAB 1 ON 120'-6" ELEVATION
3438	SV3-WWS-P0W-ME4628	INSTALLATION OF TURBINE BUILDING WWS PIPING FOR SLABS 4, 5, 6 ON 120'-6"
3439	SV3-WWS-PHW-ME3073	INSTALLATION OF ANNEX WWS PIPING SUPPORTS (FOR WP SV3-WWS-P0W-ME2692)
3440	SV3-WWS-PHW-ME3075	INSTALLATION OF ANNEX WWS PIPING SUPPORTS (FOR WP SV3-WWS-P0WME2694)
3441	SV3-WWS-PHW-ME3653	INSTALLATION OF TURBINE BUILDING WWS PIPING SUPPORTS FOR ISOMETRICS SV3-WWS-PLW-06B, 06BF, 06D, 06E, 06F, 06G, 06L, 06J, 06K, 06P
3442	SV4-WWS-CCW-CV6768	UNIT 4 WWS DUCTBANK
3443	SV4-WWS-PLW-ME1346	WWS LINE TO WWRB

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Package ID	Description
3444	SV4-CA01-S4W-861784	CA01-SA07 ELEV ABOVE 119' OLPS AND WELDED ATTACHMENTS
3445	SV0-SES-ERW-862927	INSTALL CONDUIT IN SES DUCT BANK/TRENCH FOR SECURITY LOCATED BETWEEN SITE GRID M101-L1502 PHASE 10
3446	SV3-4031-SHW-861531	FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG. AREA 1, ELEV. 100', BETWEEN COLUMN LINES 11.09/11.15 & G/I.
3447	SV3-4000-SHW-862383	FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS, DETAILS C-71, ANNEX BUILDING, ALL AREAS/ELEVATIONS. BOOK 1
3448	SV3-FPS-P0W-854240	INSTALL LB CONTAINMENT UPPER RING HEADER PIPING PER ISO'S SV3-FPS-PLW-552, 55Q, 553, 55R, 55K.
3449	SV3-WWS-P0W-ME2484	WWS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRICS SV3-WWS-PLW-32C, -32E, -32F, -32G)
3450	SV3-WRS-P0W-ME4433	INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-80F)
3451	SV4-0000-CCW-CV7168	Concrete and Rebar for the Diesel and Electric-Driven Pump Enclosure Foundation
3452	SV4-1000-CCW-CV1470	Unit 4 Nuclear Island Basemat Concrete Placement Up To 66'-6"
3453	SV3-WWS-PHW-ME2960	INSTALLATION OF LARGE BORE WWS PIPING SUPPORTS (INCLUDES ISOMETRICS SV3-WWS-PLW-01D)
3454	SV4-1000-CRW-CV1736	UNIT 4, WEST SHIELD WALL REBAR BELOW 100' ELEVATION
3455	SV3-WWS-PHW-ME3043	SV3-WWS-PHW-ME3043
3456	SV4-1000-CRW-CV1744	UNIT 4, SHIELD BUILDING, EAST PERIMETER WALL REBAR FROM 66'-6" TO 82'-6"
3457	SV3-WWS-PHW-ME3045	INSTALLATION OF WWS PIPE SUPPORTS FOR SLAB 3 AT 120' 6" ELEVATION PORTION 3
3458	SV4-1010-CRW-CV1748	INSTALLATION OF #9 AND #11 WALL DOWELS AFTER BASE MAT CONCRETE PLACEMENT
3459	SV4-1020-CRW-CV1745	UNIT 4, SHIELD BUILDING, EAST PERIMETER WALL REBAR FROM 82'-6" TO 100'-0"
3460	SV4-1100-ERW-EL2285	CONTAINMENT BUILDING EX CORE INSTRUMENTATION EMBEDDED CONDUIT EL 71FT-6IN TO 10FT-2IN
3461	SV3-WWS-PHW-ME3072	INSTALLATION OF ANNEX WWS PIPING SUPPORTS (FOR WP SV3-WWS-P0W-ME2691)
3462	SV4-1100-Z0W-CV3929	UNIT 4 CONTAINMENT REINFORCED CONCRETE REQUIREMENTS
3463	SV4-1110-CCW-CV1919	Containment Concrete - EL. 71'-6"
3464	SV4-1110-CCW-CV5151	UNIT 4 INSIDE CVBH CORE DRILLING IN CONCRETE PLACEMENT AT ELEVATION 76'-6"
3465	SV3-WWS-PLW-ME3028	INSTALLTION OF WWS PIPING FOR SLAB 3 AT 120'6" ELEVATION
3466	SV4-1110-CEW-CV1878	CONTAINMENT CONCRETE EMBEDMENTS - EL. 71'-6"

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
3467	SV4-1110-CEW-CV6676	INSTALLATION OF UNIT 4 STEAM GENERATOR COLUMN PEDESTAL EMBEDMENTS
3468	SV4-1110-CRW-CV1837	Containment Vessel Bottom Head Layers A, B, & C
3469	SV4-1120-CEW-CV4911	U4 NUCLEAR ISLAND CONTAINMENT EMBEDS AND ANCHOR BOLTS ELEVATION 71'-6" TO 84'-6"
3470	SV4-1120-CRW-CV3063	CONTAINMENT CONCRETE REINFORCEMENT EL 71 FT-6IN TO EL 76FT-6IN
3471	SV4-2040-SSW-CV3969	UNIT 4 TURBINE BUILDING SEQUENCE 7 HANDRAIL AND STAIRS
3472	SV4-ECS-ERW-EL6124	SV4-INSTALL ECS DUCT BANKS FROM MANHOLES NXM010, NXM011 TO FIRE PUMPS/FIRE WATER TANKS - PHASE 8A
3473	SV4-1120-EGW-EL2342	INSTALL GROUNDING IN UNIT 4 CONTAINMENT BUILDING AT ELEVATION 82' 6" TO 100' 0"
3474	SV4-ECS-ERW-EL6125	SV4-INSTALL ECS DUCT BANKS FROM NORTH SIDE OF UNIT 4 TURBINE BLDG TO CHEMICAL FEED STORAGE BLDG - PHASE 8A
3475	SV4-1200-AXW-CT7673	COATINGS - U4 AUX. BUILDING AREAS 3 & 4 CONCRETE COATINGS
3476	SV4-1200-CRW-CV1741	UNIT 4 NUCLEAR ISLAND AUXILIARY BUILDING-INSTALLATION OF REINFORCING STEEL ON INTERIOR WALLS UP TO 82'-6" (WALL PLACEMENTS 9 THRU 38)
3477	SV4-WRS-P0W-ME5964	FABRICATION AND INSTALLATION OF SMALL BORE WRS PIPING (ISOMETRIC SV4-WRS-PLW-57Q)
3478	SV4-WWS-PLW-ME1766	Installation of Large Bore WWS Piping (Includes Isometrics SV4-WWS-PLW-01B, -01D, -014)
3479	SV4-1210-CCW-CV1815	Unit 4 Nuclear Island Auxiliary Building Concrete Placement For Interior Walls From Elevation 66'-6" (Wall Placements #9 THRU 38) -REV. 0-
3480	SV4-1210-CEW-CV1738	U4 Auxiliary Building Embed Plates-EL 66'6"- Interior Walls
3481	SV4-1210-CEW-CV1739	U4 AUXILIARY BUILDING EMBEDMENTS-CYLINDRICAL WALL-EL. 66'-6"
3482	SV4-1210-EGW-EL1798	INSTALL GROUNDING FOR WALL POURS 1, 3, 4 AND 5
3483	SV4-1210-ERW-EL1810	UNIT 4 AUXILIARY BUILDING, INSTALL ELECTRICAL PENETRATIONS & GROUNDING FOR WALLS 34,35,36,37 & 38. SECTIONS 4,5 & 6. ELEVATION 66'-6" TO 82'-6"
3484	SV4-1210-MLW-CV2466	U4 CIVIL BLOCKOUTS FOR MECHANICAL & ELECTRICAL PENETRATIONS-AUX. BUILDING WALLS EL. 66'-6" TO EL. 82'-6"
3485	SV4-1220-CCW-CV2318	UNIT 4 CONCRETE PLACEMENT OUTSIDE CVBH UP TO ELEVATION 82'-6"
3486	SV4-1220-CCW-CV2540	Unit 4 Nuclear Island Auxiliary Building Concrete Placement for Exterior Walls from Elev. 82'-6" to 100'-0" (Wall Placements 39 thru 48)
3487	SV4-1220-CCW-CV2541	UNIT 4 NUCLEAR ISLAND AUXILIARY BUILDING AREAS 1 AND 2 CONCRETE PLACEMENT FOR INTERIOR WALLS FROM ELEVATION 82'-6" TO 100'-0"

Exhibit V – Legacy, WIP, and Completed Work Packages

Work Package ID	Work Package Description	Work Package Details
3488	SV4-1220-CEW-CV1612	Unit 4 Nuclear Island AUX. BLDG AREAS 1 THRU 6 - EL 82' -6 WALLS- MECHANICAL/ELECTRICAL PENETRATION BLOCKOUTS & BLOCKOUT EMBEEMENTS
3489	SV4-1220-CEW-CV2434	U4 AUXILIARY BUILDING EMBED PLATES & FORM WORK FOR AREA 1-EL 82'-6" WALLS
3490	SV4-1220-CEW-CV2436	U4 AUXILIARY BUILDING EMBED PLATES & TEMPORARY FORMWORK-AREA 3 & 4- EL. 82'-6" WALLS
3491	SV4-1220-CRW-CV2538	UNIT 4 NUCLEAR ISLAND AUXILIARY BUILDING - INSTALLATION OF REINFORCING STEEL ON EXTERIOR WALLS FROM ELEV. 82'6" TO 100'0" (WALL PLACEMENTS 39 THRU 48)
3492	SV4-1220-CRW-CV2539	UNIT 4 NUCLEAR ISLAND AUXILIARY BUILDING AREAS 1 AND 2 INSTALLATION OF REINFORCING STEEL ON INTERIOR WALLS FROM ELEV. 82'6" TO 100;0" (WALL PLACEMENTS 49 THRU 71)
3493	SV4-1220-EGW-EL2723	INSTALL GROUNDING GRID AND FLOOR PLATES FOR 82'-6" SLAB AREAS 1,2 & 3
3494	SV4-1220-EGW-EL2724	INSTALL GROUNDING GRID AND FLOOR PLATES FOR 82'-6" SLAB AREAS 4, 5 & 6
3495	SV4-1220-EGW-EL5784	Install Grounding For Shield Wall Elevation 82'-6" to 100'-0"
3496	SV4-1230-EGW-EL3664	ISNTALL GROUNDING GRID AND FLOOR PLATES FOR 100'-0" SLAB AREAS 1,2 & 3
3497	SV4-1230-EGW-EL3665	INSTALL GROUNDING GRID AND FLOOR PLATES FOR 100'-0" SLAB AREAS 4,5, & 6
3498	SV3-2056-SHW-800003	Elect Cable Tray Welded Support Fab & Install in Unit 3 Turbine Building, Elevation 141' 3", Area 6
3499	SV4-2000-T2W-CV1584	HSB Assembly & Installer Qualification For Turbine Building
3500	SV4-2020-CCW-CV0388	Unit 4, Turbine Building Grout below Elev. 100'
3501	SV4-2020-EGW-EL3437	ELECTRICAL GROUNDING TERMINATIONS FOR THE TURBINE BUILDING AT ELEVATION 82'-9"
3502	SV4-2020-MEW-ME1128	Unit 4 Condenser A Hotwell Assembly
3503	SV4-2020-MEW-ME1129	Unit 4 Condenser B Hotwell Assembly
3504	SV4-2020-MEW-ME1130	Unit 4 Condenser C Hotwell Assembly
3505	SV4-2020-MEW-ME1131	Unit 4 Condenser A Lower Tube Bundle Assembly
3506	SV4-2020-MEW-ME1132	Unit 4 Condenser B Lower Tube Bundle Assembly
3507	SV4-2020-MEW-ME1133	Unit 4 Condenser C Lower Tube Bundle Assembly
3508	SV4-2020-MEW-ME1134	Unit 4 Condenser A Upper Tube Bundle Assembly
3509	SV4-2020-MEW-ME1135	Unit 4 Condenser B Upper Tube Bundle Assembly
3510	SV4-2020-MEW-ME1136	Unit 4 Condenser C Upper Tube Bundle Assembly
3511	SV4-2020-MEW-ME1137	Unit 4 Condenser A Upper Shell Exterior Shell Assembly
3512	SV4-2020-MEW-ME1138	Unit 4 Condenser A Upper Shell Heater Truss Assembly

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
3513	SV4-2020-MEW-ME1139	Unit 4 Condenser A Upper Shell Upper Truss Assembly
3514	SV4-2020-MEW-ME1141	Unit 4 Condenser B Upper Shell Exterior Shell Assembly
3515	SV4-2020-MEW-ME1145	Unit 4 Condenser C Upper Shell Exterior Shell Assembly
3516	SV4-2020-MEW-ME1146	Unit 4 Condenser C Upper Shell Heater Truss Assembly
3517	SV4-2020-MEW-ME1147	Unit 4 Condenser C Upper Shell Upper Truss Assembly
3518	SV4-2020-MEW-ME1400	Unit 4 Condenser A Spring Support Foundation Installation
3519	SV4-2020-MEW-ME1401	UNIT 4 CONDENSER B SPRING SUPPORT FOUNDATION INSTALLATION
3520	SV4-2020-MEW-ME1402	Unit 4 Condenser C Spring Support Foundation Installation
3521	SV4-2020-MEW-ME1491	UNIT 4 CONDENSER A INSTALLATION (LOWER & UPPER SHELL)
3522	SV4-2020-MEW-ME1492	UNIT 4 CONDENSER B INSTALLATION (LOWER & UPPER SHELL)
3523	SV4-2020-MEW-ME1493	Unit 4 Condenser C Installation (Lower & Upper Shell)
3524	SV4-2020-MEW-ME1600	UNIT 4 CONDENSER A FLASHBOX INSTALLATION
3525	SV3-WWS-P0W-ME4630	INSTALLATION OF WWS PIPING
3526	SV4-2030-CCW-CV0385	UNIT 4 TURBINE BUILDING CONCRETE CURBS AND PADS AT 100' ELEVATION
3527	SV4-2030-CCW-CV0389	UNIT 4 TURBINE BUILDING GROUT AT THE 100' ELEVATION
3528	SV4-2030-CCW-CV1458	UNIT 4, TURBINE BUILDING STAIR LANDINGS
3529	SV4-2030-CEW-CV1389	UNIT 4 TURBINE BLDG FABRICATION OF CONSTRUCTION AIDS FOR 100'-0"
3530	SV4-2030-EGW-EL1079	Electrical Grounding Installation for the Turbine Building at Elevation 100'-0"

3563	SV4-CES-P0W-ME7576	Installation of CES piping (Portion 1)
3564	SV4-CPS-P0W-ME1668	UNIT 4 TURBINE BUILDING EL 100'-0": FABRICATION & INSTALLATION OF EMBEDDED CPS PIPING

Exhibit V – Legacy, WIP, and Completed Work Packages

Table 3. In-Progress Work Packages (as of October 17, 2017)		
3565	SV4-CR10-CRW-CV1154	The Erection of Structural Steel for the CR10 module on Pad 139
3566	SV4-CR10-CRW-CV1416	INSTALLATION OF CR 10 UNIT 4 NUCLEAR ISLAND REINFORCING STEEL LAYERS 4-10
3567	SV4-CWS-ERW-EL0352	Electrical Installation of (CWS) Cooling Water System Manholes & Duct Banks
3568	SV4-CWS-P0W-ME1713	INSTALLATION OF LARGE BORE CWS PIPING AT GRIDLINE R
3569	SV4-CWS-P0W-ME2758	Installation of CWS Piping from Backwash Strainers to Yard.
3570	SV4-CWS-P0W-ME5457	TO INSTALL AND FABRICATE CIRCULATING WATER SYSTEM (CWS) PIPING
3571	SV4-CWS-P0W-ME7467	INSTALLATION OF CROSSOVER PIPING FROM CONDENSER A TO CONDENSER B
3572	SV4-CWS-P0W-ME7468	INSTALLATION OF CROSSOVER PIPING FROM CONDENSER B TO CONDENSER C
3573	SV4-CWS-PHW-ME1716	INSTALLATION OF LARGE BORE CWS PIPING SUPPORTS AT GRIDLINE R
3574	SV4-CWS-PHW-ME5470	INSTALLATION AND FABRICATION OF AUXILIARY STEAM SUPPLY SYSTEM (ASS) PIPING SUPPORT
3575	SV4-CWS-PHW-ME7469	INSTALLATION OF PIPE SUPPORTS FOR 120" CROSSOVER PIPING FROM CONDENSER A TO CONDENSER B
3576	SV4-CWS-PHW-ME7470	INSTALLATION OF PIPE SUPPORTS FOR 120" CROSSOVER PIPING FROM CONDENSER 'B' TO CONDENSER 'C'
3577	SV4-DTS-P0W-ME1714	INSTALLATION OF DTS PIPING FROM YARD TO CARTRIDGE FILTER SKID SV4-DTS-MS-01
3578	SV4-DTS-PHW-ME1717	INSTALLATION OF DTS PIPING SUPPORTS FROM YARD TO CARTRIDGE FILTER SKID SV4-DTS-MS-01
3579	SV4-FPS-MPW-ME7582	Install Unit 4 Diesel Fire Pump Package SV4-FPS-MS-01B
3580	SV4-FPS-P0W-ME1943	INSTALLATION OF LARGE BORE FPS PIPING (INCLUDES ISOMETRICS: SV4-FPS-PLW-820, 825, 830)
3581	SV4-HDS-P0W-ME5463	INSTALLATION AND FABRICATION OF HEATER DRAIN SYSTEM(HDS) PIPING
3582	SV4-ME01-P0W-ME2589	UNIT 4 CONDENSERS A, B & C - TURBINE BYPASS PIPING
3583	SV4-ME01-PLW-ME0992	Unit 4 Condenser A: Installation of Hotwell Piping
3584	SV4-ME01-PLW-ME1000	Unit 4 Condenser B: Installation of Hotwell Piping
3585	SV4-ME01-PLW-ME1002	UNIT 4 CONDENSER C: INSTALLATION OF HOTWELL PIPING
3586	SV4-ME01-PLW-ME1004	UNIT 4 CONDENSER A: INSTALLATION OF UPPER SHELL NOZZLE CONNECTIONS
3587	SV4-ME2W-MEW-ME3012	INSTALLATION OF HDS DRAIN COOLER CDS-ME-7A
3588	SV4-ME2W-MEW-ME3019	INSTALLATION OF HDS DRAIN COOLER CDS-ME-7B
3589	SV4-ME2W-MEW-ME3020	INSTALLATION OF HDS DRAIN COOLER CDS-ME-7C
3590	SV4-ME3C-MEW-ME2970	INSTALLATION OF TCS HEAT EXCHANGERS SV4-TCS-ME-01A/B/C

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
3591	SV4-ML05-MLW-ME4811	INSTALLATION OF EMBEDDED PIPING PENETRATIONS 82'-6" FLOORS ONLY
3592	SV4-ML05-MLW-ME5280	INSTALLATION OF 82'6" WALL PENETRATIONS
3593	SV4-ML05-MLW-ME5281	WELDING OF NELSON STUDS 82'6" WALL PENETRATIONS
3594	SV4-ML05-MLW-ME6290	INSTALLATION OF ANNULUS WALL PENETRATIONS 82'6 TO 100'0
3595	SV4-MP03-MPW-ME2343	UNIT 4 TURBINE BUILDING EL82'-9": INSTALLATION OF CONDENSATE SYSTEM (CDS) PUMPS SV4-CDS-MP-01A/B/C
3596	SV4-MP1H-MPW-ME7109	INSTALLATION OF TURBINE BUILDING CLOSED COOLING WATER PUMPS (TCS-MP-01A/B)
3597	SV4-MP2D-MPW-ME6764	INSTALLATION OF HDS SHELL DRAIN TANK PUMP SV4-HDS-MP-01A
3598	SV4-MP2D-MPW-ME6765	INSTALLATION OF HDS SHELL DRAIN TANK PUMP SV4-HDS-MP-01B
3599	SV4-MS13-MSW-ME5923	INSTALLATION OF THE BALL COLLECTOR SKID (MS-01A/B)
3600	SV4-MS13-MSW-ME5924	Installation of Ball Recirculation Pump (MS-02A/B)
3601	SV4-MS21-MSW-ME5919	INSTALLATION OF THE CONDENSER HOTWELL SAMPLE PUMPS (SSS-MS-01 A/B/C)
3602	SV4-1110-CCW-CV3190	Containment Interior Concrete Placement - Elev. 71'-6" to 76'-6"
3603	SV4-MS45-MSW-ME3024	INSTALLATION OF MAIN & BOOSTER FEEDWATER PUMPS SV4-FWS-MP-01A/-02A
3604	SV4-MS45-MSW-ME3025	INSTALLATION OF MAIN & BOOSTER FEEDWATER PUMPS SV4-FWS-MP-01B/-02B
3605	SV4-MS45-MSW-ME3026	INSTALLATION OF MAIN & BOOSTER FEEDWATER PUMPS SV4-FWS-MP-01C/02C
3606	SV4-MS60-MSW-ME5879	INSTALLATION OF THE AUXILIARY BIOLER (ASS-MB-01)
3607	SV4-MS60-MSW-ME5920	INSTALLATION OF THE AUXILIARY BOILER BLOWDOWN FLASH TANK (ASS-MT-01)
3608	SV4-MS60-MSW-ME5921	INSTALLATION OF THE AUXILIARY BOILER FEED PUMPS (ASS-MP-04A/)
3609	SV4-MS60-MSW-ME7100	INSTALLATION OF THE AUX BOILER MAKEUP PUMPS (ASS-MP-01A/B)
3610	SV4-1220-CEW-CV2435	U4 AUXILIARY BUILDING EMBED PLATES & FORMWORK-AREA 2-EL.82'-6"
3611	SV4-PGS-P0W-ME1997	INSTALLATION OF PGS PIPING (INCLUDES SV4-PGS-PLW-105, 128)
3612	SV4-PV74-PVW-ME3071	INSTALLATION OF 120" CWS BUTTERFLY VALVES CWS-PL-V002A, -V002B, -V003A, -V003B
3613	SV4-1220-CEW-CV2437	U4 AUXILIARY BUILDING EMBED PLATES & FORMWORK- AREA 5&6- EL, 82'-6" WALLS
3614	SV4-PWS-P0W-ME2003	INSTALLATION OF SMALL BORE PWS PIPING (INCLUDES ISOMETRIC SV3-PWS-PLW-91A, 911, 950, 951, 952, 953)

Exhibit V – Legacy, WIP, and Completed Work Packages

Work Package ID	Work Package Description	Task Description
3615	SV4-2000-CRW-CV2974	UNIT 4 TURBINE BLDG. REBAR BENDING AND FABRICATION
3616	SV4-PWS-P0W-ME2005	Installation of Potable Water Piping (Isometric PWS-PLW-923)
3617	SV4-2000-SUW-CV1821	ASSEMBLY AND ERECTION OF CH82 MODULE IN AREA 111
3618	SV4-PWS-PHW-ME5965	FABRICATION/INSTALLATION OF SMALL BORE PWS PIPING SUPPORTS FOR ISOMETRIC DRAWING SV4-PWS-PLW-91A, 911, 950, 951, 952, 953
3619	SV4-PY05-PYW-ME2756	INSTALLATION OF SWS BACKWASH STRAINERS (SWS-PY-S06A, SWS-PY-S06B)
3620	SV4-2000-SUW-CV1822	Assembly and Erection Of CH81A, B, & C
3621	SV4-PY05-PYW-ME2757	INSTALLATION OF CWS BACKWASH STRAINERS (CWS-PY-S01A, CWS-PY-S01B, CWS-PY-S01C)
3622	SV4-CA01-MHW-862926	CA01 LIFTING LUGS FOR THE PRESSURIZER COMPARTMENT
3623	SV4-CWS-PLW-ME1115	UNIT 4 CWS FROM PCCP TO TURBINE BUILDING
3624	SV4-RWS-P0W-ME7380	FABRICATE AND INSTALL THE RWS SUPPLY TO THE UNIT 4 COOLING TOWER BASINS A & B AND TO THE DTS PRETREATMENT SKID
3625	SV4-SS01-Z0W-CV4378	STRUCTURAL STEEL SAFETY CLASS E REQUIREMENTS
3626	SV4-SWS-CCW-CV2646	UNIT 4, SWS TRENCH TUNNEL
3627	SV4-WLS-PHW-ME3286	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS WLS-PLW-364, -870
3628	SV4-SWS-CRW-CV5484	UNIT 4, SWS TRENCH TUNNEL, MECHANICAL COUPLER INSTALLATION
3629	SV4-SWS-P0W-ME1715	UNIT 4 TURBINE BUILDING AREA 2022: INSTALLATION OF SWS PIPING FOR ISOMETRICS SV4-SWS-PLW-090, -091, -092, -093, -094 & -095.
3630	SV4-SWS-P0W-ME2124	FABRICATION AND INSTALLATION OF SWS PIPING FROM YARD TO STRAINER SV4-SWS-PY-S06A
3631	SV4-SWS-P0W-ME2125	FABRICATION AND INSTALLATION OF SWS PIPING FROM YARD TO STRAINER SV4-SWS-PY-S06B
3632	SV4-SWS-P0W-ME3509	INSTALLATION OF SWS PIPING FROM BACKWASH STRAINER SWS-PY-S06A TO SWS PUMP SWS-MP-01A
3633	SV4-SWS-P0W-ME3510	INSTALLATION OF SWS PIPING FROM BACKWASH STRAINER SWS-PY-S06B TO SWS PUMP SWS-MP-01B
3634	SV4-SWS-P0W-ME7379	SERVICE WATER SYSTEM (SWS) PIPING INSTALLATION IN PHASE 8A
3635	SV4-SWS-PHW-ME1718	FABRICATION AND INSTALLATION OF PIPE SUPPORTS FOR ISOMETRICS SV4-SWS-PLW-090, -091, -092
3636	SV4-SWS-PHW-ME2355	Installation of SWS Supports For Isometrics SV4-SWS-PLW-07A, SV4-SWS-PLW-07B, SV4-SWS-PLW-070, SV4-SWS-PLW-071, SV4-SWS-PLW-072, SV4-SWS-PLW-078.
3637	SV4-SWS-PHW-ME2357	INSTALLATION OF SWS SUPPORTS FOR INOMETRICS SV4-SWS-PLW-07C, SV4-SWS-PLW-07D, SV4-SWS-PLW-074, SV4-SS-PLW-075, SV4-SWS-PLW-076, SV4-SWS-PLW-077

Exhibit V – Legacy, WIP, and Completed Work Packages

Work Package ID	Work Package Description	Task Description
3638	SV4-SWS-PHW-ME2359	INSTALLATION OF SWS SUPPORTS FOR ISOMETRICS SV4-SWS-PLW-07E, SV4-SWS-PLW-073, SV4-SWS-PLW-079.
3639	SV4-SWS-PHW-ME2361	INSTALLATION OF SWS SUPPORTS FOR ISOMETRICS SV4-SWS-PLW-010, SV4-SWS-PLW-020
3640	SV4-SWS-PHW-ME2365	INSTALLATION OF SWS SUPPORTS FOR ISOMETRICS SV4-SWS-PLW-051, SV4-SWS-PLW-052, SV4-SWS-PLW-053,
3641	SV4-SWS-PHW-ME3303	FABRICATION AND INSTALLATION OF PIPE SUPPORTS FOR SWS PIPING FROM CCS-ME-01A TO YARD
3642	SV4-SWS-PHW-ME3304	FABRICATION AND INSTALLATION OF PIPE SUPPORTS FOR SWS PIPING FROM CCS-ME-01B TO YARD
3643	SV4-SWS-PHW-ME3516	INSTALLATION OF SWS PIPING SUPPORTS FROM BACKWASH STRAINER SWS-PY-S06A TO SWS PUMP SWS-MP01A
3644	SV4-SWS-PHW-ME3517	INSTALLATION AND FABRICATION OF SERVICE WATER SYSTEM (SWS) PIPING SUPPORTS
3645	SV4-SWS-PLW-ME2354	INSTALLATION OF SWS PIPING FOR ISOMETRICS SV4-SWS-PLW-07A, SV4-SWS-PLW-07B, SV4-SWS-PLW-070, SV4-SWS-PLW-071, SV4-SWS-PLW-072, SV4-SWS-PLW-078.
3646	SV4-SWS-PLW-ME2356	INSTALLATION OF SWS PIPING FOR ISOMETRICS SV4-SWS-PLW-07C, SV4-SWS-PLW-07D, SV4-SWS-PLW-074, SV4-SWS-PLW-075, SV4-SWS-PLW-076, SV4-SWS-PLW-077
3647	SV4-SWS-PLW-ME2358	Installation of SWS Piping for Isometrics SV4-SWS-PLW-07E,SV4-SWS-PLW-073,SV4-SWS-PLW-079
3648	SV4-SWS-PLW-ME2360	INSTALLATION OF SWS PIPING FOR ISOMETRICS SV4-SWS-PLW-010 AND SV4-SWS-PLW-020
3649	SV4-SWS-THW-ME7382	Hydro Test the Service Water System (SWS) in Phase 8A
3650	SV4-TCS-P0W-ME5464	INSTALLATION AND FABRICATION OF TURBINE BUILDING CLOSED COOLING WATER SYSTEM (TCS) PIPING
3651	SV4-TCS-P0W-ME5465	INSTALLATION AND FABRICATION OF TURBINE BUILDING CLOSED COOLING WTER SYSTEM (TCS) PIPING
3652	SV4-WLS-CCW-CV2849	Unit 4 Nuclear Island- Grout Placement under the Liquid Radwaste System (WLS) Tanks
3653	SV4-WLS-MTW-ME1802	WASTE HOLDUP TANK A INSTALLATION
3654	SV4-WLS-MTW-ME1803	WASTE HOLDUP TANK B INSTALLATION
3655	SV4-WLS-MTW-ME1804	WLS MONITOR TANK C INSTALLATION
3656	SV4-PXS-PHW-851018	INSTALL SV4 RING 2 SUPPORTS FROM PIPE ISOMETRIC SV4-PXS-PLW-935
3657	SV4-SFS-P0W-850860	INSTALL ISOMETRIC SV4-SFS-PLW-860
3658	SV4-RNS-P0W-861627	ASME III FABRICATION/INSTALLATION OF CA20 LARGE BORE PIPING FOR ISOMETRIC SV4-RNS-PLW-09B
3659	SV4-PXS-PHW-851024	INSTALL SV4 RING 2 SUPPORTS FROM PIPE ISOMETRIC SV4-PXS-PLW-946
3660	SV4-1110-ADW-800000	RCDT Compartment, Reactor Cavity Shield Door Installation

Exhibit V – Legacy, WIP, and Completed Work Packages

Table 3. In-Progress Work Packages (as of October 17, 2017)		
3661	SV3-2055-SHW-862713	INSTALLATION OF WELDED SUPPORTS IN THE UNIT 3 TURBINE BUILDING, ELEVATION 141'-3", AREA 5
3662	SV0-0000-C0W-862928	300 SERIES BUILDINGS SMALL TRANSFORMER FOUNDATIONS
3663	SV3-1120-EJW-862943	FABRICATION & INSTALLATION OF DESIGN JUNCTION BOX / CONDUIT SUPPORTS IN ROOM 11208
3664	SV4-DWS-THW-862256	DWS PRESSURE TEST
3665	SV4-CAS-P0W-855038	INSTALL PIPE AND SUPPORTS FOR ISO SV4-CAS-PLW-843
3666	SV4-DWS-P0W-855008	SMALL BORE PIPE ISO SV4-DWS-PLW-725 & SUPPORTS
3667	SV4-VWS-P0W-855009	LARGE BORE PIPE ISO. SV4-VWS-PLW-50A, CONTAINMENT RM 11702
3668	SV4-VWS-P0W-855023	INSTALL LARGE BORE PIPE SV4-VWS-PLW-532
3669	SV4-VWS-PHW-855018	CONTAINMENT BUILDING- INSTALLATION OF SUPPORTS ISO SV4-VWS-PLW-50Y
3670	SV3-WWS-PHW-860661	FABRICATION AND INSTALLATION OF WWS PIPING SUPPORTS
3671	SV4-WRS-P0W-862456	INSTALLATION OF ANNEX BLDG WRS PIPING (ISO SV4-WRS-PLW-454, 455, 464, 465, 466, 467, 469 & 474)
3672	SV4-DWS-P0W-861602	INSTALLATION OF ANNEX BLDG DWS PIPING (ISO SV4-DWS-PLW-130 & 131)
3673	SV4-MSS-PHW-860361	INSTALLATION AND FABRICATION OF MAIN STEAM SYSTEM (MSS) PIPING SUPPORTS
3674	SV3-2053-SHW-862021	ELECTRICAL CABLE TRAY SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 141'3", AREA 3
3675	SV3-ZAS-ERW-EL3253	INSTALL CABLE TRAY & RACEWAY FOR UNIT AUX. TRANSFORMER ZAS-ET-2C, IN TRANSFORMER AREA NORTH OF TURBINE BUILDING.
3676	SV3-1231-C0W-850000	100' ELEV, FLOOR SLAB AREA 1 (SP-17)
3677	SV3-2033-SHW-862395	ELECTRICAL CABLE TRAY WELDED SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 100'0" , AREA 3
3678	SV3-1231-ERW-861084	Install Electrical Penetration Sleeves for Interior and Exterior Walls EL 100'-0" to 117'-6", Area 1, Unit 3 AUX
3679	SV3-2053-SHW-862688	INSTALLATION OF BUSS DUCT SUPPORTS IN TURBINE BUILDING (ELEV. 141'3" AREA 3) (ROOM 20502)
3680	SV3-1232-C0W-850000	100' Elev., Floor Slab Area 2, (SP-18)
3681	SV4-CAS-P0W-850083	SMALL BORE PIPE ISO SV4-CAS-PLW-83H & SUPPORTS
3682	SV3-2053-SHW-862687	INSTALLATION OF BUSS DUCT SUPPORTS IN TURBINE BUILDING (ELEV. 141'3" AREA 3) ROMM 20501
3683	SV4-4030-C0W-850009	UNIT 4 ANNEX BUILDING AREA 3 SLAB AT ELEV. 107'-3" REINFORCING STEEL

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Package ID	Description
3684	SV3-4000-SHW-862382	FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS, DETAIL C-70, ANNEX BUILDING, ALL AREAS / ELEVATIONS BOOK 1
3685	SV3-4031-SHW-861530	FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG. AREA 1, ELEV. 100', BETWEEN COLUMN LINES 11.09/11.15 & E/G.
3686	SV4-4031-ERW-862034	INSTALLATION OF CONDUIT PENETRATION SLEEVES, ANNEX BUILDING, AREA 1, ELEV. 100'-0"
3687	SV4-4032-ERW-862035	INSTALLATION OF CONDUIT PENETRATION SLEEVES, ANNEX BUILDING, AREA 2 ELEV. 100'-0"
3688	SV3-4000-SHW-862354	FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS, DETAIL C-204, ANNEX BUILDING, ALL AREAS/ ELEVATIONS BOOK 1
3689	SV3-TDS-P0W-860846	INSTALLATION AND FABRICATION OF TURBINE ISLAND DRAINS VENTS AND RELEIF SYSTEM (TDS) PIPING
3690	SV3-MH01-EYW-862916	UNIT 3 CONTAINMENT POLAR CRANE RUNWAY MAINLINE SUPPORTS AND MAINLINE CONDUCTOR BAR ASSEMBLIES
3691	SV3-4031-SHW-861535	FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG. AREA 1, ELEV. 100', BETWEEN COLUMN LINES 11.15/13 & F/G.
3692	SV3-4000-SHW-862384	FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS, DETAIL C-82, ANNEX BUILDING, ALL AREAS/ ELEVATION BOOK 1
3693	SV3-4031-SHW-861534	FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG. AREA 1, ELEV. 100', BETWEEN COLUMN LINES 11.15/13 & G/H.
3694	SV3-ML05-MLW-860960	Installation of Pipe Penetrations 117'-135' South Shield Wall
3695	SV3-RNS-PHW-861876	ASME SECTION III – FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-015
3696	SV4-PXS-P0W-850430	INSTALL ISOMETRIC SV4-PXS-PLW-430
3697	SV4-CA01-S4W-862815	CA01 BASEMAT SA7 INSTALLATION
3698	SV4-ME01-MEW-862758	UNIT 4 CONDENSERS A, B & C: INSTALLATION OF UPPER SHELL MANHOLES
3699	SV3-1237-SHW-860350	INSTALL CONDUIT SUPPORTS ON SHIELD WALL AZ-225' TO AZ-270' 100'-0"
3700	SV3-CA37-ERW-861473	FABRICATION AND INSTALLATION OF ELECTRICAL PENETRATIONS IN THE CA37 MODULE
3701	SV3-CA20-ERW-EL7472	MODULE CA20 UNIT, SUB-ASSEMBLY I AND II EL. 66'6" TO 92'6", INSTALL DESIGNED CABLE TRAYS AND SUPPORTS
3702	SV4-RNS-P0W-861622	ASME III FABRICATION/INSTALLATION OF CA20 LARGE BORE PIPING FOR ISOMETRIC SV4-RNS-PLW-09A
3703	SV3-PXS-MYW-862725	FABRICATION/INSTALLATION OF 2A CONTAINMENT RECIRCULATION SCREEN
3704	SV3-MG01-MEW-862024	STEAM TURBINE WELDING
3705	SV3-CA56-S5W-862415	CA56 MODULE FABRICATION

Exhibit V – Legacy, WIP, and Completed Work Packages

Work Package ID	Work Package Description	Task Description
3706	SV4-WWS-P0W-862701	INSTALLATION AND FABRICATION OF WASTE WATER SYSTEM (WWS) PIPING ON 158'7" AND 156'0" SLABS
3707	SV4-1208-C0W-850005	UNIT 4 AUXILIARY EL 100' CYLINDRICAL WALLS CIVIL RC05A AND B
3708	SV4-ML05-MLW-862027	INSTALLATION OF UNIT 4 CA20 FLOOR PENETRATIONS
3709	SV3-PXS-MYW-862726	FABRICATION/INSTALLATION OF 2B CONTAINMENT RECIRCULATION SCREEN
3710	SV3-1154-SHW-800000	Fabricate and Install Welded conduit supports in Containment Area 4 Elev. 135'3"
3711	SV3-CDS-PHW-860478	INSTALLATION OF CDS SUPPORTS FOR ISOs SV3-CDS-PLW-730, 731, 732, 733 AND 734
3712	SV4-CA01-S4W-862914	CA01 SA07 ELEV 107'-119' OVERLAY PLATES (OLPS)
3713	SV4-WWS-PHW-862813	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR UNIT 4 TRANSFORMER AREA SUMP SV4-WWS-MTW-010
3714	SV4-ME01-PLW-861893	UNIT 4 CONDENSER C: FABRICATION & INSTALLATION OF 3RD EXTRACTION STEAM PIPING
3715	SV4-ME01-PLW-861894	UNIT 4 CONDENSER C: FABRICATION & INSTALLATION OF 4TH EXTRACTION STEAM PIPING
3716	SV4-ME01-PLW-861891	UNIT 4 CONDENSER C: FABRICATION & INSTALLATION OF 1ST EXTRACTION STEAM PIPING
3717	SV4-ME01-PLW-861892	UNIT 4 CONDENSER C: FABRICATION & INSTALLATION OF 2ND EXTRACTION STEAM PIPING
3718	SV4-ME01-PLW-861888	UNIT 4 CONDENSER B: FABRICATION & INSTALLATION OF 2ND EXTRACTION STEAM PIPING
3719	SV3-1234-ERW-862935	INSTALL CONDUIT SLEEVES FOR PENETRATIONS IN PRECAST CONCRETE PANELS SV3-1234-CP-S01 TO SV3-1234-CP-S03 UNIT 3 AUXILIARY BUILDING ELEV 92'-6" AREA 4
3720	SV0-0000-XEW-CV0868	Trench/Excavation For Commodity Installation in Non-Safety Areas (All NOI-s)
3721	SV0-PWS-THW-ME2056	HYDRO TEST THE HDPE PORTION OF THE POTABLE WATER SYSTEM (PWS)
3722	SV3-0150-ERW-EL2314	INSTALLATION OF CONDUIT SLEEVES FOR PENETATION IN UNIT 3 TRANSFORMER AREA
3723	SV3-1110-ERW-EL1532	U3-CONTAINMENT CONDUIT SUPPORTS ROOM 11104 AND EL 71'6" TO 84'-6"
3724	SV3-1220-EGW-EL2411	INSTALL GROUNDING GRID AND FLOOR PLATES FOR 82'-6" SLAB AREAS 4,5 & 6
3725	SV3-4034-EGW-EL2353	PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (EGS-GROUNDING) FOR THE ANNEX BLDG., AREA 4, ELEV.100'- BETWEEN COLUMN LINES (7.9) TO (15.2)
3726	SV3-4034-ERW-EL2352	PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (EMBEDDED CONDUIT) FOR THE ANNEX BLDG., AREA 4, 100' - BETWEEN COLUMN LINES (7.9) TO (15.2).

Exhibit V – Legacy, WIP, and Completed Work Packages

Table 3. In-Progress Work Packages (as of October 17, 2017)		
3727	SV3-6000-EGW-EL2317	PERFORM INSTALLATION OF UNDERGROUND GROUNDING COMMODITIES DIESEL GENERATOR BUILDING AREA 1 & 2 ELEVATION 100' BETWEEN COLUMN LINES (BD) & (AAD)
3728	SV3-CA01-CRW-CV2290	FABRICATION OF REBAR FOR CA01 MODULE
3729	SV3-CPS-PHW-ME2122	FABRICATION AND INSTALLATION OF CPS PIPING SUPPORTS FROM ELEVATION 100'-0" TO SUMPS SV3-WWS-MT-09A&B
3730	SV3-DTS-PHW-ME1516	FABRICATE AND INSTALL DEMINERALIZED WATER TREATMENT SYSTEM (DTS) SUPPORTS PORTION 2 - (RAW WATER SUPPLY TO DTS-MS-01)
3731	SV3-ML10-MLW-ME2123	PLACEMENT OF CONTAINMENT PENETRATIONS P19, P20, P22
3732	SV3-MS60-MEW-ME1676	INSTALLATION OF AUXILIARY BOILER DEAERATOR (ASS-ME-01)
3733	SV3-WRS-PLW-ME4468	CA20 LEAK CHASE TESTING PROCEDURE FOR CHANNELS CONNECTING TO THE SPENT FUEL POOL (FHS-MT-01)
3734	SV3-WWS-PLW-ME1345	WWS LINE TO WWRB'S
3735	SV0-0000-EGW-EL3556	PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (SV0 SITE STATION GROUNDING GRID) FOR GROUND GRID AREA K1200
3736	SV0-010-ERW-EL6243	Supplemental Steel Beam Installation for Cable Tray Supports @ 315 Bldg.
3737	SV3-0000-CCW-CV7067	Concrete and Rebar for Diesel and Electric-Driven Fire Pump Enclosure Foundation
3738	SV3-1103-ERW-EL5391	11208 RNS VALVE ROOM X CONDUITS
3739	SV4-WLS-MTW-ME1805	WLS CHEMICAL WASTE TANK INSTALLATION
3740	SV4-WLS-P0W-ME1910	FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-752.
3741	SV4-WLS-P0W-ME1911	FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-753.
3742	SV4-WLS-P0W-ME1912	FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-755.
3743	SV4-WLS-P0W-ME1913	FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-756.
3744	SV4-WLS-P0W-ME1914	FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-758.
3745	SV4-WLS-P0W-ME1915	FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-759.
3746	SV4-WLS-P0W-ME1916	FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-75C.
3747	SV4-WLS-P0W-ME1917	FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-75E.
3748	SV4-WLS-P0W-ME1918	FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-785.

Exhibit V – Legacy, WIP, and Completed Work Packages

Work Package ID	Work Package Description	ASME SECTION III - FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING#
3749	SV4-WLS-P0W-ME1935	SV4-WLS-PLW-730
3750	SV4-WLS-P0W-ME1936	SV4-WLS-PLW-740
3751	SV4-WLS-P0W-ME1937	SV3-WLS-PLW-751
3752	SV4-WLS-P0W-ME3113	INSTALLATION OF LARGE BORE WLS PIPING (INCLUDES ISOMETRIC SV4-WLS-PLW-071)
3753	SV4-WLS-P0W-ME3115	INSTALLATION OF LARGE BORE WLS PIPING LINES WLS-PL-L079 & L131C OF ISOMETRIC SV4-WLS-PLW-741
3754	SV4-WRS-P0W-ME4626	WRS BASEMAT PIPING CLEANLINESS/FME REPAIR
3755	SV4-WRS-P0W-ME5329	FABRICATION/INSTALLATION OF SMALL BORE WRS LEAK CHASE PIPING INCLUDING SV4-WRS-PLW-86G, 86H, 800
3756	SV4-WRS-P0W-ME6689	WRS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRIC SV4-WRS-PLW-521, 52N, 52M, 52L)
3757	SV4-WRS-PLW-ME1574	INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV4-WRS-PLW-573, 655)
3758	SV4-WRS-PLW-ME1575	WRS LARGE BORE PIPING INSTALLATION (INCLUDES ISOMETRIC SV4-WRS-PLW-57P, 57L, AND 57K)
3759	SV4-WRS-PLW-ME1577	INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRIC SV4-WRS-PLW-57J)
3760	SV4-WRS-PLW-ME1578	INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV4-WRS-PLW-572, 574, 578, 57D, 579)
3761	SV4-WRS-PLW-ME1579	INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV4-WRS-PLW-57B, 575, 57E)
3762	SV4-WRS-PLW-ME1580	INSTALLTION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV4-WRS-PLW-571, 576, 57F)
3763	SV4-WRS-PLW-ME1763	INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV4-WRS-PLW-52A, -52B, -52D, -52F)
3764	SV4-WRS-PLW-ME1764	INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV4-WRS-PLW-53D)
3765	SV4-WRS-THW-ME2413	HYDROSTATIC TESTING FOR RADIOACTIVE WASTE DRAIN SYSTEM (WRS)
3766	SV4-WWS-ERW-EL0863	INSTALLATION OF ELECTRICAL UNDERGROUND COMMODITIES (MANHOLES AND DUCT BANKS) FOR THE (WWS) WASTE WATER SYSTEM
3767	SV4-WWS-P0W-ME1977	WWS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRIC SV3-WWS-PLW-31B, & 31F)
3768	SV4-WWS-P0W-ME2703	WWS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRIC SV3-WWS-PLW-310, 31E, 319, & 31A)
3769	SV4-WWS-P0W-ME3097	WWS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRIC SV4-WWS-PLW-020)

Exhibit V – Legacy, WIP, and Completed Work Packages

Work Package ID	Work Package Description	Work Package Details
3770	SV4-WWS-P0W-ME3187	WWS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRICS SV4-WWS-PLW-321 & 322)
3771	SV4-WWS-P0W-ME3348	WWS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRICS SV4-WWS-PLW-32C, -32E, -32F, -32G)
3772	SV4-WWS-P0W-ME4625	WWS BASEMAT PIPING CLEANLINESS/FME REPAIR
3773	SV4-WWS-P0W-ME5467	FABRICATION AND INSTALLATION OF WWS PIPING
3774	SV4-WWS-P0W-ME6622	WWS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRICS SV4-WWS-PLW-334)
3775	SV4-WWS-P0W-ME7165	FABRICATE AND INSTALL THE WASTE WATER PIPING ON THE EAST SIDE OF THE U4 TURBINE BUILDING IN PHASE 7.
3776	SV4-WWS-PHW-ME5481	INSTALLATION OF PIPE SUPPORTS FOR PIPING PACKAGE SV4-WWS-P0W-ME5467
3777	SV4-WWS-PLW-ME1646	UNIT 4 TURBINE BUILDING EL 100'-0" FIRST BAY EMBEDDED WWS PIPING PACKAGE # 1,
3778	SV4-WWS-PLW-ME1647	UNIT 4 TURBINE BUILDING EL 100'-0" FIRST BAY EMBEDDED WWS PIPING PACKAGE # 2
3779	SV4-WWS-PLW-ME1648	UNIT 4 TURBINE BUILDING EL 100'-0": EMBEDDED WWS PIPING PACKAGE # 3
3780	SV4-WWS-PLW-ME1650	UNIT 4 TURBINE BUILDING EL 100'-0": EMBEDDED WWS PIPING PACKAGE # 5
3781	SV4-WWS-PLW-ME1765	INSTALLATION OF LARGE BORE WWS PIPING (INCLUDING ISOMETRICS SV4-WWS-PLW-311, -315)
3782	SV3-2053-ERW-861823	ELECTRICAL CABLE TRAY RACEWAY FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEV 141'3" AREA 3
3783	SV3-2052-ERW-861853	ELECTRICAL CABLE TRAY RACEWAY FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 141'3", AREA 2
3784	SV3-2057-ERW-861986	INSTALLATION OF CABLE TRAY RACEWAY IN TURBINE BUILDING (ELEV. 141'3" AREA 7)
3785	SV3-2057-ERW-861990	INSTALLATION OF CABLE TRAY RACEWAY COVERS IN TURBINE BUILDING (ELEV. 141'3" AREA 7)
3786	SV3-4000-SHW-862357	FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS, DETAILS C-189, ANNEX BUILDING, ALL AREAS/ ELEVATIONS. BOOK 1
3787	SV3-WLS-P0W-800002	Install Small Bore Piping per Isometric SV3-WLS-PLW-531
3788	SV3-WLS-PHW-800002	Install Small Bore Supports per Isometric SV3-WLS-PLW-532
3789	SV4-2000-SSW-CV3930	TURBINE BLDG. HOUSE STEEL IN-PROCESS REPAIR/REWORK (SEQ6-SEW11)
3790	SV4-2020-MEW-ME1150	UNIT 4 CONDENSER A FLASH BOX ASSEMBLY
3791	SV4-2030-SSW-CV3967	UNIT 4 TURBINE BUILDING SEQUENCE 6 HANDRAIL AND STAIRS
3792	SV4-2030-SSW-CV3968	UNIT 4 TURBINE BUILDING SEQUENCE 6 GRATING AND DECKING

Exhibit V – Legacy, WIP, and Completed Work Packages

Work Package ID	Work Package Description	Task Description
3793	SV4-CWS-P0W-ME3243	INSTALLATION OF CWS PIPING RISERS (RETURN SIDE)
3794	SV4-CWS-PLW-ME0551	UNIT 4 CWS PIPING FROM NUCLEAR ISLAND TO COOLING TOWER
3795	SV4-ME01-PLW-ME1006	UNIT 4 CONDENSER B: INSTALLATION OF UPPER SHELL NOZZLES
3796	SV4-WLS-P0W-ME3117	INSTALLATION OF LARGE BORE WLS PIPING (INCLUDES ISOMETRIC SV4-WLS-PLW-754)
3797	SV4-WRS-P0W-ME1974	INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRIC SV4-WRS-PLW-66A, 66C, 66E, 662, 667)
3798	SV4-WRS-PLW-ME1576	INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV4-WRS-PLW-57M AND 57N)
3799	SV3-SDS-PHW-ME2544	INSTALLATION OF ANNEX SDS SUPPORTS (FOR WP SV3-SDS-P0W-ME2415)
3800	SV3-SDS-PHW-ME2545	INSTALLATION OF ANNEX SDS SUPPORTS (FOR WP SV3-SDS-P0W-ME2416)
3801	SV3-SDS-PHW-ME2546	Installation of Annex SDS Supports (For WP SV3-SDS-P)W-ME2417)
3802	SV4-2000-Z0W-CV1908	UNIT 4 TURBINE BUILDING REINFORCED CONCRETE REQUIREMENTS
3803	SV3-SDS-PHW-ME2547	INSTALLATION OF ANNEX SDS SUPPORTS (FOR WP SV3-SDS-P0W-ME2418)
3804	SV3-SDS-THW-ME2196	HYDRO TESTING OF THE UNIT 3 ANNEX BUILDING SANITARY DRAINAGE SYSTEM
3805	SV3-SFS-P0W-ME2188	ASME SECTION III - INSTALLATION OF R365 COMMODITIES
3806	SV3-SFS-P0W-ME3644	INSTALLATION OF LARGE BORE SFS PIPING (INCLUDES ISOMETRIC SV3-SFS-PLW-12C)
3807	SV3-SS01-Z0W-CV4381	UNIT 3 STRUCTURAL STEEL SAFETY CLASS C REQUIREMENTS
3808	SV3-SWS-P0W-ME2158	FABRICATION AND INSTALLATION OF SWS PIPING IN ROOM 20309 (ISOMETRICS SV3-SWS-PLW-051, 052, 062, 063, &064)
3809	SV3-SWS-P0W-ME2159	FABRICATION AND INSTALLATION OF SWS PIPING IN ROOM 20309 (ISOMETRICS SV3-SWS-PLW-041, 042, 060, & 061)
3810	SV3-SWS-P0W-ME6784	Service Water System (SWS) Piping Installation in Phase 3A
3811	SV3-SWS-PHW-ME1504	INSTALLATION OF SWS LARGE BORE PIPING SUPPORTS FOR PIPING INCLUDED IN THE SV3-SWS-PLW-ME1495 WORK PACKAGE
3812	SV3-SWS-PHW-ME1505	INSTALLATION OF SWS LARGE BORE PIPING SUPPORTS FOR PIPING INCLUDED IN THE SV3-SWS-PLW-ME1496 WORK PACKAGE
3813	SV3-SWS-PLW-ME1497	INSTALLATION OF SWS LARGE BORE PIPING (INCLUDES ISOMETRICS SV3-SWS-PLW-090, 091, 092, 093, 094, 095)
3814	SV3-TCS-PLW-ME2389	INSTALLATION OF TCS PIPING (INCLUDES ISOMETRICS SV3-TCS-PLW-710, 711,712,71Y,703,704, & 71B)
3815	SV3-VAS-MDW-ME5775	INSTALLATION OF HVAC DUCT PIECES AND SUPPORTS IN ROOMS 12166, 12167 & 12268

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package Code	Description
3816	SV3-VWS-P0W-ME5325	ANNEX - Initial Energization Piping - Iso 171, 180, 181, 190, 191, & 197
3817	SV3-VWS-PHW-ME2796	INSTALLATION OF VWS SUPPORTS FOR ISOMETRICS SV3-VWS-PLW-10P
3818	SV3-WGS-P0W-ME2725	INSTALLATION OF SMALL BORE WGS PIPING (INCLUDES SV3-WGS-PLW-020)
3819	SV3-WGS-P0W-ME2726	INSTALLATION OF SMALL BORE WGS PIPING (INCLUDES SV3-WGS-PLW-421)
3820	SV3-WGS-PHW-ME2807	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS SV3-WGS-PLW-050, 101, 103, 105, 107
3821	SV3-WGS-PHW-ME2809	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS SV3-WGS-PLW-546
3822	SV3-WGS-PHW-ME2811	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS SV3-WGS-PLW-421
3823	SV3-WGS-PHW-ME2812	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS SV3-WGS-PLW-544
3824	SV3-WLS-P0W-ME2990	INSTALLATION OF SMALL BORE WLS PIPING ON R104 MODULE
3825	SV3-WLS-P0W-ME3388	INSTALLATION OF SMALL BORE WLS PIPING (ISOMETRIC SV3-WLS-PLW-040)
3826	SV3-WLS-PLW-ME0510	INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRIC SV3-WLS-PLW-060)
3827	SV3-WLS-PLW-ME0938	Fabricate and Install Small Bore Elevation 1 WLS Piping Iso SV3-WLS-PLW-051
3828	SV3-WLS-PLW-ME2478	FABRICATE AND INSTALL ISOMETRIC DRAWING# SV3-WLS-PLW-741
3829	SV3-WLS-PLW-ME3091	FABRICATION/INSTALLATION OF SMALL BORE WLS PIPING FOR ISOMETRIC SV3-WLS-PLW-35K
3830	SV3-WLS-THW-ME2910	HYDRO TEST THE UNIT 3 LIQUID RADWASTE SYSTEM PIPING PHASE 5
3831	SV3-WRS-P0W-ME2348	ANNEX BUILDING - ELEV 100 WRS PIPING PACKAGE #2
3832	SV3-WRS-P0W-ME2349	ANNEX BUILDING - ELEV 136 WRS PIPING PACKAGE
3833	SV3-WRS-P0W-ME2450	Fabrication and Installation of Small Bore WRS Piping (Isometric SV3-WRS-PLW-57Q)
3834	SV3-WRS-P0W-ME2490	FABRICATION AND INSTALLATION OF LARGE BORE WRS PIPING (ISOMETRIC SV3-SRS-PLW-650)
3835	SV3-WRS-P0W-ME4428	INSTALLATION OF SMALL BASE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-86C, SV3-WRS-PLW-809)
3836	SV3-WRS-P0W-ME6720	WRS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRIC SV3-WRS-PLW-521, 52N, 52M, 52L)
3837	SV3-SWS-PHW-ME1503	INSTALLATION OF SWS LARGE BORE PIPING SUPPORTS FOR PIPING INCLUDED IN THE SV3-SWS-PLW-ME1494 WORK PACKAGE
3838	SV4-2000-SUW-CV3226	TURBINE BLDG.STEEL IN-PROCESS REPAIR/REWORK (CH80,CH81,&CH82)

Exhibit V – Legacy, WIP, and Completed Work Packages

Table 3. In-Progress Work Packages (as of October 17, 2017)		
3839	SV3-1120-ERW-EL3067	Fabrication and Installation of non-scheduled, Detail C14 conduit supports in Unit 3 Containment Building. Seismic category II. WP1
3840	SV3-1120-ERW-EL3069	Fabrication and Installation of non-scheduled, Detail C15 conduit supports in Unit 3 Containment Building. Seismic category II. WP1
3841	SV3-WRS-PHW-ME3032	INSTALLATION OF SMALL BORE WRS PIPE SUPPORTS ON R104 MODULE
3842	SV4-G100-XEW-CV0628	Unit 4 Vertical Waterproofing Membrane
3843	SV3-1110-CEW-CV2053	INSTALLATION OF UNIT 3 STEAM GENERATOR COLUMN PEDESTAL EMBEDMENTS
3844	SV3-1120-EGW-EL2181	GROUNDING OF THE CONTAINMENT BUILDING AT ELEVATION 82'-6" TO 100'
3845	SV3-2000-SUW-CV1571	RE-WORK OF CH81 STRUCTURAL STEEL
3846	SV4-2030-CCW-CV0383	UNIT 4 TURBINE BUILDING 100 FT ELEV.SLAB MUDMAT (INCLUDES THE 1ST BAY)
3847	SV4-2030-CCW-CV0384	U4 Turbine Building 82'-9" to 100' Elevation Walls
3848	SV3-1220-EGW-EL2176	INSTALL GROUNDING GRID AND FLOOR PLATES FOR 82'-6" SLAB AREAS 1, 2 & 3
3849	SV3-1133-SSW-CV6172	SPL44 INSTALLATION
3850	SV3-1220-EGW-EL3099	U3-AUXILIARY BUILDING INSTALL ELECTRICAL PENETRATIONS AND GROUNDING FOR AREAS 3 & 4, WALLS # 41, 48, 49, 50, 51, & 52 EL82' 6" TO 100' 0"
3851	SV3-1220-EGW-EL3100	U3-AUXILIARY BUILDING INSTALL ELECTRICAL PENETRATIONS AND GROUNDING FOR AREAS 5 & 6, EL 82' 6" TO 100' 0"
3852	SV3-2060-EGW-EL3271	ELECTRICAL GROUNDING INSTALLATION FOR THE TURBINE BUILDING AT ELEVATIONS 170'-0", 196'-3" AND 230'-9".
3853	SV3-ASS-PHW-ME1526	FABRICATE/INSTALL OF AUXILIARY STEAM (ASS) SUPPORTS (PORTION 4) FOR ISOMETRIC# SV3-ASS-PLW-023, 02B, & 02U
3854	SV3-WRS-P0W-ME4424	INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-802, -80X, -80Y
3855	SV4-RNS-P0W-861625	ASME III FABRICATION/INSTALLATION OF CA20 LARGE BORE PIPING FOR ISOMETRIC SV4-RNS-PLW-161
3856	SV3-2000-P0W-ME6769	INSTALLATION OF TEMPORARY FIRE PROTECTION SYSTEM STANDPIPE
3857	SV3-2033-SHW-EL6790	Electrical Cable Tray Supplemental Steel Installation in the Turbine Building, Elevation 100'-0", Area 3 from Columns 18 to 19 & P.2 to R
3858	SV3-2037-SHW-EL6766	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE TURBINE BUILDING FOR ELEV 100'-0" AREA 7 FROM COLUMNS 18 TO 19 AND 1.2 TO K.1
3859	SV3-CAS-PHW-ME2788	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CAS-PLW-83H
3860	SV3-CVS-P0W-ME2656	INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRIC: SV3-CVS-PLW-102)

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
3861	SV3-ME01-PHW-ME1536	Unit 3 Condenser A: Installation of Water Curtain Spray Piping Supports
3862	SV3-R161-ERW-EL4153	INSTALLATION OF ELECTRICAL CABLE TRAY IN MODULE R161
3863	SV4-1010-CRW-CV1271	Installation of Unit 4 Nuclear Island Basemat Reinforcement Below Containment Vessel
3864	SV4-1120-CRW-CV3171	Unit 4 Containment Concrete Reinforcement El. 76'-6" to El. 80'-0" & El. 80'-6"
3865	SV4-2030-CCW-CV0386	Unit 4, Turbine Building, 100' elevation elevated slabs
3866	SV4-ASS-P0W-ME5420	Fabricate and Install Auxiliary Steam System(ASS) Piping
3867	SV4-ASS-P0W-ME5422	Installation and Fabrication of Auxiliary Steam System (ASS) Piping Portion 2
3868	SV4-ASS-P0W-ME5423	Installation and Fabrication of Auxiliary Steam Supply System(ASS) Piping Portion 3
3869	SV3-4000-SHW-862381	FABRICATION AND INSTALLATION OF TYPICAL ROUTED CONDUIT SUPPORTS DETAIL C-89 ANNEX BUILDING ALL AREAS/ELEVATIONS BOOK 1
3870	SV3-4000-SHW-862356	FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS DETAIL C-203 ANNEX BUILDING ALL AREAS ELEVATIONS BOOK 1
3871	SV3-4000-SHW-862355	FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS DETAIL C-102 ANNEX BUILDING ALL AREAS ELEVATIONS BOOK 1
3872	SV3-4031-SHW-861533	FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG. AREA 1, ELEV. 100', WEST OF BATTERY CHARGER ROOMS, BETWEEN COLUMN LINES 10.05/11.09.
3873	SV3-2030-PLW-ME1199	INSTALL PIPING SUPPORTS ON CONDENSATE PIPING BETWEEN CONDENSER AND UNIT 3 CONDENSATE PUMPS
3874	SV3-2030-PLW-ME1197	INSTALL CDS PIPING FROM THE CONDENSER C OUTLET BOX TO THE UNIT 3 CONDENSATE PUMPS
3875	SV3-2141-C0W-850001	1ST BAY, 117'-6" ELEV, FLOOR SLAB POUR #1
3876	SV3-2047-SHW-861712	INSTALLATION OF WELDED CABLE TRAY SUPPORTS IN TURBINE BUILDING (ELEV. 120' 6" AREA 7)
3877	SV3-2034-SHW-861540	Electrical Cable Tray Welded Support Fabrication and Installation in the Unit 3 Turbine Building, Elevation 100' 0", Area 4
3878	SV3-2059-SHW-861423	ELECTRICAL CABLE TRAY WELDED SUPPORT INSTALLATION IN THE TURBINE BUILDING, ELEVATION 141' 3", AREA 9, ROOM 20500 PART 2
3879	SV4-PH01-CEW-800000	Unit 4, Reactor Vessel Anchor Bolt Installation and Construction Aid
3880	SV4-WLS-P0W-800021	Install large bore pipe per SV4-WLS-PLW-800
3881	SV4-WRS-P0W-800008	Install large bore pipe per SV4-WRS-PLW-59M
3882	SV4-WRS-P0W-800009	Install larger bore pipe per SV4-WRS-PLW-59Z
3883	SV3-1120-ERW-862941	FABRICATION & INSTALLATION OF DESIGN ROUTED SUPPORTS IN ROOM 11208

Exhibit V – Legacy, WIP, and Completed Work Packages

Work Package ID	Work Package Description	Task Description
3884	SV3-1120-ERW-862942	FABRICATION & INSTALLATION OF DESIGN ROUTED CONDUIT SUPPORTS IN ROOM 11208
3885	SV0-YFS-P0W-862751	REWORK/REPLACE FIRE HYDRANT SV0-YFS-PL-H16
3886	SV3-SFS-PHW-862862	ASME SECTION III – FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-SFS-PLW-780
3887	SV4-DWS-P0W-862958	INSTALLATION OF ANNEX BLDG DWS PIPING (ISO SV4-DWS-PLW-150)
3888	SV3-CDS-PHW-860480	FAB & INSTALL CDS SUPPORTS FOR ISOMETRICS SV3-CDS-PLW-720, SV3-CDS-PLW-721, SV3-CDS-PLW-722, SV3-CDCS-PLW-723 & SV3-CDS-PLW-724
3889	SV3-HDS-PHW-860535	TURBINE BUILDING HDS PIPE SUPPORT INSTALLATION
3890	SV3-CDS-P0W-860698	FABRICATION AND INSTALLATION OF CDS PIPING
3891	SV3-HDS-PHW-860539	FABRICATE/INSTALL HEATER DRAIN SYSTEM PIPE SUPPORTS
3892	SV3-2044-SHW-860223	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 120'-6", AREA 4
3893	SV3-MT71-SSW-850000	STRUCTURAL STEEL, WASTE WATER RETENTION BASIN
3894	SV3-1152-SHW-800003	Install Welded conduit supports in Containment Area 2 Elev. 135'3" that are associated with SP-L26, SP-L27 and SP-L28 PER Drawings SV3-1152-ER-602 and SV3-1152-ER-606
3895	SV4-2101-CEW-862982	UNIT4 TURBINE BUILDING FIRST BAY WALLS TO 122' PIPE PENETRATIONS
3896	SV4-CA20-S4W-800004	90'-3" Elev., Cask Loading Pit, Room 12463, Submodules 43 thru 46
3897	SV3-FPS-THW-ME2720	HYDRO TEST PACKAGE FOR UNIT 3 PHASE 2 FIRE PROTECTION SYSTEM (FPS) INCLUDING ISO'S (SV3-FPS-PLW-955 954,95AK,95AL,95AW,95AX,95BA)
3898	SV3-HDS-P0W-ME3736	INSTALLATION AND FABRICATION OF HEATER DRAIN SYSTEM PIPING
3899	SV3-KB23-KBW-ME2688	INSTALLATION OF KB23 COMPONENTS
3900	SV3-ML05-MLW-ME1897	INSTALLATION OF EMBEDDED PIPING PENETRATIONS 82'-6" WALLS ONLY
3901	SV3-CVS-P0W-800002	Install small bore pipe per SV3-CVS-PLW-512
3902	SV3-CVS-PHW-800001	Install small bore pipe supports per SV3-CVS-PLW-512
3903	SV3-CVS-P0W-800003	Install small bore pipe per SV3-CVS-PLW-521
3904	SV3-CVS-PHW-800002	Install small bore pipe supports per SV3-CVS-PLW-521
3905	SV3-ML05-MLW-ME1898	ATTACHMENT OF NELSON STUDS TO PIPING PENETRATIONS 82' 6" WALLS
3906	SV3-ML05-MLW-ME1899	ATTACHMENT OF WELDED COUPLINGS TO PIPING PENETRATIONS 82'6" WALLS
3907	SV3-ML05-MLW-ME2048	UNIT 3 TURBINE BUILDING EL 100'-0" PIPING PENETRATIONS

Exhibit V – Legacy, WIP, and Completed Work Packages

Work Package ID	Work Package Description	Task Description
3908	SV3-ML05-MLW-ME2169	INSTALLATION OF PENETRATIONS IN CA20 WALL 2
3909	SV3-ML05-MLW-ME2170	INSTALLATION OF PENETRATIONS IN CA20 WALLS 3 & 4
3910	SV3-ML05-MLW-ME2637	INSTALLATION OF ANNULUS WALL PENETRATIONS 82'6 TO 100'0
3911	SV3-ML05-MLW-ME3946	INSTALLATION OF CA01 ASME WALL PENETRATIONS FOR SUB-ASSEMBLY 4
3912	SV3-ML05-MLW-ME4909	INSTALLATION OF PENETRATION 11209-ML-118 (CA05)
3913	SV4-PV71-MEW-ME6729	PRE-INSTALLATION WELDING OF MAIN STOP VALVE/CONTROL VALVE EQUALIZERS
3914	SV3-ML05-MLW-ME5034	INSTALLATION OF CA01 PENETRATIONS
3915	SV3-ML05-MLW-ME6708	CA20 WALL PENETRATIONS SEALANT
3916	SV3-MP07-MEW-ME2914	INSTALLATION OF FWS STARTUP FEEDWATER PUMP (FWS-MP-03A)
3917	SV3-MP07-MEW-ME2915	INSTALLATION OF FWS STARTUP FEEDWATER PUMP (FES-MP-03B).
3918	SV3-MP10-MEW-ME2773	Installation Of TCS Turbine Bldg. Cooling Water Pumps (TCS-MP-01A & 01B)
3919	SV3-MP20-MEW-ME2366	INSTALLATION OF HDS MSR SHELL DRAIN PUMP (HDS-MP-01A).
3920	SV3-MP20-MEW-ME2383	INSTALLATION OF HDS MSR SHELL DRAIN PUMP (HDS-MP-01B)
3921	SV3-MS19-MEW-ME2482	INSTALL MB CONDENSATE POLISHER (CPS-MV-01A/01B) AND CPS-MS-01A/01B)
3922	SV3-MS60-MEW-ME1679	INSTALLATION OF AUXILIARY MOISTURE SEPARATOR (ASS-MT-08)
3923	SV3-MT6A-MEW-ME4797	INSTALLATION OF LOS OIL STORAGE TANK (LOS-MT-02A/B)
3924	SV3-MV7H-MPW-ME6688	INSTALLATION OF THE DEGASIFIER COLUMN (WLS-MV-01)
3925	SV3-PWS-P0W-ME4414	FABRICATE AND INSTALL THE POTABLE WATER SUPPLY LINE TO UNIT 3 TURBINE TIE-IN
3926	SV3-PWS-PHW-ME2872	INSTALLATION OF SMALL BORE PWS PIPING SUPPORTS FOR ISOMETRIC SV3-PW-PLW-060
3927	SV3-PXS-P0W-ME2640	FABRICATE AND INSTALL PXS LARGE BORE PIPING SHOWN ON ISOMETRIC DRAWINGS SV3-PXS-PLW-187, SV3-PXS-PLW-188 & SV3-PXS-PLW-189
3928	SV3-PXS-P0W-ME2673	Installation Of Small Bore PXS Piping (Includes Isometric: SV3-PXS-PLW-652)
3929	SV3-PXS-P0W-ME2700	Installation of Small Bore PXS Piping (Includes Isometric: SV#-PXS-PLW-823)
3930	SV3-PXS-P0W-ME2731	ASME SECTION III-FABRICATION/INSTALLATION OF ISOMETRIC#SV3-PXS-PLW-01E (LINE NUMBERS PXS-PL-L055A)

3946	SV3-RCS-P0W-ME2710	INSTALLATION OF SMALL BORE RCS PIPING (INCLUDES ISOMETRIC: SV3-RCS-PLW-280)
3947	SV3-RCS-P0W-ME2711	Installation of Small Bore RCS Piping (Includes Isometric SV3-RCS-PLW-282)
3948	SV3-RCS-P0W-ME2712	INSTALLATION OF SMALL BORE RCS PIPING (INCLUDES ISOMETRIC: SV3-RCS-PLW-290)
3949	SV3-RCS-P0W-ME2713	Installation of Small Bore RCS Piping (Includes Isometric SV3-RCS-PLW-292)

Exhibit V – Legacy, WIP, and Completed Work Packages

Table 3. In-Progress Work Packages (as of October 17, 2017)		
3950	SV0-0000-ERW-EL5902	INSTALLATION OF NEW DUCT BANKS AND DIRECT BURIED TO EXPOSED RACEWAYS AT 315 BLDG FOR SYSTEMS RWS, PWS, YFS AND ZFS
3951	SV3-RCS-P0W-ME2714	Installation of Small Bore RCS Piping (Includes Isometric: SV3-RCS-PLW-927, 929)
3952	SV3-RCS-P0W-ME2715	INSTALLATION OF SMALL BORE RCS PIPING (INCLUDES ISOMETRIC: SV3-RCS-PLW-928, 92A)
3953	SV3-RNS-P0W-ME2829	INSTALLATION OF LARGE BORE RNS PIPING (INCLUDES ISOMETRICS: SV3-RNS-PLW-022,023,07A)
3954	SV3-RNS-P0W-ME2830	INSTALLATION OF LARGE BORE RNS PIPING (INCLUDES ISOMETRICS: SV3-RNS-PLW-024)
3955	SV3-RNS-PLW-ME2704	INSTALLATION OF RNS LARGE BORE PIPING (INCLUDES ISOMETRIC SV3-RNS-PLW-141)
3956	SV3-RNS-PLW-ME2705	INSTALLATION OF RNS LARGE BORE PIPING (INCLUDES ISOMETRIC SV3-RNS-PLW-161)
3957	SV3-RWS-P0W-ME6785	FABRICATE AND INSTALL THE RWS SUPPLY TO THE UNIT 3 COOLING TOWER BASINS A & B AND TO THE DTS PRETREATMENT SKID.
3958	SV3-CVS-P0W-800005	Install large bore pipe per SV3-CVS-PLW-531
3959	SV3-CVS-P0W-800007	Install small bore pipe and supports per SV3-CVS-PLW-65D
3960	SV3-FPS-PHW-800001	Install large bore pipe supports per SV3-FPS-PLW-713
3961	SV3-RNS-PHW-800003	Install large bore pipe supports per SV3-RNS-PLW-094
3962	SV3-RNS-P0W-800001	Install large bore pipe per SV3-RNS-PLW-17F
3963	SV3-SDS-P0W-ME2139	FABRICATE AND INSTALL SANITARY DRAIN PIPING UNDER THE UNIT 3 ANNEX SLAB #1
3964	SV3-SDS-P0W-ME2300	FABRICATE AND INSTALL SANITARY DRAIN PIPING UNDER THE UNIT 3 ANNEX SLAB #2
3965	SV3-SDS-P0W-ME2302	FABRICATE AND INSTALL SANITARY DRAIN PIPING UNDER THE UNIT 3 ANNEX SLAB #4
3966	SV3-WGS-ITW-ME4483	FUNCTIONAL ARRANGEMENT WALKDOWN OF WGS SYSTEM.
3967	SV3-WLS-MTW-ME0745	WLS EFFLUENT HOLDUP TANK A INSTALLATION
3968	SV3-WLS-PHW-ME1044	Fabrication/ Installation of Pipe Supports for Isometric Drawing WLS-PLW-071
3969	SV0-869-XVW-CV6004	NORTH VEHICLE BARRIER DITCH
3970	SV3-WLS-PLW-ME0936	Fabricate and Install Small Bore Elevation 1 WLS Piping Iso SV3-WLS-PLW-041
3971	SV4-1000-XCW-CV0059	Place Category 2 Backfill, EGB, and Common Fill in Unit 4 Excavation from Elevation - 180ft to Final Grade
3972	SV0-SM01-CSW-MU0899	Mock up for Concrete Placement for the AP1000 Shield Building RS/SC Connection Zone and Air Inlet/Tension Ring
3973	SV3-0000-CEW-CV2806	UNIT 3 TURBINE BUILDING TRANSFORMER FOUNDATION EMBED

Exhibit V – Legacy, WIP, and Completed Work Packages

Table 3. In-Progress Work Packages (as of October 17, 2017)		
3974	SV3-0000-EGW-EL2316	Perform Installation of Underground Commodities (SV3-SITE STATION GROUNDING GRID) For Ground Grid Area,K1300
3975	SV4-CWS-P0W-ME3242	INSTALLATION OF CWS PIPING RISERS (SUPPLY SIDE)
3976	SV3-0500-CFW-CV2605	INSTALL/REMOVE 2" SHAKE SPACE FORMS
3977	SV3-1000-CEW-CV0353	UNIT 3 NUCLEAR ISLAND BASEMAT CAST-IN-PLACE ANCHOR BOLTS
3978	SV3-1120-ERW-EL3065	Fabrication and Installation of non-scheduled, Detail C13 conduit supports in Unit 3 Containment Building. Seismic category II. WP1
3979	SV3-1134-SSW-CV6173	SPL43 INSTALLATION
3980	SV3-1208-CRW-CV5106	U3 Shield Building Wall Concrete Reinforcement Fabrication and Installation El 100ft-0in to El 117ft-6in
3981	SV3-1208-CRW-CV5111	Installation of Reinforcing Steel through Unit 3 Shield Building Panels (01J - 01G, 01Q, 01R) & First Course #14 Nut Installation
3982	SV3-1210-CCW-CV2549	CONCRETE PLACEMENT IN N-LINE & CONTAINMENT BLOCKOUT UP TO ELEV 100'-0"
3983	SV3-1210-EGW-EL1068	Unit 3 Auxillary Bldg EL.66'-6" Grounding Work Package for Walls 6,7, 8
3984	SV3-1210-EGW-EL5393	Install Grounding To Modules & Stairwells For SV3 Auxiliary Building, Level 66'-6", Area 1 thru 6
3985	SV3-1230-CEW-CV4403	VOGTLE UNIT 3 AUXILIARY BUILDING AREA 2, EMBEDS AND TEMPORARY FORMWORK, ELEVATION 100 FT.
3986	SV3-1230-CPW-CV3079	UNIT 3 AUXILIARY BUILDING PRECAST CONCRETE FLOOR PANELS EL. 92FT.-6IN.

3999	SV3-4031-ERW-EL6600	INSTALLATION OF CONDUIT SLEEVES FOR RACEWAY PENETRATIONS, ANNEX BUILDING, AREA 1, ELEVATION 100'-0"
4000	SV3-4040-SSW-CV2289	ANNEX BUILDING STRUCTURAL STEEL AREA 4 SEQUENCE
4001	SV3-4041-CEW-CV3183	U3 ANNEX BUILDING AREA 1 EMBEDDED ITEMS FROM ELEVATION 100'-0" TO 117'-6"
4002	SV3-FPS-PHW-ME2576	INSTALLATION OF ANNEX FPS PIPING SUPPORTS FOR WP (SV3-FPS-PLW-ME2573)
4003	SV3-ASS-PHW-ME1527	FABRICATE/INSTALL OF AUXILIARY STEAM (ASS) SUPPORTS (PORTION 4) FOR ISOMETRIC# SV3-ASS-PLW-020, 022, 02V, 02S, & 02H
4004	SV3-ASS-PLW-ME1475	FABRICATE AND INSTALL AUXILIARY STEAM SYSTEM(ASS) PIPING PORTION 3 FOR 82'-9"
4005	SV3-CA01-MHW-CV2160	Lifting Frames and Bracing Submodules 01 Thru 03, Thru 24, & 25
4006	SV3-CA01-MHW-CV4242	CA01 INSTALL TEMP BRACES SG1 ROOM (WEST) FOR LIFT
4007	SV3-CA01-MHW-CV4243	CA01 REMOVE LIFT LUGS AT SM 04. 11, 12 AND 13
4008	SV3-CA01-MHW-CV4244	CA01 REMOVE LIFT LUGS AT SM 16, 17, 18 AND 19
4009	SV3-CA01-S4W-CV2066	CA01 POST WELDING SURVEY DATA/VERIFICATION
4010	SV3-CA22-S8W-CV6249	CA22 Floor Module 82'-6"
4011	SV3-CA33-S5W-CV5950	U3 CONTAINMENT INSTALLATION OF CA33 STIFFENERS, AREA REINFORCING BAR FABRICATION & STAGING
4012	SV3-CAS-P0W-ME2110	Fabricate and Install CAS Small Bore Piping shown on Isometric Drawing # SV3-CAS-PLW-732 & SV#-CAS-PLW-733
4013	SV3-CAS-P0W-ME2111	FABRICATE AND INSTALL CAS SMALL BORE PIPING SHOWN ON ISOMETRIC DRAWING# SV3-CAS-PLW-755 & SV3-CAS-PLW-759
4014	SV3-CAS-P0W-ME2112	Fabricate and Install CAS Small Bore Piping shown on Isometric Drawing # SV3-CAS-PLW-764 & SV3-CAS-PLW-77A
4015	SV3-CAS-P0W-ME2113	Fabricate and Install CAS Small Bore Piping shown on Isometric Drawing # SV3-CAS-PLW-77B
4016	SV3-CAS-P0W-ME2119	FABRICATE AND INSTALL CAS SMALL BORE PIPING SHOWN ON ISOMETRIC DRAWING# SV3-CAS-PLW-853
4017	SV3-CAS-P0W-ME3433	INSTALLATION OF SMALL BORE CAS PIPING (INCLUDES SV3-CAS-PLW-413, 414)
4018	SV3-CAS-PHW-ME2780	INSTALLATION OF SMALL BORE CAS PIPING SUPPORTS (INCLUDES ISOMETRIC SV3-CAS-PLW-732)
4019	SV3-CAS-PHW-ME2786	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CAS-PLW-835

Exhibit V – Legacy, WIP, and Completed Work Packages

Work Package ID	Work Package Code	Description
4020	SV3-CAS-PHW-ME2787	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CAS-PLW-83F
4021	SV3-CCS-P0W-ME2822	Installation of Large Bore CCS Piping (Includes Isometrics: SV3-CCS-PLW-700, 701)
4022	SV3-CCS-P0W-ME2823	INSTALLATION OF LARGE BORE CCS PIPING (INCLUDES ISOMETRICS: SV3-CCS-PLW-710, 711)
4023	SV3-CAS-PHW-ME2789	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CAS-PLW-853
4024	SV3-CAS-PHW-ME2791	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CAS-PLW-86D
4025	SV3-CDS-PHW-ME2184	INSTALLATION OF CDS LARGE BORE PUMP DISCHARGE PIPING SUPPORTS FOR PIPING INCLUDED IN THE SV3-CDS-PLW-ME2183 WORK PACKAGE
4026	SV3-CAS-THW-ME5582	HYDROSTATIC TESTING OF THE COMPRESSED & INSTRUMENT AIR PIPING FROM UNIT 3 ANNEX TO UNIT 3 DIESEL GENERATOR BLDG.,
4027	SV3-CDS-PHW-ME2186	Installation of CDS Large Bore Pump Discharge Piping Supports For Piping Included in The SV3-CDS-PLW-ME2185 Work Package
4028	SV3-CB00-S5W-CV2690	UNIT 3, NUCLEAR ISLAND, INSTALL OVERLAY PLATES FOR CB MODULES
4029	SV3-CDS-PLW-ME2183	INSTALLATION OF LARGE BORE PUMP DISCHARGE PIPING; SV3-CDS-PLW-70AA, SV3-CDS-PLW-70A, SV3-CDS-PLW-70B, SV3-CDS-PLW-70C, SV3-CDS-PLW-70D, SV3-CDS-PLW-70E
4030	SV3-CDS-PLW-ME2185	INSTALLATION OF LARGE BORE PUMP DISCHARGE PIPING; SV3-CDS-PLW-01AM, SV3-CDS-PLW-013 SPOOL #5, SV3-CDS-PLW-014, SV3-CDS-PLW-015
4031	SV3-CB00-S8W-CV2681	INSTALLATION OF CB MODULES 51, 52, 53 & 54 AT ELEVATION 80'0
4032	SV3-CDS-PLW-ME2306	INSTALLATION OF CDS PIPING FOR ISOMETRICS SV3-CDS-PLW-020, SV3-CDS-PLW-021, SV3-CDS-PLW-030, SV3-CDS-PLW-031, SV3-CDS-PLW-040, SV3-CDS-PLW-041.
4033	SV3-CES-PHW-ME1569	Fabrication/Installation of Pipe Supports for Isometric Drawing SV3-CES-PLW-702
4034	SV3-CB00-S8W-CV4047	UNIT 3 CONTAINMENT INSTALLATION OF CB MODULE 11 & MODULE 12 AT ELEV 84'-6"
4035	SV3-CES-PLW-ME1552	FABRICATE AND INSTALL CONDENSER TUBE CLEANING SYSTEM (CES) PIPING IN TURBINE BUILDING ELEV. 82'-6"-100'-0" (ISO SV3-CES-PLW-701, 702, 710, 741, 742,750)
4036	SV3-CCS-P0W-ME2455	INSTALLATION OF SMALL BORE CCS PIPING (INCLUDES ISOMETRIC: SV3-CCS-PLW-113
4037	SV3-CCS-P0W-ME2775	Installation of Large Bore Piping (Includes Isometrics SV#-CCS-PLW-100, 102)
4038	SV3-CPS-P0W-ME2121	FABRICATION AND INSTALLATION OF CPS PIPING FROM EL 100'-0" TO SUMPS SV3-WWS-MT-09A/B
4039	SV3-CVS-P0W-ME2594	ASM E Secti on III - Fabrication/ Install ati on of Isometric# SV3-CVS-PLW- I 1 2 (Line Numbers CVS-PL-L026 & CVS-PL-L540)

Exhibit V – Legacy, WIP, and Completed Work Packages

Work Package ID	Work Package Name	Description
4040	SV3-CCS-P0W-ME2776	Installation of Large Bore CCS Piping (Includes Isometrics: SV#-CCS-PLW-110, 112)
4041	SV3-CVS-P0W-ME2595	ASME Section III - Fabrication\Installation of Isometric# SV3-CVS-PLW-184 (Line Number CVS-PL-L066
4042	SV3-CVS-P0W-ME2596	ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC#S SV3-CVS-PLW-762 & SV3-CVS-PLW-763(LINE NUMBER CVS-PL-L066)
4043	SV3-CCS-P0W-ME2778	INSTALLATION OF LARGE BORE CCS PIPING (INCLUDES ISOMETRICS: SV3-CCS-PLW-140, 142)
4044	SV3-CCS-P0W-ME2779	Installation of Large Bore Piping (Includes Isometrics: SV3-CCS-PLW-150, 152)
4045	SV3-CWS-PLW-ME0973	Installation of PCCP Piping for CWS Unit #3 Phase 3 Supply Line
4046	SV3-CWS-PLW-ME2523	INSTALLATION OF CWS PIPING FOR ISOMETRICS SV3-CWS-PLW-70AK, SV3-CWS-PLW-70AR, SV3-CWS-PLW-71J, SV3-CWS-PLW-71K
4047	SV3-CWS-PLW-ME2527	INSTALLATION OF CWS PIPING FOR ISOMETRICS SV3-CWS-PLW-70AL, SV3-CWS-PLW-70N, SV3-CWS-PLW-71E, SV3-CWS-PLW-71F
4048	SV3-CVS-P0W-ME2655	INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRICS: SV3-CVS-PLW-101, 104)
4049	SV3-CVS-P0W-ME2657	INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRIC: SV3-CVS-PLW-110)
4050	SV3-G100-XEW-CV0416	Unit 3 Nuclear Island Vertical Waterproofing Membrane Completion
4051	SV3-CVS-P0W-ME2658	INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRICS: SV3-CVS-PLW-290, 292)
4052	SV3-CVS-P0W-ME2659	INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRIC: SV3-CVS-PLW-800)
4053	SV3-CVS-P0W-ME2660	INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRIC: SV3-CVS-PLW-801)
4054	SV3-KB04-KBW-ME0442	Installation of KB04 Module (WGS Delay and Gaurd Bed) RESERVED FOR Brian Bleakly
4055	SV3-KB15-KBW-ME0451	INSTALLATION OF MODULE KB15 (DEGASIFIER DISCHARGE PUMP)
4056	SV3-ME01-PLW-ME1015	UNIT 3 CONDENSER A: INSTALLATION OF CASING DRAIN PIPING
4057	SV3-ME01-PLW-ME1111	UNIT 3 CONDENSER A: HOTWELL PIPING
4058	SV3-ML05-MLW-ME2171	INSTALLATION OF PENETRATIONS IN CA20 WALLS J-1, J-2, K-2
4059	SV3-ML05-MLW-ME4411	INSTALLATION OF CA01 ROOM 11300 PENETRATIONS
4060	SV3-ML05-MLW-ME4936	INSTALLATION OF CA01 ASME WALL PENETRATIONS
4061	SV3-R104-MDW-ME2992	INSTALLATION OF HVAC ON R104 MODULE
4062	SV3-VWS-PHW-ME4477	INSTALL PIPE SUPPORTS FOR WP SV3-VWS-P0W-ME4476

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
4063	SV3-WLS-PLW-ME0939	Fabricate and Install Small Bore Elevation 1 WLS Piping Iso SV3-WLS-PLW-061 and 06B
4064	SV3-WRS-PLW-ME0607	WRS LARGE BORE PIPING INSTALLATION (INCLUDES ISOMETRIC SV3-WRS-PLW-56D AND 56E)
4065	SV3-WRS-PLW-ME2483	WRS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRIC SV3-WRS-PLW-522)
4066	SV3-WRS-PLW-ME4435	INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-811, 812, 813, 814, 815, 816, 817, 818, 819)
4067	SV3-WRS-PLW-ME4447	INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-81A, 81B, 81C, 81D)
4068	SV3-WRS-PLW-ME4450	INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-81H, 81K, 81J, 81L, 81M, 81N, 81P, 81Q, 81R, 81S)
4069	SV3-WRS-PLW-ME4455	INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-83D)
4070	SV3-WRS-THW-ME0717	RADIOACTIVE WASTE DRAIN SYSTEM (WRS) HYDROSTATIC TESTING
4071	SV3-WRS-THW-ME2831	ANNEX BUILDING-WRS HYDROSTATIC TESTING
4072	SV3-WRS-THW-ME4467	TESTING OF CA20 LEAK CHASE
4073	SV3-WWS-MTW-ME2587	INSTALL UNIT 3 TRANSFORMERS SUMP SV3-WWS-MT-010.
4074	SV3-WWS-MTW-ME2644	INSTALL UNIT 3 DIESEL FUEL OIL TANK AREA SUMP SV3-WWS-MT-04.
4075	SV3-WWS-P0W-ME2140	FABRICATE AND INSTALL THE WASTE WATER PIPING UNDER THE UNIT 3 ANNEX BASEMAT SLAB
4076	SV0-RWS-PLW-ME1268	RAW WATER SYSTEM
4077	SV0-RWS-PLW-ME1269	INSTALLATION
4078	SV3-WWS-P0W-ME2194	FABRICATE AND INSTALL THE WASTE WATER PIPING FOR THE UNIT 3 OIL/WATER SEPARATOR.
4079	SV0-RWS-THW-ME4321	HYDRO TEST OF THE HDPE PIPING FOR UNIT 3 AND UNIT 4 RAW WATER SYSTEM (RWS)
4080	SV0-ZRS-EWW-TP0671	Relocation of Power loop between Switchgears #4 and #5 Involving Transformers #11, #12 and #13
4081	SV3-WWS-P0W-ME2280	ANNEX BUILDING - EMBEDDED WWS PIPING PACKAGE #2
4082	SV3-PXS-P0W-ME2947	ASME SECTION III- FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-285 (LINE NUMBERS PXS-PL-L148A)
4083	SV3-SFS-P0W-ME3649	INSTALLATION OF LARGE BORE SFS PIPING (INCLUDES ISOMETRIC SV3-SFS-PLW-565)
4084	SV4-CVS-THW-862254	CVS PRESSURE TEST
4085	SV3-1130-C0W-850005	CONTAINMENT CONCRETE PLACEMENT, NORTH AND EAST SIDE TO ELEV 105'-2"
4086	SV4-CAS-P0W-800015	Repair Pipe ISO SV4-CAS-PLW-420 per SV4-CAS-GNR-000003 and Install Small Bore Piping per Isometric SV4-CAS-PLW-42C

Exhibit V – Legacy, WIP, and Completed Work Packages

Table 3. In-Progress Work Packages (as of October 17, 2017)		
4087	SV3-2045-SHW-860225	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEV 120'-6", AREA 5, COLUMNS 14 TO 16 & BETWEEN K.1 TO I2
4088	SV3-1208-C0W-850008	SHIELD BUILDING 117'-6" CYLINDRICAL WALL RC08C
4089	SV3-4000-SHW-862385	FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS DETAIL C-83A ANNEX BUILDING ALL AREAS/ELEVATIONS BOOK 1
4090	SV3-4052-ERW-862398	INSTALLATION OF CONDUIT PENETRATION SLEEVES, ANNEX BUILDING AREA 2 ELEV 135'-3" AND ABOVE
4091	SV3-ML05-MLW-862934	INSTALLATION OF 92'-6' FLOOR PIPING PENETRATIONS
4092	SV3-CNS-MLW-861727	ASME SECTION III – FABRICATION/INSTALLATION OF ELECTRICAL CONTAINMENT VESSEL PENETRATIONS SV3-CNS-ML-E14, -E15, -E16, -E27, -E28, -E29, -E30, -E31, -E32
4093	SV3-CDS-P0W-ME3711	INSTALLATION OF CDS PIPING ISOMETRICS ON 100' ELEVATION.
4094	SV4-2060-ERW-862154	EMBEDDED CONDUIT INSTALLATION IN THE UNIT 4 TURBINE DECK SLAB AT ELEVATION 170'-0"
4095	SV3-2038-SHW-863053	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, AREA 8, ELEVATION 100', COLUMNS 13.05 TO 13.1 & H.05 TO I.2
4096	SV4-MS08-MSW-ME7106	INSTALLATION OF CORS DEMINERALIZED WATER FEED PUMP(DWS-MP-02)
4097	SV3-CCS-P0W-ME4094	INSTALLATION OF SMALL BORE CCS PIPING INCLUDING ISOMETRICS SV3-CCS-PLW-382 , -392
4098	SV3-MS21-MEW-ME3688	INSTALLATION OF SSS CONDENSER HOTWELL PUMPS (SSS-MS-01A/B/C)
4099	SV3-4041-SHW-862628	ELECTRICAL CABLE TRAY TRAPEZE SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 ANNEX BUILDING, ELEVATION 117'-6" AND 126'-3", AREA 1
4100	SV3-4041-SHW-862621	ELECTRICAL CABLE TRAY TRAPEZE SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 ANNEX BUILDING, ELEVATION 117'-6" AND 126'-3", AREA 1
4101	SV3-4041-SHW-862631	ELECTRICAL CABLE TRAY TRAPEZE SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 ANNEX BUILDING, ELEVATION 117'-6" AND 126'-3", AREA 1
4102	SV3-4041-SHW-862618	ELECTRICAL CABLE TRAY TRAPEZE SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 ANNEX BUILDING, ELEVATION 117'-6" AND 126'-3", AREA 1
4103	SV3-4041-SHW-862627	ELECTRICAL CABLE TRAY WELDED SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 ANNEX BUILDING, ELEVATION 117'-6" AND 126'-3", AREA 1
4104	SV4-WLS-PHW-861544	INSTALLATION OF PIPE SUPPORTS FOR SV4-WLS-PLW-319
4105	SV3-2053-SHW-800001	Electrical Cable Tray Support Fab and Installation in Unit 3 Turbine Building, Elevation 141' 3", Area 3

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package Number	Description
4106	SV3-2058-SHW-861427	ELECTRICAL CABLE TRAY WELDED SUPPORT INSTALLATION IN THE TURBINE BUILDING, ELEVATION 141'3", AREA 8, ROOM 20500 PART 4
4107	SV3-2055-SHW-862715	Fabrication/Installation of Electrical Cable Tray Supports - Unit 3 Turbine Building, Elevation 141'3", Area 5
4108	SV3-2055-SHW-862716	Fabrication/Installation of Trapeze Supports Unit 3 Turbine Building, Elevation 141'3"
4109	SV4-SFS-P0W-861660	Installation of Piping for SV4-SFS-PLW-390
4110	SV3-2051-ECW-862112	INSTALLATION OF 480VAC MCC (ECS-EC-122) IN THE UNIT 3 TURBINE BUILDING, ELEVATION 141'3", AREA 1
4111	SV3-CNS-MLW-861728	ASME SECTION III-FABRICATION/INSTALLATION OF ELECTRICAL CONTAINMENT VESSEL PENETRATIONS SV3-CNS-ML-E17,-E18,-E19,-E20,-E21,-E22,-E23,-E24,-E25,-E26
4112	SV4-CA20-S4W-862963	INSTALLATION OF VAS-MS-06A SUPPORT STEEL
4113	SV3-2070-SSW-CV8965	Turbine Building Roof Decking, Sequence 14, 15 and 16
4114	SV3-1221-SHW-861929	CABLE TRAY SUPPORTS RM 12211
4115	SV3-KB11-KBW-863010	COMPLETE KB11 MODULE FABRICATION POST MODULE INSTALLATION
4116	SV4-CA20-S4W-862964	INSTALLATION OF VAS-MS-06B SUPPORT STEEL
4117	SV3-KB12-KBW-863011	COMPLETE KB12 MODULE FABRICATION POST MODULE INSTALLATION
4118	SV3-2038-ERW-862059	INSTALLATION OF ELECTRICAL CABLE TRAY RACEWAY IN THE UNIT 3 TURBINE BUILDING, ELEVATION 100'0" , AREA 8
4119	SV3-2038-ERW-862054	INSTALLATION OF ELECTRICAL CABLE TRAY RACEWAY IN THE UNIT 3 TURBINE BUILDING, ELEVATION 100' 0", AREA 8
4120	SV3-2038-ERW-862055	INSTALLATION OF ELECTRICAL CABLE TRAY RACEWAY IN THE UNIT 3 TURBINE BUILDING, ELEVATION 100' 0" , AREA 8
4121	SV3-2038-ERW-862053	INSTALLATION OF ELECTRICAL CABLE TRAY RACEWAY IN THE UNIT 3 TURBINE BUILDING, ELEVATION 100' 0", AREA 8
4122	SV3-EDS1-DBW-861176	INSTALLATION OF BATTERIES AND ASSOCIATED HARDWARE FOR "EDS1" 125V NON-CLASS 1E, DC & UPS SYSTEM (GROUP I) IN ANNEX BLDG. ROOM 40307
4123	SV3-2033-ETW-861901	INSTALLATION OF 30KVA TRANSFORMER (ECS-ET-3141) IN THE UNIT 3 TURBINE BUILDING, ELEVATION 100' 0", AREA 3
4124	SV4-WWS-P0W-ME6282	WWS PIPING TO THE UNIT 4 WASTE WATER RETENTION BASIN
4125	SV3-PGS-PHW-862909	INSTALLATION OF PGS PIPE SUPPORTS IN ANNEX 3
4126	SV4-FPS-P0W-860892	INSTALLATION AND FABRICATION OF FIRE PROTECTION SYSTEMS(FPS) PIPING
4127	SV4-WLS-PHW-861961	FABRICATION/INSTALLATION OF WLS PIPING SUPPORTS SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-380
4128	SV4-WRS-PHW-861957	FABRICATION/INSTALLATION OF WRS PIPING SUPPORTS SHOWN ON ISOMETRIC DRAWINGS SV4-WRS-PLW-59W & -593

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package Number	Description
4129	SV3-FPS-PHW-854232	INSTALL SUPPORTS FOR DRAWINGS SV3-FPS-PLW-55L, -55N, 555
4130	SV4-CA03-S5W-863063	CA03 UNSATISFACTORY IRS/N&DS/E&DCRS AND MISCELLANEOUS WORK
4131	SV3-CA32-CAW-850001	Unit 3, CA32 Module Installation
4132	SV3-2053-SHW-800002	Electrical Cable Tray Trapeze Support Fab and Installation in Unit 3 Turbine Building, Elevation 141' 3", Area 3
4133	SV0-YFS-PLW-ME0134	INSTALLATION OF THE YARD FIRE SYSTEM PIPING IN TRENCH 6.
4134	SV4-2053-SHW-862447	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE TURBINE BUILDING, ELEVATION 141'-3", AREA 3 FROM COLUMNS 18 TO 19 & P.2 TO R
4135	SV3-RNS-PHW-861885	FABRICATION/INSTALLATION OF B31.1 PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-024
4136	SV3-SFS-PHW-800002	Install Large Bore Pipe Supports Per SV3-SFS-PLW-538
4137	SV3-CVS-PHW-800006	Install Small Bore Pipe Supports Per SV3-CVS-PLW-65A
4138	SV4-CCS-PHW-862867	INSTALLATION OF CCS PIPE SUPPORTS IN ANNEX 4
4139	SV4-WLS-P0W-861364	INSTALLATION OF PIPING FOR ISOMETRICS SV4-WLS-PLW-33B, -33G, -33H & -33K
4140	SV4-1231-CDW-800000	100' Elev., Decking & Grating, Areas 1
4141	SV4-PH01-CEW-800001	Unit 4, Reactor Cavity Anchor Bolts & Anchor Bolt Construction Aid Installation
4142	SV3-2056-SHW-800004	Elect Cable Tray Welded Support Fab & Install in Unit 3 Turbine Building, Elevation 141' 3", Area 6
4143	SV4-MS19-MSW-ME7104	INSTALLATION OF CONDENSATE POLISHER VESSELS(MS01A/01B), SPENT RESIN TANKS(MS03) AND RESIN HOOPER(MT01)
4144	SV4-WLS-P0W-861958	fabrication installation of WLS piping shown on Isometric Drawings SV4-WLS-PLW-14E, -150, -206, -370 and -375
4145	SV3-1123-SSW-CV6258	SPL21 INSTALLATION
4146	SV3-RNS-PHW-861883	FABRICATION/INSTALLATION OF B31.1 PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-021
4147	SV3-WLS-P0W-861906	INSTALL ELECTRO-FUSION COUPLINGS ON UNIT 3 WLS LINE, ISOMETRICS SV3-WLS-PLW-80EK, 80EL, 80EM, 80EN, 80EP, 80EQ, 80ER, 80ES, & 80KC
4148	SV3-2033-ERW-862335	ELECTRICAL CABLE TRAY RACEWAY FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEV 100'-0" AREA 3
4149	SV3-SGS-MLW-861039	ASME SECTION III - INSTALLATION OF CONTAINMENT VESSEL PENETRATION SV3-SGS-PY-C02A (P25)
4150	SV3-SGS-MLW-861040	ASME SECTION III - INSTALLATION OF CONTAINMENT VESSEL PENETRATION SV3-SGS-PY-C02B (P26)

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Package ID	Description
4151	SV4-WLS-THW-861977	PNEUMATIC TEST OF THE HDPE PORTION OF UNIT 4 WLS SYSTEM UNDER AND SOUTH OF THE VEHICLE BARRIER DITCH
4152	SV3-2048-SHW-860226	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING AREAS 5 & 8 EL 120'-6" COLMNS 13.1-14 AND H.05-K.1
4153	SV3-TDS-P0W-860844	INSTALLATION AND FABRICATION OF TURBINE ISLAND DRAINS VENTS AND RELIEF SYSTEM (TDS) PIPING
4154	SV3-4041-SHW-862630	ELECTRICAL CABLE TRAY TRAPEZE SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 ANNEX BUILDING ELEV 117'-6" AND 126'-3" AREA 1
4155	SV3-HDS-P0W-860767	T13 HDS PIPING INSTALLATION ISOs SV3-HDS-PLW-091, 092, 093, 094, 095, 096, 097, 111, 112 113, 114, 115 & 116
4156	SV3-LOS-PHW-860568	TURBINE GENERATOR LUBE OIL SYSTEM PIPING SUPPORT INSTALLATION
4157	SV3-TDS-PHW-860620	INSTALLATION AND FABRICATION OF TURBINE ISLAND VENTS AND DRAINS AND RELIEF SYSTEMS (TDS) PIPING SUPPORTS
4158	SV3-TDS-PHW-860616	INSTALLATION AND FABRICATION OF TURBINE ISLAND VENTS AND DRAINS AND RELIEF SYSTEMS (TDS) PIPING SUPPORTS
4159	SV3-4041-SHW-862633	ELECTRICAL CABLE TRAY TRAPEZE SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 ANNEX BUILDING ELEV 117'-6" & 126'3" AREA 1
4160	SV3-4041-SHW-862629	ELECTRICAL CABLE TRAY TRAPEZE SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 ANNEX BUILDING ELEV 117'-6" & 126'3" AREA 1
4161	SV4-WLS-THW-862960	HYDROTEST FOR WLS-PLW-74A,741,750,731
4162	SV3-CVS-THW-862237	CVS PRESSURE TEST
4163	SV3-DWS-THW-862239	DWS PRESSURE TEST
4164	SV4-WLS-P0W-861913	INSTALL ELECTRO-FUSION COUPLINGS ON UNIT 4 WLS LINE. ISOMETRICS SV4-WLS-PLW-81EV -81EW, -81EX, -81EY, -81EZ, -81FA, -81FB, -81FC & -81KD
4165	SV3-PXS-PHW-800000	Install Small Bore Pipe Supports Per SV3-PXS-PLW-299
4166	SV4-FPS-P0W-ME7088	INSTALLATION OF LARGE BORE FPS PIPING INCLUDES ISOMETRICS: SV4-FPS-PLW-821, 827, 829, 82A
4167	SV4-WWS-PHW-800005	TB- INSTALL WWS PIPE SUPPORTS ELEV. 100'-0"
4168	SV4-WWS-PHW-800007	TB- INSTALL WWS PIPE SUPPORTS ELEV. 170'-0"
4169	SV4-MS05-MEW-861749	INSTALLATION OF CAS INSTRUMENT AIR COMPRESSOR - CAS - MS - 01A/B
4170	SV3-RNS-PHW-861884	FABRICATION/ INSTALLATION OF B31.1 PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-022
4171	SV3-1237-SHW-860295	INSTALL CONDUIT SUPPORTS ON SHIELD WALL AZ-90 _i TO AZ-180 _i 100'-0"

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
4172	SV3-FPS-PHW-854242	INSTALL LARGE BORE PIPE SUPPORTS FOR SV3-FPS-PLW-55R & -55K
4173	SV3-FPS-PHW-854201	LARGE BORE SUPPORTS ISOS SV3-FPS-PLW-55A, 55B & 55C
4174	SV3-DWS-PHW-800000	Install Small Bore Supports per Isometric SV3-DWS-PLW-62B
4175	SV3-CAS-THW-863085	PNEUMATIC TEST FOR CAS PIPING ON MODULE R219
4176	SV3-SFS-THW-863089	HYDRO TESTING OF SFS PIPING ON MODULE R219
4177	SV4-2035-SHW-863007	UNIT 4 TURBINE BUILDING CABLE TRAY SUPPLEMENTARY STEEL IN AREA 5 ON ELEVATION 100'-0"
4178	SV4-CA35-S5W-863043	CA35 SHIP LOOSE ITEM INSTALLATION AND FABRICATION
4179	SV3-FPS-P0W-854210	INSTALL LB CONTAINMENT UPPER RING HEADER PIPING PER ISO'S SV3-FPS-PLW-55D, 55V, 55E, 55F, 55W, 55G, 55H, 55I, 55J
4180	SV3-R261-R2W-863051	COMPLETE MODULE R261 FABRICATION
4181	SV3-CA35-CAW-850001	Unit 3, Module CA35 Installation
4182	SV4-CA36-S5W-862998	CA36 SHIP LOOSE ITEM INSTALL
4183	SV3-CFS-PLW-507-FP715	FABRICATE SPOOLS SV3-CFS-PLW-507-1, -2 & SV3-CFS-PLW-536-1, -2, & -3
4184	SV3-CA20-C0W-850009	U3 CA20 FLOOR SUBMODULES 43 AND 44 CONCRETE PLACEMENT ELEV 90'-3"
4185	SV3-CAS-PHW-800002	Install Small Bore Pipe Supports Per SV3-CAS-PLW-734
4186	SV3-2057-SHW-861354	Electrical Cable Tray Welded Supports
4187	SV4-2070-SUW-863147	UNIT 4 TURBINE BUILDING STRUCTURAL STEEL FRAMING SEQUENCE 15
4188	SV3-2057-SHW-861377	Electrical Cable Tray Welded Supports in Turbine Bldg., EL. 141'3", Area 7
4189	SV4-CA55-S5W-863080	UNIT 4 CA55 FABRICATION
4190	SV3-2057-SHW-861982	ELECTRICAL CABLE TRAY TRAPEZE SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 141'-3", AREA 7
4191	SV4-DWS-PLW-01D-FP437	MODIFY PIPE SPOOL SV4-DWS-PLW-01D-1, -2, -4, -5 & -6
4192	SV3-1150-EWW-862085	FABRICATION AND INSTALLATION OF HYDROGEN SENSOR CABLE SUPPORTS AT EL. 135'-3" ON THE CV IN AREAS 1, 2, 3 & 4.
4193	SV3-1150-ERW-862087	FABRICATION AND INSTALLATION OF HYDROGEN IGNITER CONDUIT SUPPORTS AT EL 135'-3" IN AREA 2 ON THE CV.
4194	SV3-1150-ERW-862088	FABRICATION AND INSTALLATION OF HYDROGEN IGNITER CONDUIT SUPPORTS AT EL 135'-3" IN AREA 3 ON THE CV
4195	SV3-1150-ERW-862090	FABRICATION AND INSTALLATION OF HYDROGEN IGNITER CONDUIT SUPPORTS AT EL 135'-3" IN AREA 4 ON THE CV
4196	SV4-1212-ERW-861218	INSTALL DESIGN ROUTED CONDUIT AND CONDUIT SUPPORTS IN BATTERY ROOM "A", ROOM 12101 EL. 66'-6"

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
4197	SV3-CFS-PLW-510-FP719	FABRICATE SPOOLS SV3-CFS-PLW-510-1, -2, -3 & -4 AND SV3-CFS-PLW-538-1, -2, -3, -4, -5 & -6
4198	SV3-CFS-PLW-508-FP717	FABRICATE SPOOLS SV3-CFS-PLW-508-1, -2 & -3 AND SV3-CFS-PLW-537-1, -2 & -3
4199	SV3-WLS-PLW-80BU-FP906	HYDROSTATIC TEST THE FABRICATED SPOOLS SV3-WLS-PLW-80BU-1A/1B/2
4200	SV3-WLS-PLW-80AQ-FP902	HYDROSTATIC TEST THE FABRICATED SPOOLS SV3-WLS-PLW-80AQ-1/2A/2B
4201	SV4-1208-C0W-800009	UNIT 4, SHIELD BLDG, COURSE 3 CONCRETE PLACEMENT
4202	SV3-1214-ERW-863176	AUXILARY BUILDING UNIT 3, EL 66'-6", AREA 4, FABRICATE AND INSTALL DESIGNED TRAY SUPPORTS
4203	SV3-1150-ERW-862091	FABRICATION AND INSTALLATION OF HYDROGEN IGNITER SUPPORTS AT EL 135'-3" IN AREAS 1, 2, 3 & 4 ON THE CV.
4204	SV3-WWS-PHW-800000	Install Large Bore Pipe Supports Per SV3-WWS-PLW-325
4205	SV4-1130-SLW-800000	Uponder Pit Installation
4206	SV3-2037-ERW-862162	INSTALLATION OF ELECTRICAL CABLE TRAY RACEWAY IN THE UNIT 3 TURBINE BUILDING EL 100'-0" AREA 7
4207	SV3-R261-R2W-862915	INSTALLATION OF MODULE R261
4208	SV3-CAS-PHW-800004	Install Small Bore Pipe Supports Per SV3-CAS-PLW-83B
4209	SV3-CA37-CAW-850001	UNIT 3, CA37 MODULE INSTALLATION
4210	SV3-LOS-P0W-860787	FABRICATION AND INSTALLATION OF LOS PIPING
4211	SV3-4002-SSW-863177	UNIT 3 ANNEX BUILDING, S05 & S06 STAIRS
4212	SV3-CA33-CAW-850001	UNIT 3, CA33 MODULE INSTALLATION
4213	SV3-CA20-S4W-CV2109	INTERIOR TEMPORARY ATTACHMENTS FOR SUB-ASSEMBLY 4
4214	SV4-1231-SAW-850000	UNIT 4, AUXILIARY BUILDING STUDS FOR 100' ELEV, AREA 1
4215	SV3-1240-CRW-800000	Wall 11 Critical Section, Rebar Fabrication and Installation
4216	SV3-CAS-PHW-800021	Install Small Bore Pipe Supports Per SV3-CAS-PLW-862
4217	SV3-CCS-PHW-800004	Install Large Bore Pipe Supports Per SV3-CCS-PLW-04E
4218	SV3-CCS-PHW-800006	Install Large Bore Pipe Supports Per SV3-CCS-PLW-05C
4219	SV3-CCS-PHW-800014	Install Small Bore Pipe Supports Per SV3-CCS-PLW-05Q
4220	SV3-CCS-PHW-800016	Install Small Bore Pipe Supports Per SV3-CCS-PLW-05S
4221	SV3-CCS-PHW-800026	Install Small Bore Pipe Supports Per SV3-CCS-PLW-106
4222	SV3-CCS-PHW-800027	Install Small Bore Pipe Supports Per SV3-CCS-PLW-107
4223	SV3-CVS-PHW-800009	Install Large Bore Pipe Supports Per SV3-CVS-PLW-094
4224	SV3-CVS-PHW-800014	Install Small Bore Pipe Supports Per SV3-CVS-PLW-281
4225	SV3-DWS-PHW-800006	Install Small Bore Pipe Supports Per SV3-DWS-PLW-731

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
4226	SV3-PXS-P0W-ME2888	ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC # SV3-PXS-PLW-014 (LINE NUMBERS PXS-PL-L025A, -027A, -L029A)
4227	SV3-2041-SHW-863124	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, AREA 1, ELEVATION 120'-6", COLUMNS 13.1 TO 16.1 & P.1 TO R
4228	SV3-2040-SHW-863123	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, AREA 0, ELEVATION 120'-6", COLUMNS 12.1 TO 13.1 & L.1 TO P.2
4229	SV4-2036-SHW-863232	" ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE TURBINE BUILDING, ELEVATION 100'-0".
4230	SV4-FWS-PHW-860900	INSTALLATION OF MAIN AND STARTUP FEEDWATER SYSTEM (FWS) PIPE SUPPORTS
4231	SV4-1234-CPW-850000	92'6" TO 100' ELKEV. PRE-CAST PANEL FAB, AUX BLDG. AREA 4
4232	SV4-1130-C0W-850001	UNIT 4, REINFORCED CONCRETE INSIDE CONTAINMENT BLDG. EL. 87'-6" TO 96'-0" EAST SIDE
4233	SV4-CA20-S4W-850006	CA20, ROOM 12363, SUBMODULE 75 INSTALLATION
4234	SV4-HDS-PHW-860902	FABRICATION AND INSTALLATION OF SV4 HDS PIPING SUPPORTS
4235	SV4-1231-CPW-850000	UNIT 4, AUXILLIARY BUILD, AREA 1, 100' ELE. PRECAST PANEL FABRICATION
4236	SV3-FPS-PHW-800025	Install Large Bore Pipe Supports Per SV3-FPS-PLW-53B
4237	SV4-WLS-P0W-861915	INSTALL ELECTRO-FUSION COUPLINGS ON UNIT 4 WLS LINE. ISOMETRICS SV4-WLS-PLW-81FL, -81FM, -81FP, -81FQ, -81FR, -81FS, -81FT, -81FU, -81FV & -81KF
4238	SV3-WLS-P0W-861907	INSTALL ELECTRO-FUSION COUPLINGS ON UNIT 3 WLS LINE. ISOMETRICS SV3-WLS-PLW-80ET, -80EU, -80EV, -80EW, -80EX, -80EY, -80EZ & -80KD
4239	SV4-WLS-P0W-861914	INSTALL ELECTRO-FUSION COUPLINGS ON UNIT 4 WLS LINE. ISOMETRICS SV4-WLS-PLW-81FD, -81FE, -81FF, -81FG, -81FH, -81FJ, -81FK & -81KE
4240	SV3-WLS-P0W-861908	INSTALL ELECTRO-FUSION COUPLINGS ON UNIT 3 WLS LINE. ISOMETRICS SV3-WLS-PLW-80FA, -80FB, -80FC, -80FD, -80FE, -80FF, -80FG, -80FH, -80FJ & -80KE
4241	SV3-WWS-P0W-862360	INSTALLATION OF SMALL BORE WWS PIPING ISOMETRICS SV3-WWS-PLW-036
4242	SV3-CA55-S5W-862414	CA55 FABRICATION
4243	SV4-4042-SAW-850004	SUPPLEMENTARY STEEL, EL. 117'-6" , AREA 2 CL H/E & 7.8/9
4244	SV3-1244-CPW-800001	107'-2" Elev., Precast Panel Fabrication, Area 4
4245	SV4-RCS-P0W-800000	Install small bore pipe and supports per SV4-RCS-PLW-927
4246	SV4-RCS-P0W-800005	Install Small Bore Pipe And Supports Per SV4-RCS-PLW-290
4247	SV4-PXS-P0W-800042	Install Small Bore Pipe And Supports Per SV4-PXS-PLW-652

Exhibit V – Legacy, WIP, and Completed Work Packages

Table 3. In-Progress Work Packages (as of October 17, 2017)		
4248	SV3-RNS-P0W-860286	FABRICATION / INSTALLATION OF RNS LARGE BORE ISOMETRIC SV3-RNS-PLW-094
4249	SV4-4033-ERW-862036	INSTALLTION OF CONDUIT PENETRATION SLEEVES, ANNEX BUILDING, AREA 3 ELEV 100'-0", 107'-2", 121'-0", & 126'-3"
4250	SV3-WWS-PHW-862954	FABRICATION AND INSTALLATION OF WWS PIPING SUPPORTS
4251	SV3-WWS-PHW-860660	FABRICATION AND INSTALLATION OF WWS PIPING SUPPORTS
4252	SV3-2070-C0W-850007	UNIT 3 TURBINE BUILDING STUDS, REINFORCING STEEL AND CONCRETE PLACEMENT FOR ROOF SLABS OVER NW AND SW STAIRWELLS
4253	SV3-1232-ERW-861085	Install Electrical Penetration Sleeves in Interior & Exterior Walls Elevation 100'-0" to 117'-6", Area 2, Unit 3
4254	SV0-0000-C0W-862945	Building 315: Miscellaneous Concrete
4255	SV4-CA34-S5W-863024	CA34 MODULE FABRICATION/ASSEMBLY OF LOOSE PARTS
4256	SV3-1212-ERW-EL3165	AUXILARY BUILDING UNIT 3, EL 66'-6", AREA 2, FABRICATE AND INSTALL TYPICAL CONDUIT SUPPORTS.
4257	SV4-MS01-MSW-862269	INSTALLTION FOR VWS CHILLERS - VWS-MS-01A/B
4258	SV4-CA57-S5W-863076	CA57 FABRICATION
4259	SV4-CA56-S5W-863062	CA56 MODULE FABRICATION
4260	SV3-1150-EJW-862092	FABRICATION AND INSTALLATION OF HYDROGEN SNESOR CONDUIT/ JUNCTION BOX SUPPORTS ON CV RING 3 AND DOME
4261	SV3-1150-ERW-862089	FABRICATION AND INSTALLATION OF HYDROGEN SENSOR CONDUIT SPPORTS ON CV RING 3
4262	SV4-1220-CEW-800001	Unit 4 Aux Bldg, Areas 5 & 6, Rooms 12271 to 12275, 82'-6" Elev., Pre-Placement Embedment Plates
4263	SV4-FPS-P0W-862841	Installation of FPS Piping in Annex 4
4264	SV3-VWS-PHW-862931	Fabrication and Installation of VWS Piping Supports
4265	SV3-0150-ERW-861870	Cable Tray Support for Aux Transformer 2A
4266	SV4-CA33-CAW-800000	CA33 Module Installation
4267	SV4-CA01-S4W-800002	CA01-44 Submodule Installation
4268	SV3-DWS-THW-863097	HYDRO TESTING OF DWS PIPING ON MODULE R261
4269	SV3-CCS-THW-863096	HYDRO TESTING OF CCS PIPING ON MODULE R261
4270	SV3-RNS-P0W-800007	Install Large Bore Piping per Isometric SV3-RNS-PLW-016
4271	SV3-FPS-PHW-854202	INSTALL SUPPORTS FOR DRAWINGS SV3-FPS-PLW-55U AND SV3-FPS-PLW-559
4272	SV3-FPS-THW-863098	HYDRO TESTING OF FPS PIPPING ON MODULE R261
4273	SV3-1121-SPW-850012	SPL 12 Main Support Beam Installation, Unit 3

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
4274	SV3-RNS-PHW-851017	INSTALL LARGE BORE SUPPORTS FROM ISOMETRIC SV3-RNS-PLW-17B
4275	SV4-VCS-PHW-851020	INSTALLATION OF SUPPORT VCS-PH-11R0829
4276	SV0-PWS-PLW-ME0033	HDPE Potable Water System Underground Piping for Trench 6
4277	SV3-CS17-CSW-800001	CS17 Module Installation
4278	SV4-4030-C0W-850005	100' Elev. Walls, Pour # 5
4279	SV4-VWS-THW-861273	HYDROSTATIC TESTING OF VWS PIPING ON MODULE R151
4280	SV3-2070-C0W-863140	UNIT 3 TURBINE BUILDING ROOF EXHAUST FAN CURBS
4281	SV4-PGS-THW-ME2869	HYDRO TEST THE UNIT 4 PLANT GAS SYSTEM SOUTH OF THE TURBINE BUILDING
4282	SV4-PGS-THW-ME2870	HYDRO TEST THE UNIT 4 HIGH PRESSURE NITROGEN PLANT GAS SYSTEM SOUTH OF THE TURBINE BUILDING
4283	SV4-PGS-P0W-ME2877	FABRICATE AND INSTALL PGS SMALL BORE CARBON DIOXIDE PIPING SHOWN ON ISOMETRIC DRAWING# SV4-PGS-PLW-898, 899, 900, 901, 902, AND 945
4284	SV4-PGS-P0W-ME2875	FABRICATE AND INSTALL PGS SMALL BORE LP NITROGEN PIPING SHOWN ON ISOMETRIC DRAWING # SV4-PGS-PLW-846, 847, 848, 849, 850 AND 951
4285	SV3-1244-SSW-850000	Auxiliary Building Structural Steel from Elev. 100'-0" to 117'-6", Area 4
4286	RFD-SV3-CAS-PHW-850041	INSTALLATION/FABRICATION OF SMALL BORE PIPE SUPPORTS FOR ISO'S CAS-PLW-41C, 41F, 41G
4287	SV4-CA37-S4W-863015	CA37 - SEAM WELDS AND INSTALLATION OF MK#50, MK#132
4288	SV4-PGS-P0W-863127	FABRICATE AND INSTALL PGS SMALL BORE HP NITROGEN PIPING SHOWN ON ISOMETRIC DRAWING # SV4-PGS-PLW-879, 880, 881, 952, 953, 954, 955, 956
4289	SV4-CDS-PHW-860885	FABRICATE AND INSTALL PIPING SUPPORTS FOR CDS ON 100' ELEVATION
4290	SV4-FWS-PHW-860898	INSTALLATION OF FWS PIPING SUPPORTS ELEVATION 120'
4291	SV4-FPS-P0W-800001	TB- INSTALL FPS LARGE BORE PIPE ELEV. 100'-0"
4292	SV4-FPS-P0W-800004	TB- INSTALL FPS LARGE BORE PIPE ELEV. 100'-0"
4293	SV4-FPS-P0W-800005	TB- INSTALL FPS LARGE BORE PIPE ELEV. 100'-0"
4294	SV4-HDS-P0W-800000	TB- INSTALL HDS LARGE BORE PIPE ELEV. 100'-0"
4295	SV4-HDS-P0W-800001	TB- INSTALL HDS LARGE BORE PIPE ELEV. 100'-0"
4296	SV4-WWS-PHW-800000	TB- INSTALL WWS PIPE SUPPORTS ELEV. 100'-0"
4297	SV3-WWS-PHW-860662	FABRICATION AND INSTALLATION OF WWS PIPING SUPPORTS
4298	SV4-CAS-P0W-ME2873	FABRICATE AND INSTALL CAS BORE PIPING SHOWN ON ISOMETRIC DRAWING # SV4-CAS-PLW-776, 777, 778, 778, 784, AND 799

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
4299	SV3-2039-ERW-862118	INSTALLATION OF CABLE TRAY RACEWAY IN THE UNIT 3 TURBINE BUILDING, ELEVATION 100', AREA 9
4300	SV3-2039-ERW-862121	INSTALLATION OF CABLE TRAY RACEWAY COVERS IN THE UNIT 3 TURBINE BUILDING, ELEVATION 100', AREA 9
4301	SV3-2039-ERW-862120	INSTALLATION OF CABLE TRAY RACEWAY IN THE UNIT 3 TURBINE BUILDING, ELEVATION 100', AREA 9
4302	SV4-CCS-PHW-861617	INSTALLATION OF PIPE SUPPORTS FOR SV4-CCS-PLW-522 AND 540
4303	SV3-2035-SHW-862410	ELECTRICAL CABLE TRAY WELDED SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 100' 0", AREA 5
4304	SV3-2032-SHW-862425	ELECTRICAL CABLE TRAY WELDED SUPPORT FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 100' 0", AREA 2
4305	SV4-CCS-P0W-861616	INSTALLATION OF PIPING FOR SV4-CCS-PLW-522 & -540
4306	SV0-0000-CCW-CV5529	MISCELLANEOUS GROUTING IN 300 SERIES BUILDINGS/YARD
4307	SV4-MH20-EYW-863215	220 TON BRIDGE CRANE MAINLINE SYSTEM ASSEMBLY FOR THE UNIT 4 TURBINE BUILDING IN ROOM 20600 (CONDUCTOR BAR)
4308	SV4-WRS-PHW-800001	Install Large Bore Pipe Supports Per SV4-WRS-PLW-52B
4309	SV3-12171-S7W-800000	UNIT 3 AUX BLDG SPREADER PLATE INSTALLATION, ROOM 12171, FLOOR ELEV 66'-6"
4310	SV4-WWS-PHW-863100	INSTALLATION AND FABRICATION OF WASTE WATER SYSTEM(WWS) PIPING SUPPORTS
4311	SV4-CDS-PHW-860331	INSTALL PIPE SUPPORTS FOR TURBINE ISLAND 4 CONDENSATE SYSTEM ROOM 20300, 20600, 20700
4312	SV0-0000-EGW-862959	INSTALLATION OF GROUND GRID AND ASSOCIATED GROUNDING FOR SITE GRID AREA LOCATION'S K1500 AND L1500
4313	SV4-CA01-S4W-861773	CA01-SUBASSEMBLY 05 ELEV 107' TO 119' OLPS AND WELDED ATTACHMENTS
4314	SV3-WWS-PHW-860652	FABRICATION AND INSTALLATION OF WWS PIPING SUPPORTS
4315	SV3-PWS-P0W-860817	POTABLE WATER SYSTEM PIPING INSTALLATION
4316	SV3-PWS-P0W-860816	INSTALLATION OF SV3 TURBINE BUILDING PWS PIPING
4317	SV4-CCS-P0W-861618	INSTALLATION OF PIPING FOR SV4-CCS-PLW-530 & -550
4318	SV3-PWS-P0W-863266	INSTALLATION OF SV3 TURBINE BUILDING PWS PIPING
4319	SV4-ME04-MEW-863330	MSR MOISTURE SEPARATOR REHEATERS (MSS-ME-01A)
4320	SV3-VWS-PLW-ME2836	INSTALLATION OF SMALL BORE VWS PIPING (INCLUDES ISOMETRICS SV3-VWS-PLW-386)
4321	SV4-WLS-PHW-861369	INSTALLATION OF PIPE SUPPORTS FOR ISOMETRICS SV4-WLS-PLW-590, -591 & -710

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
4322	SV3-1152-SHW-800004	Fabricate welded conduit supports for Containment Area 2 Elev. 135'3" that are associated with SP-L26, SP-L27 and SP-L28
4323	SV3-SSS-PHW-860597	INSTALLATION OF SECONDARY SAMPLING SYSTEM (SSS)
4324	SV4-RNS-MLW-800001	ASME III - Installation of Containment Vessel Penetration SV4-RNS-PY-C02 (P20)
4325	SV4-FWS-P0W-863271	INSTALL PIPING FOR TURBINE ISLAND 4 FEED WATER SYSTEM ROOM 203000
4326	SV3-0150-ERW-861866	CABLE TRAY SUPPORT FOR TRANSFORMER PHASE A
4327	SV3-0150-ERW-861867	CABLE TRAY SUPPORT FOR TRANSFORMER PHASE B (ZAS-ET-1B)
4328	SV4-4031-C0W-850001	UNIT 4 ANNEX BLDG BATTERY/CHARGER ROOM INTERIOR WALLS ELEV 100'-0" TO 116'-10"
4329	SV4-FWS-PHW-863272	INSTALL PIPE SUPPORTS FOR TURBINE ISLAND 4 FEED WATER SYSTEM ROOM 20300
4330	SV4-DTS-PHW-863256	DEMINERALIZED WATER TREATMENT TURBINE BUILDING ROOM 20300 DTS-MS-05 A/B TO WASTE
4331	SV4-VYS-PHW-860345	AUXILIARY STEAM SUPPLY SYSTEM TURBINE BUILDING ROOM 20400 FROM ASS TO HEAT EXCHANGER
4332	SV4-CA37-S4W-863106	UNIT 4 CA37 RIGGING MODIFICATION
4333	SV4-CA37-S4W-863017	CA37 - OLP INSTALL AND OLP & EMBED COUPLER INSTALLATION
4334	SV4-CA37-S4W-863020	UNIT 4 CA37 STUD INSTALLATION
4335	SV3-0150-ERW-861868	CABLE TRAY SUPPORT FOR TRANSFORMER PHASE C
4336	SV4-1212-ERW-861221	INSTALL DESIGN ROUTED CABLE TRAY AND SUPPORTS FOR SPARE BATTERY ROOM 12103 EL. 66'-6"
4337	SV4-WWS-PHW-800034	TB-Install WWS Large Bore Pipe SUPPORTS- EL 120'-6"
4338	SV4-MS85-MTW-863174	INSTALLATION OF LUBE OIL FLUSHING UNIT SV4-LOS-MS-05
4339	SV3-PWS-PHW-863265	FABRICATION AND INSTALLATION OF SV3 TURBINE BUILDING POTABLE WATER SYSTEM PIPING SUPPORTS
4340	SV4-FPS-P0W-800007	FPS Piping Installation 100' Elevation
4341	SV3-FPS-PHW-862830	INSTALLATION OF FPS PIPE SUPPORTS IN ANNEX 3
4342	SV3-KB22-KBW-863241	REWORK WLS PIPING ON MODULE KB22
4343	SV4-WLS-PHW-861959	FABRICATION / INSTALLATION OF WLS PIPING SUPPORTS SHOWN ON ISOMETRIC DRAWINGS SV4-WLS-PLW-370
4344	SV4-HDS-PHW-860906	FABRICATION AND INSTALLATION OF SV4 TURBINE BUILDING HDS PIPE SUPPORTS
4345	SV3-2058-SHW-861524	CABLE TRAY WELDED STAND SUPPORT INSTALLATION FOR TURVINE 3, AREA 8 EL 141'3"
4346	SV4-1208-CCW-851004	Course 4 Concrete Placement
4347	SV3-ML05-MLW-800007	INSTALL PENETRATIONS SV3-11300-ML-P19 & SV3-11300-ML-P20

Exhibit V – Legacy, WIP, and Completed Work Packages

Table 3. In-Progress Work Packages (as of October 17, 2017)		
4348	SV3-MP03-EMW-863282	INSTALL AC MOTORS TO CONDENSATE PUMPS IN THE UNIT 3 TURBINE BUILDING (BETWEEN COL. 17 & 18, COL. J.15 & I.5
4349	SV3-ME01-PHW-860975	CONDENSER C HEATER DRAIN PIPE SUPPORTS
4350	SV4-CA01-S4W-861191	CA01-SA01 - ELEV 96' TO 107' OLPSS AND WELDED ATTACHMENTS
4351	SV4-CA01-S4W-861768	CA01-SA01 - ELEV 107'-119' OLPS
4352	SV4-WLS-PLW-81CW-FP1014	HYDROSTATIC TEST THE FABRICATED SPOOLS SV4-WLS-PLW-81CW-3A/3B
4353	SV3-CWS-ERW-863235	UNIT 3 TOP DECK 1" EMBEDDED CONDUITS
4354	SV3-2060-CPW-850000	UNIT 3, TURBINE BUILDING, 170' ELEV. PRECAST PANELS
4355	SV4-0000-SSW-863284	UNIT 4 TRANSFORMER FOUNDATION STRUCTURAL STEEL
4356	SV3-VAS-MDW-860228	R161 MODULE HVAC COMPLETION
4357	SV3-2051-SHW-862677	ELECTRICAL CABLE TRAY WELDED SUPPORT FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING ELEVATION 141'3" AREA 1
4358	SV3-PWS-PHW-863263	FABRICATION AND INSTALLATION OF SV3 TURBINE BUILDING POTABLE WATER SYSTEM PIPING SUPPORTS
4359	SV3-PWS-PHW-863264	FABRICATION AND INSTALLATION OF SV3 TURBINE BUILDING POTABLE WATER SYSTEM PIPING SUPPORTS
4360	SV3-KB37-KBW-863233	REWORK WLS PIPING ON MODULE KB37
4361	SV3-KB38-KBW-863234	REWORK WLS PIPING ON MODULE KB38
4362	SV3-FPS-P0W-800002	Installation of Large Bore Pipe Per ISO SV3-FPS-PLW-51R
4363	SV3-FPS-P0W-800007	Containment Building-Installation of Large Bore Pipe per ISO SV3-FPS-PLW-53B
4364	SV3-2034-SHW-800001	Electrical Welded Cable Tray Support Fab and Installation in Unit 3 Turbine Building, Elevation 100' 0", Area 4
4365	SV4-CDS-P0W-800002	TB-Install CDS Large Bore Pipe - EL 100'
4366	SV4-VWS-PHW-861584	INSTALLATION OF PIPE SUPPORTS FOR SV4-VWS-PLW-390
4367	SV3-FPS-PHW-854231	LARGE BORE SUPPORT FOR ISOS SV3-FPS-PLW-554 & SV3-FPS-PLW-55S
4368	SV3-FPS-PHW-854241	FAB AND INSTALL LB PIPE SUPPORTS PER ISO'S SV3-FPS-PLW-552, PLW-553 AND PLW-55Q
4369	SV3-FPS-PHW-854212	FAB & INSTALL SUPPORTS FOR ISO'S SV3-FPS-PLW-55G, -55H, -55I & -55J
4370	SV3-FPS-PHW-854203	FAB AND INSTALL CONTAINMENT FPS LOWER RING HEADER SUPPORTS PER ISO'S SV3-FPS-PLW-556, 558, 55T & 55X
4371	SV4-FPS-P0W-861568	FABRICATION / INSTALLATION OF FPS PIPING SHOWN ON ISOMETRIC DRAWINGS SV4-FPS-PLW-710, - 720 AND 723
4372	SV4-MP80-MTW-863173	INSTALLATION OF LUBE OIL TRANSFER PUMP SV4-LOS-MP-05

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
4373	SV3-PWS-PHW-860589	FABRICATE AND INSTALL SV3 TURBINE BUILDING POTABLE WATER PIPING SYSTEM SUPPORTS
4374	SV4-VWS-P0W-861579	INSTALLATION OF PIPING FOR SV4-VWS-PLW-290
4375	SV3-FPS-PHW-854211	LARGE BORE SUPPORTS FIR ISO'S SV3-FPS-PLW-55D, 55V, 55E, 55F & 55W
4376	SV3-1211-ERW-800002	Install Field Routed Conduit in Auxillary Building Area 1, Elev. 66'6", Room 12104
4377	SV3-ME3B-MEW-800001	Installation of Plate Heat Exchanger SFS-ME-01B
4378	SV3-ME2Q-MEW-800000	Installation of Miniflow Heat Exchanger CVS-ME-03A
4379	SV3-CA20-S7W-800001	CA20, HVAC Spreader Plate Installations, Room 12162
4380	SV3-CA20-S7W-800002	CA20, HVAC Spreader Plate Installations, Room 12163
4381	SV3-CA20-S7W-800003	CA20, HVAC Spreader Plate Installations, Room 12264
4382	SV3-CA20-S7W-800006	CA20, HVAC Spreader Plate Installations, Room 12262
4383	SV3-CA20-S7W-800007	CA20, HVAC Spreader Plate Installations, Room 12166
4384	SV3-CA20-S7W-800008	CA20, HVAC Spreader Plate Installations, Room 12167
4385	SV3-CA20-S7W-800009	CA20, HVAC Spreader Plate Installations, Room 12268
4386	SV3-CA20-S7W-800010	CA20, HVAC Spreader Plate Installations, Room 12269
4387	SV0-YFS-P0W-863252	START UP SUPPORT FOR YFS SYSTEM @ BUILDING 315
4388	SV3-ML05-MLW-800003	Containment Building-Installation of Pipe Penetrations in Room 11300
4389	SV3-KB33-KBW-863175	COMPLETE PIPING AND PIPING SUPPORTS INSTALLATION ON MODULE KB33
4390	SV3-ECS-TIW-862099	INSTALLATION OF "TEMPORARY MODIFICATION" OF SUPPORTS & CABLES IN SUPPORT OF INITIAL ENERGIZATION FOR UNIT SV3 ANNEX & TURBINE
4391	SV4-VWS-PHW-861588	INSTALLATION OF PIPE SUPPORTS FOR SV4-VWS-PLW-680
4392	SV4-WLS-PHW-ME3288	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING WLS-PLW-215
4393	SV3-4032-SHW-862720	FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG AREA 2 ELEV 100' BETWEEN COLUMN LINES 7.1/7.8 & H/G
4394	SV3-4032-SHW-862721	FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG AREA 2 ELEV 100' BETWEEN COLUMN LINES 7.1/7.8 & F/G
4395	SV3-2051-SHW-862673	ELECTRICAL CABLE TRAY WELDED SUPPORT FABRICATION & INSTALLATION IN THE UNIT 3 TURBINE BUILDING ELEV 141'3" AREA 1
4396	SV3-2051-SHW-862672	ELECTRICAL CABLE TRAY WELDED SUPPORT FABRICATION & INSTALLATION IN THE UNIT 3 TURBINE BUILDING ELEV 141'3" AREA 1
4397	SV3-KB33-KBW-862944	KB33 COMPLETE MODULE STRUCTURAL, HVAC, EQUIPMENTS INSTALLATION

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
4398	SV3-CAS-PHW-850041	INSTALLATION/FABRICATION OF SMALL BORE PIPE SUPPORTS FOR ISO'S CAS-PLW-41C, 41F, 41G
4399	SV3-1212-ERW-800001	Install Field Routed Non 1E Couduit in Aux Area 2 Elev 66'6" Room 12102
4400	SV3-WLS-PHW-800008	Install SB Pipe Supports Per Isometric SV3-WLS-PLW-33B
4401	SV3-ML05-MLW-800005	ASME III: Installation of Penetration 12306-ML-P25
4402	SV3-1120-CCW-CV1817	PLACEMENT, CURING, AND REPAIR OF CONCRETE INSIDE THE CV UP TO ELEV 80'-0" AND ELEV 80'-6"
4403	SV3-1212-ERW-800003	Install Field Routed Class 1E Conduit in Auxillary Building Area 2, Elev. 66'6", Room 12101
4404	SV4-WWS-PHW-860932	FABRICATE AND INSTALL SV4- TURBINE BUILDING WASTE WATER SYSTEM PIPE SUPPORTS
4405	SV4-CA37-S4W-863016	CA37 - MISC STRUCTURAL SHAPE INSTALLATION
4406	SV4-CA20-S4W-800008	CA20, Leak Chase Repairs
4407	SV3-CAS-P0W-863122	INSTALLATION OF CAS PIPING IN ANNEX 3 (SWITCHGEAR ROOM)
4408	SV3-CDS-P0W-863013	INSTALLATION OF CDS PIPING FROM CONDENSATE PUMP DISCHARGE VENTS TO CONDENSER (ISOMETRICS SV3-CDS-PLW-744/745/746
4409	SV4-TCS-P0W-860921	INSTALLATION AND FABRICATION OF TURBINE BUILDIN CLOSED COOLING WATER SYSTEM (TCS)
4410	SV4-FPS-PHW-860335	INSTALL FPS PIPING SUPPORTS IN UNIT 4 TURBINE BUILDING
4411	SV4-HDS-PHW-863195	FABRICATE AND INSTALL HDS PIPING SUPPORTS
4412	SV3-FPS-PHW-862832	INSTALLATION OF FPS PIPE SUPPORTS IN ANNEX 3
4413	SV3-PWS-PHW-862368	INSTALLATION OF ANNEX BLDG PWS PIPE SUPPORTS (ISO SV3-PWS-PLW-115,-457 & -458
4414	SV4-1232-SAW-850000	UNIT 4, AUXILIARY BUILDING STUDS FOR 100' ELEV, AREA 2
4415	SV3-WLS-PLW-80BY-FP907	REWORK SPOOLS SV3-WLS-PLW-80BY-1A,-1B & -2 AND SV3-WLS-PLW-80FY-1A,-1B,-1C & -2
4416	SV3-2034-SHW-800000	Electrical Cable Tray Support Fab and Installation in Unit 3 Turbine Building, Elevation 100' 0", Area 4
4417	SV3-1212-ERW-800004	Install Field Routed Non 1E Couduit in Aux Area 2 Elev 66'6" Room 12102
4418	SV3-KB33-ERW-800000	INSTALLATION OF ELECTRICAL CABLE TRAY IN MODULE KB33
4419	SV3-WLS-PLW-460-FP1010	MODIFICATION OF PIPE SPOOL SV3-WLS-PLW-460-1
4420	SV3-RWS-P0W-863001	INSTALL RWS 34" AND 20" HDPE PIPING TO UNIT 3 COOLING TOWER
4421	SV3-RWS-THW-863144	HYDROTEST RWS 34" AND 20" HDPE PIPING TO UNIT 3 COOLING TOWER

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
4422	SV3-CA01-CCW-800009	CA01 West Steam Generator Concrete, Wall Placement, Section #7, 10b, 10c, 10d, 11, 12, 13 & 15 up to 153'-0"
4423	SV4-2050-SSW-863283	UNIT4 TURBINE BUILDING SEQUENCE 18 ROOMS 20501, 20502 & 20503
4424	SV4-SFS-P0W-861547	INSTALLATION OF PIPING FOR SV4-SFS-PLW-12C & 12I
4425	SV3-1212-SHW-800008	Fabricate and Install Field-Routed Conduit Supports in Room 12102, Area 2, Elev. 66'-6"
4426	SV3-CWS-CYW-863550	PHASE 3 JOINT GROUTING AND FLOWABLE FILL
4427	SV4-KB23-THW-863504	HYDRO TESTING OF WLS PIPING ON MODULE KB23
4428	SV3-CVS-PHW-ME2930	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CVS-PLW-801
4429	SV4-WWS-P0W-863287	INSTALL WASTE WATER SYSTEM PIPING, ISOMETRICS SV4-WWS-PLW-506, -816, 924
4430	SV3-WWS-P0W-863285	INSTALL WASTE WATER SYSTEM PIPING, ISOMETRICS SV3-WWS-PLW-505, -923, 980
4431	SV3-WWS-PHW-860653	FABRICATE AND INSTALL SV3 TURBINE BUILDING WASTE WATER (WWS) SYSTEM PIPING SUPPORTS
4432	SV0-0000-C0W-863503	PERSONNEL ACCESS POINT PEDESTRIAN BRIDGE
4433	SV3-2026-SHW-862477	INSTALLATION OF ELECTRICAL CABLE TRAY WELDED SUPPORTS IN THE UNIT 3 TURBINE BUILDING ELEV 82'-9" AREA 6
4434	SV4-RWS-THW-863145	Hydrotest RWS 34" and 20" HDPE Piping to Unit 4 Cooling Tower
4435	SV4-WWS-THW-863143	HYDROTEST WWS 20" HDPE PIPING FROM UNIT 4 COOLING TOWER
4436	SV3-2044-SHW-861967	ELECTRICAL CABLE TRAY WELDED SUPPORTS
4437	SV3-MSS-PLW-452-FP348	MODIFY PIPE SPOOL
4438	SV4-WWS-P0W-863000	INSTALL WWS 20" HDPE PIPING FROM UNIT 4 COOLING TOWER
4439	SV4-VWS-PHW-855014	Containment Building-Installation of Supports: ISO-SV4-VWS-PLW-502
4440	SV3-PCS-PHW-800001	INSTALL ASME III PIPE SUPPORTS PER SV3-PCS-PLW-035
4441	SV4-2070-SSW-863274	UNIT 4 TURBINE BUILDING ROOF DECKING, SEQUENCE 14, 15 AND 16
4442	SV3-2044-SHW-861966	ELECTRICAL CABLE TRAY WELDED SUPPORTS
4443	SV3-2045-SHW-861893	ELECTRICAL CABLE TRAY WELDED SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 120'6", AREA 5
4444	SV3-4000-SHW-863324	FABRICATE AND INSTALL TYPICAL FIELD ROUTED CONDUIT SUPPORTS C-131 ANNEX BUILDING ALL AREAS AND ELEVATIONS, BOOK 1
4445	SV3-CCS-P0W-800074	Install Large Bore Pipe per SV3-CCS-PLW-516

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Code	Description
4446	SV3-CAS-PHW-850895	INSTALL ISOMETRICS SV3-CAS-PLW-895 SMALL BORE PIPE SUPPORTS
4447	SV3-1214-SHW-862408	FABRICATE & INSTALL DESIGNED CONDUIT SUPPORTS AREA 4 ELEV 66'-6"
4448	SV3-CAS-P0W-862826	INSTALLATION OF ANNEX BLDG CAS PIPING (ISO-CAS-PLW-20S, 25S, 25U, 25V, 202, 203, 205, 211, 217, 224, 225, 227, & 229)
4449	SV4-WWS-THW-862953	HYDROTEST UNIT 4 YARD WASTE WATER SYSTEM UNDERGROUND STEEL PIPING.
4450	SV4-MS18-MSW-800000	TB - Condenser Air Removal Pump Skids (CMS-MS-01A/B/C/D)
4451	SV3-1230-CRW-800008	100'-0" to 115'-6", CL 2 Wall, Rebar Fabrication & Installation (Wall 98)
4452	SV3-4000-SHW-862404	FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS, DETAIL C-94, ANNEX BUILDING, ALL AREAS / ELEVATIONS. BOOK 1
4453	SV4-CA01-S4W-861769	CA01-SA01 ELEV 107" - 119" DWA
4454	SV3-4032-SHW-862719	FABRICATE AND INSTALL CABLE TRAY SUPPORTS, ANNEX BLDG. AREA 2, ELEV. 100', BETWEEN COLUMN LINES 6/7.1 & E/F.
4455	SV4-1130-SLW-861200	Uponder Pit, Fabrication
4456	SV3-1213-ERW-EL3680	FABRICATE AND INSTALL FIELD ROUTED TYPICAL CONDUIT SUPPORT C15 FOR AUX BUILDING (AREAS 3 & 4) EL 66'-6" TO 82'-6"
4457	SV3-1213-ERW-EL3681	FABRICATE AND INSTALL FIELD ROUTED TYPICAL CONDUIT SUPPORT C29 FOR AUX BUILDING (AREAS 3 & 4) EL 66'-6" TO 82'-6"
4458	SV3-1215-ERW-EL3683	FABRICATE AND INSTALL FIELD ROUTED TYPICAL CONDUIT SUPPORT C13 FOR AUX BUILDING (AREAS 5 & 6) EL 66'-6" TO 82'-6"
4459	SV4-2037-SHW-863385	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE TURBINE BUILDING ELEVATION 100'-0" AREA 7 FROM COLUMNS 18 TO 19 & I.2 TO K.1
4460	SV3-2000-PHW-863497	INSTALLATION OF TEMPORARY SUPPORTS FOR FIRE PROTECTION SYSTEM
4461	SV4-2037-SHW-863388	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE TURBINE BUILDING, ELEVATION 100'-0", AREA 7 FROM COLUMNS 18 TO 20 & L.1 TO K.1
4462	SV3-WLS-PHW-800001	Install SB pipe supports per SV3-WLS-PLW-522
4463	SV3-2068-SHW-863447	ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE TURBINE BUILDING UNIT 3, BELOW ELEVATION 230'-9",
4464	SV3-WLS-PHW-800000	Install SB pipe supports per SV3-WLS-PLW-521
4465	SV3-CVS-PHW-800004	Install large bore pipe supports per SV3-CVS-PLW-532
4466	SV3-RNS-PHW-861487	FABRICATION/INSTALLATION OF RNS SMALL BORE PIPE SUPPORTS FOR ISO SV3-RNS-PLW-17U

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
4467	SV3-WLS-P0W-800000	Install small bore pipe per SV3-WLS-PLW-521
4468	SV3-WLS-PHW-800004	Install Small Bore Supports per Isometric SV3-WLS-PLW-524
4469	SV3-RNS-PHW-ME9014	FABRICATION/INSTALLATION OF SUPPORTS FOR ISO SV3-RNS-PLW-174
4470	SV3-WLS-PHW-800003	Install Small Bore Supports per Isometric SV3-WLS-PLW-533
4471	SV4-FPS-PHW-863275	FABRICATION AND INSTALLATION OF SV4 TURBINE BUILDING FPS PIPING SUPPORTS
4472	SV3-2044-SHW-861965	ELECTRICAL CABLE TRAY WELDED SUPPORTS
4473	SV3-6030-C0W-850000	DIESEL GENERATOR BUILDING CONCRERT SLAB AND FOUNDATION
4474	SV4-4040-CRW-863383	AREA 3 WALLS FROM 107'2" TO 123'-8" REINFORCEMEN
4475	SV4-RNS-P0W-850180	INSTALL PIPE ISO SV4-RNS-PLW-180
4476	SV3-WWS-PHW-860663	FABRICATE AND INSTALL SV3 TURBINE BUILDING WASTE WATER (WWS) SYSTEM PIPING SUPPORTS
4477	SV4-CA01-S4W-861770	CA01-SA02 - ELEV 107' TO 119' OLPs AND WELDED ATTACHMENTS
4478	SV3-RNS-PHW-850023	3" LARGE BORE PIPE SUPPORT PER ISO: SV3-RNS-PLW-023
4479	SV4-WWS-PHW-863288	INSTALL WASTE WATER SYSTEM PIPE SUPPORTS ISOMETRICS SV4-WWS-PLW-506, 816, 924
4480	SV3-VYS-PHW-863039	INSTALLATION OF PIPE SUPPORTS IN ANNEX 3
4481	SV3-RWS-P0W-863381	UNIT 3 RAW WATER SYSTEM PIPING NEAR THE BLOWDOWN SUMP
4482	SV4-RWS-P0W-863382	UNIT 4 RAW WATER SYSTEM PIPING AND SUPPORT NEAR THE BLOWDOWN SUMP
4483	SV4-KB37-KBW-863074	SITE COMPLETION OF MODULE KB37 FABRICATION
4484	SV3-PWS-PHW-ME6979	Installation of Annex Bldg PWS Pipe Supports (Isometrics SV3-PWS-PLW-150, 156, 157, 454, 455, 471).
4485	SV3-WWS-PHW-860654	FABRICATE AND INSTALL SV3 TURBINE BUILDING WASTE WATER SYSTEM PIPING SUPPORTS
4486	SV3-VWS-P0W-862835	INSTALLATION OF VWS PIPING IN ANNEX 3
4487	SV0-SDS-PLW-ME1148	Install Sanitary Drain Lines Between Lift Stations MS-501 and MS-502
4488	SV4-1220-CCW-CV10085	UNIT 4 CORE BUILDING IN CONCRETE PLACEMENT OUTSIDE THE CVBH AT ELEV. 72'-6"
4489	SV4-RWS-P0W-863002	INSTALL RWS 34" AND 20" HDPE PIPING TO UNIT 4 COOLING TOWER
4490	SV4-PXS-P0W-800022	Install large bore pipe per SV4-PXS-PLW-029

4528	SV4-MH20-MHW-863168	ASSEMBLY AND INSTALLATION OF 220T TURBINE CRANE
4529	SV3-VWS-PHW-800001	Install large bore pipe support per SV3-VWS-PLW-920
4530	SV3-CVS-P0W-800006	ASME III INSTALL LB PIPING FROM ISO SV3-CVS-PLW-532
4531	SV3-CAS-P0W-800014	Install Small Bore Pipe Per SV3-CAS-PLW-833
4532	SV3-1130-C0W-850003	Containment Concrete Placement, West Side to Elev. 102'-11-1/2"
4533	SV3-MS10-MEW-860243	INSTALLATION OF TURBINE BUILDING FIRST BAY AHUs SV3-VTS-MS-03A & 03B
4534	SV3-CVS-P0W-800004	Install small bore pipe per SV3-CVS-PLW-522
4535	SV4-MS60-MSW-863329	INSTALLATION OF AUXILIARY BOILER DEAERATOR SV4-ASS-ME-01
4536	SV4-1232-SSW-850000	AUXILIARY BUILDING STRUCTURAL STEEL FROM ELEV 82'-6" UP TO 100'-0" AREA 2
4537	SV3-WWS-PHW-ME2683	INSTALLATION OF ANNEX WWS PIPING SUPPORTS (FOR WP SV3-WWS-P0W-ME2633)
4538	SV0-0000-XEW-CV0267	Erosion Control Measures per NOI-20 in Support of the RWI Site Development
4539	SV0-0000-XYW-CV0239	Maintenance and Removal of Various NOI's
4540	SV0-142-PPW-ME0306	PWS & SDS FOR BUILDING 142: SAFETY, MEDICAL AND FIRE FACILITY
4541	SV0-869-XVW-CV1421	Vehicle Barrier Ditch
4542	SV0-RWS-CCW-CV0964	RWS DUCT BANK TO THE RIVER WATER INTAKE
4543	SV0-YFS-PLW-ME0265	FABRICATION AND INSTALLATION OF THE YARD FIRE WATER SYSTEM HDPE PIPING FOR TRENCH 7
4544	SV3-CA01-S4W-CV6061	CA01-43 PERMANENT WELDED ATTACHMENT INSTALLATION
4545	SV3-CA01-S5W-CV4285	CA01-22 N&D SV3-CA01-GNR-000067 REWORK
4546	SV3-CA20-S4W-CV0438	Install CA20-66 Floor into CA20 SA4
4547	SV4-CAS-THW-863505	HYDROSTATIC TESTING OF CAS PIPING ON MODULE R161
4548	SV3-CVS-PLW-ME0560	INSTALLATION OF LARGE BORE CVS PIPING. INCLUDES ISOMETRICS SV3-CVS-PLW-561 AND 562

Exhibit V – Legacy, WIP, and Completed Work Packages

Table 3. In-Progress Work Packages (as of October 17, 2017)		
4549	SV3-DWS-PLW-ME0930	Fabricate and Install Small Bore Elevation 1 DWS Piping Iso SV3-DWS-PLW-773
4550	SV3-HDS-PHW-ME1366	FABRICATE AND INSTALL HEATER DRAIN PIPE SUPPORTS ON FEEDWATER HEATER DRAIN COOLER 7B
4551	SV3-ME01-PLW-ME1011	Unit 3 Condenser C: Installation of Upper Shell Nozzles
4552	SV3-MT6F-MEW-ME3568	INSTALLATION OF MAIN FEEDWATER PUMP DRAIN COLLECTOR (FWS-MT-01)
4553	SV3-PXS-PLW-ME0931	Fabricate and Install Small Bore Elevation 1 PXS Piping Iso SV3-PXS-PLW-824
4554	SV3-WLS-MTW-ME0746	WLS EFFLUENT HOLDUP TANK B INSTALLATION
4555	SV3-WLS-MTW-ME0747	WASTE HOLDUP TANK A INSTALLATION
4556	SV3-WLS-MTW-ME0748	WASTE HOLDUP TANK B INSTALLATION
4557	SV3-WLS-MTW-ME0749	WLS MONITOR TANK C INSTALLATION
4558	SV3-WLS-MTW-ME0750	WLS CHEMICAL WASTE TANK INSTALLATION
4559	SV3-WLS-PLW-ME0855	ASME SECTION III FABRICATE AND INSTALL THE LIQUID RADWASTE SYSTEM (WLS) COLLECTED DRAIN LINE (WLS-PL-L063) TO CONTAINMEN
4560	SV3-WRS-P0W-ME2492	FABRICATION AND INSTALLATION OF LARGE BORE WRS PIPING (ISOMETRIC SV3-WRS-PLW-65A, -65B, -654)
4561	SV3-WRS-PHW-ME0774	INSTALLATION OF LARGE BORE WRS PIPING SUPPORTS: SV3-WRS-PH-12R4039, 12R4038)
4562	SV3-WRS-PHW-ME0775	INSTALLATION OF LARGE BORE WRS PIPING SUPPORTS: SV3-WRS-PH-12R0058, 12R0053)
4563	SV3-WRS-PLW-ME0944	WELDING OF WRS PIPING DRAIN HUBS (CA20 SCOPE) (DRAINS FOUND ON ISOMETRIC SV3-WRS-PLW-59R, 654, 65B, 652, 650, AND 56G)
4564	SV4-1230-SSW-850000	AUXILIARY BUILDING STRUCTURAL STEEL FROM ELEV 82'-6" UP TO 100'-0" AREA 5 & 6
4565	SV3-SFS-P0W-ME4355	INSTALLATION OF LARGE BORE SFS PIPING ISOMETRICS SV3-SFS-PLW-53N, 53P, 53Y, 53Z
4566	SV3-WLS-PHW-ME1040	FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING WLS-PLW-061
4567	SV4-1208-C0W-850004	CYLINDRICAL WALL RC04
4568	SV3-2041-SHW-861948	INSTALLATION OF WELDED CABLE TRAY SUPPORTS IN TURBINE BUILDING (ELEV 120'6" AREA 1)
4569	SV3-CVS-PHW-ME4774	INSTALLATION OF ANNEX CVS PIPING SUPPORTS FOR WP (SV3-CVS-P0W-ME4773)
4570	SV3-CVS-P0W-ME4773	FABRICATE AND INSTALL CVS PIPING INCLUDING ISOMETRIC: SV3-CVS-PLW-641,650,680 & 694
4571	SV3-PXS-PHW-800074	INSTALL ASME III SUPPORT SV3-PXS-PH-11R0128 FROM ISO SV3-PXS-PLW-02X
4572	SV4-KB23-KBW-863105	INSTALLATION OF KB23
4573	SV4-CDS-P0W-863008	INSTALL CDS PIPING IN UNIT 4 TURBINE BUILDING
4574	SV4-WLS-THW-863432	HYDROSTATIC TESTING OF WLS PIPING ON MODULE KB20
4575	SV3-WWS-P0W-863012	Install Large Bore WWS Piping

Exhibit V – Legacy, WIP, and Completed Work Packages

ID	Work Package ID	Description
4576	SV4-ME04-MEW-863331	INSTALL TB 4 MSR MOISTURE SEPARATOR REHEATER SV4-MSS-ME-01B
4577	SV4-4002-SSW-863240	Unit 4 Annex Building Area 2 Stair Tower S04 Girts and Tie-Rods
4578	SV3-RNS-PHW-800004	Install large bore pipe supports per SV3-RNS-PLW-17F
4579	SV4-DWS-THW-861309	Hydrostatic Testing of WGS Piping on Module R161
4580	SV4-ME03-MEW-863437	Installation of Deaerator SV4-CDS-ME-05
4581	SV4-WGS-THW-861312	Hydrostatic Testing of WGS Piping on Module R161
4582	SV4-VWS-THW-861311	Hydrostatic Testing of VWS Piping on Module R161
4583	SV4-PGS-THW-861310	Hydrostatic Testing of PGS Piping on Module R161
4584	SV4-CCS-THW-861308	Hydrostatic Testing of CCS Piping on Module R161
4585	SV3-CA20-C0W-850010	U3 CA20 FLOOR SUBMODULES 45 AND 46 CONCRETE PLACEMENT AT ELEV 92'-6"
4586	SV3-4032-SHW-862717	FABRICATE AND INSTALL CABLE TRAY SUPPORTS, ANNEX BLDG. AREA 2, ELEV. 100', BETWEEN COLUMN LINES 6/7.1 & F/G.
4587	SV3-4032-SHW-862718	FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG AREA 2 ELEV 100' BETWEEN COLUMN LINES 4.1/6 & E/F
4588	SV4-FPS-P0W-860334	Fabricate/Install Fire Protection Piping in Unit 4 Turbine Building
4589	SV3-4031-ERW-863443	INSTALLATION OF ALL UNSCHEDULED CONDUIT TO INCLUDE BOXES & RECEPTACLES FOR POWER IN ANNEX BLDG AREA 1 ELEV 100'-0"
4590	SV4-MS60-MSW-861738	Installation of ASS Electrolyte Feed Tank (ASS-MT-06) and Auxiliary Steam Separator (ASS-MT-08)
4591	SV3-2036-SHW-861528	ELECTRICAL CABLE TRAY (WELDED) SUPPORT FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING ELEV 100'0" AREA 6
4592	SV4-0000-C0W-863509	UNIT 4 TRANSFORMER EXCITER PAD
4593	SV3-CCS-PHW-862865	INSTALLATION OF CCS PIPE SUPPORTS IN ANNEX 3
4594	SV3-VWS-PLW-10AU-FP1088	FABRICATION OF PIPE SPOOLS SV3-VWS-PLW-10AU-1 THRU 5
4595	SV4-KB23-KBW-863299	COMPLETE MODULE KB23 FABRICATION
4596	SV4-2070-EGW-863325	GROUNDING INSTALLATION IN THE UNIT 4 TURBINE BUILDING FROM ABOVE THE 170' ELEVATION TO THE 254' ELEVATION ROOF.
4597	SV4-WWS-THW-863430	PRESSURE TESTING OF WWS PIPING ON MODULE KB10
4598	SV3-PWS-P0W-861752	INSTALLATION OF PWS PIPING IN ANNEX 3 AREA 1 (ISO'S SV3-PWS-PLW-154, 171, 172, 447, 456, 461 & 966)
4599	SV3-FPS-P0W-862829	INSTALLATION OF FPS PIPING IN ANNEX 3
4600	SV3-1215-ERW-EL3684	FABRICATE AND INSTALL FIELD ROUTED TYPICAL CONDUIT SUPPORT C14 FOR AUX BUILDING (AREAS 5 & 6) EL 66'-6" TO 82'-6"
4601	SV3-KU20-KUW-800002	Auxillary Building- Staging of Filter Vessel Shield Box KU20CV4
4602	SV3-1131-SSW-800000	IRWST TOWER INSTALLATION @ ELEVATION 103'-1 1/2"

Exhibit V – Legacy, WIP, and Completed Work Packages

Work Package ID	Work Package Description	Work Package Details
4603	SV3-2043-SHW-861599	ELECTRICAL CABLE TRAY TRAPEZE SUPPORTS FABRICATION AND INSTALLATION IN UNIT 3 TURBINE BUILDING, ELEVATION 120'6", AREA 3
4604	SV3-2051-SHW-862676	ELECTRICAL CABLE TRAY WELDED SUPPORT FABRICATION AND INSTALLATION IN THE UNIT 3 TUBRING BUILDING ELEVATION 141'-3" AREA 1
4605	SV3-2051-SHW-862678	ELECTRICAL CABLE TRAY WELDED SUPPORT FABRICATION AND INSTALLATION IN THE UNIT 3 TUBRINE BUILDING ELEVATION 141'-3" AREA 1
4606	SV3-PWS-PHW-861755	INSTALL OF PWS PIPE SUPPORTS IN ANNEX 3 (AREA 1 ISO'S SV3-PWS-PLW-154, 171, 172, 447, 456, 461 & 966)
4607	SV4-0000-C0W-863510	UNIT 4 TRANSFORMER PEDESTAL PLACEMENT 14, 16, & 18
4608	SV4-CA33-S5W-863153	CA33 SEAM WELDS
4609	SV3-VWS-PHW-ME2797	INSTALLATION OF VWS SUPPORTS FOR ISOMETRIC SV3-VWS-PLW-10Q.
4610	SV3-CAS-PHW-862827	INSTALLATION OF ANNEX BLDG CAS PIPE SUPPORTS (ISO SV3-CAS-PLW-20S, 25S, 25U, 25V, 202, 203, 205, 211, 217, 224, 225, 227, & 229)
4611	SV4-CDS-P0W-860324	INSTALLATION AND FABRICATION OF CONDENSATE SYSTEM (CDS) PIPING
4612	SV3-VXS-PHW-862459	INSTALLATION OF VXS PIPE SUPPORTS IN ANNEX 3
4613	SV3-CVS-P0W-800001	Install ASME III SB Piping for ISO SV3-CVS-PLW-511
4614	SV3-RNS-PHW-800005	Install Large Bore Pipe Supports per Isometric SV3-RNS-PLW-090

THE SOUTHERN COMPANY
CERTIFICATION OF CHIEF EXECUTIVE OFFICER

I, Thomas A. Fanning, certify that:

1. I have reviewed this annual report on Form 10-K of The Southern Company;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Members of Southern Natural Gas Company, L.L.C.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Southern Natural Gas Company, L.L.C. and its subsidiary (the "Company") as of December 31, 2017 and 2016, and the related consolidated statements of income, of cash flows and of members' equity for the year ended December 31, 2017 and for the four months ended December 31, 2016, including the related notes (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016, and the results of their operations and their cash flows for the year ended December 31, 2017 and for the four months ended December 31, 2016 in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's consolidated financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these consolidated financial statements in accordance with the auditing standards of the PCAOB and in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Significant Transactions with Related Parties

As discussed in Note 6 to the consolidated financial statements, the Company has entered into significant transactions with related parties.

SOUTHERN NATURAL GAS COMPANY, L.L.C. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. General

We are a Delaware limited liability company, originally formed in 1935 as a corporation. When we refer to “us,” “we,” “our,” “ours,” “the Company,” or “SNG,” we are describing Southern Natural Gas Company, L.L.C and its consolidated subsidiary.

The member interests in us are as follows:

- 50.0% - Kinder Morgan SNG Operator, LLC, an indirect subsidiary of Kinder Morgan, Inc. (KMI); and
- 50.0% - Evergreen Enterprise Holdings, LLC, an indirect subsidiary of The Southern Company (TSC).

Our operations are regulated by the Federal Energy Regulatory Commission (FERC) under the Natural Gas Act of 1938, the Natural Gas Policy Act of 1978 and the Energy Policy Act of 2005. The FERC approves tariffs that establish rates, cost recovery mechanisms and other terms and conditions of service to our customers.

Our primary business consists of the interstate transportation and storage of natural gas. Our natural gas pipeline system consists of approximately 6,900 miles of pipeline with a design capacity of approximately 4.2 billion cubic feet (Bcf) per day for natural gas. This pipeline system extends from supply basins in Louisiana, Mississippi and Alabama to market areas in Louisiana, Mississippi, Alabama, Florida, Georgia, South Carolina and Tennessee, including the metropolitan areas of Atlanta and Birmingham. We also own and operate 100% of the Muldon storage facility in Monroe County, Mississippi and own a 50% interest in Bear Creek Storage Company, L.L.C. (Bear Creek) in Bienville Parish, Louisiana. Bear Creek is a joint venture equally owned by us and Tennessee Gas Pipeline Company, L.L.C., an affiliate. Our interest in Bear Creek, the Muldon storage facilities and contracted storage have a combined working natural gas storage capacity of approximately 68 Bcf and peak withdrawal capacity of approximately 1.3 Bcf per day.

2. Summary of Significant Accounting Policies

Basis of Presentation

We have prepared our accompanying consolidated financial statements in accordance with the accounting principles contained in the Financial Accounting Standards Board's (FASB) Accounting Standards Codification, the single source of United States Generally Accepted Accounting Principles (GAAP) and referred to in this report as the Codification. Additionally, certain amounts from the prior year have been reclassified to conform to the current presentation.

Management has evaluated subsequent events through February 14, 2018, the date the financial statements were available to be issued.

Principles of Consolidation

We consolidate entities when we have the ability to control or direct the operating and financial decisions of the entity or when we have a significant interest in the entity that gives us the ability to direct the activities that are significant to that entity. The determination of our ability to control, direct or exert significant influence over an entity involves the use of judgment. All significant intercompany items have been eliminated in consolidation.

Use of Estimates

Certain amounts included in or affecting our financial statements and related disclosures must be estimated, requiring us to make certain assumptions with respect to values or conditions which cannot be known with certainty at the time our financial statements are prepared. These estimates and assumptions affect the amounts we report for assets and liabilities, our revenues and expenses during the reporting period, and our disclosures, including as it relates to contingent assets and liabilities at the date of our financial statements. We evaluate these estimates on an ongoing basis, utilizing historical experience, consultation with experts and other methods we consider reasonable in the particular circumstances. Nevertheless, actual results may differ significantly from our estimates. Any effects on our business, financial position or results of operations resulting from revisions to these estimates are recorded in the period in which the facts that give rise to the revision become known.

In addition, we believe that certain accounting policies are of more significance in our financial statement preparation process than others, and set out below are the principal accounting policies we apply in the preparation of our consolidated financial statements.

Cash Equivalents

We define cash equivalents as all highly liquid short-term investments with original maturities of three months or less.

Accounts Receivable, net

We establish provisions for losses on accounts receivable due from shippers and operators if we determine that we will not collect all or part of the outstanding balance. We regularly review collectability and establish or adjust our allowance as necessary using the specific identification method. The allowance for doubtful accounts as of December 31, 2017 and 2016 was not significant.

Inventories

Our inventories, which consist of materials and supplies, are valued at weighted-average cost, and we periodically review for physical deterioration and obsolescence.

Natural Gas Imbalances

Natural gas imbalances occur when the amount of natural gas delivered from or received by a pipeline system or storage facility differs from the scheduled amount of gas to be delivered or received. We value these imbalances due to or from shippers and operators at current index prices. Imbalances are settled in cash or made up in-kind, subject to the terms of our FERC tariff. Imbalances due from others are reported on our accompanying Consolidated Balance Sheets in "Other current assets." Imbalances owed to others are reported on our accompanying Consolidated Balance Sheets in "Other current liabilities." We classify all imbalances due from or owed to others as current as we expect to settle them within a year.

Property, Plant and Equipment, net

Our property, plant and equipment is recorded at its original cost of construction or, upon acquisition, at either the fair value of the assets acquired or the cost to the entity that first placed the asset in utility service. For constructed assets, we capitalize all construction-related direct labor and material costs, as well as indirect construction costs. Our indirect construction costs primarily include an interest and equity return component (as more fully described below) and labor and related costs associated with supporting construction activities. The indirect capitalized labor and related costs are based upon estimates of time spent supporting construction projects.

We use the composite method to depreciate property, plant and equipment. Under this method, assets with similar economic characteristics are grouped and depreciated as one asset. The FERC-accepted depreciation rate is applied to the total cost of the group until the net book value equals the salvage value. For certain general plant, the asset is depreciated to zero. As part of periodic filings with the FERC, we also re-evaluate and receive approval for our depreciation rates. When property, plant and equipment is retired, accumulated depreciation and amortization is charged for the original cost of the assets in addition to the cost to remove, sell or dispose of the assets, less salvage value. We do not recognize gains or losses unless we sell land or an entire operating unit (as approved by the FERC). In those instances where we receive recovery in rates related to losses on dispositions of operating units, we record a regulatory asset for the estimated recoverable amount.

Included in our property balances are base gas and working gas at our storage facilities. We periodically evaluate natural gas volumes at our storage facilities for gas losses. When events or circumstances indicate a loss has occurred, we recognize a loss on our accompanying Consolidated Statements of Income or defer the loss as a regulatory asset on our accompanying Consolidated Balance Sheets if deemed probable of recovery through future rates charged to customers.

We capitalize a carrying cost (an allowance for funds used during construction or AFUDC) on debt and equity funds related to the construction of long-lived assets. This carrying cost consists of a return on the investment financed by debt and a return on the investment financed by equity. The debt portion is calculated based on our average cost of debt. Interest costs capitalized are included as a reduction in "Interest, net" on our accompanying Consolidated Statements of Income. The equity portion is calculated based on our most recent FERC approved rate of return. Equity amounts capitalized are included in "Other, net" on our accompanying Consolidated Statements of Income. The amounts of capitalized AFUDC were not significant for the year ended December 31, 2017 and the four months ended December 31, 2016.

Asset Retirement Obligations (ARO)

We record liabilities for obligations related to the retirement and removal of long-lived assets used in our businesses. We record, as liabilities, the fair value of ARO on a discounted basis when they are incurred and can be reasonably estimated, which is typically at the time the assets are installed or acquired. Amounts recorded for the related assets are increased by the amount of these obligations. Over time, the liabilities increase due to the change in their present value, and the initial capitalized costs are depreciated over the useful lives of the related assets. The liabilities are eventually extinguished when the asset is taken out of service.

We are required to operate and maintain our natural gas pipelines and storage systems, and intend to do so as long as supply and demand for natural gas exists, which we expect for the foreseeable future. Therefore, we believe that we cannot reasonably estimate the ARO for the substantial majority of our assets because these assets have indeterminate lives. We continue to evaluate our ARO and future developments could impact the amounts we record. Our recorded ARO were not significant as of December 31, 2017 and 2016.

Asset and Investment Impairments

We evaluate our assets and investments for impairment when events or circumstances indicate that their carrying values may not be recovered. These events include market declines that are believed to be other than temporary, changes in the manner in which we intend to use a long-lived asset, decisions to sell an asset or investment and adverse changes in market conditions or in the legal or business environment such as adverse actions by regulators. If an event occurs, which is a determination that involves judgment, we evaluate the recoverability of our carrying value based on either (i) the long-lived asset's ability to generate future cash flows on an undiscounted basis or (ii) the fair value of the investment in an unconsolidated affiliate. If an impairment is indicated, or if we decide to sell a long-lived asset or group of assets, we adjust the carrying value of the asset downward, if necessary, to its estimated fair value.

Our fair value estimates are generally based on assumptions market participants would use, including market data obtained through the sales process or an analysis of expected discounted future cash flows. There were no impairments for the year ended December 31, 2017 and the four months ended December 31, 2016.

Equity Method of Accounting

We account for investments, which we do not control but do have the ability to exercise significant influence, by the equity method of accounting. Under this method, our equity investments are carried originally at our acquisition cost, increased by our proportionate share of the investee's net income and by contributions made, and decreased by our proportionate share of the investee's net losses and by distributions received.

Revenue Recognition

We are subject to FERC regulations, therefore fees and rates established under our tariff are a function of our cost of providing services to our customers, including a reasonable return on our invested capital. Our revenues are primarily generated from natural gas transportation and storage services and include estimates of amounts earned but unbilled. We estimate these unbilled revenues based on contract data, regulatory information, and preliminary throughput and allocation measurements, among other items. Revenues for all services are based on the thermal quantity of gas delivered or subscribed at a price specified in the contract. For our transportation services and storage services, we recognize reservation revenues on firm contracted capacity ratably over the contract period regardless of the amount of natural gas that is transported or stored. For interruptible or volumetric-based services, we record revenues when physical deliveries of natural gas are made at the agreed upon delivery point or when gas is injected or withdrawn from the storage facility. For contracts with step-up or step-down rate provisions that are not related to changes in levels of service, we recognize reservation revenues ratably over the contract life. The revenues we collect may be subject to refund in a rate proceeding.

For the year ended December 31, 2017, revenues from our two largest customers (one affiliate and one third party) were approximately \$269 million, and \$55 million, each of which exceeded 10% of our operating revenues. For the the four months ended December 31, 2016, revenues from our largest affiliate and non-affiliate customers were approximately \$89 million and \$52 million, respectively, each of which exceeded 10% of our operating revenues for that period, see Note 6. Amounts for both periods include contracted capacity released by customers to third parties.

In September 2016, we recognized revenue of \$37 million from an early termination of a customer contract.

Environmental Matters

We capitalize or expense, as appropriate, environmental expenditures. We capitalize certain environmental expenditures required in obtaining rights-of-way, regulatory approvals or permitting as part of the construction. We accrue and expense environmental costs that relate to an existing condition caused by past operations, which do not contribute to current or future revenue generation. We generally do not discount environmental liabilities to a net present value, and we record environmental liabilities when environmental assessments and/or remedial efforts are probable and we can reasonably estimate the costs. Generally, our recording of these accruals coincides with our completion of a feasibility study or our commitment to a formal plan of action. We recognize receivables for anticipated associated insurance recoveries when such recoveries are deemed to be probable.

We routinely conduct reviews of potential environmental issues and claims that could impact our assets or operations. These reviews assist us in identifying environmental issues and estimating the costs and timing of remediation efforts. We also routinely adjust our environmental liabilities to reflect changes in previous estimates. In making environmental liability estimations, we consider the material effect of environmental compliance, pending legal actions against us, and potential third-party liability claims. Often, as the remediation evaluation and effort progresses, additional information is obtained, requiring revisions to estimated costs. These revisions are reflected in our income in the period in which they are reasonably determinable. For more information on our environmental matters, see Note 9.

Other Contingencies

We recognize liabilities for other contingencies when we have an exposure that indicates it is both probable that a liability has been incurred and the amount of loss can be reasonably estimated. Where the most likely outcome of a contingency can be reasonably estimated, we accrue an undiscounted liability for that amount. Where the most likely outcome cannot be estimated, a range of potential losses is established and if no one amount in that range is more likely than any other, the low end of the range is accrued.

Postretirement Benefits

We maintain a postretirement benefit plan covering certain of our former employees that we have made contributions to in the past. These contributions are invested until the benefits are paid to plan participants. The net benefit cost of this plan is recorded on our accompanying Consolidated Statements of Income and is a function of many factors including expected returns on plan assets and amortization of certain deferred gains and losses. For more information on our policies with respect to our postretirement benefit plan, see Note 5.

In accounting for our postretirement benefit plan, we record an asset or liability based on the difference between the fair value of the plan's assets and the plan's benefit obligation. Any deferred amounts related to unrecognized gains and losses or changes in actuarial assumptions are recorded on our Consolidated Balance Sheets as a regulatory asset or liability until those gains or losses are recognized on our accompanying Consolidated Statements of Income.

Income Taxes

We are a limited liability company and are not subject to federal or state income taxes. Our Members are responsible for income taxes on their allocated share of taxable income which may differ from income for financial statement purposes due to differences in the tax basis and financial reporting basis of assets and liabilities. However, we are subject to Texas margin tax (a revenue based calculation).

Regulatory Assets and Liabilities

Our interstate natural gas pipeline and storage operations are subject to the jurisdiction of the FERC and are accounted for in accordance with Accounting Standards Codification Topic 980, "Regulated Operations." Under these standards, we record regulatory assets and liabilities that would not be recorded for non-regulated entities. Regulatory assets and liabilities represent probable future revenues or expenses associated with certain charges and credits that are expected to be recovered from or refunded to customers through the ratemaking process. Items to which we apply regulatory accounting requirements include certain postretirement employee benefit plan costs, losses on reacquired debt, taxes related to an equity return component on regulated capital projects prior to our change in legal structure to a non taxable entity, certain differences between gas retained and gas consumed in operations, amounts associated with the Tax Cuts and Jobs Act of 2017 (2017 Tax Reform) and other costs included in, or expected to be included in, future rates. For more information on our regulated operations, see Note 8.

3. Property, Plant and Equipment, net

Our property, plant and equipment, net consisted of the following (in millions, except for %):

	Annual Depreciation Rates %	December 31,	
		2017	2016
Transmission and storage facilities	0.9-2.25	\$ 3,648	\$ 3,570
General plant	3.33-20	19	25
Intangible plant	5-10	20	19
Other		129	116
Accumulated depreciation and amortization(a)		(1,412)	(1,344)
		2,404	2,386
Land		13	12
Construction work in progress		22	53
Property, plant and equipment, net		\$ 2,439	\$ 2,451

(a) The composite weighted average depreciation rate for the year ended December 31, 2017 and the four months ended December 31, 2016 was approximately 2.3%.

4. Debt

We classify our debt based on the contractual maturity dates of the underlying debt instruments. We defer costs associated with debt issuance over the applicable term. These costs are then amortized as interest expense on our accompanying Consolidated Statements of Income.

The following table summarizes the net carrying value of our outstanding debt (in millions):

	December 31,	
	2017	2016
5.90% Notes due April 2017	\$ —	\$ 500
4.40% Notes due June 2021	300	300
7.35% Notes due February 2031	153	153
8.00% Notes due March 2032	258	258
4.80% Senior Notes due March 2047	400	—
Credit Facility	13	—
	1,124	1,211
Less: Unamortized discount and debt issuance costs	9	5
Total debt	\$ 1,115	\$ 1,206
Less: Current portion of debt	13	500
Total long-term debt	\$ 1,102	\$ 706

Credit Facility

Effective September 1, 2016, we entered into a \$75 million, unsecured, 5-year revolving credit facility (Credit Facility). The facility is with a syndicate of financial institutions with Barclays Bank PLC as the administrative agent. Borrowings under our Credit Facility can be used for working capital and other general corporate purposes and are included within the caption “Current portion of debt” on our accompanying Consolidated Balance Sheet.

Our Credit Facility borrowings bear interest at either (i) London Interbank Offered Rate (LIBOR) plus an applicable margin ranging from 0.875% to 1.50% per annum based on our credit ratings or (ii) the greatest of the (a) Federal Funds Effective rate plus ½ of 1%, (b) the Prime Rate in effect for such day, and (c) the LIBOR rate for a one-month Eurodollar loan plus 1%, plus, in each

case, an applicable margin ranging from nil to 1.5%. In addition, we have agreed to pay the administrative agent a commitment fee, based on our credit rating, ranging from 0.075% to 0.200%.

Our Credit Facility includes the following restrictive covenants:

- total debt divided by earnings before interest, income taxes, depreciation and amortization may not exceed 5.00 to 1.00;
- certain limitations on indebtedness, including payments and amendments;
- certain limitations on entering into mergers, consolidations, sales of assets and investments;
- limitations on granting liens; and
- prohibitions on making any distributions if an event of default exists or would exist upon making such a distribution.

As of December 31, 2017, we had \$13 million of borrowings outstanding under our Credit Facility. As of December 31, 2016, we had no borrowings outstanding under our Credit Facility. As of December 31, 2017 and 2016, we were in compliance with all required covenants.

Debt Issuance and Repayment

On March 15, 2017 we issued \$400 million of 4.80% senior notes due March 2047 and incurred debt issuance costs of \$4 million. On April 3, 2017 we used the net proceeds of \$399 million received from the debt issuance and equity contributions from our Members to repay \$500 million of our 5.90% notes due April 2017.

Debt Covenants

Under our various other financing documents, we are subject to certain restrictions and covenants. The most restrictive of these include limitations on the incurrence of liens and limitations on sale-leaseback transactions. For the year ended December 31, 2017 and the four months ended December 31, 2016, we were in compliance with our debt-related covenants.

5. Retirement Benefits

Pension and Retirement Savings Plans

KMI maintains a pension plan and a retirement savings plan covering substantially all of its U.S. employees, including certain of our former employees. The benefits under the pension plan are determined under a cash balance formula. Under its retirement savings plan, KMI contributes an amount equal to 5% of participants' eligible compensation per year. KMI is responsible for benefits accrued under its plans and allocates certain costs based on a benefit allocation rate applied on payroll charged to its affiliates.

Postretirement Benefits Plan

We provide postretirement benefits, including medical benefits for a closed group of retirees. Medical benefits for pre-age 65 participants of this closed group may be subject to deductibles, co-payment provisions, dollar caps and other limitations on the amount of employer costs, and are subject to further benefit changes by KMI, the plan sponsor. Post-age 65 Medicare eligible participants are provided a fixed subsidy to purchase coverage through a retiree Medicare exchange. In addition, certain former employees continue to receive limited postretirement life insurance benefits. Our postretirement benefit plan costs were prefunded and were recoverable under prior rate case settlements. Currently, there is no cost recovery or related funding that is required as part of our current FERC approved rates, however, we can seek to recover any funding shortfall that may be required in the future. We do not expect to make any contributions to our postretirement benefit plan in 2018 and there were no contributions made in 2017 and 2016. KMI's postretirement plans have been merged. Prior to September 1, 2016, KMI used combined plan assets under the structure of the plans of its affiliated entities to fund participant benefits, including participants of affiliated entities.

Postretirement Benefit Obligation, Plan Assets and Funded Status

Our postretirement benefit obligations and net benefit costs are primarily based on actuarial calculations. We use various assumptions in performing these calculations, including those related to the return that we expect to earn on our plan assets, the estimated cost of health care when benefits are provided under our plan and other factors. A significant assumption we utilize is the discount rates used in calculating the benefit obligations. The discount rate used in the measurement of our postretirement benefit obligation is determined by matching the timing and amount of our expected future benefit payments for our postretirement benefit obligation to the average yields of various high-quality bonds with corresponding maturities. The service and interest cost

components of net periodic benefit cost (credit) for our other postretirement benefit plan are estimated by utilizing a full yield curve approach by applying the specific spot rates along the yield curve used in the determination of the benefit obligation to their underlying projected cash flows.

The table below provides information about our postretirement benefit plan (in millions):

	Year Ended December 31, 2017	Four Months Ended December 31, 2016
Change in plan assets:		
Fair value of plan assets - beginning of period	\$ 58	\$ 57
Actual return on plan assets	5	2
Benefits paid	(3)	(1)
Fair value of plan assets - end of period	<u>\$ 60</u>	<u>\$ 58</u>
Change in postretirement benefit obligation:		
Postretirement benefit obligation - beginning of period	\$ 29	\$ 30
Interest cost(a)	1	—
Actuarial gain(b)	—	—
Benefits paid	(3)	(1)
Postretirement benefit obligation - end of period	<u>\$ 27</u>	<u>\$ 29</u>
Reconciliation of funded status:		
Fair value of plan assets	\$ 60	\$ 58
Less: Postretirement benefit obligation	27	29
Net asset at December 31(c)	<u>\$ 33</u>	<u>\$ 29</u>

(a) Amount during the four months ended December 31, 2016 was less than \$500,000.

(b) Amounts during the year ended December 31, 2017 and the four months ended December 31, 2016 were less than \$500,000.

(c) Net asset amounts are included in "Deferred charges and other assets" on our accompanying Consolidated Balance Sheets.

Plan Assets

The primary investment objective of our plan is to ensure that, over the long-term life of the plan, an adequate pool of sufficiently liquid assets exists to meet the benefit obligations to retirees and beneficiaries. Investment objectives are long-term in nature covering typical market cycles. Any shortfall of investment performance compared to investment objectives is generally the result of economic and capital market conditions. Although actual allocations vary from time to time from our targeted allocations, the target allocations of our postretirement plan's assets are 30% equity, 30% fixed income and 40% master limited partnerships.

Below are the details of the postretirement benefit plan assets by class and a description of the valuation methodologies used for assets measured at fair value.

- Level 1 assets' fair values are based on quoted market prices for the instruments in actively traded markets. Included in this are equities and master limited partnerships using the quoted prices in actively traded markets;
- Level 2 assets' fair values are primarily based on pricing, data representative of quoted prices for similar assets in active markets (or identical assets in less active markets). Included in this are short term investment funds which are valued at cost plus calculated interest; and
- Plan assets with fair values that are based on the net asset value per share, or its equivalent (NAV), as reported by the issuers are determined based on the fair value of the underlying securities as of the valuation date and include private limited partnerships and fixed income trusts. The plan assets measured at NAV are not categorized within the fair value hierarchy described above, but are separately identified in the table below.

Listed below are the fair values of the plan's assets that are recorded at fair value by class and categorized by fair value measurement used at December 31, 2017 and 2016 (in millions):

	2017			2016		
	Level 1	Level 2	Total	Level 1	Level 2	Total
Short-term investment fund (money market)	\$ —	\$ 1	\$ 1	\$ —	\$ 1	\$ 1
Equity securities, domestic	5	—	5	3	—	3
Master limited partnerships	14	—	14	14	—	14
Total assets in fair value hierarchy	\$ 19	\$ 1	\$ 20	\$ 17	\$ 1	\$ 18
Investments measured at NAV(a)			40			40
Investments at fair value			\$ 60			\$ 58

(a) In accordance with Subtopic 820-10 of Accounting Standards Update (ASU) No. 2015-07, *Fair Value Measurement (Topic 820)*, certain Plan assets that were measured at NAV per share (or its equivalent) have not been classified in the fair value hierarchy. The fair value of the fixed income trusts as of December 31, 2017 and 2016 is \$18 million and \$15 million, respectively. The fair value of the private limited partnerships as of December 31, 2017 and 2016 is \$22 million and \$25 million, respectively.

Expected Payment of Future Benefits

As of December 31, 2017, we expect the following benefit payments under our plan (in millions):

Year	Total
2018	\$ 3
2019	3
2020	2
2021	2
2022	2
2023 - 2027	9

Actuarial Assumptions and Sensitivity Analysis

Postretirement benefit obligations and net benefit costs are based on actuarial estimates and assumptions. The following table details the weighted average actuarial assumptions used in determining our postretirement plan obligations and net benefit costs.

	2017	2016
	(%)	
Assumptions related to benefit obligations at December 31:		
Discount rate	3.45	3.63
Assumptions related to benefit costs for the year ended December 31:		
Discount rate for benefit obligations	3.63	3.82
Discount rate for interest on benefit obligations	2.93	2.98
Expected return on plan assets(a)	7.00	7.25

(a) The expected return on plan assets listed in the table above is a pre-tax rate of return based on our portfolio of investments. We utilize an after-tax expected return on plan assets to determine our benefit costs, which is based on unrelated business income taxes with a weighted average rate of 21% for both 2017 and 2016.

Actuarial estimates for our postretirement benefits plan assumed a weighted average annual rate of increase in the per capita costs of covered health care benefits of 6.41%, gradually decreasing to 4.54% by the year 2038. A one-percentage point change in assumed health care trends would not have had a significant effect on the postretirement benefit obligation or interest costs as of and for the year ended December 31, 2017 and the four months ended December 31, 2016.

Components of Net Benefit Income

The components of net benefit costs (income) are as follows (in millions):

	Year Ended December 31, 2017	Four Months Ended December 31, 2016
Interest cost(a)	\$ 1	\$ —
Expected return on plan assets	(3)	(1)
Amortization of prior service credit(a)	(2)	—
Net benefit income	<u>\$ (4)</u>	<u>\$ (1)</u>

(a) Amounts during the four months ended December 31, 2016 were less than \$500,000.

6. Related Party Transactions

Affiliate Balances and Activities

We enter into transactions with our affiliates within the ordinary course of business, including natural gas transportation services to and from affiliates under long-term contracts, storage contracts and various operating agreements, and the services are based on the same terms as non-affiliates. As of December 31, 2017 and 2016, we had approximately \$1 million of natural gas imbalance receivable with our affiliates which is included in “Other current assets” on our accompanying Consolidated Balance Sheets.

We do not have employees and are operated by an indirect subsidiary of KMI; therefore, KMI employees provide services to us. Subsequent to TSC's acquisition, we entered into an Operations and Management Agreement (O&M Agreement) with Kinder Morgan SNG Operator, LLC, a subsidiary of KMI, whereby we reimburse KMI monthly for direct operating expenses incurred on our behalf and pay a fixed annual fee for general and administrative costs. The fixed fee for the year ended December 31, 2017 and the four months ended December 31, 2016 was \$30 million and \$13 million, respectively. The fixed fee will be \$31 million for each of the years 2018 through 2020, and is subject to review and approval for each of the next four years pursuant to the O&M Agreement. These costs are reflected, as appropriate, in the “Operations and maintenance”, “General and administrative” and “Capitalized costs” lines in the table below.

The following table shows revenues and costs from our affiliates (in millions):

	Year Ended December 31, 2017	Four Months Ended December 31, 2016
Revenues	\$ 200	\$ 67
Operations and maintenance	90	24
General and administrative	30	13
Capitalized costs	9	4

Subsequent Event

In January 2018, we made a cash distribution to our Members of \$22 million and received contributions from our Members of approximately \$21 million.

7. Fair Value

The following table reflects the carrying amount and estimated fair value of our outstanding debt balances (in millions):

	As of December 31,			
	2017		2016	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Total debt	\$1,115	\$1,302	\$1,206	\$1,312

We separate the fair values of our financial instruments into levels based on our assessment of the availability of observable market data and the significance of non-observable data used to determine the estimated fair value. We estimated the fair values of our outstanding debt balance primarily based on quoted market prices for the same or similar issues, a Level 2 fair value measurement. Our assessment and classification of an instrument within a level can change over time based on the maturity or liquidity of the instrument and this change would be reflected at the end of the period in which the change occurs. During the year ended December 31, 2017 and the four months ended December 31, 2016, there were no changes to the inputs and valuation techniques used to measure fair value, the types of instruments, or the levels in which they were classified.

8. Accounting for Regulatory Activities

Regulatory Assets and Liabilities

Regulatory assets and liabilities represent probable future revenues or expenses associated with certain charges and credits that will be recovered from or refunded to customers through the ratemaking process. As of December 31, 2017, the regulatory assets are being recovered in our rates, without earning a return, over a period of approximately one year to 27 years. Below are the details of our regulatory assets and liabilities as of (in millions):

	December 31,	
	2017	2016
Current regulatory assets		
Difference between gas retained and gas consumed in operations	\$ 1	\$ 3
Other	1	1
Total current regulatory assets(a)	2	4
Non-current regulatory assets		
Taxes on capitalized funds used during construction(b)	13	24
Unamortized loss on reacquired debt	9	10
Other	1	2
Total non-current regulatory assets	23	36
Total regulatory assets	\$ 25	\$ 40
Current regulatory liabilities		
Difference between gas retained and gas consumed in operations	\$ 12	\$ 1
Other	3	2
Total current regulatory liabilities	15	3
Non-current regulatory liabilities		
Postretirement benefits	19	19
Income taxes(b)	55	—
Other	1	2
Total non-current regulatory liabilities(c)	75	21
Total regulatory liabilities	\$ 90	\$ 24

(a) Included in "Other current assets" on our accompanying Consolidated Balance Sheets.

(b) See "2017 Tax Reform" below.

(c) Included in "Other long-term liabilities and deferred credits" on our accompanying Consolidated Balance Sheets.

Our significant regulatory assets and liabilities include:

Difference between gas retained and gas consumed in operations

Amounts reflect the value of the difference between the gas retained and consumed in our operations. Pursuant to our tariff, these amounts are expected to be recovered from our customers in subsequent periods.

Taxes on capitalized funds used during construction

Amounts represent the recovery of deferred income taxes on AFUDC Equity recognized during the time prior to 2007 when we were a taxable entity. These amounts are included in our tariff rates and are recovered over the depreciable lives of the asset in which they apply.

Unamortized loss on reacquired debt

Amounts represent the deferred and unamortized portion of loss on reacquired debt which are recovered in our rates. Amounts are amortized over the original life of the debt issue, or in the case of refinanced debt, over the life of the new debt issue.

Postretirement Benefits

Amounts represent unrecognized gains and losses related to our postretirement benefit plan.

2017 Tax Reform

On December 22, 2017, the U.S. enacted the 2017 Tax Reform. Among the many provisions included in the 2017 Tax Reform is a provision to reduce the U.S. federal corporate income tax rate from 35% to 21% effective January 1, 2018. As income taxes are a component in our maximum recourse rates, the income tax rate change resulted in us recording a provisional \$66 million non-cash charge to our earnings related to an adjustment to our deferred income tax related regulatory assets and liabilities. The charge was recorded as a reduction to Revenues of \$55 million and an increase to Other, net of \$11 million for the year ended December 31, 2017.

As the impact on the regulatory ratemaking process is currently uncertain, and we have not completed our assessment of the 2017 Tax Reform's effect, these amounts are subject to further adjustments. We continue to assess the impact of the 2017 Tax Reform on our business in order to complete our analysis. Any adjustments to our provisional amount will be reported in the reporting period in which any such adjustments are determined and may be material in the period in which the adjustments are made.

Regulatory Assets Amortization

Our amortizations of the regulatory assets for the year ended December 31, 2017 and the four months ended December 31, 2016 were \$1 million, related to deferred losses on reacquired debt included in "Interest, net" on our accompanying Consolidated Statements of Income.

Regulatory Matters

Rate Case

On July 12, 2013, the FERC approved a comprehensive rate case settlement for SNG's general system-wide tariff rates. Under the settlement, we are required to file a new rate case no later than February 28, 2018 for new storage and transportation tariff rates to go into effect September 1, 2018. In August 2017, we commenced pre-filing settlement negotiations with our customers to try and resolve the rate proceeding prior to filing a rate case with FERC. We have filed on January 29, 2018 a request to FERC to extend the obligation to file the rate case from February 28 to May 1, 2018 in order to continue negotiations of a pre-filing settlement. If we were to succeed in obtaining a pre-filing settlement, new transportation, storage and park and loan tariff rates would go into effect September 1, 2018.

Other

We applied with the FERC on February 3, 2017 in Docket No. CP17-46-000 to expand our system in Georgia (Fairburn Expansion project) to provide additional firm transportation capacity of approximately 347,000 dekatherms per day in the Southeast market. The estimated capital cost of the project is approximately \$240 million and its anticipated in-service date is October 1, 2018.

9. Litigation, Environmental and Commitments

We are party to various legal, regulatory and other matters arising from the day-to-day operations of our businesses that may result in claims against the Company. Although no assurance can be given, we believe, based on our experiences to date and taking into account established reserves, that the ultimate resolution of such items will not have a material adverse impact on our business, financial position, results of operations or cash flows. We believe we have meritorious defenses to the matters to which we are a party and intend to vigorously defend the Company. When we determine a loss is probable of occurring and is reasonably estimable, we accrue an undiscounted liability for such contingencies based on our best estimate using information available at that time. If the estimated loss is a range of potential outcomes and there is no better estimate within the range, we accrue the amount at the low end

of the range. We disclose contingencies where an adverse outcome may be material, or in the judgment of management, we conclude the matter should otherwise be disclosed.

Legal Proceedings

Cliffs Natural Resources (Cliffs)

We filed a lawsuit against Cliffs in the Circuit Court of Jefferson County, Alabama (Case No. 68-CV-2014-900533) to determine whether Cliffs' longwall coal mining operations require the relocation of a large segment of our pipelines in Jefferson County, Alabama and who will be responsible for the cost of any such relocation. Prior to the initiation of the lawsuit, Cliffs notified us of its intent to conduct underground longwall coal mining operations in the vicinity of four of our pipelines in Jefferson County. Upon being informed by Cliffs that its planned coal mining operations would cause surface subsidence of three to six feet, we determined that such level of subsidence presented a safety hazard to our pipelines and that relocating the affected pipelines may be the safest and most economical option to mitigate the safety hazard. We alleged in the lawsuit that easements governing our property rights to operate our pipelines do not allow Cliffs' mining operations to proceed as planned. We also alleged, among other things, that if Cliffs is allowed to proceed with its mining plan, Cliffs should be responsible for the pipeline relocation costs and any other damages. We have completed the relocation of the pipelines, at a cost of approximately \$34 million, to avoid the mining threat. On March 3, 2017, the parties reached a confidential settlement agreement to resolve all disputes related to the relocation and the lawsuit was dismissed in May 2017.

General

As of December 31, 2017, we had no accruals for our outstanding legal proceedings. As of December 31, 2016, we had less than \$1 million accrued for our outstanding legal proceedings.

Environmental Matters

We are subject to environmental cleanup and enforcement actions from time to time. In particular, the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) generally imposes joint and several liability for cleanup and enforcement costs on current and predecessor owners and operators of a site, among others, without regard to fault or the legality of the original conduct, subject to the right of a liable party to establish a "reasonable basis" for apportionment of costs. Our operations are also subject to federal, state and local laws and regulations relating to protection of the environment. Although we believe our operations are in substantial compliance with applicable environmental laws and regulations, risks of additional costs and liabilities are inherent in our operations, and there can be no assurance that we will not incur significant costs and liabilities. Moreover, it is possible that other developments, such as increasingly stringent environmental laws, regulations and enforcement policies under the terms of authority of those laws, and claims for damages to property or persons resulting from our operations, could result in substantial costs and liabilities to us.

Southeast Louisiana Flood Protection Litigation

On July 24, 2013, the Board of Commissioners of the Southeast Louisiana Flood Protection Authority - East (SLFPA) filed a petition for damages and injunctive relief in a state district court for Orleans Parish, Louisiana against us and approximately 100 other energy companies, alleging that defendants' drilling, dredging, pipeline and industrial operations since the 1930's have caused direct land loss and increased erosion and submergence resulting in alleged increased storm surge risk, increased flood protection costs and unspecified damages to the plaintiff. The SLFPA asserts claims for negligence, strict liability, public nuisance, private nuisance, and breach of contract. Among other relief, the petition seeks unspecified monetary damages, attorney fees, interest, and injunctive relief in the form of abatement and restoration of the alleged coastal land loss including but not limited to backfilling and re-vegetation of canals, wetlands and reef creation, land bridge construction, hydrologic restoration, shoreline protection, structural protection, and bank stabilization. On August 13, 2013, the suit was removed to the U.S. District Court for the Eastern District of Louisiana. On February 13, 2015, the Court granted defendants' motion to dismiss the suit for failure to state a claim, and issued an order dismissing the SLFPA's claims with prejudice. On March 3, 2017, the Fifth Circuit Court of Appeals affirmed the U.S. District Court's decision, and the SLFPA's petition for writ of certiorari to the U.S. Supreme Court was denied on October 30, 2017, thereby resolving this matter in its entirety.

Vintage Assets, Inc. Coastal Erosion Litigation

On December 18, 2015, Vintage Assets, Inc. and several individual landowners filed a petition in the State District Court for Plaquemines Parish, Louisiana alleging that its 5,000 acre property is composed of coastal wetlands, and that we failed to maintain

pipeline canals and banks, causing widening of the canals, land loss, and damage to the ecology and hydrology of the marsh, in breach of right of way agreements, prudent operating practices, and Louisiana law. The suit also claims that defendants' alleged failure to maintain pipeline canals and banks constitutes negligence and has resulted in encroachment of the canals, constituting trespass. The suit seeks in excess of \$80 million in money damages, including recovery of litigation costs, damages for trespass, and money damages associated with an alleged loss of natural resources and projected reconstruction cost of replacing or restoring wetlands. The suit was removed to the U.S. District Court for the Eastern District of Louisiana. Our assets at issue were sold to Highpoint Gas Transmission, LLC in 2011, which was subsequently purchased by American Midstream Partners, LP. In response to our demand for defense and indemnity, American Midstream Partners agreed to pay 50% of joint defense costs and expenses, with a percentage of indemnity to be determined upon final resolution of the suit. On October 20, 2016, plaintiffs filed an amended complaint naming Highpoint Gas Transmission, LLC as an additional defendant. A non-jury trial was held during September 2017. We anticipate a ruling in the first quarter 2018. We will continue to vigorously defend the suit, and intend to appeal any adverse ruling that may result from the trial.

Superfund Matters

In our recorded environmental liabilities there were projects where we had received notice that we had been designated or could be designated as a Potentially Responsible Party (PRP) under CERCLA, commonly known as Superfund, or state equivalents for one site. On September 29, 2017, we entered into a Consent Decree after meeting the Environmental Protection Agency's requirements for a final settlement for the remaining liability at the Port Refinery Superfund site, including payment of a settlement amount which is the final judgment against us for the site.

General

Although it is not possible to predict the ultimate outcomes, we believe that the resolution of the environmental matters set forth in this note, and other matters to which we and our subsidiary are a party, will not have a material adverse effect on our business, financial position, results of operations or cash flows. As of December 31, 2017 and 2016, we had less than \$1 million accrued for our environmental matters.

Commitments

Capital Commitments

As of December 31, 2017, we have capital commitments of \$15 million, which we expect to spend during 2018. We have other planned capital and investment projects that are discretionary in nature, with no substantial contractual capital commitments made in advance of the actual expenditures.

Transportation Commitments

We have transportation commitments totaling \$359 million as of December 31, 2017, which are primarily related to a transportation contract with our affiliate, Elba Express Company, L.L.C., which we expect to spend \$32 million each year for the period from 2018 to 2022 and \$199 million in total thereafter.

Storage Commitments

We have storage capacity commitments totaling \$8 million as of December 31, 2017, most of which are related to storage capacity contracts with our equity investee, Bear Creek, which we expect to spend during 2018. We expect annual renewal of this contract to occur into the foreseeable future.

Operating Leases

We lease property, facilities and equipment under various operating leases. Our future minimum annual rental commitments under our operating leases as of December 31, 2017, are as follows (in millions):

Year	Total
2018	\$ 2
2019	2
2020	2
2021	2
2022	2
Thereafter	11
Total	\$ 21

Rent expense on our lease obligations for the year ended December 31, 2017 and the four months ended December 31, 2016 was approximately \$2 million and \$1 million, respectively, and is reflected in “Operations and maintenance” and “General and administrative” on our accompanying Consolidated Statements of Income. For certain operating leases related to shared facilities, we may be the primary obligor, but the rent expense is allocated to various KMI subsidiaries and is administered and funded by KMI.

Accounting Standards Updates

Topic 606

On May 28, 2014, the FASB issued ASU No. 2014-09, “*Revenue from Contracts with Customers*” followed by a series of related accounting standard updates (collectively referred to as “Topic 606”). Topic 606 is designed to create greater revenue recognition and disclosure comparability in financial statements. The provisions of Topic 606 include a five-step process by which an entity will determine revenue recognition, depicting the transfer of goods or services to customers in amounts reflecting the payment to which an entity expects to be entitled in exchange for those goods or services. Topic 606 requires certain disclosures about contracts with customers and provides more comprehensive guidance for transactions such as service revenue, contract modifications, and multiple-element arrangements.

Topic 606 will require that our revenue recognition policy disclosure include further detail regarding our performance obligations as to the nature, amount, timing, and estimates of revenue and cash flows generated from our contracts with customers. Topic 606 will also require disclosure of significant changes in contract asset and contract liability balances period to period and the amount of the transaction price allocated to performance obligations that are unsatisfied (or partially unsatisfied) as of the end of the reporting period, as applicable. We utilized the modified retrospective method to adopt the provisions of this standard effective January 1, 2018, which required us to apply the new revenue standard to (i) all new revenue contracts entered into after January 1, 2018 and (ii) all existing revenue contracts as of January 1, 2018 through a cumulative adjustment to equity. In accordance with this approach, our consolidated revenues for periods prior to January 1, 2018 will not be revised. The cumulative effect of the adoption of this standard as of January 1, 2018 was not material.

ASU No. 2016-02

On February 25, 2016, the FASB issued ASU No. 2016-02, “*Leases (Topic 842)*.” This ASU requires that lessees recognize assets and liabilities on the balance sheet for the present value of the rights and obligations created by all leases with terms of more than 12 months. The ASU also will require disclosures designed to give financial statement users information on the amount, timing, and uncertainty of cash flows arising from leases. ASU No. 2016-02 will be effective for us as of January 1, 2019. We are currently reviewing the effect of ASU No. 2016-02.

ASU No. 2017-07

On March 10, 2017, the FASB issued ASU No. 2017-07, “ *Compensation - Retirement Benefits (Topic 715)* .” This ASU requires an employer to disaggregate the service cost component from the other components of net benefit cost, allows only the service cost component of net benefit cost to be eligible for capitalization, and addresses how to present the service cost component and the other components of net benefit cost in the income statement. We adopted ASU No. 2017-07 effective January 1, 2018 with no material impact to our financial statements.

ASU No. 2018-01

On January 25, 2018, the FASB issued ASU No. 2018-01, “*Land Easement Practical Expedient for Transition to Topic 842.*” This ASU provides an optional transition practical expedient that, if elected, would not require companies to reconsider its accounting for existing or expired land easements before the adoption of Topic 842 and that were not previously accounted for as leases under Topic 840. ASU No. 2018-01 will be effective for us as of January 1, 2019, and earlier adoption is permitted. We are currently reviewing the effect of this ASU to our financial statements.

Table of Contents

Indicate by check mark whether the registrants (1) have filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrants were required to file such reports), and (2) have been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrants have submitted electronically and posted on their corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrants were required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Registrant	Large Accelerated Filer	Accelerated Filer	Non-accelerated Filer	Smaller Reporting Company	Emerging Growth Company
The Southern Company	X				
Alabama Power Company			X		
Georgia Power Company			X		
Gulf Power Company			X		
Mississippi Power Company			X		
Southern Power Company			X		
Southern Company Gas			X		

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No (Response applicable to all registrants.)

Registrant	Description of Common Stock	Shares Outstanding at June 30, 2018
The Southern Company	Par Value \$5 Per Share	1,014,136,083
Alabama Power Company	Par Value \$40 Per Share	30,537,500
Georgia Power Company	Without Par Value	9,261,500
Gulf Power Company	Without Par Value	7,392,717
Mississippi Power Company	Without Par Value	1,121,000
Southern Power Company	Par Value \$0.01 Per Share	1,000
Southern Company Gas	Par Value \$0.01 Per Share	100

This combined Form 10-Q is separately filed by The Southern Company, Alabama Power Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company, Southern Power Company, and Southern Company Gas. Information contained herein relating to any individual registrant is filed by such registrant on its own behalf. Each registrant makes no representation as to information relating to the other registrants.

DEFINITIONS

Term	Meaning
2013 ARP	Alternative Rate Plan approved by the Georgia PSC in 2013 for Georgia Power for the years 2014 through 2016 and subsequently extended through 2019
AFUDC	Allowance for funds used during construction
Alabama Power	Alabama Power Company
ARO	Asset retirement obligation
ASC	Accounting Standards Codification
ASU	Accounting Standards Update
Atlanta Gas Light	Atlanta Gas Light Company, a wholly-owned subsidiary of Southern Company Gas
Atlantic Coast Pipeline	Atlantic Coast Pipeline, LLC, a joint venture to construct and operate a natural gas pipeline in which Southern Company Gas has a 5% ownership interest
Bechtel	Bechtel Power Corporation
CCR	Coal combustion residuals
CO ₂	Carbon dioxide
COD	Commercial operation date
Contractor Settlement Agreement	The December 31, 2015 agreement between Westinghouse and the Vogtle Owners resolving disputes between the Vogtle Owners and the EPC Contractor under the Vogtle 3 and 4 Agreement
Cooperative Energy	Electric cooperative in Mississippi
CPCN	Certificate of public convenience and necessity
Customer Refunds	Refunds to be issued to Georgia Power customers no later than the end of the third quarter 2018 as ordered by the Georgia PSC related to the Guarantee Settlement Agreement
CWIP	Construction work in progress
Dalton Pipeline	A 50% undivided ownership interest of Southern Company Gas in a pipeline facility in Georgia
DOE	U.S. Department of Energy
ECO Plan	Mississippi Power's environmental compliance overview plan
Eligible Project Costs	Certain costs of construction relating to Plant Vogtle Units 3 and 4 that are eligible for financing under the loan guarantee program established under Title XVII of the Energy Policy Act of 2005
EPA	U.S. Environmental Protection Agency
EPC Contractor	Westinghouse and its affiliate, WECTEC Global Project Services Inc.; the former engineering, procurement, and construction contractor for Plant Vogtle Units 3 and 4
FASB	Financial Accounting Standards Board
FERC	Federal Energy Regulatory Commission
FFB	Federal Financing Bank
Fitch	Fitch Ratings, Inc.
Form 10-K	Annual Report on Form 10-K of Southern Company, Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Southern Power, and Southern Company Gas for the year ended December 31, 2017, as applicable
GAAP	U.S. generally accepted accounting principles
Georgia Power	Georgia Power Company
Guarantee Settlement Agreement	The June 9, 2017 settlement agreement between the Vogtle Owners and Toshiba related to the Toshiba Guarantee
Gulf Power	Gulf Power Company
Heating Degree Days	A measure of weather, calculated when the average daily temperatures are less than 65 degrees Fahrenheit
Horizon Pipeline	Horizon Pipeline Company, LLC
IGCC	Integrated coal gasification combined cycle, the technology originally approved for Mississippi Power's Kemper County energy facility (Plant Ratcliffe)
IIC	Intercompany interchange contract

DEFINITIONS
(continued)

Term	Meaning
Illinois Commission	Illinois Commerce Commission
Interim Assessment Agreement	Agreement entered into by the Vogtle Owners and the EPC Contractor to allow construction to continue after the EPC Contractor's bankruptcy filing
IRS	Internal Revenue Service
ITC	Investment tax credit
KWH	Kilowatt-hour
LIBOR	London Interbank Offered Rate
LIFO	Last-in, first-out
LNG	Liquefied natural gas
Loan Guarantee Agreement	Loan guarantee agreement entered into by Georgia Power with the DOE in 2014, under which the proceeds of borrowings may be used to reimburse Georgia Power for Eligible Project Costs incurred in connection with its construction of Plant Vogtle Units 3 and 4
LOCOM	Lower of weighted average cost or current market price
LTSA	Long-term service agreement
Merger	The merger, effective July 1, 2016, of a wholly-owned, direct subsidiary of Southern Company with and into Southern Company Gas, with Southern Company Gas continuing as the surviving corporation
Mississippi Power	Mississippi Power Company
mmBtu	Million British thermal units
Moody's	Moody's Investors Service, Inc.
MRA	Municipal and Rural Associations
MW	Megawatt
natural gas distribution utilities	Southern Company Gas' natural gas distribution utilities (Nicor Gas, Atlanta Gas Light, Virginia Natural Gas, Elizabethtown Gas, Florida City Gas, Chattanooga Gas Company, and Elkton Gas as of June 30, 2018) (Nicor Gas, Atlanta Gas Light, Virginia Natural Gas, and Chattanooga Gas Company as of July 29, 2018)
NCCR	Georgia Power's Nuclear Construction Cost Recovery
New Jersey BPU	New Jersey Board of Public Utilities
NextEra Energy	NextEra Energy, Inc.
Nicor Gas	Northern Illinois Gas Company, a wholly-owned subsidiary of Southern Company Gas
NRC	U.S. Nuclear Regulatory Commission
NYMEX	New York Mercantile Exchange, Inc.
OCI	Other comprehensive income
PennEast Pipeline	PennEast Pipeline Company, LLC, a joint venture to construct and operate a natural gas pipeline in which Southern Company Gas has a 20% ownership interest
PEP	Mississippi Power's Performance Evaluation Plan
Pivotal Home Solutions	Nicor Energy Services Company, until June 4, 2018 a wholly-owned subsidiary of Southern Company Gas, doing business as Pivotal Home Solutions
Pivotal Utility Holdings	Pivotal Utility Holdings, Inc., until July 29, 2018 a wholly-owned subsidiary of Southern Company Gas, doing business as Elizabethtown Gas (until July 1, 2018), Elkton Gas (until July 1, 2018), and Florida City Gas
PowerSecure	PowerSecure, Inc.
power pool	The operating arrangement whereby the integrated generating resources of the traditional electric operating companies and Southern Power (excluding subsidiaries) are subject to joint commitment and dispatch in order to serve their combined load obligations
PPA	Power purchase agreements, as well as, for Southern Power, contracts for differences that provide the owner of a renewable facility a certain fixed price for the electricity sold to the grid
PSC	Public Service Commission

DEFINITIONS
(continued)

Term	Meaning
PTC	Production tax credit
Rate CNP	Alabama Power's Rate Certificated New Plant
Rate CNP Compliance	Alabama Power's Rate Certificated New Plant Compliance
Rate CNP PPA	Alabama Power's Rate Certificated New Plant Power Purchase Agreement
Rate ECR	Alabama Power's Rate Energy Cost Recovery
Rate NDR	Alabama Power's Rate Natural Disaster Reserve
Rate RSE	Alabama Power's Rate Stabilization and Equalization plan
registrants	Southern Company, Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Southern Power Company, and Southern Company Gas
ROE	Return on equity
S&P	S&P Global Ratings, a division of S&P Global Inc.
SCS	Southern Company Services, Inc. (the Southern Company system service company)
SEC	U.S. Securities and Exchange Commission
SNG	Southern Natural Gas Company, L.L.C.
Southern Company	The Southern Company
Southern Company Gas	Southern Company Gas and its subsidiaries
Southern Company Gas Capital	Southern Company Gas Capital Corporation, a 100%-owned subsidiary of Southern Company Gas
Southern Company system	Southern Company, the traditional electric operating companies, Southern Power, Southern Company Gas, Southern Electric Generating Company, Southern Nuclear, SCS, Southern Communications Services, Inc., PowerSecure, and other subsidiaries
Southern Nuclear	Southern Nuclear Operating Company, Inc.
Southern Power	Southern Power Company and its subsidiaries
SPSH	SP Solar Holdings I, LP
Tax Reform Legislation	The Tax Cuts and Jobs Act, which was signed into law on December 22, 2017 and became effective on January 1, 2018
Toshiba	Toshiba Corporation, parent company of Westinghouse
Toshiba Guarantee	Certain payment obligations of the EPC Contractor guaranteed by Toshiba
traditional electric operating companies	Alabama Power, Georgia Power, Gulf Power, and Mississippi Power
Triton	Triton Container Investments, LLC
VCM	Vogtle Construction Monitoring
Virginia Commission	Virginia State Corporation Commission
Virginia Natural Gas	Virginia Natural Gas, Inc., a wholly-owned subsidiary of Southern Company Gas
Vogtle 3 and 4 Agreement	Agreement entered into with the EPC Contractor in 2008 by Georgia Power, acting for itself and as agent for the Vogtle Owners, and rejected in bankruptcy in July 2017, pursuant to which the EPC Contractor agreed to design, engineer, procure, construct, and test Plant Vogtle Units 3 and 4
Vogtle Owners	Georgia Power, Oglethorpe Power Corporation, the Municipal Electric Authority of Georgia, and the City of Dalton, Georgia, an incorporated municipality in the State of Georgia acting by and through its Board of Water, Light, and Sinking Fund Commissioners
Vogtle Services Agreement	The June 9, 2017 services agreement between the Vogtle Owners and the EPC Contractor, as amended and restated on July 20, 2017, for the EPC Contractor to transition construction management of Plant Vogtle Units 3 and 4 to Southern Nuclear and to provide ongoing design, engineering, and procurement services to Southern Nuclear
WACOG	Weighted average cost of gas
Westinghouse	Westinghouse Electric Company LLC

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

This Quarterly Report on Form 10-Q contains forward-looking statements. Forward-looking statements include, among other things, statements concerning regulated rates, the strategic goals for the wholesale business, customer and sales growth, economic conditions, fuel and environmental cost recovery and other rate actions, projected equity ratios, costs of modernization efforts, current and proposed environmental regulations and related compliance plans and estimated expenditures, pending or potential litigation matters, access to sources of capital, financing activities, completion dates of construction projects, completion of announced acquisitions or dispositions, filings with state and federal regulatory authorities, impacts of the Tax Reform Legislation, federal and state income tax benefits, estimated sales and purchases under power sale and purchase agreements, and estimated construction and other plans and expenditures. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "could," "should," "expects," "plans," "anticipates," "believes," "estimates," "projects," "predicts," "potential," or "continue" or the negative of these terms or other similar terminology. There are various factors that could cause actual results to differ materially from those suggested by the forward-looking statements; accordingly, there can be no assurance that such indicated results will be realized. These factors include:

- the impact of recent and future federal and state regulatory changes, including environmental laws and regulations governing air, water, land, and protection of other natural resources, and also changes in tax and other laws and regulations to which Southern Company and its subsidiaries are subject, as well as changes in application of existing laws and regulations;
- the uncertainty surrounding the Tax Reform Legislation, including implementing regulations and IRS interpretations, actions that may be taken in response by regulatory authorities, and its impact, if any, on the credit ratings of Southern Company and its subsidiaries;
- current and future litigation or regulatory investigations, proceedings, or inquiries;
- the effects, extent, and timing of the entry of additional competition in the markets in which Southern Company's subsidiaries operate, including from the development and deployment of alternative energy sources such as self-generation and distributed generation technologies;
- variations in demand for electricity and natural gas, including those relating to weather, the general economy, population and business growth (and declines), the effects of energy conservation and efficiency measures, and any potential economic impacts resulting from federal fiscal decisions;
- available sources and costs of natural gas and other fuels;
- limits on pipeline capacity;
- transmission constraints;
- effects of inflation;
- the ability to control costs and avoid cost and schedule overruns during the development, construction, and operation of facilities, including Plant Vogtle Units 3 and 4 which includes components based on new technology that is just beginning initial operation in the global nuclear industry at scale, including changes in labor costs, availability, and productivity, challenges with management of contractors, subcontractors, or vendors, adverse weather conditions, shortages, increased costs or inconsistent quality of equipment, materials, and labor, including any changes related to imposition of import tariffs, contractor or supplier delay, non-performance under construction, operating, or other agreements, operational readiness, including specialized operator training and required site safety programs, unforeseen engineering or design problems, start-up activities (including major equipment failure and system integration), and/or operational performance;
- the ability to construct facilities in accordance with the requirements of permits and licenses (including satisfaction of NRC requirements), to satisfy any environmental performance standards and the requirements of tax credits and other incentives, and to integrate facilities into the Southern Company system upon completion of construction;
- investment performance of the Southern Company system's employee and retiree benefit plans and nuclear decommissioning trust funds;
- advances in technology;
- ongoing renewable energy partnerships and development agreements;
- state and federal rate regulations and the impact of pending and future rate cases and negotiations, including rate actions relating to fuel and other cost recovery mechanisms;
- the ability to successfully operate the electric utilities' generating, transmission, and distribution facilities and Southern Company Gas' natural gas distribution and storage facilities and the successful performance of necessary corporate functions;

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

(continued)

- legal proceedings and regulatory approvals and actions related to Plant Vogtle Units 3 and 4, including Georgia PSC approvals and NRC actions;
- a decision by more than 10% of the owners of Plant Vogtle Units 3 and 4 not to proceed with construction;
- litigation or other disputes related to the Kemper County energy facility;
- the inherent risks involved in operating and constructing nuclear generating facilities, including environmental, health, regulatory, natural disaster, terrorism, and financial risks;
- the inherent risks involved in transporting and storing natural gas;
- the performance of projects undertaken by the non-utility businesses and the success of efforts to invest in and develop new opportunities;
- internal restructuring or other restructuring options that may be pursued;
- potential business strategies, including acquisitions or dispositions of assets or businesses, including the proposed dispositions of Gulf Power and Southern Power's plants located in Florida and the potential sale of a noncontrolling interest in Southern Power's wind facilities, which cannot be assured to be completed or beneficial to Southern Company or its subsidiaries;
- the possibility that the anticipated benefits from the Merger cannot be fully realized or may take longer to realize than expected and the possibility that costs related to the integration of Southern Company and Southern Company Gas will be greater than expected;
- the ability of counterparties of Southern Company and its subsidiaries to make payments as and when due and to perform as required;
- the ability to obtain new short- and long-term contracts with wholesale customers;
- the direct or indirect effect on the Southern Company system's business resulting from cyber intrusion or physical attack and the threat of physical attacks;
- interest rate fluctuations and financial market conditions and the results of financing efforts;
- changes in Southern Company's and any of its subsidiaries' credit ratings, including impacts on interest rates, access to capital markets, and collateral requirements;
- the impacts of any sovereign financial issues, including impacts on interest rates, access to capital markets, impacts on foreign currency exchange rates, counterparty performance, and the economy in general, as well as potential impacts on the benefits of the DOE loan guarantees;
- the ability of Southern Company's electric utilities to obtain additional generating capacity (or sell excess generating capacity) at competitive prices;
- catastrophic events such as fires, earthquakes, explosions, floods, tornadoes, hurricanes and other storms, droughts, pandemic health events such as influenzas, or other similar occurrences;
- the direct or indirect effects on the Southern Company system's business resulting from incidents affecting the U.S. electric grid, natural gas pipeline infrastructure, or operation of generating or storage resources;
- impairments of goodwill or long-lived assets;
- the effect of accounting pronouncements issued periodically by standard-setting bodies; and
- other factors discussed elsewhere herein and in other reports (including the Form 10-K) filed by the registrants from time to time with the SEC.

The registrants expressly disclaim any obligation to update any forward-looking statements.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

SECOND QUARTER 2018 vs. SECOND QUARTER 2017
AND
YEAR-TO-DATE 2018 vs. YEAR-TO-DATE 2017

OVERVIEW

Southern Company is a holding company that owns all of the common stock of the traditional electric operating companies and the parent entities of Southern Power and Southern Company Gas and owns other direct and indirect subsidiaries. Discussion of the results of operations is focused on the Southern Company system's primary businesses of electricity sales by the traditional electric operating companies and Southern Power and the distribution of natural gas by Southern Company Gas. The four traditional electric operating companies are vertically integrated utilities providing electric service in four Southeastern states. Southern Power develops, constructs, acquires, owns, and manages power generation assets, including renewable energy projects, and sells electricity at market-based rates in the wholesale market. During the second quarter 2018, Southern Power completed the sale of a 33% equity interest in a newly-formed limited partnership indirectly owning substantially all of its solar facilities. Southern Company Gas distributes natural gas through its natural gas distribution utilities in four states and is involved in several other complementary businesses including gas marketing services, wholesale gas services, and gas midstream operations. Through June 30, 2018, Southern Company Gas had seven natural gas distribution utilities in seven states. Subsequent to June 30, 2018, Southern Company Gas completed sales of three of its natural gas distribution utilities. During the second quarter 2018, Southern Company Gas completed the sale of Pivotal Home Solutions. Southern Company's other business activities include providing energy technologies and services to electric utilities and large industrial, commercial, institutional, and municipal customers. Customer solutions include distributed generation systems, utility infrastructure solutions, and energy efficiency products and services. Other business activities also include investments in telecommunications, leveraged lease projects, and gas storage facilities. For additional information, see BUSINESS – "The Southern Company System – Traditional Electric Operating Companies," " – Southern Power," " – Southern Company Gas," and " – Other Businesses" in Item 1 of the Form 10-K. See FUTURE EARNINGS POTENTIAL and Note (J) to the Condensed Financial Statements herein for additional information regarding disposition activity.

On May 20, 2018, Southern Company entered into a stock purchase agreement with NextEra Energy to sell Gulf Power for an aggregate cash purchase price of \$5.75 billion (less the amount of indebtedness assumed at closing, which is currently estimated at approximately \$1.4 billion), subject to certain adjustments. The completion of the sale is subject to the satisfaction or waiver of certain closing conditions and is expected to occur in the first half of 2019. The ultimate outcome of this matter cannot be determined at this time. See Note (J) to the Condensed Financial Statements under " Southern Company's Sale of Gulf Power " herein for additional information.

Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Atlanta Gas Light, and Nicor Gas recently reached agreements with their respective state PSCs or other applicable state regulatory agencies relating to the regulatory impacts of the Tax Reform Legislation, which, for some companies, included capital structure adjustments expected to help mitigate the potential adverse impacts to certain of their credit metrics. See Note (B) to the Condensed Financial Statements under " Regulatory Matters " herein for additional information regarding state PSC or other regulatory agency actions related to the Tax Reform Legislation. Also see MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Income Tax Matters" of Southern Company in Item 7 of the Form 10-K and FINANCIAL CONDITION AND LIQUIDITY – " Credit Rating Risk " and Note (H) to the Condensed Financial Statements herein for information regarding the Tax Reform Legislation.

Southern Company continues to focus on several key performance indicators. These indicators include, but are not limited to, customer satisfaction, plant availability, electric and natural gas system reliability, execution of major construction projects, and earnings per share.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Plant Vogtle Units 3 and 4 Status

In 2009, the Georgia PSC certified construction of Plant Vogtle Units 3 and 4 (with electric generating capacity of approximately 1,100 MWs each). In March 2017, the EPC Contractor filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy Code. In December 2017, the Georgia PSC approved Georgia Power's recommendation to continue construction.

In the second quarter 2018, Georgia Power revised its base cost forecast and estimated contingency to complete construction and start-up of Plant Vogtle Units 3 and 4 to \$8.0 billion and \$0.4 billion, respectively, for a total project capital cost forecast of \$8.4 billion (net of \$1.7 billion received under the Guarantee Settlement Agreement and \$188 million in Customer Refunds recognized as a regulatory liability in 2017). Although Georgia Power believes these incremental costs are reasonable and necessary to complete the project and the Georgia PSC has stated the \$7.3 billion estimate included in the seventeenth VCM proceeding does not represent a cost cap, Georgia Power does not intend to seek rate recovery for the \$0.7 billion increase in costs included in the revised base capital cost forecast, which will be filed with the Georgia PSC in the nineteenth VCM report on August 31, 2018. In connection with future VCM filings, Georgia Power may request the Georgia PSC to evaluate costs included in the revised construction contingency estimate for rate recovery as and when they are appropriately included in the base capital cost forecast. After considering the significant level of uncertainty that exists regarding the future recoverability of costs included in the construction contingency estimate since the ultimate outcome of these matters is subject to the outcome of future assessments by management, as well as Georgia PSC decisions in these future regulatory proceedings, Georgia Power has recorded a total pre-tax charge to income of \$1.1 billion (\$0.8 billion after tax) as of June 30, 2018 .

As a result of the increase in the total project capital cost forecast and Georgia Power's decision not to seek rate recovery of the increase in the base capital costs, the holders of at least 90% of the ownership interests in Plant Vogtle Units 3 and 4 must vote to continue construction. The Vogtle Owners are expected to conduct these votes in the third quarter 2018.

If the holders of at least 90% of the ownership interests in Plant Vogtle Units 3 and 4 do not vote to continue construction, the Vogtle Joint Ownership Agreements provide that the project will be cancelled, and construction will cease. In the event that fewer than 90% of the Vogtle Owners vote to continue construction, Georgia Power and the other Vogtle Owners will assess options for Plant Vogtle Units 3 and 4. If Plant Vogtle Units 3 and 4 were cancelled and Georgia Power was unable to recover costs it has incurred in connection with the project, Southern Company's results of operations, cash flow, and financial condition would be materially impacted. The ultimate outcome of this matter cannot be determined at this time.

Georgia Power's revised cost estimate reflects an expected in-service date of November 2021 for Unit 3 and November 2022 for Unit 4.

See FUTURE EARNINGS POTENTIAL – " Construction Program – Nuclear Construction " and ACCOUNTING POLICIES – " Application of Critical Accounting Policies and Estimates " herein for additional information.

RESULTS OF OPERATIONS

Net Income (Loss)

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$1,227	N/M	\$1,507	N/M

N/M - Not meaningful

Consolidated net loss attributable to Southern Company was \$(154) million (\$(0.15) per share) for the second quarter 2018 compared to a net loss of \$(1.4) billion (\$(1.38) per share) for the corresponding period in 2017 . The change was primarily due to charges of \$3.01 billion (\$2.12 billion after tax) in 2017 related to the Kemper IGCC at

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Mississippi Power, partially offset by a \$1.1 billion (\$0.8 billion after tax) charge in the second quarter 2018 for an estimated probable loss on Georgia Power's construction of Plant Vogtle Units 3 and 4. Also contributing to the change were lower federal income tax expense as a result of the Tax Reform Legislation and higher retail electric revenues due to warmer weather in the second quarter 2018 compared to the corresponding period in 2017, partially offset by increased operations and maintenance expenses and reductions in retail revenues related to the regulatory treatment of the Tax Reform Legislation impacts.

Consolidated net income attributable to Southern Company was \$784 million (\$0.77 per share) for year-to-date 2018 compared to a net loss of \$(723) million (\$(0.73) per share) for the corresponding period in 2017 . The change was primarily due to charges of \$3.12 billion (\$2.18 billion after tax) in 2017 related to the Kemper IGCC at Mississippi Power, partially offset by a \$1.1 billion (\$0.8 billion after tax) charge in the second quarter 2018 for an estimated probable loss on Georgia Power's construction of Plant Vogtle Units 3 and 4. Also contributing to the change were lower federal income tax expense as a result of the Tax Reform Legislation and higher retail electric revenues due to colder weather in the first quarter 2018 and warmer weather in the second quarter 2018 compared to the corresponding periods in 2017, partially offset by increased operations and maintenance expenses and reductions in retail revenues related to the regulatory treatment of the Tax Reform Legislation impacts.

Retail Electric Revenues

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(37)	(1.0)	\$137	1.9

In the second quarter 2018 , retail electric revenues were \$3.7 billion compared to \$3.8 billion for the corresponding period in 2017 . For year-to-date 2018 , retail electric revenues were \$7.3 billion compared to \$7.2 billion for the corresponding period in 2017 .

Details of the changes in retail electric revenues were as follows:

	Second Quarter 2018		Year-to-Date 2018	
	<i>(in millions)</i>	<i>(% change)</i>	<i>(in millions)</i>	<i>(% change)</i>
Retail electric – prior year	\$ 3,777		\$ 7,171	
Estimated change resulting from –				
Rates and pricing	(141)	(3.7)	(245)	(3.4)
Sales growth (decline)	(5)	(0.1)	22	0.3
Weather	73	1.9	217	3.0
Fuel and other cost recovery	36	0.9	143	2.0
Retail electric – current year	\$ 3,740	(1.0)%	\$ 7,308	1.9 %

Revenues associated with changes in rates and pricing decreased in the second quarter and year-to-date 2018 when compared to the corresponding periods in 2017 primarily due to revenues deferred as regulatory liabilities for future adjustments to customer billings related to the Tax Reform Legislation and a decrease in the recovery of Plant Vogtle Units 3 and 4 construction financing costs under the NCCR tariff at Georgia Power, also primarily related to the Tax Reform Legislation. Also contributing to the year-to-date 2018 decrease was the rate pricing effect of increased customer usage at Georgia Power. These decreases were partially offset by higher contributions from variable demand-driven pricing from commercial and industrial customers at Georgia Power.

See Note 3 to the financial statements of Southern Company under "Regulatory Matters – Alabama Power," " – Georgia Power – Rate Plans," and " – Gulf Power – Retail Base Rate Cases" in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements herein for additional information.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Revenues attributable to changes in sales decreased in the second quarter 2018 when compared to the corresponding period in 2017 . Weather-adjusted residential KWH sales were flat in the second quarter 2018 , primarily due to customer growth, offset by decreased customer usage. Weather-adjusted commercial KWH sales decreased 0.2% in the second quarter 2018 , primarily due to decreased customer usage, partially offset by customer growth. Industrial KWH sales increased 0.6% in the second quarter 2018 , primarily in the primary metals and stone, clay, and glass sectors, partially offset by decreased sales in the paper sector.

Revenues attributable to changes in sales increased for year-to-date 2018 when compared to the corresponding period in 2017 . Weather-adjusted residential KWH sales and weather-adjusted commercial KWH sales increased 0.6% and 0.5%, respectively, for year-to-date 2018 , primarily due to customer growth, partially offset by decreased customer usage. Industrial KWH sales increased 1.6% for year-to-date 2018 , primarily in the primary metals and stone, clay and glass sectors, partially offset by decreased sales in the paper sector.

Fuel and other cost recovery revenues increased \$36 million and \$143 million in the second quarter and year-to-date 2018 , respectively, when compared to the corresponding periods in 2017 primarily due to higher energy sales resulting from colder weather in the first quarter 2018 and warmer weather in the second quarter 2018 compared to the corresponding periods in 2017. Electric rates for the traditional electric operating companies include provisions to adjust billings for fluctuations in fuel costs, including the energy component of purchased power costs. Under these provisions, fuel revenues generally equal fuel expenses, including the energy component of PPA costs, and do not affect net income. The traditional electric operating companies each have one or more regulatory mechanisms to recover other costs such as environmental and other compliance costs, storm damage, new plants, and PPA capacity costs.

Wholesale Electric Revenues

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(7)	(1.1)	\$81	7.0

Wholesale electric revenues consist of PPAs primarily with investor-owned utilities and electric cooperatives and short-term opportunity sales. Wholesale electric revenues from PPAs (other than solar and wind PPAs) have both capacity and energy components. Capacity revenues generally represent the greatest contribution to net income and are designed to provide recovery of fixed costs plus a return on investment. Energy revenues will vary depending on fuel prices, the market prices of wholesale energy compared to the Southern Company system's generation, demand for energy within the Southern Company system's electric service territory, and the availability of the Southern Company system's generation. Increases and decreases in energy revenues that are driven by fuel prices are accompanied by an increase or decrease in fuel costs and do not have a significant impact on net income. Energy sales from solar and wind PPAs do not have a capacity charge and customers either purchase the energy output of a dedicated renewable facility through an energy charge or through a fixed price related to the energy. As a result, Southern Company's ability to recover fixed and variable operations and maintenance expenses is dependent upon the level of energy generated from these facilities, which can be impacted by weather conditions, equipment performance, transmission constraints, and other factors. Wholesale electric revenues at Mississippi Power include FERC-regulated municipal and rural association sales under cost-based tariffs as well as market-based sales. Short-term opportunity sales are made at market-based rates that generally provide a margin above the Southern Company system's variable cost to produce the energy.

For year-to-date 2018 , wholesale electric revenues were \$1.2 billion compared to \$1.1 billion for the corresponding period in 2017 . This increase was related to a \$90 million increase in energy revenues, partially offset by a \$9 million decrease in capacity revenues. The year-to-date 2018 increase in energy revenues primarily related to Southern Power and included an increase in fuel costs that are contractually recovered through PPAs, revenues from new natural gas PPAs from existing facilities, and an increase in sales from renewable facilities, partially offset by a decrease in non-PPA revenues from short-term sales.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Natural Gas Revenues

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$22	3.2	\$100	4.5

In the second quarter 2018, natural gas revenues were \$706 million compared to \$684 million for the corresponding period in 2017. For year-to-date 2018, natural gas revenues were \$2.3 billion compared to \$2.2 billion for the corresponding period in 2017.

Details of the changes in natural gas revenues were as follows:

	Second Quarter 2018		Year-to-Date 2018	
	<i>(in millions)</i>	<i>(% change)</i>	<i>(in millions)</i>	<i>(% change)</i>
Natural gas revenues – prior year	\$ 684		\$ 2,214	
Estimated change resulting from –				
Infrastructure replacement programs and base rate changes	38	5.6 %	48	2.2 %
Gas costs and other cost recovery	(4)	(0.6)%	(2)	(0.1)
Weather	8	1.2 %	16	0.7
Wholesale gas services	(4)	(0.6)%	31	1.4
Other	(16)	(2.4)%	7	0.3
Natural gas revenues – current year	\$ 706	3.2 %	\$ 2,314	4.5 %

The increases in natural gas revenues in the second quarter and year-to-date 2018 were primarily related to continued infrastructure investments recovered through replacement programs and base rate changes at the natural gas distribution utilities. These changes include base rate increases as a result of rate cases, partially offset by revenue reductions for the impacts of the Tax Reform Legislation.

Revenues attributable to gas costs and other cost recovery decreased due to reduced natural gas prices during 2018 compared to the corresponding periods in 2017, partially offset by increased volumes of natural gas sold in 2018 as a result of colder weather, as determined by Heating Degree Days.

Revenues increased due to colder weather, as determined by Heating Degree Days, in 2018 compared to the corresponding periods in 2017 that affected the utility customers in Illinois and Southern Company Gas' gas marketing services customers in Georgia and Illinois.

Revenues attributable to Southern Company Gas' wholesale gas services business decreased in the second quarter 2018 primarily due to derivative losses, partially offset by increased commercial activity and increased for year-to-date 2018 primarily due to increased commercial activity, partially offset by derivative losses.

Natural gas distribution rates include provisions to adjust billings for fluctuations in natural gas costs. Therefore, gas costs recovered through natural gas revenues generally equal the amount expensed in cost of natural gas and do not affect net income from gas distribution operations.

See Note (B) to the Condensed Financial Statements herein under "Regulatory Matters – Southern Company Gas" for additional information.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Other Revenues

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$211	114.7	\$482	147.9

In the second quarter 2018 , other revenues were \$395 million compared to \$184 million for the corresponding period in 2017 . For year-to-date 2018 , other revenues were \$808 million compared to \$326 million for the corresponding period in 2017 . These increases were primarily due to PowerSecure's storm restoration services in Puerto Rico.

Fuel and Purchased Power Expenses

	Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
	<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
Fuel	\$ 11	1.0	\$ 116	5.6
Purchased power	25	11.8	113	29.0
Total fuel and purchased power expenses	\$ 36		\$ 229	

In the second quarter 2018 , total fuel and purchased power expenses were \$1.34 billion compared to \$1.30 billion for the corresponding period in 2017 . The increase was primarily the result of an \$87 million increase in the volume of KWHs generated and purchased, partially offset by an \$80 million decrease in the average cost of fuel and purchased power.

For year-to-date 2018 , total fuel and purchased power expenses were \$2.7 billion compared to \$2.5 billion for the corresponding period in 2017 . The increase was primarily the result of a \$234 million increase in the volume of KWHs generated and purchased, partially offset by a \$34 million net decrease in the average cost of fuel and purchased power.

In addition, fuel expense increased \$30 million in both the second quarter and year-to-date 2018 in accordance with an Alabama PSC accounting order authorizing the use of excess deferred income taxes to offset under recovered fuel costs.

Fuel and purchased power energy transactions at the traditional electric operating companies are generally offset by fuel revenues and do not have a significant impact on net income. See FUTURE EARNINGS POTENTIAL – " Regulatory Matters – Fuel Cost Recovery" and " – Alabama Power – Accounting Order" herein for additional information. Fuel expenses incurred under Southern Power's PPAs are generally the responsibility of the counterparties and do not significantly impact net income.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Details of the Southern Company system's generation and purchased power were as follows:

	Second Quarter 2018	Second Quarter 2017	Year-to-Date 2018	Year-to-Date 2017
Total generation <i>(in billions of KWHs)</i>	49	49	97	92
Total purchased power <i>(in billions of KWHs)</i>	5	4	10	9
Sources of generation <i>(percent)</i> —				
Gas	46	44	46	45
Coal	30	30	29	29
Nuclear	14	16	15	16
Hydro	3	3	3	3
Other	7	7	7	7
Cost of fuel, generated <i>(in cents per net KWH)</i> —				
Gas	2.74	2.94	2.80	2.93
Coal	2.75	2.85	2.82	2.87
Nuclear	0.82	0.80	0.80	0.80
Average cost of fuel, generated <i>(in cents per net KWH)</i> ^(a)	2.44	2.51	2.47	2.51
Average cost of purchased power <i>(in cents per net KWH)</i> ^(b)	5.00	5.47	5.64	5.28

(a) Cost of fuel and average cost of fuel, generated excludes a \$30 million adjustment associated with the Alabama PSC accounting order related to excess deferred income taxes.

(b) Average cost of purchased power includes fuel purchased by the Southern Company system for tolling agreements where power is generated by the provider.

Fuel

In the second quarter 2018, fuel expense was \$1.10 billion compared to \$1.09 billion for the corresponding period in 2017. The increase was primarily due to a 6.9% increase in the volume of KWHs generated by natural gas and a 1.7% increase in the volume of KWHs generated by coal, partially offset by a 6.8% decrease in the average cost of natural gas per KWH generated and a 3.5% decrease in the average cost of coal per KWH generated.

For year-to-date 2018, fuel expense was \$2.2 billion compared to \$2.1 billion for the corresponding period in 2017. The increase was primarily due to a 10.4% increase in the volume of KWHs generated by natural gas and a 5.9% increase in the volume of KWHs generated by coal, partially offset by a 4.4% decrease in the average cost of natural gas per KWH generated and a 1.7% decrease in the average cost of coal per KWH generated.

Purchased Power

In the second quarter 2018, purchased power expense was \$236 million compared to \$211 million for the corresponding period in 2017. The increase was primarily due to an 18.4% increase in the volume of KWHs purchased, partially offset by an 8.6% decrease in the average cost per KWH purchased.

For year-to-date 2018, purchased power expense was \$503 million compared to \$390 million for the corresponding period in 2017. The increase was primarily due to a 16.3% increase in the volume of KWHs purchased and a 6.8% increase in the average cost per KWH purchased.

Energy purchases will vary depending on demand for energy within the Southern Company system's electric service territory, the market prices of wholesale energy as compared to the cost of the Southern Company system's generation, and the availability of the Southern Company system's generation.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Cost of Other Sales

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$165	144.7	\$365	179.8

In the second quarter 2018 , cost of other sales was \$279 million compared to \$114 million for the corresponding period in 2017 . For year-to-date 2018 , cost of other sales was \$568 million compared to \$203 million for the corresponding period in 2017 . These increases primarily reflect costs related to PowerSecure's storm restoration services in Puerto Rico.

Other Operations and Maintenance Expenses

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$203	15.0	\$268	9.8

In the second quarter 2018 , other operations and maintenance expenses were \$1.6 billion compared to \$1.4 billion for the corresponding period in 2017 . The increase was primarily due to an asset impairment charge of \$119 million at Southern Power related to the pending sale of its Florida plants, a \$36 million loss on the sale of Pivotal Home Solutions at Southern Company Gas, and a \$27 million increase in transmission and distribution costs, primarily related to line maintenance.

For year-to-date 2018 , other operations and maintenance expenses were \$3.0 billion compared to \$2.7 billion for the corresponding period in 2017 . The increase was primarily due to an asset impairment charge of \$119 million at Southern Power related to the pending sale of its Florida plants, a \$42 million goodwill impairment charge at Southern Company Gas related to the sale of Pivotal Home Solutions, and a \$36 million loss on the sale of Pivotal Home Solutions at Southern Company Gas. Also contributing to the increase were a \$38 million increase in transmission and distribution costs, primarily related to line maintenance, a \$19 million decrease in gains from sales of integrated transmission system assets at Georgia Power, and a \$12 million increase at Southern Company Gas to align paid time off with the Southern Company system's policy. These increases were partially offset by \$32.5 million resulting from the write-down of Gulf Power's ownership of Plant Scherer Unit 3 in the first quarter 2017 in accordance with a settlement agreement approved by the Florida PSC in April 2017 (2017 Gulf Power Rate Case Settlement Agreement).

See Note (A) to the Condensed Financial Statements under " Goodwill and Other Intangible Assets " and Note (J) to the Condensed Financial Statements under " Southern Company Gas – Sale of Pivotal Home Solutions " and "Southern Power – Sale of Florida Plants " herein for additional information. Also see Note 3 to the financial statements of Southern Company under "Regulatory Matters – Gulf Power – Retail Base Rate Cases" in Item 8 of the Form 10-K for additional information regarding the 2017 Gulf Power Rate Case Settlement Agreement.

Depreciation and Amortization

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$29	3.8	\$83	5.7

In the second quarter 2018 , depreciation and amortization was \$783 million compared to \$754 million for the corresponding period in 2017 . For year-to-date 2018 , depreciation and amortization was \$1.6 billion compared to \$1.5 billion for the corresponding period in 2017 . These increases primarily reflect increases of \$31 million and \$65 million for the second quarter and year-to-date 2018 , respectively, related to additional plant in service.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Additionally, these increases were due to depreciation credits of \$8.5 million and \$34 million recognized in the second quarter and year-to-date 2017, respectively, as authorized in Gulf Power's 2013 rate case settlement.

See Note 3 to the financial statements of Southern Company under "Regulatory Matters – Gulf Power – Retail Base Rate Cases" in Item 8 of the Form 10-K for additional information.

Taxes Other Than Income Taxes

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$8	2.6	\$33	5.2

In the second quarter 2018, taxes other than income taxes were \$316 million compared to \$308 million for the corresponding period in 2017. For year-to-date 2018, taxes other than income taxes were \$671 million compared to \$638 million for the corresponding period in 2017. These increases were primarily due to increased property taxes at Georgia Power, increased revenue tax expenses at Southern Company Gas, and increased payroll taxes related to aligning paid time off at Southern Company Gas with the Southern Company system's policy. Also contributing to the year-to-date 2018 increase was an increase in municipal franchise fees primarily related to higher retail revenues at Georgia Power.

Estimated Loss on Plants Under Construction

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(1,952)	(64.8)	\$(2,015)	(64.6)

In the second quarter 2018, estimated loss on plants under construction was \$1.06 billion compared to \$3.01 billion for the corresponding period in 2017. For year-to-date 2018, estimated loss on plants under construction was \$1.11 billion compared to \$3.12 billion for the corresponding period in 2017. These decreases were primarily related to revisions to the estimated construction costs for, and subsequent suspension of, the Kemper IGCC in June 2017 at Mississippi Power, partially offset by Georgia Power's revised estimate to complete construction and start-up of Plant Vogtle Units 3 and 4 in the second quarter 2018.

See Note 3 to the financial statements of Southern Company under "Kemper County Energy Facility" in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements under "Kemper County Energy Facility" and "Nuclear Construction" herein for additional information.

Allowance for Equity Funds Used During Construction

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(26)	(44.8)	\$(52)	(45.2)

In the second quarter 2018, AFUDC equity was \$32 million compared to \$58 million in the corresponding period in 2017. For year-to-date 2018, AFUDC equity was \$63 million compared to \$115 million in the corresponding period in 2017. These decreases primarily resulted from Mississippi Power's suspension of the Kemper IGCC construction in June 2017, partially offset by increases in capital expenditures related to environmental and transmission projects at Alabama Power.

See Note 3 to the financial statements of Southern Company under "Kemper County Energy Facility" in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements under "Kemper County Energy Facility" herein for additional information.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Interest Expense, Net of Amounts Capitalized

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$46	10.8	\$88	10.5

In the second quarter 2018 , interest expense, net of amounts capitalized was \$470 million compared to \$424 million in the corresponding period in 2017 . For year-to-date 2018 , interest expense, net of amounts capitalized was \$928 million compared to \$840 million in the corresponding period in 2017 . These increases were largely due to an increase in average outstanding long-term debt, primarily at the parent company and Southern Company Gas.

See Note 6 to the financial statements of Southern Company in Item 8 of the Form 10-K and Note (F) to the Condensed Financial Statements herein for additional information.

Other Income (Expense), Net

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$26	50.0	\$40	40.8

In the second quarter 2018 , other income (expense), net was \$78 million compared to \$52 million for the corresponding period in 2017 . For year-to-date 2018 , other income (expense), net was \$138 million compared to \$98 million for the corresponding period in 2017 . These increases were primarily due to the settlement of Mississippi Power's Deepwater Horizon claim in May 2018. The year-to-date 2018 increase was also due to a gain from the settlement of a contractor litigation claim at Southern Company Gas.

See Note (B) to the Condensed Financial Statements under "General Litigation Matters – Mississippi Power" and " Southern Company Gas – Atlanta Gas Light's Pipeline Replacement Program " herein for additional information.

Income Taxes (Benefit)

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$448	N/M	\$248	N/M

N/M - Not meaningful

In the second quarter 2018 , income tax benefit was \$139 million compared to an income tax benefit of \$587 million for the corresponding period in 2017 . For year-to-date 2018 , income tax benefit was \$25 million compared to an income tax benefit of \$273 million for the corresponding period in 2017 . These changes were primarily due to charges recorded in 2017 related to the Kemper IGCC at Mississippi Power, partially offset by the estimated probable loss on Plant Vogtle Units 3 and 4 at Georgia Power in the second quarter 2018 and lower federal income tax expense as well as the benefit from the flowback of excess deferred income taxes as a result of the Tax Reform Legislation. The year-to-date 2018 change was also due to net state income tax benefits arising from the reorganization of Southern Power's legal entities holding its solar facilities.

See Note (H) to the Condensed Financial Statements herein for additional information.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Dividends on Preferred and Preference Stock of Subsidiaries

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(7)	(63.6)	\$(14)	(63.6)

In the second quarter 2018, dividends on preferred and preference stock of subsidiaries was \$4 million compared to \$11 million for the corresponding period in 2017. For year-to-date 2018, dividends on preferred and preference stock of subsidiaries was \$8 million compared to \$22 million for the corresponding period in 2017. These decreases were primarily due to the 2017 redemptions of all outstanding shares of preferred and preference stock at Georgia Power and preference stock at Gulf Power.

See Note 6 the financial statements of Southern Company under "Redeemable Preferred Stock of Subsidiaries" in Item 8 of the Form 10-K for additional information.

FUTURE EARNINGS POTENTIAL

The results of operations discussed above are not necessarily indicative of Southern Company's future earnings potential. The level of Southern Company's future earnings depends on numerous factors that affect the opportunities, challenges, and risks of the Southern Company system's primary businesses of selling electricity and distributing natural gas. These factors include the traditional electric operating companies' and the natural gas distribution utilities' ability to maintain a constructive regulatory environment that allows for the timely recovery of prudently-incurred costs during a time of increasing costs and limited projected demand growth over the next several years. Plant Vogtle Units 3 and 4 construction and rate recovery and the profitability of Southern Power's competitive wholesale business and successful additional investments in renewable and other energy projects are also major factors.

Future earnings for the electricity and natural gas businesses will be driven primarily by customer growth. Earnings in the electricity business will also depend upon maintaining and growing sales, considering, among other things, the adoption and/or penetration rates of increasingly energy-efficient technologies, increasing volumes of electronic commerce transactions, and more multi-family home construction, all of which could contribute to a net reduction in customer usage. Earnings for both the electricity and natural gas businesses are subject to a variety of other factors. These factors include weather, competition, new energy contracts with other utilities and other wholesale customers, energy conservation practiced by customers, the use of alternative energy sources by customers, the prices of electricity and natural gas, the price elasticity of demand, and the rate of economic growth or decline in the service territory. In addition, the level of future earnings for the wholesale electric business also depends on numerous factors including regulatory matters, creditworthiness of customers, total electric generating capacity available and related costs, future acquisitions and construction of electric generating facilities, the impact of tax credits from renewable energy projects, and the successful remarketing of capacity as current contracts expire. Demand for electricity and natural gas is primarily driven by the pace of economic growth that may be affected by changes in regional and global economic conditions, which may impact future earnings. In addition, the volatility of natural gas prices has a significant impact on the natural gas distribution utilities' customer rates, long-term competitive position against other energy sources, and the ability of Southern Company Gas' gas marketing services and wholesale gas services businesses to capture value from locational and seasonal spreads. Additionally, changes in commodity prices subject a significant portion of Southern Company Gas' operations to earnings variability.

As part of its ongoing effort to adapt to changing market conditions, Southern Company continues to evaluate and consider a wide array of potential business strategies. These strategies may include business combinations, partnerships, and acquisitions involving other utility or non-utility businesses or properties, disposition of certain assets or businesses, internal restructuring, or some combination thereof. Furthermore, Southern Company may engage in new business ventures that arise from competitive and regulatory changes in the utility industry. Pursuit of any of the above strategies, or any combination thereof, may significantly affect the business operations, risks, and financial condition of Southern Company.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

On May 20, 2018, Southern Company entered into a stock purchase agreement with NextEra Energy to sell all of the capital stock of Gulf Power for an aggregate cash purchase price of \$5.75 billion (less the amount of indebtedness assumed at closing, which is currently estimated at approximately \$1.4 billion), subject to (i) customary adjustments for indebtedness and working capital and (ii) reduction by the amount (if any) by which Gulf Power fails to meet a specified capital expenditure target. The completion of the sale is subject to the satisfaction or waiver of certain closing conditions, including, among others, (i) the expiration or termination of the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act, (ii) approval by the FERC and the Federal Communications Commission, (iii) the entry into certain ancillary agreements, including transmission-related agreements and a transition services agreement, among the parties and their affiliates, and (iv) other customary closing conditions. Southern Company's sale of Gulf Power is expected to occur in the first half of 2019. See Note (J) to the Condensed Financial Statements under "Southern Company's Sale of Gulf Power" herein for additional information. The ultimate outcome of this matter cannot be determined at this time.

On June 4, 2018, Southern Company Gas completed the stock sale of Pivotal Home Solutions to American Water Enterprises LLC for a total cash purchase price of \$358 million and an additional \$6 million for working capital. This disposition resulted in a net loss of \$76 million, which included \$40 million of income tax expense. In contemplation of the transaction, a goodwill impairment charge of \$42 million was recorded during the first quarter 2018.

On July 1, 2018, a Southern Company Gas subsidiary, Pivotal Utility Holdings, completed the sales of the assets of two of its natural gas distribution utilities, Elizabethtown Gas and Elkton Gas, to South Jersey Industries, Inc. for a total cash purchase price of \$1.7 billion and an additional \$40 million for working capital. This disposition resulted in an estimated pre-tax gain of approximately \$235 million and an after-tax gain of approximately \$12 million, which will be recorded in the third quarter 2018.

On July 29, 2018, Southern Company Gas and its wholly-owned direct subsidiary, NUI Corporation, completed the stock sale of Pivotal Utility Holdings, which primarily consisted of Florida City Gas, to NextEra Energy for a total cash purchase price of \$530 million (less \$3 million of indebtedness assumed at closing for customer deposits) and an additional \$60 million for cash and other working capital. This disposition resulted in an estimated pre-tax gain of approximately \$126 million and an after-tax gain of approximately \$4 million, which will be recorded in the third quarter 2018.

The after-tax impacts of Southern Company Gas' dispositions included income tax expense on goodwill not deductible for tax purposes and for which a deferred tax liability had not been recorded previously. Additionally, each of these dispositions is subject to a final working capital adjustment that may impact the cash proceeds from disposition, but not the gain recorded. See Note (J) to the Condensed Financial Statements under "Southern Company Gas" herein for additional information on Southern Company Gas' dispositions.

In May 2018, Southern Power completed the sale of a 33% equity interest in SPSH, a newly-formed limited partnership indirectly owning substantially all of Southern Power's solar facilities, for an aggregate purchase price of approximately \$1.2 billion, subject to customary working capital adjustments. Southern Power maintains control and overall operational responsibilities for the solar facilities. See Note (J) to the Condensed Financial Statements under "Southern Power" herein for additional information.

Southern Power is pursuing the sale of a noncontrolling interest in a portfolio of eight operating wind facilities through the use of third-party tax equity, which, if successful, is expected to close in the fourth quarter 2018. See "Income Tax Matters – Southern Power" herein for additional information. The ultimate outcome of this matter cannot be determined at this time.

For additional information relating to these issues, see RISK FACTORS in Item 1A and MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL of Southern Company in Item 7 of the Form 10-K.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Environmental Matters

The Southern Company system's operations are regulated by state and federal environmental agencies through a variety of laws and regulations governing air, water, land, and protection of other natural resources. The Southern Company system maintains comprehensive environmental compliance and greenhouse gas (GHG) strategies to assess upcoming requirements and compliance costs associated with these environmental laws and regulations. The costs, including capital expenditures and operations and maintenance costs, required to comply with environmental laws and regulations and to achieve stated goals may impact future unit retirement and replacement decisions, results of operations, cash flows, and financial condition. Related costs may result from the installation of additional environmental controls, closure and monitoring of CCR facilities, unit retirements, and adding or changing fuel sources for certain existing units, as well as related upgrades to the transmission system. A major portion of these costs are expected to be recovered through existing ratemaking provisions. The ultimate impact of environmental laws and regulations and the GHG goals discussed below will depend on various factors, such as state adoption and implementation of requirements, the availability and cost of any deployed control technology, and the outcome of pending and/or future legal challenges.

New or revised environmental laws and regulations could affect many areas of the traditional electric operating companies', Southern Power's, and the natural gas distribution utilities' operations. The impact of any such changes cannot be determined at this time. Environmental compliance costs could affect earnings if such costs cannot continue to be fully recovered in rates on a timely basis for the traditional electric operating companies and the natural gas distribution utilities or through long-term wholesale agreements for the traditional electric operating companies and Southern Power. Further, increased costs that are recovered through regulated rates could contribute to reduced demand for electricity and natural gas, which could negatively affect results of operations, cash flows, and financial condition. Additionally, many commercial and industrial customers may also be affected by existing and future environmental requirements, which for some may have the potential to ultimately affect their demand for electricity and natural gas. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters" of Southern Company in Item 7 and Note 3 to the financial statements of Southern Company under "Environmental Matters" in Item 8 of the Form 10-K for additional information.

Environmental Laws and Regulations

Water Quality

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters – Environmental Laws and Regulations – Water Quality" of Southern Company in Item 7 of the Form 10-K for additional information regarding the effluent limitations guidelines (ELG) rule.

On May 2, 2018, the EPA updated its anticipated final rulemaking schedule for ELG from September 2020 to December 2019. The impact of any changes to the ELG rule will depend on the content of the final rule and the outcome of any legal challenges and cannot be determined at this time.

Coal Combustion Residuals

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters – Environmental Laws and Regulations – Coal Combustion Residuals" of Southern Company in Item 7 of the Form 10-K for additional information regarding the Disposal of Coal Combustion Residuals from Electric Utilities rule (CCR Rule).

On July 30, 2018, the EPA published certain amendments to the CCR Rule, which will be effective August 29, 2018. These amendments extend the date from April 2019 to October 31, 2020 to cease sending CCR and other waste streams to impoundments that demonstrate compliance with all except two specified criteria. These amendments also establish groundwater protection standards for four constituents that do not have established EPA maximum contaminant levels and allow a participating state director or the EPA (where the EPA is the permitting authority) to suspend groundwater monitoring requirements under certain circumstances. Specific site impacts are being evaluated by the traditional electric operating companies.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In June 2018, Alabama Power recorded an increase of approximately \$1.2 billion to its AROs related to the CCR Rule. The revised cost estimates as of June 30, 2018 are based on information from feasibility studies performed on ash ponds in use at plants operated by Alabama Power, including a plant jointly-owned by Mississippi Power. During the second quarter 2018, Alabama Power's management completed its analysis of these studies which indicated that additional closure costs, primarily related to increases in estimated ash volume, water management requirements, and design revisions, will be required to close these ash ponds under the planned closure-in-place methodology.

Georgia Power continues to perform engineering studies related to its plans to close the ash ponds at all of its generating plants, including one jointly owned with Gulf Power, in compliance with federal and state CCR rules. Georgia Power also continues to refine its closure strategy and cost estimates for each ash pond and is preparing permit applications as required by the State of Georgia CCR rule. While Georgia Power believes its recorded liability for ash pond closures appropriately reflects its obligations under the current closure strategies it has elected, changes to such strategies and cost estimates would likely result in additional closure costs which would increase Georgia Power's ARO liability. It is not currently possible to determine the magnitude of an increase related to a change in closure strategies nor an increase related to ongoing engineering studies for the current closure strategies, and the timing of future cash outflows are indeterminable at this time. As permit applications advance, engineering studies continue, and the timing of ash pond closures develop further on a plant-by-plant basis during the second half of 2018 and in the future, Georgia Power will record any changes as necessary to its ARO liability, which could be material. Georgia Power expects to continue to periodically update these cost estimates as necessary, which could change further as additional information becomes available.

As further analysis is performed and closure details are developed with respect to ash pond closures, the traditional electric operating companies expect to periodically update their cost estimates as necessary. Absent continued recovery of ARO costs through regulated rates, Southern Company's results of operations, cash flows, and financial condition could be materially impacted. See Note (A) to the Condensed Financial Statements under "Asset Retirement Obligations" herein for additional information.

The ultimate outcome of these matters cannot be determined at this time.

Nuclear Decommissioning

In June 2018, Alabama Power completed an updated decommissioning cost site study for Plant Farley. The estimated cost of decommissioning based on the study resulted in an increase in the ARO liability of approximately \$300 million. Amounts previously contributed to Alabama Power's external trust funds are currently projected to be adequate to meet the updated decommissioning obligations. See Note 1 to the financial statements of Southern Company under "Nuclear Decommissioning" in Item 8 of the Form 10-K and Note (A) to the Condensed Financial Statements under "Asset Retirement Obligations" and "Nuclear Decommissioning" herein for additional information.

Global Climate Issues

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters – Global Climate Issues" of Southern Company in Item 7 of the Form 10-K for additional information regarding domestic GHG policies.

Through 2017, the Southern Company system has achieved an estimated GHG emission reduction of 36% since 2007. In April 2018, Southern Company established an intermediate goal of a 50% reduction in carbon emissions from 2007 levels by 2030 and a long-term goal of low- to no-carbon operations by 2050. To achieve these goals, the Southern Company system expects to continue growing its renewable energy portfolio, optimize technology advancements to modernize its transmission and distribution systems, increase the use of natural gas for generation, complete construction of Plant Vogtle Units 3 and 4, invest in energy efficiency, and continue research and development efforts focused on technologies to lower GHG emissions. The Southern Company system's ability to achieve these goals also will be dependent on many external factors, including supportive national energy policies,

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

low natural gas prices, and the development, deployment, and advancement of relevant energy technologies. The ultimate outcome of this matter cannot be determined at this time.

FERC Matters

Market-Based Rate Authority

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "FERC Matters – Market-Based Rate Authority" of Southern Company in Item 7 of the Form 10-K for additional information regarding proceedings related to the traditional electric operating companies' and Southern Power's 2014 and 2017 triennial market power analyses.

On May 4, 2018, the FERC issued an order terminating both proceedings, finding that the traditional electric operating companies and Southern Power satisfy the FERC's standards for market-based rates. On May 9, 2018, the traditional electric operating companies and Southern Power made the compliance filing required by the order. These proceedings are essentially concluded.

Open Access Transmission Tariff

On May 10, 2018, the Alabama Municipal Electric Authority and Cooperative Energy filed with the FERC a complaint against SCS and the traditional electric operating companies claiming that the current 11.25% base ROE used in calculating the annual transmission revenue requirements of the traditional electric operating companies' open access transmission tariff is unjust and unreasonable as measured by the applicable FERC standards. The complaint requests that the base ROE be set no higher than 8.65% and that the FERC order refunds for the difference in revenue requirements that results from applying a just and reasonable ROE established in this proceeding upon determining the current ROE is unjust and unreasonable. On June 18, 2018, SCS and the traditional electric operating companies filed their response challenging the adequacy of the showing presented by the complainants and offering support for the current ROE. The ultimate outcome of this matter cannot be determined at this time.

Regulatory Matters

Fuel Cost Recovery

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Regulatory Matters – Fuel Cost Recovery" of Southern Company in Item 7 and Note 3 to the financial statements of Southern Company under "Regulatory Matters – Alabama Power – Rate ECR" and "Regulatory Matters – Georgia Power – Fuel Cost Recovery" in Item 8 of the Form 10-K for additional information regarding fuel cost recovery for the traditional electric operating companies.

The traditional electric operating companies each have established fuel cost recovery rates approved by their respective state PSCs. Fuel cost recovery revenues are adjusted for differences in actual recoverable fuel costs and amounts billed in current regulated rates. Accordingly, changes in the billing factor will not have a significant effect on Southern Company's revenues or net income, but will affect cash flow. The traditional electric operating companies continuously monitor their under or over recovered fuel cost balances and make appropriate filings with their state PSCs to adjust fuel cost recovery rates as necessary.

Alabama Power

Alabama Power's revenues from regulated retail operations are collected through various rate mechanisms subject to the oversight of the Alabama PSC. Alabama Power currently recovers its costs from the regulated retail business primarily through Rate RSE, Rate CNP, Rate ECR, and Rate NDR. In addition, the Alabama PSC issues accounting orders to address current events impacting Alabama Power. See Note 3 to the financial statements of Southern Company under "Regulatory Matters – Alabama Power" in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements herein for additional information regarding Alabama Power's rate mechanisms, accounting orders, and the recovery balance of each regulatory clause for Alabama Power.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

On May 1, 2018, the Alabama PSC approved modifications to Rate RSE and other commitments designed to position Alabama Power to address the growing pressure on its credit quality resulting from the Tax Reform Legislation, without increasing retail rates under Rate RSE in the near term. Alabama Power plans to reduce growth in total debt by increasing equity, with corresponding reductions in debt issuances, thereby de-leveraging its capital structure. Alabama Power's goal is to achieve an equity ratio of approximately 55% by the end of 2025. At June 30, 2018, Alabama Power's equity ratio was approximately 46.6%. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Income Tax Matters – Federal Tax Reform Legislation" of Southern Company in Item 7 of the Form 10-K for additional information.

Rate RSE

The approved modifications to Rate RSE became effective June 2018 and are applicable for January 2019 billings and thereafter. The modifications include reducing the top of the allowed weighted common equity return (WCER) range from 6.21% to 6.15% and modifications to the refund mechanism applicable to prior year actual results. The modifications to the refund mechanism allow Alabama Power to retain a portion of the revenue that causes the actual WCER for a given year to exceed the allowed range.

In conjunction with these modifications to Rate RSE, on May 8, 2018, Alabama Power consented to a moratorium on any upward adjustments under Rate RSE for 2019 and 2020. Additionally, Alabama Power will return \$50 million to customers through bill credits in 2019.

In accordance with an established retail tariff that provides for an interim adjustment to customer billings to recognize the impact of a change in the statutory income tax rate, Alabama Power is returning approximately \$257 million to retail customers through bill credits in the second half of 2018 as a result of the change in the federal income tax rate under the Tax Reform Legislation.

Rate ECR

On May 1, 2018, the Alabama PSC approved an increase to Rate ECR from 2.015 cents per KWH to 2.353 cents per KWH effective July 2018 which is expected to result in additional collections of approximately \$100 million through December 31, 2018. The approved increase in the Rate ECR factor will have no significant effect on Southern Company's net income, but will increase operating cash flows related to fuel cost recovery in 2018. The rate will return to 5.910 cents per KWH in 2019, absent a further order from the Alabama PSC.

Accounting Order

On May 1, 2018, the Alabama PSC approved an accounting order that authorizes Alabama Power to defer the benefits of federal excess deferred income taxes associated with the Tax Reform Legislation for the year ending December 31, 2018 as a regulatory liability and to use up to \$30 million of such deferrals to offset under recovered amounts under Rate ECR. Any remaining amounts will be used for the benefit of customers as determined by the Alabama PSC. As of June 30, 2018, Alabama Power had applied approximately \$30 million of such deferrals to offset the under recovered balance under Rate ECR and expects the total deferrals for the year ending December 31, 2018 to be approximately \$50 million. See Note 5 to the financial statements of Southern Company under "Federal Tax Reform Legislation" in Item 8 of the Form 10-K for additional information.

Georgia Power

Georgia Power's revenues from regulated retail operations are collected through various rate mechanisms subject to the oversight of the Georgia PSC. Georgia Power currently recovers its costs from the regulated retail business through the 2013 ARP, which includes traditional base tariff rates, Demand-Side Management tariffs, Environmental Compliance Cost Recovery tariffs, and Municipal Franchise Fee tariffs. In addition, financing costs related to certified construction costs of Plant Vogtle Units 3 and 4 are being collected through the NCCR tariff and fuel costs are collected through a separate fuel cost recovery tariff. See Note (B) to the Condensed Financial Statements under " Nuclear Construction " herein and Note 3 to the financial statements of Southern Company under "Nuclear Construction" in Item 8 of the Form 10-K for additional information regarding Georgia Power's NCCR

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

tariff. Also see Note (B) to the Condensed Financial Statements under " Regulatory Matters – Georgia Power – Fuel Cost Recovery " herein for additional information regarding Georgia Power's fuel cost recovery.

Rate Plans

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Regulatory Matters – Georgia Power – Rate Plans" of Southern Company in Item 7 of the Form 10-K for additional information regarding Georgia Power's 2013 ARP and the Georgia PSC's 2018 order related to the Tax Reform Legislation.

On April 3, 2018, the Georgia PSC approved a settlement agreement between Georgia Power and the staff of the Georgia PSC regarding the retail rate impact of the Tax Reform Legislation (Georgia Power Tax Reform Settlement Agreement). Pursuant to the Georgia Power Tax Reform Settlement Agreement, to reflect the federal income tax rate reduction impact of the Tax Reform Legislation, Georgia Power will refund to customers a total of \$330 million through bill credits of \$131 million in October 2018, \$96 million in June 2019, and \$103 million in February 2020. In addition, Georgia Power is deferring as a regulatory liability (i) the revenue equivalent of the tax expense reduction resulting from legislation lowering the Georgia state income tax rate from 6.00% to 5.75% in 2019 and (ii) the entire benefit of approximately \$700 million in federal and state excess accumulated deferred income taxes. The amortization of these regulatory liabilities is expected to be addressed in Georgia Power's next base rate case, which is scheduled to be filed by July 1, 2019. If there is not a base rate case in 2019, customers will receive \$185 million in annual bill credits beginning in 2020, with any additional federal and state income tax savings deferred as a regulatory liability, until Georgia Power's next base rate case.

To address the negative cash flow and credit metric impacts of the Tax Reform Legislation, the Georgia PSC also approved an increase in Georgia Power's retail equity ratio to the lower of (i) Georgia Power's actual common equity weight in its capital structure or (ii) 55%, until Georgia Power's next base rate case. Benefits from reduced federal income tax rates in excess of the amounts refunded to customers will be retained by Georgia Power to cover the carrying costs of the incremental equity in 2018 and 2019.

Gulf Power

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Regulatory Matters – Gulf Power" of Southern Company in Item 7 of the Form 10-K for additional information.

As a continuation of the 2017 Gulf Power Rate Case Settlement Agreement, on March 26, 2018, the Florida PSC approved a stipulation and settlement agreement among Gulf Power and three intervenors addressing the retail revenue requirement effects of the Tax Reform Legislation (Gulf Power Tax Reform Settlement Agreement).

The Gulf Power Tax Reform Settlement Agreement results in annual reductions to Gulf Power's revenues of \$18.2 million from base rates and \$15.6 million from environmental cost recovery rates, implemented April 1, 2018, and also provides for a one-time refund of \$69.4 million for the retail portion of unprotected (not subject to normalization) deferred tax liabilities through a reduced fuel cost recovery rate over the remainder of 2018. Through June 30, 2018, approximately \$28 million of this refund has been reflected in customer bills. As a result of the Gulf Power Tax Reform Settlement Agreement, the Florida PSC also approved an increase in Gulf Power's maximum equity ratio from 52.5% to 53.5% for all retail regulatory purposes.

As part of the Gulf Power Tax Reform Settlement Agreement, a limited scope proceeding to address protected deferred tax liabilities consistent with IRS normalization principles was initiated on April 30, 2018. Pending resolution of this proceeding, Gulf Power is deferring the related amounts for 2018 as a regulatory liability. Through June 30, 2018, amounts deferred totaled \$5 million. Unless otherwise agreed to by the parties to the Gulf Power Tax Reform Settlement Agreement, amounts recorded in this regulatory liability will be refunded to retail customers in 2019 through Gulf Power's fuel cost recovery rates. The ultimate outcome of this matter cannot be determined at this time.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Mississippi Power

On February 7, 2018, Mississippi Power submitted its revised 2018 projected PEP filing to the Mississippi PSC, which reflected the impacts of the Tax Reform Legislation, requesting an increase in annual retail revenues of \$26 million based on a performance adjusted ROE of 9.33% and an increased equity ratio of 55%.

On July 27, 2018, Mississippi Power and the Mississippi Public Utilities Staff (MPUS) entered into a settlement agreement with respect to the 2018 PEP filing and all unresolved PEP filings for prior years (PEP Settlement Agreement), which was approved by the Mississippi PSC on August 7, 2018. Rates under the PEP Settlement Agreement will take effect for the first billing cycle of September 2018.

The PEP Settlement Agreement provides for an increase of approximately \$21.6 million in annual base retail revenues, which excludes approximately \$5.5 million requested for certain compensation costs contested by the MPUS. Under the PEP Settlement Agreement, Mississippi Power expects to defer these costs for 2018 and 2019 as a regulatory asset. The Mississippi PSC is currently expected to rule on the appropriate treatment for such costs in connection with Mississippi Power's next base rate case, which is scheduled to be filed in the fourth quarter 2019 (2019 Base Rate Case). The ultimate outcome of this matter cannot be determined at this time.

Pursuant to the PEP Settlement Agreement, Mississippi Power's performance-adjusted allowed ROE will be 9.31% and its allowed equity ratio will remain at 50%, pending further review by the Mississippi PSC. In lieu of the requested equity ratio increase, Mississippi Power will retain \$44 million of excess accumulated deferred income taxes resulting from the Tax Reform Legislation, which had been proposed to be amortized beginning in 2018, until the conclusion of the 2019 Base Rate Case. Further, Mississippi Power will seek equity contributions sufficient to restore its equity ratio (which was 43.5% at June 30, 2018) to the 50% target. In the event Mississippi Power's actual average equity ratio for 2018 is more than 1% higher or lower than the 50% target, Mississippi Power will defer the corresponding difference in its revenue requirement as a regulatory asset or liability for resolution in the 2019 Base Rate Case.

Pursuant to the PEP Settlement Agreement, PEP proceedings will be suspended until after the conclusion of the 2019 Base Rate Case and Mississippi Power will not be required to make any PEP filings for regulatory years 2018, 2019, and 2020. The PEP Settlement Agreement also resolves all open PEP filings with no change to customer rates. As a result, in the third quarter 2018, Mississippi Power expects to recognize revenues of \$5 million previously reserved in connection with the 2012 PEP lookback filing.

Southern Company Gas

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Regulatory Matters – Southern Company Gas" of Southern Company in Item 7 of the Form 10-K and Note (B) to the Condensed Financial Statements under "Regulatory Matters – Southern Company Gas" herein for additional information.

On February 23, 2018, Atlanta Gas Light revised its annual base rate filing to reflect the impacts of the Tax Reform Legislation and requested a \$16 million rate reduction in 2018. On May 15, 2018, the Georgia PSC approved a stipulation for Atlanta Gas Light's annual base rates to remain at the 2017 level for 2018 and 2019, with customer credits of \$8 million in each of July 2018 and October 2018 to reflect the impacts of the Tax Reform Legislation. The Georgia PSC maintained Atlanta Gas Light's previously authorized earnings band based on a ROE between 10.55% and 10.95% and increased the allowed equity ratio by 4% to an equity ratio of 55% to address the negative cash flow and credit metric impacts of the Tax Reform Legislation. Additionally, Atlanta Gas Light is required to file a traditional base rate case on or before June 1, 2019 for rates effective January 1, 2020.

On May 2, 2018, the Illinois Commission approved Nicor Gas' rehearing request for revised base rates to incorporate the reduction in the federal income tax rate as a result of the Tax Reform Legislation. The resulting decrease of approximately \$44 million in annual base rate revenues became effective May 5, 2018. Nicor Gas' previously-authorized capital structure and ROE of 9.8% were not addressed in the rehearing and remain unchanged.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Kemper County Energy Facility

For additional information on the Kemper County energy facility, see Note 3 to the financial statements of Southern Company under "Kemper County Energy Facility" in Item 8 of the Form 10-K.

As the mining permit holder for the Kemper County energy facility, Liberty Fuels Company, LLC has a legal obligation to perform mine reclamation, and Mississippi Power has a contractual obligation to fund all reclamation activities. Mine reclamation began in the first quarter 2018.

As of June 30, 2018, Mississippi Power recorded charges to income of an immaterial amount for the second quarter 2018 and \$45 million (\$33 million after tax) for year-to-date 2018, primarily resulting from the abandonment and related closure activities for the mine and gasifier-related assets at the Kemper County energy facility. Additional closure costs for the mine and gasifier-related assets, currently estimated to cost up to \$25 million pre-tax (excluding salvage, net of dismantlement costs), are expected to be incurred during the remainder of 2018 and 2019. In addition, period costs, including, but not limited to, costs for compliance and safety, ARO accretion, and property taxes for the mine and gasifier-related assets, are estimated at \$4 million for the remainder of 2018, \$7 million in 2019, and \$4 million annually beginning in 2020. The ultimate outcome of this matter cannot be determined at this time.

The combined cycle and associated common facilities portions of the Kemper County energy facility were dedicated as Plant Ratcliffe on April 27, 2018.

Reserve Margin Plan

On August 6, 2018, Mississippi Power filed its proposed Reserve Margin Plan (RMP), as required by the Mississippi PSC's order in the docket established for the purposes of pursuing a global settlement of the costs related to the Kemper County energy facility. Under the RMP, Mississippi Power proposes alternatives that would reduce its reserve margin, with the most economic of the alternatives being the 2-year and 7-year acceleration of the retirement of Plant Watson Units 4 and 5, respectively, to the first quarter 2022 and the 4-year acceleration of the retirement of Plant Greene County Units 1 and 2 to the third quarter 2021 and the third quarter 2022, respectively, in order to lower or avoid operating costs. The Plant Greene County unit retirements would require the completion by Alabama Power of proposed transmission and system reliability improvements, as well as agreement by Alabama Power. The RMP filing also states that, in the event the Mississippi PSC ultimately approves an alternative that includes an accelerated retirement, Mississippi Power would require authorization to defer in a regulatory asset for future recovery the remaining net book value of the units at the time of retirement. Mississippi Power expects the MPUS and other interested parties to review the proposal prior to resolution by the Mississippi PSC. The ultimate outcome of this matter cannot be determined at this time. However, if approved by the Mississippi PSC, the alternatives are not expected to have any adverse impact on customer rates.

Construction Program

Overview

The subsidiary companies of Southern Company are engaged in continuous construction programs to accommodate existing and estimated future loads on their respective systems. The Southern Company system intends to continue its strategy of developing and constructing new electric generating facilities, adding environmental modifications to certain existing units, expanding the electric transmission and distribution systems, and updating and expanding the natural gas distribution systems. For the traditional electric operating companies, major generation construction projects are subject to state PSC approval in order to be included in retail rates. While Southern Power generally constructs and acquires generation assets covered by long-term PPAs, any uncontracted capacity could negatively affect future earnings. Southern Company Gas is engaged in various infrastructure improvement programs designed to update or expand the natural gas distribution systems of the natural gas distribution utilities to improve reliability and meet operational flexibility and growth. The natural gas distribution utilities recover their investment and a return associated with these infrastructure programs through their regulated rates. See Notes 3 and 12 to the financial statements of Southern Company under "Regulatory Matters – Southern Company Gas – Regulatory

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Infrastructure Programs" and "Southern Power – Construction Projects in Progress," respectively, in Item 8 of the Form 10-K and Note (J) to the Condensed Financial Statements under "Southern Power" herein for additional information.

The largest construction project currently underway in the Southern Company system is Plant Vogtle Units 3 and 4 (45.7% ownership interest by Georgia Power in the two units, each with approximately 1,100 MWs). See Note 3 to the financial statements of Southern Company under "Nuclear Construction" in Item 8 of the Form 10-K and "Nuclear Construction" herein for additional information.

Also see FINANCIAL CONDITION AND LIQUIDITY – "Capital Requirements and Contractual Obligations" herein for additional information regarding Southern Company's capital requirements for its subsidiaries' construction programs.

Nuclear Construction

See Note 3 to the financial statements of Southern Company under "Nuclear Construction" in Item 8 of the Form 10-K for additional information regarding the construction of Plant Vogtle Units 3 and 4, VCM reports, and the NCCR tariff.

In 2009, the Georgia PSC certified construction of Plant Vogtle Units 3 and 4. In 2012, the NRC issued the related combined construction and operating licenses, which allowed full construction of the two AP1000 nuclear units (with electric generating capacity of approximately 1,100 MWs each) and related facilities to begin. Until March 2017, construction on Plant Vogtle Units 3 and 4 continued under the Vogtle 3 and 4 Agreement, which was a substantially fixed price agreement. In March 2017, the EPC Contractor filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy Code.

In connection with the EPC Contractor's bankruptcy filing, Georgia Power, acting for itself and as agent for the Vogtle Owners, entered into the Interim Assessment Agreement with the EPC Contractor to allow construction to continue. The Interim Assessment Agreement expired in July 2017 when Georgia Power, acting for itself and as agent for the other Vogtle Owners, and the EPC Contractor entered into the Vogtle Services Agreement. Under the Vogtle Services Agreement, Westinghouse provides facility design and engineering services, procurement and technical support, and staff augmentation on a time and materials cost basis. The Vogtle Services Agreement will continue until the start-up and testing of Plant Vogtle Units 3 and 4 are complete and electricity is generated and sold from both units. The Vogtle Services Agreement is terminable by the Vogtle Owners upon 30 days' written notice.

In October 2017, Georgia Power, acting for itself and as agent for the other Vogtle Owners, entered into a construction completion agreement with Bechtel, whereby Bechtel will serve as the primary contractor for the remaining construction activities for Plant Vogtle Units 3 and 4 (Bechtel Agreement). The Bechtel Agreement is a cost reimbursable plus fee arrangement, whereby Bechtel is reimbursed for actual costs plus a base fee and an at-risk fee, which is subject to adjustment based on Bechtel's performance against cost and schedule targets. Each Vogtle Owner is severally (not jointly) liable for its proportionate share, based on its ownership interest, of all amounts owed to Bechtel under the Bechtel Agreement. The Vogtle Owners may terminate the Bechtel Agreement at any time for their convenience, provided that the Vogtle Owners will be required to pay amounts related to work performed prior to the termination (including the applicable portion of the base fee), certain termination-related costs, and, at certain stages of the work, the applicable portion of the at-risk fee. Bechtel may terminate the Bechtel Agreement under certain circumstances, including certain Vogtle Owner suspensions of work, certain breaches of the Bechtel Agreement by the Vogtle Owners, Vogtle Owner insolvency, and certain other events. Pursuant to the Loan Guarantee Agreement between Georgia Power and the DOE, Georgia Power is required to obtain the DOE's approval of the Bechtel Agreement prior to obtaining any further advances under the Loan Guarantee Agreement.

In December 2017, the Georgia PSC approved Georgia Power's seventeenth VCM report, which included a recommendation to continue construction of Plant Vogtle Units 3 and 4, with Southern Nuclear serving as project manager and Bechtel serving as the primary construction contractor.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Cost and Schedule

In preparation for its nineteenth VCM filing, Georgia Power requested Southern Nuclear to perform a full cost reforecast for the project. Georgia Power's approximate proportionate share of the remaining estimated capital cost to complete Plant Vogtle Units 3 and 4 by the expected in-service dates of November 2021 and November 2022, respectively, is as follows:

	<i>(in billions)</i>	
Base project capital cost forecast ^{(a)(b)}	\$	8.0
Construction contingency estimate		0.4
Total project capital cost forecast ^{(a)(b)}		8.4
Net investment as of June 30, 2018 ^(b)		(4.0)
Remaining estimate to complete ^(a)	\$	4.4

(a) Excludes financing costs expected to be capitalized through AFUDC of approximately \$350 million .

(b) Net of \$1.7 billion received from Toshiba in 2017 under the Guarantee Settlement Agreement and \$188 million in Customer Refunds recognized as a regulatory liability in 2017.

Georgia Power estimates that its financing costs for construction of Plant Vogtle Units 3 and 4 will total approximately \$3.2 billion , of which \$1.7 billion had been incurred through June 30, 2018 .

The \$0.7 billion increase to the base capital cost forecast reflected in the table above primarily results from changed assumptions related to the finalization of contract scopes and management responsibilities for Bechtel and over 60 subcontractors, labor productivity rates, and craft labor incentives, as well as the related levels of project management, oversight, and support, including field supervision and engineering support.

Although Georgia Power believes these incremental costs are reasonable and necessary to complete the project and the Georgia PSC's order in the seventeenth VCM proceeding specifically states that the construction of Plant Vogtle Units 3 and 4 is not subject to a cost cap, Georgia Power does not intend to seek rate recovery for these cost increases included in the current base capital cost forecast (or any related financing costs), which will be filed with the Georgia PSC in the nineteenth VCM report at the end of August 2018. In connection with future VCM filings, Georgia Power may request the Georgia PSC to evaluate costs currently included in the construction contingency estimate for rate recovery as and when they are appropriately included in the base capital cost forecast. After considering the significant level of uncertainty that exists regarding the future recoverability of costs included in the construction contingency estimate since the ultimate outcome of these matters is subject to the outcome of future assessments by management, as well as Georgia PSC decisions in these future regulatory proceedings, Georgia Power has recorded a total pre-tax charge to income of \$1.1 billion (\$0.8 billion after tax), which includes the total increase in the capital cost forecast and construction contingency estimate as of June 30, 2018 .

Subsequent to the EPC Contractor bankruptcy filing, a number of subcontractors to the EPC Contractor alleged non-payment by the EPC Contractor for amounts owed for work performed on Plant Vogtle Units 3 and 4. Georgia Power, acting for itself and as agent for the Vogtle Owners, has taken actions to remove liens filed by these subcontractors through the posting of surety bonds. Related to such liens, certain subcontractors have filed, and additional subcontractors may file, lawsuits against the EPC Contractor and the Vogtle Owners to preserve their payment rights with respect to such claims. All known amounts associated with the removal of subcontractor liens and other EPC Contractor pre-petition accounts payable have been paid or accrued as of June 30, 2018 . The ultimate liability is expected to be finalized in connection with the completion of the sale of Westinghouse.

As construction continues, challenges with management of contractors, subcontractors, and vendors; labor productivity, availability, and/or cost escalation; procurement, fabrication, delivery, assembly, and/or installation, including any required engineering changes, of plant systems, structures, and components (some of which are based on new technology that is just beginning initial operation in the global nuclear industry at this scale); or other issues could arise and change the projected schedule and estimated cost.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

There have been technical and procedural challenges to the construction and licensing of Plant Vogtle Units 3 and 4 at the federal and state level and additional challenges may arise. Processes are in place that are designed to assure compliance with the requirements specified in the Westinghouse Design Control Document and the combined construction and operating licenses, including inspections by Southern Nuclear and the NRC that occur throughout construction. As a result of such compliance processes, certain license amendment requests have been filed and approved or are pending before the NRC. Various design and other licensing-based compliance matters, including the timely resolution of Inspections, Tests, Analyses, and Acceptance Criteria and the related approvals by the NRC, may arise, which may result in additional license amendments or require other resolution. If any license amendment requests or other licensing-based compliance issues are not resolved in a timely manner, there may be delays in the project schedule that could result in increased costs.

The ultimate outcome of these matters cannot be determined at this time. However, any extension of the project schedule is currently estimated to result in additional base capital costs of approximately \$50 million per month, based on Georgia Power's ownership interests, and AFUDC of approximately \$12 million per month. While Georgia Power is not precluded from seeking recovery of any future capital cost forecast increase, management will ultimately determine whether or not to seek recovery. Any further changes to the capital cost forecast that are not expected to be recoverable through regulated rates will be required to be charged to income and such charges could be material.

Joint Owner Contracts

In November 2017, the Vogtle Owners entered into an amendment to their joint ownership agreements for Plant Vogtle Units 3 and 4 (as amended, Vogtle Joint Ownership Agreements) to provide for, among other conditions, additional Vogtle Owner approval requirements. Pursuant to the Vogtle Joint Ownership Agreements, the holders of at least 90% of the ownership interests in Plant Vogtle Units 3 and 4 must vote to continue construction if certain adverse events occur, including: (i) the bankruptcy of Toshiba; (ii) termination or rejection in bankruptcy of certain agreements, including the Vogtle Services Agreement or the Bechtel Agreement; (iii) the Georgia PSC or Georgia Power determines that any of Georgia Power's costs relating to the construction of Plant Vogtle Units 3 and 4 will not be recovered in retail rates because such costs are deemed unreasonable or imprudent; or (iv) an increase in the construction budget contained in the seventeenth VCM report of more than \$1 billion or extension of the project schedule contained in the seventeenth VCM report of more than one year. In addition, pursuant to the Vogtle Joint Ownership Agreements, the required approval of holders of ownership interests in Plant Vogtle Units 3 and 4 is at least (i) 90% for a change of the primary construction contractor and (ii) 67% for material amendments to the Vogtle Services Agreement or agreements with Southern Nuclear or the primary construction contractor, including the Bechtel Agreement. The Vogtle Joint Ownership Agreements also confirm that the Vogtle Owners' sole recourse against Georgia Power or Southern Nuclear for any action or inaction in connection with their performance as agent for the Vogtle Owners is limited to removal of Georgia Power and/or Southern Nuclear as agent, except in cases of willful misconduct.

As a result of the increase in the total project capital cost forecast and Georgia Power's decision not to seek rate recovery of the increase in the base capital costs as described in "Cost and Schedule" herein, the holders of at least 90% of the ownership interests in Plant Vogtle Units 3 and 4 must vote to continue construction. The Vogtle Owners are expected to conduct these votes in the third quarter 2018.

If the holders of at least 90% of the ownership interests in Plant Vogtle Units 3 and 4 do not vote to continue construction, the Vogtle Joint Ownership Agreements provide that the project will be cancelled, and construction will cease. In the event that fewer than 90% of the Vogtle Owners vote to continue construction, Georgia Power and the other Vogtle Owners will assess options for Plant Vogtle Units 3 and 4. If Plant Vogtle Units 3 and 4 were cancelled and Georgia Power was unable to recover costs it has incurred in connection with the project, Southern Company's results of operations, cash flow, and financial condition would be materially impacted. The ultimate outcome of this matter cannot be determined at this time.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Regulatory Matters

In 2009, the Georgia PSC voted to certify construction of Plant Vogtle Units 3 and 4 with a certified capital cost of \$4.418 billion . In addition, in 2009 the Georgia PSC approved inclusion of the Plant Vogtle Units 3 and 4 related CWIP accounts in rate base, and the State of Georgia enacted the Georgia Nuclear Energy Financing Act, which allows Georgia Power to recover financing costs for Plant Vogtle Units 3 and 4. Financing costs are recovered on all applicable certified costs through annual adjustments to the NCCR tariff up to the certified capital cost of \$4.418 billion . As of June 30, 2018 , Georgia Power had recovered approximately \$1.7 billion of financing costs. Financing costs related to capital costs above \$4.418 billion will be recovered through AFUDC; however, Georgia Power will not record AFUDC related to any capital costs in excess of the total deemed reasonable by the Georgia PSC (currently \$7.3 billion) and not requested for rate recovery.

Georgia Power is required to file semi-annual VCM reports with the Georgia PSC by February 28 and August 31 of each year. In 2013, in connection with the eighth VCM report, the Georgia PSC approved a stipulation between Georgia Power and the staff of the Georgia PSC to waive the requirement to amend the Plant Vogtle Units 3 and 4 certificate in accordance with the 2009 certification order until the completion of Plant Vogtle Unit 3, or earlier if deemed appropriate by the Georgia PSC and Georgia Power.

In 2016, the Georgia PSC voted to approve a settlement agreement (Vogtle Cost Settlement Agreement) resolving certain prudency matters in connection with the fifteenth VCM report. In December 2017, the Georgia PSC voted to approve (and issued its related order on January 11, 2018) certain recommendations made by Georgia Power in the seventeenth VCM report and modifying the Vogtle Cost Settlement Agreement. The Vogtle Cost Settlement Agreement, as modified by the January 11, 2018 order, resolved the following regulatory matters related to Plant Vogtle Units 3 and 4: (i) none of the \$3.3 billion of costs incurred through December 31, 2015 and reflected in the fourteenth VCM report should be disallowed from rate base on the basis of imprudence; (ii) the Contractor Settlement Agreement was reasonable and prudent and none of the amounts paid pursuant to the Contractor Settlement Agreement should be disallowed from rate base on the basis of imprudence; (iii) (a) capital costs incurred up to \$5.68 billion would be presumed to be reasonable and prudent with the burden of proof on any party challenging such costs, (b) Georgia Power would have the burden to show that any capital costs above \$5.68 billion were prudent, and (c) a revised capital cost forecast of \$7.3 billion (after reflecting the impact of payments received under the Guarantee Settlement Agreement and Customer Refunds) was found reasonable; (iv) construction of Plant Vogtle Units 3 and 4 should be completed, with Southern Nuclear serving as project manager and Bechtel as primary contractor; (v) approved and deemed reasonable Georgia Power's revised schedule placing Plant Vogtle Units 3 and 4 in service in November 2021 and November 2022, respectively; (vi) confirmed that the revised cost forecast does not represent a cost cap and that prudence decisions on cost recovery will be made at a later date, consistent with applicable Georgia law; (vii) reduced the ROE used to calculate the NCCR tariff (a) from 10.95% (the ROE rate setting point authorized by the Georgia PSC in the 2013 ARP) to 10.00% effective January 1, 2016, (b) from 10.00% to 8.30%, effective January 1, 2020, and (c) from 8.30% to 5.30%, effective January 1, 2021 (provided that the ROE in no case will be less than Georgia Power's average cost of long-term debt); (viii) reduced the ROE used for AFUDC equity for Plant Vogtle Units 3 and 4 from 10.00% to Georgia Power's average cost of long-term debt, effective January 1, 2018; and (ix) agreed that upon Unit 3 reaching commercial operation, retail base rates would be adjusted to include carrying costs on those capital costs deemed prudent in the Vogtle Cost Settlement Agreement. The January 11, 2018 order also stated that if Plant Vogtle Units 3 and 4 are not commercially operational by June 1, 2021 and June 1, 2022, respectively, the ROE used to calculate the NCCR tariff will be further reduced by 10 basis points each month (but not lower than Georgia Power's average cost of long-term debt) until the respective unit is commercially operational. The ROE reductions negatively impacted earnings by approximately \$25 million in 2017 and are estimated to have negative earnings impacts of approximately \$100 million in 2018 and an aggregate of \$585 million from 2019 to 2022.

In its January 11, 2018 order, the Georgia PSC also stated if other conditions change and assumptions upon which Georgia Power's seventeenth VCM report are based do not materialize, the Georgia PSC reserved the right to reconsider the decision to continue construction.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

On February 12, 2018, Georgia Interfaith Power & Light, Inc. and Partnership for Southern Equity, Inc. filed a petition appealing the Georgia PSC's January 11, 2018 order with the Fulton County Superior Court. On March 8, 2018, Georgia Watch filed a similar appeal to the Fulton County Superior Court for judicial review of the Georgia PSC's final decision and denial of Georgia Watch's motion for reconsideration. Georgia Power believes the two appeals have no merit; however, an adverse outcome in either appeal could have a material impact on Southern Company's results of operations, financial condition, and liquidity.

The Georgia PSC has approved seventeen VCM reports covering the periods through June 30, 2017, including total construction capital costs incurred through that date of \$4.4 billion. On August 21, 2018, the Georgia PSC is scheduled to vote on Georgia Power's eighteenth VCM report, which requested approval of \$448 million of construction capital costs (excluding the \$1.7 billion received from Toshiba under the Guarantee Settlement Agreement and the \$188 million in Customer Refunds recognized as a regulatory liability) incurred from July 1, 2017 through December 31, 2017.

On August 31, 2018, Georgia Power will file its nineteenth VCM report with the Georgia PSC, which will reflect the revised capital cost forecast discussed previously and request approval of \$578 million of construction capital costs incurred from January 1, 2018 through June 30, 2018.

The ultimate outcome of these matters cannot be determined at this time.

See RISK FACTORS of Southern Company in Item 1A herein and of the Form 10-K for a discussion of certain risks associated with the licensing, construction, and operation of nuclear generating units, including potential impacts that could result from a major incident at a nuclear facility anywhere in the world.

DOE Financing

As of June 30, 2018, Georgia Power had borrowed \$2.6 billion related to Plant Vogtle Units 3 and 4 costs through the Loan Guarantee Agreement and a multi-advance credit facility among Georgia Power, the DOE, and the FFB, which provides for borrowings of up to \$3.46 billion, subject to the satisfaction of certain conditions. In September 2017, the DOE issued a conditional commitment to Georgia Power for up to approximately \$1.67 billion in additional guaranteed loans under the Loan Guarantee Agreement. In June 2018, the DOE approved a request by Georgia Power to extend the conditional commitment to September 30, 2018. Any further extension must be approved by the DOE. Final approval and issuance of these additional loan guarantees by the DOE cannot be assured and are subject to the negotiation of definitive agreements, completion of due diligence by the DOE, receipt of any necessary regulatory approvals, and satisfaction of other conditions, including the Vogtle Owners' votes to continue construction. See Note 6 to the financial statements of Southern Company under "DOE Loan Guarantee Borrowings" in Item 8 of the Form 10-K and Note (F) to the Condensed Financial Statements under "DOE Loan Guarantee Borrowings" herein for additional information, including applicable covenants, events of default, mandatory prepayment events (including any decision not to continue construction of Plant Vogtle Units 3 and 4), and conditions to borrowing.

The ultimate outcome of these matters cannot be determined at this time.

Income Tax Matters

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Income Tax Matters" of Southern Company in Item 7 of the Form 10-K and FINANCIAL CONDITION AND LIQUIDITY – "Credit Rating Risk," Note (B) to the Condensed Financial Statements under "Regulatory Matters," and Note (H) to the Condensed Financial Statements herein for information regarding the Tax Reform Legislation and related regulatory actions.

Southern Power

In March 2018, Southern Power substantially completed a legal entity reorganization of various direct and indirect subsidiaries that own and operate substantially all of its solar facilities, including certain subsidiaries owned in partnership with various third parties. The reorganization resulted in net state tax benefits related to certain changes

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

in apportionment rates totaling approximately \$50 million, which were recorded in the first quarter 2018. In April 2018, Southern Power completed the final stage of the reorganization resulting in additional net state tax benefits of approximately \$4 million.

Southern Power is pursuing the sale of a noncontrolling interest in a portfolio of eight operating wind facilities through the use of third-party tax equity, which, if successful, is expected to close in the fourth quarter 2018. In the third quarter 2018, various direct and indirect subsidiaries of Southern Power that own and operate these wind facilities are expected to be reorganized under a new holding company in which the tax equity partner would invest. The reorganization is expected to result in estimated net state tax benefits totaling approximately \$10 million related to certain changes in apportionment rates. The ultimate outcome of this matter cannot be determined at this time.

Other Matters

Southern Company and its subsidiaries are involved in various other matters being litigated and regulatory matters that could affect future earnings. In addition, Southern Company and its subsidiaries are subject to certain claims and legal actions arising in the ordinary course of business. The business activities of Southern Company's subsidiaries are subject to extensive governmental regulation related to public health and the environment, such as laws and regulations governing air, water, land, and protection of natural resources. Litigation over environmental issues and claims of various types, including property damage, personal injury, common law nuisance, and citizen enforcement of environmental laws and regulations has occurred throughout the U.S. This litigation has included claims for damages alleged to have been caused by CO₂ and other emissions, CCR, and alleged exposure to hazardous materials, and/or requests for injunctive relief in connection with such matters.

The ultimate outcome of such pending or potential litigation or regulatory matters cannot be predicted at this time; however, for current proceedings not specifically reported in Note (B) to the Condensed Financial Statements herein, management does not anticipate that the ultimate liabilities, if any, arising from such current proceedings would have a material effect on Southern Company's financial statements. See Note (B) to the Condensed Financial Statements herein for a discussion of various other contingencies, regulatory matters, and other matters being litigated which may affect future earnings potential.

Litigation

In 2016, a complaint against Mississippi Power was filed in Harrison County Circuit Court (Circuit Court) by Biloxi Freezing & Processing Inc., Gulfside Casino Partnership, and John Carlton Dean, which was amended and refiled to include, among other things, Southern Company as a defendant. The individual plaintiff alleged that Mississippi Power and Southern Company violated the Mississippi Unfair Trade Practices Act. All plaintiffs alleged that Mississippi Power and Southern Company concealed, falsely represented, and failed to fully disclose important facts concerning the cost and schedule of the Kemper County energy facility and that these alleged breaches unjustly enriched Mississippi Power and Southern Company. The plaintiffs sought unspecified actual damages and punitive damages; asked the Circuit Court to appoint a receiver to oversee, operate, manage, and otherwise control all affairs relating to the Kemper County energy facility; asked the Circuit Court to revoke any licenses or certificates authorizing Mississippi Power or Southern Company to engage in any business related to the Kemper County energy facility in Mississippi; and sought attorney's fees, costs, and interest. The plaintiffs also sought an injunction to prevent any Kemper County energy facility costs from being charged to customers through electric rates. In June 2017, the Circuit Court ruled in favor of motions by Southern Company and Mississippi Power and dismissed the case. In July 2017, the plaintiffs filed notice of an appeal. On July 13, 2018, Mississippi Power and Southern Company reached a settlement agreement with the plaintiffs and the plaintiffs' appeal was dismissed with prejudice. The settlement had no material impact on Southern Company's financial statements.

In January 2017, a putative securities class action complaint was filed against Southern Company, certain of its officers, and certain former Mississippi Power officers in the U.S. District Court for the Northern District of Georgia, Atlanta Division, by Monroe County Employees' Retirement System on behalf of all persons who purchased shares of Southern Company's common stock between April 25, 2012 and October 29, 2013. The complaint alleges that Southern Company, certain of its officers, and certain former Mississippi Power officers

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

made materially false and misleading statements regarding the Kemper County energy facility in violation of certain provisions under the Securities Exchange Act of 1934, as amended. The complaint seeks, among other things, compensatory damages and litigation costs and attorneys' fees. In June 2017, the plaintiffs filed an amended complaint that provided additional detail about their claims, increased the purported class period by one day, and added certain other former Mississippi Power officers as defendants. In July 2017, the defendants filed a motion to dismiss the plaintiffs' amended complaint with prejudice, to which the plaintiffs filed an opposition in September 2017. On March 29, 2018, the U.S. District Court for the Northern District of Georgia, Atlanta Division, issued an order granting, in part, the defendants' motion to dismiss. The court dismissed certain claims against certain officers of Southern Company and Mississippi Power and dismissed the allegations related to a number of the statements that plaintiffs challenged as being false or misleading. On April 26, 2018, the defendants filed a motion for reconsideration of the court's order, seeking dismissal of the remaining claims in the lawsuit.

In February 2017, Jean Vineyard filed a shareholder derivative lawsuit and, in May 2017, Judy Mesirov filed a shareholder derivative lawsuit, each in the U.S. District Court for the Northern District of Georgia. Each of these lawsuits names as defendants Southern Company, certain of its directors, certain of its officers, and certain former Mississippi Power officers. In August 2017, these two shareholder derivative lawsuits were consolidated in the U.S. District Court for the Northern District of Georgia. The complaints allege that the defendants caused Southern Company to make false or misleading statements regarding the Kemper County energy facility cost and schedule. Further, the complaints allege that the defendants were unjustly enriched and caused the waste of corporate assets and also allege that the individual defendants violated their fiduciary duties. Each plaintiff seeks to recover, on behalf of Southern Company, unspecified actual damages and, on each plaintiff's own behalf, attorneys' fees and costs in bringing the lawsuit. Each plaintiff also seeks certain changes to Southern Company's corporate governance and internal processes. On April 25, 2018, the court entered an order staying this lawsuit until 30 days after the resolution of any dispositive motions or any settlement, whichever is earlier, in the putative securities class action.

In May 2017, Helen E. Piper Survivor's Trust filed a shareholder derivative lawsuit in the Superior Court of Gwinnett County, State of Georgia that names as defendants Southern Company, certain of its directors, certain of its officers, and certain former Mississippi Power officers. The complaint alleges that the individual defendants, among other things, breached their fiduciary duties in connection with schedule delays and cost overruns associated with the construction of the Kemper County energy facility. The complaint further alleges that the individual defendants authorized or failed to correct false and misleading statements regarding the Kemper County energy facility schedule and cost and failed to implement necessary internal controls to prevent harm to Southern Company. The plaintiff seeks to recover, on behalf of Southern Company, unspecified actual damages and disgorgement of profits and, on its behalf, attorneys' fees and costs in bringing the lawsuit. The plaintiff also seeks certain unspecified changes to Southern Company's corporate governance and internal processes. The court entered an order staying this lawsuit until 30 days after the resolution of any dispositive motions or any settlement, whichever is earlier, in the putative securities class action.

On May 18, 2018, Southern Company and Mississippi Power received a notice of dispute and arbitration demand filed by Martin Product Sales, LLC (Martin) based on two agreements, both related to Kemper IGCC byproducts for which Mississippi Power provided termination notices in September 2017. Martin alleges breach of contract, breach of good faith and fair dealing, fraud and misrepresentation, and civil conspiracy and makes a claim for damages in the amount of approximately \$143 million, as well as additional unspecified damages, attorney's fees, costs, and interest.

Southern Company believes these legal challenges have no merit; however, an adverse outcome in any of these proceedings could have an impact on Southern Company's results of operations, financial condition, and liquidity. Southern Company will vigorously defend itself in these matters, the ultimate outcome of which cannot be determined at this time.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Investments in Leveraged Leases

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Other Matters – Investments in Leveraged Leases" of Southern Company in Item 7 and Note 1 to the financial statements of Southern Company under "Leveraged Leases" in Item 8 of the Form 10-K for additional information regarding a Southern Company Holdings Inc. (Southern Holdings) subsidiary's leveraged lease agreements and concerns about the financial and operational performance of one of the lessees and the associated generation assets.

The ability of the lessees to make required payments to the Southern Holdings subsidiary is dependent on the operational performance of the assets. As a result of operational improvements in the first half of 2018, the June 2018 lease payment was paid in full and the December 2018 lease payment is currently expected to be paid in full. However, operational issues and the resulting cash liquidity challenges persist and significant concerns continue regarding the lessee's ability to make the remaining semi-annual lease payments. These operational challenges may also impact the expected residual value of the assets at the end of the lease term in 2047. If any future lease payment is not paid in full, the Southern Holdings subsidiary may be unable to make its corresponding payment to the holders of the underlying non-recourse debt related to the generation assets. Failure to make the required payment to the debtholders would represent an event of default that would give the debtholders the right to foreclose on, and take ownership of, the generation assets from the Southern Holdings subsidiary, in effect terminating the lease and resulting in the write-off of the related lease receivable, which would result in a reduction in net income of approximately \$86 million after tax based on the lease receivable balance as of June 30, 2018. Southern Company has evaluated the recoverability of the lease receivable and the expected residual value of the generation assets at the end of the lease under various scenarios and has concluded that its investment in the leveraged lease is not impaired as of June 30, 2018. Southern Company will continue to monitor the operational performance of the underlying assets and evaluate the ability of the lessee to continue to make the required lease payments. The ultimate outcome of this matter cannot be determined at this time.

ACCOUNTING POLICIES

Application of Critical Accounting Policies and Estimates

Southern Company prepares its consolidated financial statements in accordance with GAAP. Significant accounting policies are described in Note 1 to the financial statements of Southern Company in Item 8 of the Form 10-K. In the application of these policies, certain estimates are made that may have a material impact on Southern Company's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. See MANAGEMENT'S DISCUSSION AND ANALYSIS – ACCOUNTING POLICIES – "Application of Critical Accounting Policies and Estimates" of Southern Company in Item 7 of the Form 10-K for a complete discussion of Southern Company's critical accounting policies and estimates.

Estimated Cost, Schedule, and Rate Recovery for the Construction of Plant Vogtle Units 3 and 4

In December 2016, the Georgia PSC approved the Vogtle Cost Settlement Agreement, which resolved certain prudence matters in connection with Georgia Power's fifteenth VCM report. In December 2017, the Georgia PSC approved Georgia Power's seventeenth VCM report, which included a recommendation to continue construction of Plant Vogtle Units 3 and 4, with Southern Nuclear serving as project manager and Bechtel serving as the primary construction contractor, as well as a modification of the Vogtle Cost Settlement Agreement. The Georgia PSC's related order stated that under the modified Vogtle Cost Settlement Agreement, (i) none of the \$3.3 billion of costs incurred through December 31, 2015 should be disallowed as imprudent; (ii) capital costs incurred up to \$5.68 billion would be presumed to be reasonable and prudent with the burden of proof on any party challenging such costs; (iii) Georgia Power would have the burden of proof to show that any capital costs above \$5.68 billion were prudent; (iv) Georgia Power's total project capital cost forecast of \$7.3 billion (net of \$1.7 billion received under the Guarantee Settlement Agreement and \$188 million in Customer Refunds recognized as a regulatory liability in 2017) was found reasonable and did not represent a cost cap; and (v) prudence decisions would be made subsequent to achieving fuel load for Unit 4.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In its order, the Georgia PSC also stated if other conditions change and assumptions upon which Georgia Power's seventeenth VCM report are based do not materialize, the Georgia PSC reserved the right to reconsider the decision to continue construction.

In the second quarter 2018, Georgia Power revised its base cost forecast and estimated contingency to complete construction and start-up of Plant Vogtle Units 3 and 4 to \$8.0 billion and \$0.4 billion, respectively, for a total project capital cost forecast of \$8.4 billion (net of \$1.7 billion received under the Guarantee Settlement Agreement and \$188 million in Customer Refunds recognized as a regulatory liability in 2017). Although Georgia Power believes these incremental costs are reasonable and necessary to complete the project and the Georgia PSC has stated the \$7.3 billion estimate included in the seventeenth VCM proceeding does not represent a cost cap, Georgia Power does not intend to seek rate recovery for the \$0.7 billion increase in costs included in the revised base capital cost forecast, which will be filed with the Georgia PSC in the nineteenth VCM report on August 31, 2018. In connection with future VCM filings, Georgia Power may request the Georgia PSC to evaluate costs included in the revised construction contingency estimate for rate recovery as and when they are appropriately included in the base capital cost forecast. After considering the significant level of uncertainty that exists regarding the future recoverability of costs included in the construction contingency estimate since the ultimate outcome of these matters is subject to the outcome of future assessments by management, as well as Georgia PSC decisions in these future regulatory proceedings, Georgia Power has recorded a total pre-tax charge to income of \$1.1 billion (\$0.8 billion after tax) as of June 30, 2018.

Georgia Power's revised cost estimate reflects an expected in-service date of November 2021 for Unit 3 and November 2022 for Unit 4.

As construction continues, challenges with management of contractors, subcontractors, and vendors; labor productivity, availability, and/or cost escalation; procurement, fabrication, delivery, assembly, and/or installation, including any required engineering changes, of plant systems, structures, and components (some of which are based on new technology that is just beginning initial operation in the global nuclear industry at this scale); or other issues could arise and change the projected schedule and estimated cost.

There have been technical and procedural challenges to the construction and licensing of Plant Vogtle Units 3 and 4 at the federal and state level and additional challenges may arise. Processes are in place that are designed to assure compliance with the requirements specified in the Westinghouse Design Control Document and the combined construction and operating licenses, including inspections by Southern Nuclear and the NRC that occur throughout construction. As a result of such compliance processes, certain license amendment requests have been filed and approved or are pending before the NRC. Various design and other licensing-based compliance matters, including the timely resolution of Inspections, Tests, Analyses, and Acceptance Criteria and the related approvals by the NRC, may arise, which may result in additional license amendments or require other resolution. If any license amendment requests or other licensing-based compliance issues are not resolved in a timely manner, there may be delays in the project schedule that could result in increased costs.

The ultimate outcome of these matters cannot be determined at this time. Any extension of the in-service dates of November 2021 for Unit 3 and November 2022 for Unit 4 is currently estimated to result in additional base capital costs of approximately \$50 million per month, based on Georgia Power's ownership interests, and AFUDC of approximately \$12 million per month. While Georgia Power is not precluded from seeking recovery of any future capital cost forecast increase, management will ultimately determine whether or not to seek recovery. Any further changes to the capital cost forecast that are not expected to be recoverable through regulated rates will be required to be charged to income and such charges could be material.

Given the significant complexity involved in estimating the future costs to complete construction and start-up of Plant Vogtle Units 3 and 4 and the significant management judgment necessary to assess the related uncertainties surrounding future rate recovery of any projected cost increases, as well as the potential impact on Southern Company's results of operations and cash flows, Southern Company considers these items to be critical accounting estimates. See Note 3 to the financial statements of Southern Company under "Nuclear Construction" in Item 8 of

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

the Form 10-K and Note (B) to the Condensed Financial Statements under "Nuclear Construction" herein for additional information.

Recently Issued Accounting Standards

See MANAGEMENT'S DISCUSSION AND ANALYSIS – ACCOUNTING POLICIES – "Recently Issued Accounting Standards" of Southern Company in Item 7 of the Form 10-K for additional information regarding ASU No. 2016-02, *Leases (Topic 842)* . See Note (A) to the Condensed Financial Statements herein for information regarding Southern Company's recently adopted accounting standards.

FINANCIAL CONDITION AND LIQUIDITY

Overview

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Overview" of Southern Company in Item 7 of the Form 10-K for additional information. Southern Company's financial condition remained stable at June 30, 2018 . Southern Company intends to continue to monitor its access to short-term and long-term capital markets as well as bank credit agreements to meet future capital and liquidity needs. See " Capital Requirements and Contractual Obligations ," " Sources of Capital ," and " Financing Activities " herein for additional information.

Net cash provided from operating activities totaled \$3.3 billion for the first six months of 2018 , an increase of \$0.5 billion from the corresponding period in 2017 . The increase in net cash provided from operating activities was primarily due to an increase in fuel cost recovery and an increase in other current liabilities, primarily due to the timing of customer billing reductions related to the Tax Reform Legislation. Net cash used for investing activities totaled \$3.6 billion for the first six months of 2018 primarily due to the traditional electric operating companies' installation of equipment to comply with environmental standards and construction of electric generation, transmission, and distribution facilities and capital expenditures for Southern Company Gas' infrastructure replacement programs. Net cash provided from financing activities totaled \$0.2 billion for the first six months of 2018 primarily due to an increase in commercial paper borrowings and proceeds from Southern Power's sale of a 33% equity interest in a limited partnership indirectly owning substantially all of its solar facilities, partially offset by common stock dividend payments and net redemptions and repurchases of long-term and short-term debt. Cash flows from financing activities vary from period to period based on capital needs and the maturity or redemption of securities.

Significant balance sheet changes for the first six months of 2018 include the reclassification of \$7.3 billion and \$3.5 billion in total assets and liabilities held for sale, respectively, associated with Gulf Power, Elizabethtown Gas, Elkton Gas, and Florida City Gas as described in Note (J) to the Condensed Financial Statements herein under " Assets Held for Sale ;" an increase of \$2.8 billion in total property, plant, and equipment primarily related to the traditional electric operating companies' installation of equipment to comply with environmental standards and construction of electric generation, transmission, and distribution facilities, as well as an increase in AROs at Alabama Power, partially offset by the charge related to the construction of Plant Vogtle Units 3 and 4; an increase of \$2.5 billion in notes payable primarily related to increased commercial paper borrowings and issuances of short-term bank debt; a decrease of \$2.3 billion in long-term debt (including amounts due within one year) resulting from the repayment of long-term debt; an increase of \$1.7 billion in noncontrolling interests primarily related to Southern Power's sale of a 33% equity interest in a limited partnership indirectly owning substantially all of its solar facilities; and an increase of \$1.5 billion in ARO liabilities primarily related to revised estimates for ash pond closure costs at Alabama Power to comply with the CCR Rule. See Notes (A), (B), (F), and (J) to the Condensed Financial Statements under " Asset Retirement Obligations ," " Nuclear Construction ," " Financing Activities ," and "Southern Power – Sale of Solar Facility Interests ," respectively, herein for additional information.

At the end of the second quarter 2018 , the market price of Southern Company's common stock was \$46.31 per share (based on the closing price as reported on the New York Stock Exchange) and the book value was \$23.31 per share, representing a market-to-book ratio of 199% , compared to \$48.09, \$23.99, and 201%, respectively, at the end of

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

2017. Southern Company's common stock dividend for the second quarter 2018 was \$0.60 per share compared to \$0.58 per share in the second quarter 2017.

Capital Requirements and Contractual Obligations

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Capital Requirements and Contractual Obligations" of Southern Company in Item 7 of the Form 10-K for a description of Southern Company's capital requirements and contractual obligations. Approximately \$2.2 billion will be required through June 30, 2019 to fund maturities of long-term debt. See "Sources of Capital" herein for additional information.

The Southern Company system's construction program is currently estimated to total approximately \$8.8 billion for 2018, \$8.2 billion for 2019, \$7.2 billion for 2020, \$7.0 billion for 2021, and \$6.7 billion for 2022. These amounts include expenditures of approximately \$1.4 billion, \$1.4 billion, \$0.9 billion, \$1.0 billion, and \$0.6 billion for the construction of Plant Vogtle Units 3 and 4 in 2018, 2019, 2020, 2021, and 2022, respectively, and an average of approximately \$0.5 billion per year for 2018 through 2022 for Southern Power's planned expenditures for plant acquisitions and placeholder growth, as revised subsequent to Tax Reform Legislation. These amounts also include capital expenditures related to contractual purchase commitments for nuclear fuel, capital expenditures covered under LTSAs, and costs, which are immaterial to Southern Company, relating to assets divested during 2018 and held for sale at June 30, 2018. Estimated capital expenditures to comply with environmental laws and regulations included in these amounts are \$1.1 billion, \$0.3 billion, \$0.4 billion, \$0.5 billion, and \$0.5 billion for 2018, 2019, 2020, 2021, and 2022, respectively. These estimated expenditures do not include any potential compliance costs associated with the regulation of CO₂ emissions from fossil fuel-fired electric generating units.

The traditional electric operating companies also anticipate costs associated with closure and monitoring of ash ponds in accordance with the CCR Rule, which are reflected in Southern Company's ARO liabilities. These costs, which are expected to change as the Southern Company system continues to refine its assumptions underlying the cost estimates and evaluate the method and timing of compliance activities, are currently estimated to be approximately \$0.3 billion, \$0.4 billion, \$0.5 billion, \$0.6 billion, and \$0.5 billion for 2018, 2019, 2020, 2021, and 2022, respectively. For information regarding expected changes to these cost estimates during the second half of 2018, see FUTURE EARNINGS POTENTIAL – "Environmental Matters – Environmental Laws and Regulations – Coal Combustion Residuals" and Note (A) to the Condensed Financial Statements under "Asset Retirement Obligations" herein. Also see Note 1 to the financial statements of Southern Company under "Asset Retirement Obligations and Other Costs of Removal" in Item 8 of the Form 10-K for additional information on AROs.

The construction programs are subject to periodic review and revision, and actual construction costs may vary from these estimates because of numerous factors. These factors include: changes in business conditions; changes in load projections; changes in environmental laws and regulations; the outcome of any legal challenges to environmental rules; changes in electric generating plants, including unit retirements and replacements and adding or changing fuel sources at existing electric generating units, to meet regulatory requirements; changes in FERC rules and regulations; state regulatory agency approvals; changes in the expected environmental compliance program; changes in legislation; the cost and efficiency of construction labor, equipment, and materials; project scope and design changes; storm impacts; and the cost of capital. In addition, there can be no assurance that costs related to capital expenditures will be fully recovered. Additionally, planned expenditures for plant acquisitions may vary due to market opportunities and Southern Power's ability to execute its growth strategy. See Note 12 to the financial statements of Southern Company under "Southern Power" in Item 8 of the Form 10-K and Note (J) to the Condensed Financial Statements under "Southern Power" herein for additional information regarding Southern Power's plant acquisitions.

The construction program also includes Plant Vogtle Units 3 and 4, which includes components based on new technology that is just beginning initial operation in the global nuclear industry at scale and which may be subject to additional revised cost estimates during construction. The ability to control costs and avoid cost and schedule overruns during the development, construction, and operation of new facilities is subject to a number of factors, including, but not limited to, changes in labor costs, availability, and productivity, challenges with management of

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

contractors, subcontractors, or vendors, adverse weather conditions, shortages and inconsistent quality of equipment, materials, and labor, contractor or supplier delay, non-performance under construction, operating, or other agreements, operational readiness, including specialized operator training and required site safety programs, unforeseen engineering or design problems, start-up activities (including major equipment failure and system integration), and/or operational performance. See Note 3 to the financial statements of Southern Company under "Nuclear Construction" in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements under " Nuclear Construction " herein for information regarding Plant Vogtle Units 3 and 4 and additional factors that may impact construction expenditures.

Sources of Capital

Southern Company intends to meet its future capital needs through operating cash flows, borrowings from financial institutions, and debt and equity issuances in the capital markets. Southern Company also plans to utilize the proceeds from the disposition of Gulf Power when completed for future capital needs. Equity capital can be provided from any combination of Southern Company's stock plans, private placements, or public offerings. The amount and timing of additional equity and debt issuances in 2018 , as well as in subsequent years, will be contingent on Southern Company's investment opportunities and the Southern Company system's capital requirements and will depend upon prevailing market conditions and other factors. See " Capital Requirements and Contractual Obligations " herein for additional information.

Except as described herein, the traditional electric operating companies, Southern Power, and Southern Company Gas plan to obtain the funds required for construction and other purposes from operating cash flows, external security issuances, borrowings from financial institutions, and equity contributions or loans from Southern Company. Southern Power also plans to utilize tax equity partnership contributions. Southern Company Gas also plans to utilize the proceeds from the dispositions of Elizabethtown Gas, Elkton Gas, Florida City Gas, and Pivotal Home Solutions for future capital needs. However, the amount, type, and timing of any future financings, if needed, will depend upon prevailing market conditions, regulatory approval, and other factors. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Sources of Capital" of Southern Company in Item 7 of the Form 10-K for additional information.

In addition, in 2014, Georgia Power entered into the Loan Guarantee Agreement with the DOE, under which the proceeds of borrowings may be used to reimburse Georgia Power for Eligible Project Costs incurred in connection with its construction of Plant Vogtle Units 3 and 4. Under the Loan Guarantee Agreement, the DOE agreed to guarantee borrowings of up to \$3.46 billion (not to exceed 70% of Eligible Project Costs) to be made by Georgia Power under a multi-advance credit facility (FFB Credit Facility) among Georgia Power, the DOE, and the FFB. As of June 30, 2018 , Georgia Power had borrowed \$2.6 billion under the FFB Credit Facility. In July 2017, Georgia Power entered into an amendment to the Loan Guarantee Agreement, which provides that further advances are conditioned upon the DOE's approval of any agreements entered into in replacement of the Vogtle 3 and 4 Agreement and satisfaction of certain other conditions.

In September 2017, the DOE issued a conditional commitment to Georgia Power for up to approximately \$1.67 billion of additional guaranteed loans under the Loan Guarantee Agreement. This conditional commitment expires on September 30, 2018 , subject to any further extension approved by the DOE. Final approval and issuance of these additional loan guarantees by the DOE cannot be assured and are subject to the negotiation of definitive agreements, completion of due diligence by the DOE, receipt of any necessary regulatory approvals, and satisfaction of other conditions, including the Vogtle Owners' votes to continue construction. See Note 6 to the financial statements of Southern Company under "DOE Loan Guarantee Borrowings" in Item 8 of the Form 10-K and Note (F) to the Condensed Financial Statements under " DOE Loan Guarantee Borrowings " herein for additional information regarding the Loan Guarantee Agreement, including applicable covenants, events of default, mandatory prepayment events (including any decision not to continue construction of Plant Vogtle Units 3 and 4), and additional conditions to borrowing. Also see Note (B) to the Condensed Financial Statements under " Nuclear Construction " herein for additional information regarding Plant Vogtle Units 3 and 4.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Gas, and Nicor Gas were in compliance with all such covenants. All but \$40 million of the bank credit arrangements do not contain material adverse change clauses at the time of borrowings.

Subject to applicable market conditions, Southern Company and its subsidiaries expect to renew or replace their bank credit arrangements as needed, prior to expiration. In connection therewith, Southern Company and its subsidiaries may extend the maturity dates and/or increase or decrease the lending commitments thereunder.

A portion of the unused credit with banks is allocated to provide liquidity support to the revenue bonds of the traditional electric operating companies and the commercial paper programs of Southern Company, the traditional electric operating companies, Southern Power Company, Southern Company Gas, and Nicor Gas. The amount of variable rate revenue bonds of the traditional electric operating companies outstanding requiring liquidity support as of June 30, 2018 was approximately \$1.5 billion. In addition, at June 30, 2018, the traditional electric operating companies had approximately \$482 million of revenue bonds outstanding that were required to be remarketed within the next 12 months. Subsequent to June 30, 2018, approximately \$43 million of these pollution control revenue bonds of Mississippi Power were purchased and held by Mississippi Power.

Southern Company, the traditional electric operating companies (other than Mississippi Power), Southern Power Company, Southern Company Gas, and Nicor Gas make short-term borrowings primarily through commercial paper programs that have the liquidity support of the committed bank credit arrangements described above. Short-term borrowings are included in notes payable in the balance sheets.

Details of short-term borrowings were as follows:

	Short-term Debt at June 30, 2018		Short-term Debt During the Period ^(*)		
	Amount Outstanding	Weighted Average Interest Rate	Average Amount Outstanding	Weighted Average Interest Rate	Maximum Amount Outstanding
	<i>(in millions)</i>		<i>(in millions)</i>		<i>(in millions)</i>
Commercial paper	\$ 3,002	2.5%	\$ 2,292	2.4%	\$ 3,042
Short-term bank debt	1,979	3.0%	1,987	2.8%	2,254
Total	\$ 4,981	2.7%	\$ 4,279	2.6%	

(*) Average and maximum amounts are based upon daily balances during the three-month period ended June 30, 2018.

Southern Company believes the need for working capital can be adequately met by utilizing commercial paper programs, lines of credit, bank term loans, and operating cash flows.

Credit Rating Risk

At June 30, 2018, Southern Company and its subsidiaries did not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade.

There are certain contracts that could require collateral, but not accelerated payment, in the event of a credit rating change of certain subsidiaries to BBB and/or Baa2 or below. These contracts are for physical electricity and natural gas purchases and sales, fuel purchases, fuel transportation and storage, energy price risk management, transmission, interest rate management, and construction of new generation at Plant Vogtle Units 3 and 4.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The maximum potential collateral requirements under these contracts at June 30, 2018 were as follows:

Credit Ratings	Maximum Potential Collateral Requirements	
	<i>(in millions)</i>	
At BBB and/or Baa2	\$	38
At BBB- and/or Baa3	\$	576
At BB+ and/or Ba1 (*)	\$	2,141

(*) Any additional credit rating downgrades at or below BB- and/or Ba3 could increase collateral requirements up to an additional \$38 million.

Generally, collateral may be provided by a Southern Company guaranty, letter of credit, or cash. Additionally, a credit rating downgrade could impact the ability of Southern Company and its subsidiaries to access capital markets, and would be likely to impact the cost at which they do so.

On February 26, 2018, Moody's revised its rating outlook for Mississippi Power from stable to positive.

On February 28, 2018, Fitch downgraded the senior unsecured long-term debt rating of Southern Company to BBB+ from A- with a stable outlook and of Georgia Power to A from A+ with a negative outlook.

On March 14, 2018, S&P upgraded the senior unsecured long-term debt rating of Mississippi Power to A- from BBB+. The outlook remained negative.

On May 21, 2018, S&P revised its rating outlook for Gulf Power from negative to stable.

As a result of the Tax Reform Legislation, certain financial metrics, such as the funds from operations to debt percentage, used by the credit rating agencies to assess Southern Company and its subsidiaries may be negatively impacted. Southern Company and certain of its subsidiaries are taking actions to mitigate the resulting impacts, which, among other alternatives, include adjusting capital structure. Absent actions by Southern Company and its subsidiaries that fully mitigate the impacts, the credit ratings of Southern Company and certain of its subsidiaries could be negatively affected. See Note 3 to the financial statements of Southern Company in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements herein for additional information related to state PSC or other regulatory agency actions related to the Tax Reform Legislation, including recent approvals of capital structure adjustments for Alabama Power, Georgia Power, Gulf Power, and Atlanta Gas Light by their respective state PSCs, which are expected to help mitigate the potential adverse impacts to certain of their credit metrics.

Financing Activities

During the first six months of 2018, Southern Company issued approximately 6.6 million shares of common stock primarily through employee equity compensation plans and received proceeds of approximately \$222 million.

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following table outlines the long-term debt financing activities for Southern Company and its subsidiaries for the first six months of 2018 :

Company	Senior Note Issuances	Senior Note Maturities, Redemptions, and Repurchases	Revenue Bond Maturities, Redemptions, and Repurchases	Other Long-Term Debt Redemptions and Maturities ^(*)
	<i>(in millions)</i>			
Alabama Power	\$ 500	\$ —	\$ —	\$ —
Georgia Power	—	1,000	398	104
Mississippi Power	600	—	—	900
Southern Power	—	350	—	420
Southern Company Gas	—	—	200	—
Other	—	—	—	7
Southern Company Consolidated	\$ 1,100	\$ 1,350	\$ 598	\$ 1,431

(*) Includes reductions in capital lease obligations resulting from cash payments under capital leases.

Except as otherwise described herein, Southern Company and its subsidiaries used the proceeds of debt issuances for their redemptions and maturities shown in the table above, to repay short-term indebtedness, and for general corporate purposes, including working capital, and for the subsidiaries, their construction programs.

In March 2018, Southern Company entered into a \$900 million short-term floating rate bank loan bearing interest based on one-month LIBOR.

In April 2018, Southern Company borrowed \$250 million pursuant to a short-term uncommitted bank credit arrangement, which bears interest at a rate agreed upon by Southern Company and the bank from time to time and is payable on no less than 30 days' demand by the bank.

In June 2018, Southern Company repaid at maturity two \$100 million short-term floating rate bank term loans.

In January 2018, Georgia Power repaid its outstanding \$150 million short-term floating rate bank loan due May 31, 2018.

In May 2018, through cash tender offers, Georgia Power repurchased and retired \$89 million of the \$250 million aggregate principal amount outstanding of its Series 2007A 5.65% Senior Notes due March 1, 2037, \$326 million of the \$500 million aggregate principal amount outstanding of its Series 2009A 5.95% Senior Notes due February 1, 2039, and \$335 million of the \$600 million aggregate principal amount outstanding of its Series 2010B 5.40% Senior Notes due June 1, 2040, for an aggregate purchase price, excluding accrued and unpaid interest, of \$902 million.

In March 2018, Mississippi Power entered into a \$300 million short-term floating rate bank loan bearing interest based on one-month LIBOR, of which \$200 million was repaid in the second quarter 2018 and \$50 million was repaid on July 31, 2018. The proceeds of this loan, together with the proceeds of Mississippi Power's \$600 million senior notes issuances, were used to repay Mississippi Power's \$900 million unsecured floating rate term loan.

Subsequent to June 30, 2018, approximately \$43 million in pollution control revenue bonds of Mississippi Power were purchased and held by Mississippi Power. These bonds may be remarketed to the public in the future.

In May 2018, Southern Power entered into two short-term floating rate bank loans, each for an aggregate principal amount of \$100 million, which bear interest based on one-month LIBOR.

In the second quarter 2018, Pivotal Utility Holdings caused \$200 million aggregate principal amount of gas facility revenue bonds to be redeemed. Also in the second quarter 2018, Pivotal Utility Holdings, as borrower, and Southern Company Gas, as guarantor, entered into a \$181 million short-term delayed draw floating rate bank term loan

SOUTHERN COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

bearing interest based on one-month LIBOR, which Pivotal Utility Holdings used to repay the gas facility revenue bonds. Subsequent to June 30, 2018, Pivotal Utility Holdings repaid this short-term loan.

In May 2018, Southern Company Gas Capital borrowed \$95 million pursuant to a short-term uncommitted bank credit arrangement, guaranteed by Southern Company Gas, bearing interest at a rate agreed upon by Southern Company Gas Capital and the bank from time to time and payable on no less than 30 days' demand by the bank. The proceeds of the loan were used to pay down short-term debt. Subsequent to June 30, 2018, Southern Company Gas Capital repaid this loan.

Subsequent to June 30, 2018, Nicor Gas agreed to issue \$300 million aggregate principal amount of first mortgage bonds in a private placement, \$100 million of which is expected to be issued in August 2018 and \$200 million of which is expected to be issued in November 2018.

In addition to any financings that may be necessary to meet capital requirements and contractual obligations, Southern Company and its subsidiaries plan to continue, when economically feasible, a program to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit.

PART I

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

During the three months ended June 30, 2018, there were no material changes to Southern Company's, Alabama Power's, Georgia Power's, Gulf Power's, Mississippi Power's, and Southern Power's disclosures about market risk. For additional market risk disclosures relating to Southern Company Gas, see MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Market Price Risk" of Southern Company Gas herein. For an in-depth discussion of each registrant's market risks, see MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Market Price Risk" of each registrant in Item 7 of the Form 10-K and Note 1 to the financial statements of each registrant under "Financial Instruments," Note 11 to the financial statements of Southern Company, Alabama Power, and Georgia Power, Note 10 to the financial statements of Gulf Power, Mississippi Power, and Southern Company Gas, and Note 9 to the financial statements of Southern Power in Item 8 of the Form 10-K. Also see Note (D) and Note (I) to the Condensed Financial Statements herein for information relating to derivative instruments.

Item 4. Controls and Procedures.

(a) Evaluation of disclosure controls and procedures.

As of the end of the period covered by this Quarterly Report on Form 10-Q, Southern Company, Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Southern Power, and Southern Company Gas conducted separate evaluations under the supervision and with the participation of each company's management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of the disclosure controls and procedures (as defined in Sections 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended). Based upon these evaluations, the Chief Executive Officer and the Chief Financial Officer, in each case, concluded that the disclosure controls and procedures are effective.

(b) Changes in internal controls over financial reporting.

There have been no changes in Southern Company's, Alabama Power's, Georgia Power's, Gulf Power's, Mississippi Power's, Southern Power's, or Southern Company Gas' internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended) during the second quarter 2018 that have materially affected or are reasonably likely to materially affect Southern Company's, Alabama Power's, Georgia Power's, Gulf Power's, Mississippi Power's, Southern Power's, or Southern Company Gas' internal control over financial reporting.

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

SECOND QUARTER 2018 vs. SECOND QUARTER 2017
AND
YEAR-TO-DATE 2018 vs. YEAR-TO-DATE 2017

OVERVIEW

Alabama Power operates as a vertically integrated utility providing electric service to retail and wholesale customers within its traditional service territory located in the State of Alabama in addition to wholesale customers in the Southeast.

Many factors affect the opportunities, challenges, and risks of Alabama Power's business of providing electric service. These factors include the ability to maintain a constructive regulatory environment, to maintain and grow energy sales and customers, and to effectively manage and secure timely recovery of costs. These costs include those related to projected long-term demand growth, stringent environmental standards, reliability, fuel, capital expenditures, and restoration following major storms. Alabama Power has various regulatory mechanisms that operate to address cost recovery. Effectively operating pursuant to these regulatory mechanisms and appropriately balancing required costs and capital expenditures with customer prices will continue to challenge Alabama Power for the foreseeable future. On May 1, 2018, the Alabama PSC approved modifications to Rate RSE and other commitments designed to position Alabama Power to address the retail rate impact and the growing pressure on its credit quality resulting from the Tax Reform Legislation. See FUTURE EARNINGS POTENTIAL – "Retail Regulatory Matters " and FINANCIAL CONDITION AND LIQUIDITY – " Credit Rating Risk " herein for additional information and Note 3 to the financial statements of Alabama Power under "Retail Regulatory Matters – Rate RSE" in Item 8 of the Form 10-K for additional information on Alabama Power's established retail tariff.

Alabama Power continues to focus on several key performance indicators including, but not limited to, customer satisfaction, plant availability, system reliability, and net income after dividends on preferred stock.

RESULTS OF OPERATIONS

Net Income

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$29	12.6	\$81	20.1

Alabama Power's net income after dividends on preferred and preference stock for the second quarter 2018 was \$259 million compared to \$230 million for the corresponding period in 2017 . The increase was primarily related to an increase in retail revenues associated with warmer weather experienced in Alabama Power's service territory in the second quarter 2018 compared to the corresponding period in 2017 and a decrease in income tax expense, partially offset by revenues deferred as a regulatory liability for reductions to customer billings, which began in July 2018, related to the Tax Reform Legislation.

Alabama Power's net income after dividends on preferred and preference stock for year-to-date 2018 was \$484 million compared to \$403 million for the corresponding period in 2017 . The increase was primarily related to an increase in retail revenues associated with colder weather experienced in the first quarter 2018 and warmer weather experienced in the second quarter 2018 in Alabama Power's service territory compared to the corresponding periods in 2017 and a decrease in income tax expense, partially offset by revenues deferred as a regulatory liability for reductions to customer billings, which began in July 2018, related to the Tax Reform Legislation and an increase in depreciation. See FUTURE EARNINGS POTENTIAL – " Retail Regulatory Matters " herein and Note 3 to the financial statements of Alabama Power under "Retail Regulatory Matters – Rate RSE" in Item 8 of the Form 10-K for additional information.

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Retail Revenues

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$5	0.4	\$64	2.5

In the second quarter 2018 , retail revenues were \$1.34 billion compared to \$1.33 billion for the corresponding period in 2017 . For year-to-date 2018 , retail revenues were \$2.62 billion compared to \$2.56 billion for the corresponding period in 2017 .

Details of the changes in retail revenues were as follows:

	Second Quarter 2018		Year-to-Date 2018

Weather	28	2.1	92	3.6
Fuel and other cost recovery	41	3.1	85	3.3
Retail – current year	\$ 1,338	0.4%	\$ 2,624	2.5%

Revenues associated with changes in rates and pricing decreased in the second quarter and year-to-date 2018 when compared to the corresponding periods in 2017 primarily due to revenues deferred as a regulatory liability for reductions to customer billings, which began in July 2018, related to the Tax Reform Legislation. See Note (B) to the Condensed Financial Statements under " Regulatory Matters – Alabama Power " herein and Note 3 to the financial statements of Alabama Power under "Retail Regulatory Matters" in Item 8 of the Form 10-K for additional information.

Revenues attributable to changes in sales decreased in the second quarter and year-to-date 2018 when compared to the corresponding periods in 2017 . Weather-adjusted commercial KWH sales decreased 2.3% and 1.6% for the second quarter and year-to-date 2018 , respectively, and weather-adjusted residential KWH sales decreased 0.9% and 0.7% for the second quarter and year-to-date 2018, respectively, when compared to the corresponding periods in 2017 primarily due to lower customer usage related to energy efficiency. Industrial KWH sales increased 1.6% and 3.0% for the second quarter and year-to-date 2018 , respectively, when compared to the corresponding periods in 2017 as a result of an increase in demand resulting from changes in production levels primarily in the pipelines and primary metals sectors, partially offset by a decrease in demand in the paper sector.

Revenues resulting from changes in weather increased in the second quarter and year-to-date 2018 due to colder weather experienced in the first quarter 2018 and warmer weather experienced in the second quarter 2018 in Alabama Power's service territory compared to the corresponding periods in 2017 . For the second quarter 2018 , the resulting increases were 3.9% and 1.7% for residential and commercial sales revenues, respectively. For year-to-date 2018 , the resulting increases were 7.0% and 2.4% for residential and commercial sales revenues, respectively.

Fuel and other cost recovery revenues increased in the second quarter and year-to-date 2018 when compared to the corresponding periods in 2017 primarily due to increases in KWH generation and the average cost of fuel.

Electric rates include provisions to recognize the full recovery of fuel costs, purchased power costs, PPAs certificated by the Alabama PSC, and costs associated with the natural disaster reserve. Under these provisions, fuel and other cost recovery revenues generally equal fuel and other cost recovery expenses and do not affect net income. See Note 3 to the financial statements of Alabama Power under "Retail Regulatory Matters" in Item 8 of the Form 10-K for additional information.

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Wholesale Revenues – Affiliates

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(1)	(3.1)	\$17	26.2

Wholesale revenues from sales to affiliated companies will vary depending on demand and the availability and cost of generating resources at each company. These affiliate sales are made in accordance with the IIC, as approved by the FERC. These transactions do not have a significant impact on earnings since this energy is generally sold at marginal cost and energy purchases are generally offset by energy revenues through Alabama Power's energy cost recovery clause.

For year-to-date 2018, wholesale revenues from sales to affiliates were \$82 million compared to \$65 million for the corresponding period in 2017. The increase was primarily due to an 12.4% increase in the price of energy and an 11.3% increase in KWH sales as a result of increased demand due to colder weather in the first quarter 2018 compared to the corresponding period in 2017.

Other Revenues

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$18	35.3	\$23	21.3

In the second quarter 2018, other revenues were \$69 million compared to \$51 million for the corresponding period in 2017. For year-to-date 2018, other revenues were \$131 million compared to \$108 million for the corresponding period in 2017. These increases were primarily due to revenues related to unregulated sales of products and services that were reclassified as other revenues as a result of the adoption of ASC 606, *Revenue from Contracts with Customers* (ASC 606). In prior periods, these revenues were included in other income (expense), net. See Note (A) to the Condensed Financial Statements herein for additional information regarding Alabama Power's adoption of ASC 606. The year-to-date 2018 increase was partially offset by decreases in open access transmission tariff revenues and miscellaneous rents.

Fuel and Purchased Power Expenses

	Second Quarter 2018		vs.		Year-to-Date 2018 vs. Year-to-Date 2017	
	Second Quarter 2017					
	<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
Fuel	\$ 44	14.5	\$ 71	11.8		
Purchased power – non-affiliates	8	20.0	38	50.7		
Purchased power – affiliates	9	26.5	18	29.0		
Total fuel and purchased power expenses	\$ 61		\$ 127			

In the second quarter 2018, fuel and purchased power expenses were \$438 million compared to \$377 million for the corresponding period in 2017. The increase was primarily due to a \$39 million increase related to the volume of KWHs generated and purchased and a \$7 million increase related to the average cost of fuel, partially offset by a \$14 million decrease in the average cost of purchased power.

For year-to-date 2018, fuel and purchased power expenses were \$865 million compared to \$738 million for the corresponding period in 2017. The increase was primarily due to a \$75 million increase related to the volume of KWHs generated and purchased, a \$16 million increase related to the average cost of fuel, and a \$7 million increase in the average cost of purchased power.

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In addition, fuel expense increased \$30 million in both the second quarter and year-to-date 2018 in accordance with an Alabama PSC accounting order authorizing the use of excess deferred income taxes to offset under recovered fuel costs. See FUTURE EARNINGS POTENTIAL – "Retail Regulatory Matters – Accounting Order" herein for additional information.

Fuel and purchased power energy transactions do not have a significant impact on earnings since energy expenses are generally offset by energy revenues through Alabama Power's energy cost recovery clause. See Note 3 to the financial statements of Alabama Power under "Retail Regulatory Matters – Rate ECR" in Item 8 of the Form 10-K for additional information.

Details of Alabama Power's generation and purchased power were as follows:

	Second Quarter 2018	Second Quarter 2017	Year-to-Date 2018	Year-to-Date 2017
Total generation (in billions of KWHs)	15	15	31	30
Total purchased power (in billions of KWHs)	2	1	3	2
Sources of generation (percent) —				
Coal	53	47	52	48
Nuclear	20	25	21	26
Gas	20	20	19	20
Hydro	7	8	8	6
Cost of fuel, generated (in cents per net KWH) ^(a) —				
Coal	2.79	2.63	2.74	2.61
Nuclear	0.80	0.76	0.77	0.75
Gas	2.51	2.75	2.69	2.76
Average cost of fuel, generated (in cents per net KWH) ^{(a)(b)}	2.31	2.14	2.27	2.13
Average cost of purchased power (in cents per net KWH) ^(c)	4.72	5.43	5.72	5.50

(a) Cost of fuel and average cost of fuel, generated excludes a \$30 million adjustment associated with the Alabama PSC accounting order related to excess deferred income taxes.

(b) KWHs generated by hydro are excluded from the average cost of fuel, generated.

(c) Average cost of purchased power includes fuel, energy, and transmission purchased by Alabama Power for tolling agreements where power is generated by the provider.

Fuel

In the second quarter 2018, fuel expense was \$347 million compared to \$303 million for the corresponding period in 2017. The increase was primarily due to a 24.9% decrease in the volume of KWHs generated by nuclear facilities, a 12.4% decrease in the volume of KWHs generated by hydro facilities, an 8.7% increase in the volume of KWHs generated by coal, a 6.1% increase in the average cost of coal per KWH generated, and a 5.3% increase in the average cost of nuclear per KWH generated. These increases were partially offset by an 8.7% decrease in the average cost of natural gas per KWH generated, which excludes fuel associated with tolling agreements.

For year-to-date 2018, fuel expense was \$672 million compared to \$601 million for the corresponding period in 2017. The increase was primarily due to a 14.2% decrease in the volume of KWHs generated by nuclear facilities, a 9.8% increase in the volume of KWHs generated by coal, and a 5.0% increase in the average cost of coal per KWH generated. These increases were partially offset by a 22.6% increase in the volume of KWHs generated by hydro facilities.

In addition, fuel expense increased \$30 million in both the second quarter and year-to-date 2018 in accordance with an Alabama PSC accounting order authorizing the use of excess deferred income taxes to offset under recovered

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

fuel costs. See FUTURE EARNINGS POTENTIAL – " Retail Regulatory Matters – Accounting Order " herein for additional information.

Purchased Power – Non-Affiliates

In the second quarter 2018 , purchased power expense from non-affiliates was \$48 million compared to \$40 million for the corresponding period in 2017 . The increase was primarily related to a 24.6% increase in the amount of energy purchased due to warmer weather in the second quarter 2018 compared to the corresponding period in 2017 . This increase was partially offset by a 4.4% decrease in the average cost of purchased power per KWH due to lower natural gas prices.

For year-to-date 2018 , purchased power expense from non-affiliates was \$113 million compared to \$75 million for the corresponding period in 2017 . The increase was primarily related to a 29.6% increase in the amount of energy purchased and a 15.6% increase in the average cost of purchased power per KWH due to colder weather in the first quarter 2018 compared to the corresponding period in 2017 .

Energy purchases from non-affiliates will vary depending on the market prices of wholesale energy as compared to the cost of the Southern Company system's generation, demand for energy within the Southern Company system's service territory, and the availability of the Southern Company system's generation.

Purchased Power – Affiliates

In the second quarter 2018 , purchased power expense from affiliates was \$43 million compared to \$34 million for the corresponding period in 2017 . The increase was primarily related to a 60.8% increase in the amount of energy purchased due to warmer weather in the second quarter 2018 compared to the corresponding period in 2017, partially offset by a 20.9% decrease in the average cost of purchased power per KWH due to lower natural gas prices in the second quarter 2018 compared to the corresponding period in 2017 .

For year-to-date 2018 , purchased power expense from affiliates was \$80 million compared to \$62 million for the corresponding period in 2017 . The increase was primarily related to a 44% increase in the amount of energy purchased as a result of colder weather in the first quarter 2018 compared to the corresponding period in 2017 , partially offset by a 9.8% decrease in the average cost of purchased power per KWH due to lower natural gas prices in the second quarter 2018 compared to the corresponding period in 2017 .

Energy purchases from affiliates will vary depending on demand for energy and the availability and cost of generating resources at each company within the Southern Company system. These purchases are made in accordance with the IIC or other contractual agreements, as approved by the FERC.

Other Operations and Maintenance Expenses

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$13	3.3	\$16	2.1

In the second quarter 2018 , other operations and maintenance expenses were \$402 million compared to \$389 million for the corresponding period in 2017 . The increase was primarily due to \$12 million of expenses from unregulated sales of products and services that were reclassified as other operations and maintenance expenses as a result of the adoption of ASC 606. In prior periods, these expenses were included in other income (expense), net. In addition, distribution costs increased \$5 million primarily due to line maintenance. These increases were partially offset by a \$4 million decrease in nuclear generation costs primarily due to the timing of plant improvement projects.

For year-to-date 2018 , other operations and maintenance expenses were \$788 million compared to \$772 million for the corresponding period in 2017 . The increase was primarily due to \$21 million of expenses from unregulated sales of products and services that were reclassified as other operations and maintenance expenses as a result of the adoption of ASC 606. In prior periods, these expenses were included in other income (expense), net. In addition,

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

distribution costs increased \$11 million primarily due to line maintenance. These increases were partially offset by a \$6 million decrease in property insurance primarily due to the receipt of refunds, a \$5 million decrease in steam generation costs primarily due to the timing of outages, and a \$5 million decrease in nuclear generation costs primarily due to the timing of plant improvement projects.

See Note (A) to the Condensed Financial Statements herein for additional information regarding Alabama Power's adoption of ASC 606.

Depreciation and Amortization

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$6	3.3	\$15	4.1

For year-to-date 2018 , depreciation and amortization was \$379 million compared to \$364 million for the corresponding period in 2017 . This increase was primarily due to additional plant in service related to steam generation, transmission, and distribution assets. See Note 1 to the financial statements of Alabama Power under "Depreciation and Amortization" in Item 8 of the Form 10-K for additional information.

Allowance for Equity Funds Used During Construction

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$6	75.0	\$11	68.8

In the second quarter 2018 , AFUDC equity was \$14 million compared to \$8 million for the corresponding period in 2017 . For year-to-date 2018 , AFUDC equity was \$27 million compared to \$16 million for the corresponding period in 2017 . These increases were primarily due to an increase in capital expenditures related to environmental and transmission projects.

Other Income (Expense), Net

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(3)	(20.0)	\$(10)	(40.0)

In the second quarter 2018 , other income (expense), net was \$12 million compared to \$15 million for the corresponding period in 2017 . For year-to-date 2018 , other income (expense), net was \$15 million compared to \$25 million for the corresponding period in 2017 . These decreases were primarily due to the reclassification of revenues and expenses associated with unregulated sales of products and services to other revenues and operations and maintenance expense, respectively, as a result of the adoption of ASC 606. See Note (A) to the Condensed Financial Statements herein for additional information regarding Alabama Power's adoption of ASC 606.

Income Taxes

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(87)	(57.6)	\$(132)	(47.7)

In the second quarter 2018 , income taxes were \$64 million compared to \$151 million for the corresponding period in 2017 . For year-to-date 2018 , income taxes were \$145 million compared to \$277 million for the corresponding period in 2017 . These decreases were primarily due to the reduction in the federal income tax rate and the benefit from the flowback of excess deferred income taxes as a result of the Tax Reform Legislation and lower pre-tax net

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

income. See FUTURE EARNINGS POTENTIAL – "Retail Regulatory Matters – Accounting Order" and Note (H) to the Condensed Financial Statements under "Effective Tax Rate" herein for additional information.

FUTURE EARNINGS POTENTIAL

The results of operations discussed above are not necessarily indicative of Alabama Power's future earnings potential. The level of Alabama Power's future earnings depends on numerous factors that affect the opportunities, challenges, and risks of Alabama Power's primary business of providing electric service. These factors include Alabama Power's ability to maintain a constructive regulatory environment that continues to allow for the timely recovery of prudently-incurred costs during a time of increasing costs and limited projected demand growth over the next several years. Future earnings will be impacted by customer growth. Earnings will also depend upon maintaining and growing sales, considering, among other things, the adoption and/or penetration rates of increasingly energy-efficient technologies and increasing volumes of electronic commerce transactions, both of which could contribute to a net reduction in customer usage. Earnings are subject to a variety of other factors. These factors include weather, competition, new energy contracts with other utilities, energy conservation practiced by customers, the use of alternative energy sources by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth or decline in Alabama Power's service territory. Demand for electricity is primarily driven by the pace of economic growth that may be affected by changes in regional and global economic conditions, which may impact future earnings. For additional information relating to these issues, see RISK FACTORS in Item 1A and MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL of Alabama Power in Item 7 of the Form 10-K.

Environmental Matters

Alabama Power's operations are regulated by state and federal environmental agencies through a variety of laws and regulations governing air, water, land, and protection of other natural resources. Alabama Power maintains comprehensive environmental compliance and greenhouse gas (GHG) strategies to assess upcoming requirements and compliance costs associated with these environmental laws and regulations. The costs, including capital expenditures and operations and maintenance costs, required to comply with environmental laws and regulations and to achieve stated goals may impact future unit retirement and replacement decisions, results of operations, cash flows, and financial condition. Related costs may result from the installation of additional environmental controls, closure and monitoring of CCR facilities, unit retirements, and adding or changing fuel sources for certain existing units, as well as related upgrades to the transmission system. A major portion of these costs are expected to be recovered through existing ratemaking provisions. The ultimate impact of environmental laws and regulations and the GHG goals discussed below will depend on various factors, such as state adoption and implementation of requirements, the availability and cost of any deployed control technology, and the outcome of pending and/or future legal challenges.

New or revised environmental laws and regulations could affect many areas of Alabama Power's operations. The impact of any such changes cannot be determined at this time. Environmental compliance costs could affect earnings if such costs cannot continue to be fully recovered in rates on a timely basis. Environmental compliance costs are recovered through Rate CNP Compliance. Further, increased costs that are recovered through regulated rates could contribute to reduced demand for electricity, which could negatively affect results of operations, cash flows, and financial condition. Additionally, many commercial and industrial customers may also be affected by existing and future environmental requirements, which for some may have the potential to ultimately affect their demand for electricity. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters" of Alabama Power in Item 7 and Note 3 to the financial statements of Alabama Power under "Environmental Matters" and "Retail Regulatory Matters – Rate CNP Compliance" in Item 8 of the Form 10-K for additional information.

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Environmental Laws and Regulations

Water Quality

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters – Environmental Laws and Regulations – Water Quality" of Alabama Power in Item 7 of the Form 10-K for additional information regarding the effluent limitations guidelines (ELG) rule.

On May 2, 2018, the EPA updated its anticipated final rulemaking schedule for ELG from September 2020 to December 2019. The impact of any changes to the ELG rule will depend on the content of the final rule and the outcome of any legal challenges and cannot be determined at this time.

Coal Combustion Residuals

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters – Environmental Laws and Regulations – Coal Combustion Residuals" of Alabama Power in Item 7 of the Form 10-K for additional information regarding the Disposal of Coal Combustion Residuals from Electric Utilities rule (CCR Rule).

On July 30, 2018, the EPA published certain amendments to the CCR Rule, which will be effective August 29, 2018. These amendments extend the date from April 2019 to October 31, 2020 to cease sending CCR and other waste streams to impoundments that demonstrate compliance with all except two specified criteria. These amendments also establish groundwater protection standards for four constituents that do not have established EPA maximum contaminant levels and allow a participating state director or the EPA (where the EPA is the permitting authority) to suspend groundwater monitoring requirements under certain circumstances. Specific site impacts are being evaluated by Alabama Power.

On April 20, 2018, the Alabama Environmental Management Commission approved a state CCR rule that has been provided to the EPA for a six-month review period. This state CCR rule is generally consistent with the federal CCR Rule. The ultimate outcome of this matter cannot be determined at this time.

In June 2018, Alabama Power recorded an increase of approximately \$1.2 billion to its AROs related to the CCR Rule. The revised cost estimates as of June 30, 2018 are based on information from feasibility studies performed on ash ponds in use at plants operated by Alabama Power. During the second quarter 2018, Alabama Power's management completed its analysis of these studies which indicated that additional closure costs, primarily related to increases in estimated ash volume, water management requirements, and design revisions, will be required to close these ash ponds under the planned closure-in-place methodology. As further analysis is performed and closure details are developed with respect to ash pond closures, Alabama Power expects to periodically update these cost estimates as necessary. See Note (A) to the Condensed Financial Statements under " Asset Retirement Obligations " herein for additional information.

Absent continued recovery of ARO costs through regulated rates, Alabama Power's results of operations, cash flows, and financial condition could be materially impacted. The ultimate outcome of these matters cannot be determined at this time.

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Nuclear Decommissioning

In June 2018, Alabama Power completed an updated decommissioning cost site study for Plant Farley. The estimated cost of decommissioning based on the study resulted in an increase in the ARO liability of approximately \$300 million. Amounts previously contributed to the external trust funds are currently projected to be adequate to meet the updated decommissioning obligations. See Note 1 to the financial statements of Alabama Power under "Nuclear Decommissioning" in Item 8 of the Form 10-K and Note (A) to the Condensed Financial Statements under "Asset Retirement Obligations" and "Nuclear Decommissioning" herein for additional information.

Global Climate Issues

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters – Global Climate Issues" of Alabama Power in Item 7 of the Form 10-K for additional information.

Through 2017, the Southern Company system has achieved an estimated GHG emission reduction of 36% since 2007. In April 2018, Southern Company established an intermediate goal of a 50% reduction in carbon emissions from 2007 levels by 2030 and a long-term goal of low- to no-carbon operations by 2050. To achieve these goals, the Southern Company system expects to continue growing its renewable energy portfolio, optimize technology advancements to modernize its transmission and distribution systems, increase the use of natural gas for generation, invest in energy efficiency, and continue research and development efforts focused on technologies to lower GHG emissions. The Southern Company system's ability to achieve these goals also will be dependent on many external factors, including supportive national energy policies, low natural gas prices, and the development, deployment, and advancement of relevant energy technologies. The ultimate outcome of this matter cannot be determined at this time.

FERC Matters

Market-Based Rate Authority

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "FERC Matters" of Alabama Power in Item 7 of the Form 10-K for additional information regarding proceedings related to the traditional electric operating companies' (including Alabama Power's) and Southern Power's 2014 and 2017 triennial market power analyses.

On May 4, 2018, the FERC issued an order terminating both proceedings, finding that the traditional electric operating companies (including Alabama Power) and Southern Power satisfy the FERC's standards for market-based rates. On May 9, 2018, the traditional electric operating companies (including Alabama Power) and Southern Power made the compliance filing required by the order. These proceedings are essentially concluded.

Open Access Transmission Tariff

On May 10, 2018, the Alabama Municipal Electric Authority and Cooperative Energy filed with the FERC a complaint against SCS and the traditional electric operating companies (including Alabama Power) claiming that the current 11.25% base ROE used in calculating the annual transmission revenue requirements of the traditional electric operating companies' (including Alabama Power's) open access transmission tariff is unjust and unreasonable as measured by the applicable FERC standards. The complaint requests that the base ROE be set no higher than 8.65% and that the FERC order refunds for the difference in revenue requirements that results from applying a just and reasonable ROE established in this proceeding upon determining the current ROE is unjust and unreasonable. On June 18, 2018, SCS and the traditional electric operating companies (including Alabama Power) filed their response challenging the adequacy of the showing presented by the complainants and offering support for the current ROE. The ultimate outcome of this matter cannot be determined at this time.

Relicensing of Hydroelectric Developments

See BUSINESS – "Regulation – Federal Power Act" in Item 1 of the Form 10-K for a discussion of Alabama Power's hydroelectric developments on the Coosa River.

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

On July 6, 2018, the U.S. Court of Appeals for the District of Columbia Circuit issued a decision vacating the FERC's 2013 order issuing a new 30-year license to Alabama Power for seven hydroelectric developments on the Coosa River and remanding the proceeding to the FERC for further proceedings. Alabama Power continues to operate the Coosa River developments under annual licenses issued by the FERC. The ultimate outcome of this matter cannot be determined at this time.

Retail Regulatory Matters

Alabama Power's revenues from regulated retail operations are collected through various rate mechanisms subject to the oversight of the Alabama PSC. Alabama Power currently recovers its costs from the regulated retail business primarily through Rate RSE, Rate CNP, Rate ECR, and Rate NDR. In addition, the Alabama PSC issues accounting orders to address current events impacting Alabama Power. See Notes 1 and 3 to the financial statements of Alabama Power under "Nuclear Outage Accounting Order" and "Retail Regulatory Matters," respectively, in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements herein for additional information regarding Alabama Power's rate mechanisms, accounting orders, and the recovery balance of each regulatory clause for Alabama Power.

On May 1, 2018, the Alabama PSC approved modifications to Rate RSE and other commitments designed to position Alabama Power to address the growing pressure on its credit quality resulting from the Tax Reform Legislation, without increasing retail rates under Rate RSE in the near term. Alabama Power plans to reduce growth in total debt by increasing equity, with corresponding reductions in debt issuances, thereby de-leveraging its capital structure. Alabama Power's goal is to achieve an equity ratio of approximately 55% by the end of 2025. At June 30, 2018, Alabama Power's equity ratio was approximately 46.6%. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Income Tax Matters – Federal Tax Reform Legislation" of Alabama Power in Item 7 of the Form 10-K for additional information.

Rate RSE

The approved modifications to Rate RSE became effective June 2018 and are applicable for January 2019 billings and thereafter. The modifications include reducing the top of the allowed weighted common equity return (WCER) range from 6.21% to 6.15% and modifications to the refund mechanism applicable to prior year actual results. The modifications to the refund mechanism allow Alabama Power to retain a portion of the revenue that causes the actual WCER for a given year to exceed the allowed range.

In conjunction with these modifications to Rate RSE, on May 8, 2018, Alabama Power consented to a moratorium on any upward adjustments under Rate RSE for 2019 and 2020. Additionally, Alabama Power will return \$50 million to customers through bill credits in 2019.

In accordance with an established retail tariff that provides for an interim adjustment to customer billings to recognize the impact of a change in the statutory income tax rate, Alabama Power is returning approximately \$257 million to retail customers through bill credits in the second half of 2018 as a result of the change in the federal income tax rate under the Tax Reform Legislation.

Rate ECR

On May 1, 2018, the Alabama PSC approved an increase to Rate ECR from 2.015 cents per KWH to 2.353 cents per KWH effective July 2018 which is expected to result in additional collections of approximately \$100 million through December 31, 2018. The approved increase in the Rate ECR factor will have no significant effect on Alabama Power's net income, but will increase operating cash flows related to fuel cost recovery in 2018. The rate will return to 5.910 cents per KWH in 2019, absent a further order from the Alabama PSC.

Accounting Order

On May 1, 2018, the Alabama PSC approved an accounting order that authorizes Alabama Power to defer the benefits of federal excess deferred income taxes associated with the Tax Reform Legislation for the year ending December 31, 2018 as a regulatory liability and to use up to \$30 million of such deferrals to offset under recovered

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

amounts under Rate ECR. Any remaining amounts will be used for the benefit of customers as determined by the Alabama PSC. As of June 30, 2018, Alabama Power had applied approximately \$30 million of such deferrals to offset the under recovered balance under Rate ECR and expects the total deferrals for the year ending December 31, 2018 to be approximately \$50 million. See Note 5 to the financial statements of Alabama Power under "Federal Tax Reform Legislation" and "Current and Deferred Income Taxes" in Item 8 of the Form 10-K for additional information.

Plant Greene County

Alabama Power jointly owns Plant Greene County with an affiliate, Mississippi Power. See Note 4 to the financial statements of Alabama Power in Item 8 of the Form 10-K for additional information regarding the joint ownership agreement. On August 6, 2018, Mississippi Power filed its proposed Reserve Margin Plan (RMP) with the Mississippi PSC, which proposes a 4 -year acceleration of the retirement of Plant Greene County Units 1 and 2 to the third quarter 2021 and the third quarter 2022, respectively. Mississippi Power's proposed Plant Greene County unit retirements would require the completion of proposed transmission and system reliability improvements, as well as agreement by Alabama Power. Alabama Power will monitor Mississippi Power's proposed RMP and associated regulatory process as well as the proposed transmission and system reliability improvements. Alabama Power will review all the facts and circumstances and will evaluate all its alternatives prior to reaching a final determination on the ongoing operations of Plant Greene County. The ultimate outcome of this matter cannot be determined at this time.

Income Tax Matters

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Income Tax Matters" of Alabama Power in Item 7 of the Form 10-K and FINANCIAL CONDITION AND LIQUIDITY – "Credit Rating Risk," Note (B) to the Condensed Financial Statements under "Regulatory Matters – Alabama Power," and Note (H) to the Condensed Financial Statements herein for information regarding the Tax Reform Legislation and related regulatory actions.

Other Matters

Alabama Power is involved in various other matters being litigated and regulatory matters that could affect future earnings. In addition, Alabama Power is subject to certain claims and legal actions arising in the ordinary course of business. Alabama Power's business activities are subject to extensive governmental regulation related to public health and the environment, such as laws and regulations governing air, water, land, and protection of natural resources. Litigation over environmental issues and claims of various types, including property damage, personal injury, common law nuisance, and citizen enforcement of environmental laws and regulations has occurred throughout the U.S. This litigation has included claims for damages alleged to have been caused by CO₂ and other emissions, CCR, and alleged exposure to hazardous materials, and/or requests for injunctive relief in connection with such matters.

The ultimate outcome of such pending or potential litigation or regulatory matters cannot be predicted at this time; however, for current proceedings not specifically reported in Note (B) to the Condensed Financial Statements herein, management does not anticipate that the ultimate liabilities, if any, arising from such current proceedings would have a material effect on Alabama Power's financial statements. See Note (B) to the Condensed Financial Statements herein for a discussion of various other contingencies, regulatory matters, and other matters being litigated which may affect future earnings potential.

On March 2, 2018, the Alabama Department of Environmental Management (ADEM) issued proposed administrative orders assessing a penalty of \$1.25 million to Alabama Power for unpermitted discharge of fluids and/or pollutants to groundwater at five electric generating plants. The proposed orders also require the submission to the ADEM of a plan with a schedule for implementation of a comprehensive groundwater investigation, including an assessment of corrective measures, a report evaluating any deficiencies at the facilities that may have led to the

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

unpermitted discharges, and quarterly progress reports. Alabama Power is awaiting finalization of the orders. The ultimate outcome of this matter cannot be determined at this time.

ACCOUNTING POLICIES

Application of Critical Accounting Policies and Estimates

Alabama Power prepares its financial statements in accordance with GAAP. Significant accounting policies are described in Note 1 to the financial statements of Alabama Power in Item 8 of the Form 10-K. In the application of these policies, certain estimates are made that may have a material impact on Alabama Power's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. See MANAGEMENT'S DISCUSSION AND ANALYSIS – ACCOUNTING POLICIES – "Application of Critical Accounting Policies and Estimates" of Alabama Power in Item 7 of the Form 10-K for a complete discussion of Alabama Power's critical accounting policies and estimates.

Recently Issued Accounting Standards

See MANAGEMENT'S DISCUSSION AND ANALYSIS – ACCOUNTING POLICIES – "Recently Issued Accounting Standards" of Alabama Power in Item 7 of the Form 10-K for additional information regarding ASU No. 2016-02, *Leases (Topic 842)*. See Note (A) to the Condensed Financial Statements herein for information regarding Alabama Power's recently adopted accounting standards.

FINANCIAL CONDITION AND LIQUIDITY

Overview

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Overview" of Alabama Power in Item 7 of the Form 10-K for additional information. Alabama Power's financial condition remained stable at June 30, 2018. Alabama Power intends to continue to monitor its access to short-term and long-term capital markets as well as its bank credit arrangements to meet future capital and liquidity needs. See "Capital Requirements and Contractual Obligations," "Sources of Capital," and "Financing Activities" herein for additional information.

Net cash provided from operating activities totaled \$652 million for the first six months of 2018, a decrease of \$20 million as compared to the first six months of 2017. The decrease in net cash provided from operating activities was primarily due to decreased fuel cost recovery and the timing of vendor payments. These uses of cash were partially offset by an increase in other current liabilities due to the timing of customer billing reductions related to the Tax Reform Legislation and income tax refunds in 2018. Net cash used for investing activities totaled \$1.08 billion for the first six months of 2018 primarily due to gross property additions related to environmental, distribution, and transmission assets. Net cash provided from financing activities totaled \$565 million for the first six months of 2018 primarily due to an issuance of long-term debt and additional capital contributions from Southern Company, partially offset by common stock dividend payments. Fluctuations in cash flows from financing activities vary from period to period based on capital needs and the maturity or redemption of securities.

Significant balance sheet changes for the first six months of 2018 include increases of \$2.1 billion in property, plant, and equipment primarily due to increases in AROs related to the CCR Rule and additions to distribution, environmental, and transmission assets, \$1.4 billion in AROs related to the CCR Rule and nuclear decommissioning, \$494 million in additional paid-in capital due to capital contributions from Southern Company, \$294 million in long-term debt primarily due to the issuance of additional senior notes, and \$200 million in securities due within one year reclassified from long-term debt. See Note (A) to the Condensed Financial Statements under "Asset Retirement Obligations" herein for additional information related to changes in Alabama Power's AROs.

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Capital Requirements and Contractual Obligations

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Capital Requirements and Contractual Obligations" of Alabama Power in Item 7 of the Form 10-K for a description of Alabama Power's capital requirements and contractual obligations. Approximately \$200 million will be required through June 30, 2019 to fund maturities of long-term debt.

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters" of Alabama Power in Item 7 of the Form 10-K for additional information on Alabama Power's environmental compliance strategy.

Alabama Power anticipates costs associated with closure-in-place and monitoring of ash ponds in accordance with the CCR Rule, which are reflected in Alabama Power's ARO liabilities. These costs, which are expected to change as Alabama Power continues to refine its assumptions underlying the cost estimates and evaluate the method and timing of compliance activities, are expected to begin in 2019 and are currently estimated to be approximately \$232 million for 2019, \$238 million for 2020, \$246 million for 2021, and \$252 million for 2022. See Note 1 to the financial statements of Alabama Power under "Asset Retirement Obligations and Other Costs of Removal" in Item 8 of the Form 10-K, FUTURE EARNINGS POTENTIAL – "Environmental Matters – Environmental Laws and Regulations – Coal Combustion Residuals" herein, and Note (A) to the Condensed Financial Statements under "Asset Retirement Obligations" herein for additional information.

The construction program is subject to periodic review and revision, and actual construction costs may vary from these estimates because of numerous factors. These factors include: changes in business conditions; changes in load projections; changes in environmental laws and regulations; the outcome of any legal challenges to environmental rules; changes in generating plants, including unit retirements and replacements and adding or changing fuel sources at existing generating units, to meet regulatory requirements; changes in the expected environmental compliance program; changes in FERC rules and regulations; Alabama PSC approvals; changes in legislation; the cost and efficiency of construction labor, equipment, and materials; project scope and design changes; storm impacts; and the cost of capital. In addition, there can be no assurance that costs related to capital expenditures will be fully recovered.

Sources of Capital

Alabama Power plans to obtain the funds to meet its future capital needs from sources similar to those used in the past, which were primarily from operating cash flows, external security issuances, borrowings from financial institutions, and equity contributions from Southern Company. However, the amount, type, and timing of any future financings, if needed, will depend upon prevailing market conditions, regulatory approval, and other factors. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Sources of Capital" of Alabama Power in Item 7 of the Form 10-K for additional information.

Alabama Power's current liabilities sometimes exceed current assets because of long-term debt maturities and the periodic use of short-term debt as a funding source, as well as significant seasonal fluctuations in cash needs.

At June 30, 2018, Alabama Power had approximately \$686 million of cash and cash equivalents. Committed credit arrangements with banks at June 30, 2018 were as follows:

Expires				Total	Unused	Expires Within One Year	
2018	2019	2020	2022			Term Out	No Term Out
<i>(in millions)</i>							
\$ 2	\$ 31	\$ 500	\$ 800	\$ 1,333	\$ 1,333	\$ —	\$ 33

See Note 6 to the financial statements of Alabama Power under "Bank Credit Arrangements" in Item 8 of the Form 10-K and Note (F) to the Condensed Financial Statements under "Bank Credit Arrangements" herein for additional information.

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Most of these bank credit arrangements, as well as Alabama Power's term loan arrangements, contain covenants that limit debt levels and contain cross-acceleration provisions to other indebtedness (including guarantee obligations) of Alabama Power. Such cross-acceleration provisions to other indebtedness would trigger an event of default if Alabama Power defaulted on indebtedness, the payment of which was then accelerated. At June 30, 2018, Alabama Power was in compliance with all such covenants. None of the bank credit arrangements contain material adverse change clauses at the time of borrowings.

Subject to applicable market conditions, Alabama Power expects to renew or replace its bank credit arrangements as needed, prior to expiration. In connection therewith, Alabama Power may extend the maturity dates and/or increase or decrease the lending commitments thereunder.

A portion of the unused credit with banks is allocated to provide liquidity support to Alabama Power's pollution control revenue bonds and commercial paper programs. The amount of variable rate pollution control revenue bonds outstanding requiring liquidity support was approximately \$854 million as of June 30, 2018. At June 30, 2018, Alabama Power had \$120 million of fixed rate pollution control revenue bonds outstanding that were required to be reoffered within the next 12 months.

Alabama Power also has substantial cash flow from operating activities and access to capital markets, including a commercial paper program, to meet liquidity needs. Alabama Power may meet short-term cash needs through its commercial paper program. Alabama Power may also meet short-term cash needs through a Southern Company subsidiary organized to issue and sell commercial paper at the request and for the benefit of Alabama Power and the other traditional electric operating companies. Proceeds from such issuances for the benefit of Alabama Power are loaned directly to Alabama Power. The obligations of each traditional electric operating company under these arrangements are several and there is no cross-affiliate credit support. Short-term borrowings are included in notes payable in the balance sheets.

Details of short-term borrowings were as follows:

	Short-term Debt at June 30, 2018		Short-term Debt During the Period ^(*)		
	Amount Outstanding	Weighted Average Interest Rate	Average Amount Outstanding	Weighted Average Interest Rate	Maximum Amount Outstanding
	<i>(in millions)</i>		<i>(in millions)</i>		<i>(in millions)</i>
Commercial paper	\$ —	—%	\$ 44	2.2%	\$ 245
Short-term bank loan	3	3.7%	3	3.7%	3
Total	\$ 3	3.7%	\$ 47	2.3%	

(*) Average and maximum amounts are based upon daily balances during the three-month period ended June 30, 2018.

Alabama Power believes the need for working capital can be adequately met by utilizing commercial paper programs, lines of credit, and operating cash flows.

Credit Rating Risk

At June 30, 2018, Alabama Power did not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade.

There are certain contracts that could require collateral, but not accelerated payment, in the event of a credit rating change to BBB and/or Baa2 or below. These contracts are primarily for physical electricity purchases, fuel purchases, fuel transportation and storage, energy price risk management, and transmission.

ALABAMA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The maximum potential collateral requirements under these contracts at June 30, 2018 were as follows:

Credit Ratings	Maximum Potential Collateral Requirements	
	<i>(in millions)</i>	
At BBB and/or Baa2	\$	1
At BBB- and/or Baa3	\$	1
Below BBB- and/or Baa3	\$	279

Included in these amounts are certain agreements that could require collateral in the event that either Alabama Power or Georgia Power (affiliate company of Alabama Power) has a credit rating change to below investment grade. Generally, collateral may be provided by a Southern Company guaranty, letter of credit, or cash. Additionally, a credit rating downgrade could impact the ability of Alabama Power to access capital markets and would be likely to impact the cost at which it does so.

As a result of the Tax Reform Legislation, certain financial metrics, such as the funds from operations to debt percentage, used by the credit rating agencies to assess Southern Company and its subsidiaries, including Alabama Power, may be negatively impacted. The modifications to Rate RSE and other commitments approved by the Alabama PSC are expected to help mitigate these potential adverse impacts to certain credit metrics and will help Alabama Power meet its goal of achieving an equity ratio of approximately 55% by the end of 2025. See Note 3 to the financial statements of Alabama Power under "Retail Regulatory Matters – Rate RSE" in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements under "Regulatory Matters – Alabama Power – Rate RSE" herein for additional information.

Financing Activities

In June 2018, Alabama Power issued \$500 million aggregate principal amount of Series 2018A 4.30% Senior Notes due July 15, 2048. The proceeds were used to repay outstanding commercial paper and for general corporate purposes, including Alabama Power's continuous construction program.

In addition to any financings that may be necessary to meet capital requirements and contractual obligations, Alabama Power plans to continue, when economically feasible, a program to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit.

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

SECOND QUARTER 2018 vs. SECOND QUARTER 2017
AND
YEAR-TO-DATE 2018 vs. YEAR-TO-DATE 2017

OVERVIEW

Georgia Power operates as a vertically integrated utility providing electric service to retail customers within its traditional service territory located within the State of Georgia and to wholesale customers in the Southeast.

Many factors affect the opportunities, challenges, and risks of Georgia Power's business of providing electric service. These factors include the ability to maintain a constructive regulatory environment, to maintain and grow energy sales, and to effectively manage and secure timely recovery of costs. These costs include those related to projected long-term demand growth, stringent environmental standards, reliability, fuel, capital expenditures, and restoration following major storms. Georgia Power has various regulatory mechanisms that operate to address cost recovery. Effectively operating pursuant to these regulatory mechanisms and appropriately balancing required costs and capital expenditures with customer prices will continue to challenge Georgia Power for the foreseeable future. On April 3, 2018, the Georgia PSC approved a settlement agreement between Georgia Power and the staff of the Georgia PSC regarding the retail rate impact of the Tax Reform Legislation (Tax Reform Settlement Agreement). The Tax Reform Settlement Agreement provides for a total of \$330 million in customer refunds for 2018 and 2019 and the deferral of certain revenues and tax benefits to be addressed in Georgia Power's next base rate case, which is expected to be filed by July 1, 2019. The Georgia PSC also approved an increase to Georgia Power's retail equity ratio to address the negative cash flow and credit metric impacts of the Tax Reform Legislation. See FUTURE EARNINGS POTENTIAL – "Retail Regulatory Matters – Rate Plans " herein for additional information on the Tax Reform Settlement Agreement.

Georgia Power continues to focus on several key performance indicators including, but not limited to, customer satisfaction, plant availability, system reliability, the execution of major construction projects, and net income.

Plant Vogtle Units 3 and 4 Status

In 2009, the Georgia PSC certified construction of Plant Vogtle Units 3 and 4 (with electric generating capacity of approximately 1,100 MWs each). In March 2017, the EPC Contractor filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy Code. In December 2017, the Georgia PSC approved Georgia Power's recommendation to continue construction.

In the second quarter 2018, Georgia Power revised its base cost forecast and estimated contingency to complete construction and start-up of Plant Vogtle Units 3 and 4 to \$8.0 billion and \$0.4 billion, respectively, for a total project capital cost forecast of \$8.4 billion (net of \$1.7 billion received under the Guarantee Settlement Agreement and \$188 million in Customer Refunds recognized as a regulatory liability in 2017). Although Georgia Power believes these incremental costs are reasonable and necessary to complete the project and the Georgia PSC has stated the \$7.3 billion estimate included in the seventeenth VCM proceeding does not represent a cost cap, Georgia Power does not intend to seek rate recovery for the \$0.7 billion increase in costs included in the revised base capital cost forecast, which will be filed with the Georgia PSC in the nineteenth VCM report on August 31, 2018. In connection with future VCM filings, Georgia Power may request the Georgia PSC to evaluate costs included in the revised construction contingency estimate for rate recovery as and when they are appropriately included in the base capital cost forecast. After considering the significant level of uncertainty that exists regarding the future recoverability of costs included in the construction contingency estimate since the ultimate outcome of these matters is subject to the outcome of future assessments by management, as well as Georgia PSC decisions in these future regulatory proceedings, Georgia Power has recorded a total pre-tax charge to income of \$1.1 billion (\$0.8 billion after tax) as of June 30, 2018 .

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

As a result of the increase in the total project capital cost forecast and Georgia Power's decision not to seek rate recovery of the increase in the base capital costs, the holders of at least 90% of the ownership interests in Plant Vogtle Units 3 and 4 must vote to continue construction. The Vogtle Owners are expected to conduct these votes in the third quarter 2018.

If the holders of at least 90% of the ownership interests in Plant Vogtle Units 3 and 4 do not vote to continue construction, the Vogtle Joint Ownership Agreements provide that the project will be cancelled, and construction will cease. In the event that fewer than 90% of the Vogtle Owners vote to continue construction, Georgia Power and the other Vogtle Owners will assess options for Plant Vogtle Units 3 and 4. If Plant Vogtle Units 3 and 4 were cancelled and Georgia Power was unable to recover costs it has incurred in connection with the project, Georgia Power's results of operations, cash flow, and financial condition would be materially impacted. The ultimate outcome of this matter cannot be determined at this time.

Georgia Power's revised cost estimate reflects an expected in-service date of November 2021 for Unit 3 and November 2022 for Unit 4.

See FUTURE EARNINGS POTENTIAL – " Retail Regulatory Matters – Nuclear Construction " and ACCOUNTING POLICIES – " Application of Critical Accounting Policies and Estimates " herein for additional information on Plant Vogtle Units 3 and 4.

RESULTS OF OPERATIONS

Net Income (Loss)

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(743)	N/M	\$(651)	N/M

N/M - Not meaningful

Georgia Power's net loss after dividends on preferred and preference stock for the second quarter 2018 was \$396 million compared to net income after dividends on preferred and preference stock of \$347 million for the corresponding period in 2017 . For year-to-date 2018 , net loss after dividends on preferred and preference stock was \$44 million compared to net income after dividends on preferred and preference stock of \$607 million for the corresponding period in 2017 . The changes were primarily due to a \$1.1 billion (\$0.8 billion after tax) charge in the second quarter 2018 for an estimated probable loss related to Georgia Power's construction of Plant Vogtle Units 3 and 4, revenues deferred as a regulatory liability for future customer refunds related to the Tax Reform Legislation, and higher non-fuel operations and maintenance expenses. Partially offsetting the changes were lower federal income tax expense as a result of the Tax Reform Legislation and an increase in retail revenues associated with warmer weather in the second quarter 2018 compared to the corresponding period in 2017 . Also offsetting the change for year-to-date 2018 was an increase in retail revenues associated with colder weather in the first quarter 2018 compared to the corresponding period in 2017 . See Note (B) to the Condensed Financial Statements under "Nuclear Construction" herein for additional information on the estimated loss related to Georgia Power's construction of Plant Vogtle Units 3 and 4.

Retail Revenues

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(15)	(0.8)	\$95	2.6

In the second quarter 2018 , retail revenues were \$1.89 billion compared to \$1.90 billion for the corresponding period in 2017 . For year-to-date 2018 , retail revenues were \$3.69 billion compared to \$3.59 billion for the corresponding period in 2017 .

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Details of the changes in retail revenues were as follows:

	Second Quarter 2018		Year-to-Date 2018	
	<i>(in millions)</i>	<i>(% change)</i>	<i>(in millions)</i>	<i>(% change)</i>
Retail – prior year	\$ 1,904		\$ 3,593	
Estimated change resulting from –				
Rates and pricing	(58)	(3.0)	(108)	(3.0)
Sales growth	3	0.1	26	0.7
Weather	40	2.1	105	2.9
Fuel cost recovery	—	—	72	2.0
Retail – current year	\$ 1,889	(0.8)%	\$ 3,688	2.6 %

Revenues associated with changes in rates and pricing decreased in the second quarter and year-to-date 2018 when compared to the corresponding periods in 2017 primarily due to revenues deferred as a regulatory liability for future customer refunds related to the Tax Reform Legislation and a decrease in revenues related to the recovery of Plant Vogtle Units 3 and 4 construction financing costs under the NCCR tariff, also primarily related to the Tax Reform Legislation. Also contributing to the year-to-date 2018 decrease was the rate pricing effect of increased customer usage in the first quarter 2018. The decreases were partially offset by higher contributions from variable demand-driven pricing from commercial and industrial customers. See FUTURE EARNINGS POTENTIAL – "Retail Regulatory Matters – Rate Plans" herein for additional information on regulatory actions related to the Tax Reform Legislation. Also, see MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Retail Regulatory Matters – Nuclear Construction" of Georgia Power in Item 7 of the Form 10-K and FUTURE EARNINGS POTENTIAL – "Retail Regulatory Matters – Nuclear Construction – Regulatory Matters" herein for additional information related to the NCCR tariff.

Revenues attributable to changes in sales increased in the second quarter and year-to-date 2018 when compared to the corresponding periods in 2017. Weather-adjusted residential KWH sales were essentially flat for the second quarter 2018 and increased 1.1% for year-to-date 2018 largely due to customer growth. Weather-adjusted commercial KWH sales increased 0.7% and 1.5% for the second quarter and year-to-date 2018, respectively, largely due to customer growth. Weather-adjusted industrial KWH sales increased slightly in the second quarter 2018 and increased 0.5% for year-to-date 2018, primarily due to increased demand in the stone, clay, and glass, rubber, and textiles sectors. The increase in weather-adjusted industrial KWH sales for year-to-date 2018 was partially offset by decreased demand in the paper sector.

Fuel revenues and costs are allocated between retail and wholesale jurisdictions. In the second quarter 2018, retail fuel cost recovery revenues remained flat when compared to the corresponding period in 2017 primarily due to increased energy sales driven by warmer weather and higher purchased power costs, largely offset by lower natural gas prices. For year-to-date 2018, retail fuel cost recovery revenues increased \$72 million when compared to the corresponding period in 2017 primarily due to increased energy sales driven by colder weather in the first quarter 2018 and warmer weather in the second quarter 2018 and higher purchased power costs. Electric rates include provisions to periodically adjust billings for fluctuations in fuel costs, including the energy component of purchased power costs. Under these fuel cost recovery provisions, fuel revenues generally equal fuel expenses and do not affect net income. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Retail Regulatory Matters – Fuel Cost Recovery" of Georgia Power in Item 7 of the Form 10-K for additional information.

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Wholesale Revenues – Affiliates

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(6)	(66.7)	\$(4)	(23.5)

Wholesale revenues from sales to affiliated companies will vary depending on demand and the availability and cost of generating resources at each company. These affiliate sales are made in accordance with the IIC, as approved by the FERC. These transactions do not have a significant impact on earnings since this energy is generally sold at marginal cost.

In the second quarter 2018, wholesale revenues from sales to affiliates were \$3 million compared to \$9 million for the corresponding period in 2017. For year-to-date 2018, wholesale revenues from sales to affiliates were \$13 million compared to \$17 million for the corresponding period in 2017. The decreases were due to 67.1% and 57.9% decreases in KWH sales in the second quarter and year-to-date 2018, respectively, primarily due to the higher cost of Georgia Power-owned generation as compared to the market cost of available energy.

Other Revenues

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$25	26.3	\$36	18.8

In the second quarter 2018, other revenues were \$120 million compared to \$95 million for the corresponding period in 2017. For year-to-date 2018, other revenues were \$227 million compared to \$191 million for the corresponding period in 2017. The increases were primarily due to \$23 million and \$38 million of revenues in the second quarter and year-to-date 2018, respectively, primarily from unregulated sales of products and services that were reclassified as other revenues as a result of the adoption of ASC 606, *Revenue from Contracts with Customers* (ASC 606). In prior periods, these revenues were included in other income (expense), net. See Note (A) to the Condensed Financial Statements herein for additional information regarding Georgia Power's adoption of ASC 606.

Fuel and Purchased Power Expenses

	Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
	<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
Fuel	\$ (67)	(15.1)	\$ (25)	(3.1)
Purchased power – non-affiliates	8	7.8	42	22.0
Purchased power – affiliates	40	29.0	39	12.6
Total fuel and purchased power expenses	\$ (19)		\$ 56	

In the second quarter 2018, total fuel and purchased power expenses were \$667 million compared to \$686 million in the corresponding period in 2017. The decrease was primarily due to a \$37 million decrease related to the average cost of fuel and purchased power primarily due to lower natural gas prices and a \$49 million decrease related to the volume of KWHs generated due to scheduled generation outages, partially offset by an increase of \$67 million related to the volume of KWHs purchased due to warmer weather.

For year-to-date 2018, total fuel and purchased power expenses were \$1.37 billion compared to \$1.32 billion in the corresponding period in 2017. The increase was primarily due to a \$32 million increase related to the volume of KWHs generated and purchased due to colder weather in the first quarter 2018 and warmer weather in the second quarter 2018 and a \$28 million increase related to the average cost of purchased power primarily due to higher

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

energy prices, partially offset by a \$4 million decrease related to the average cost of fuel due to lower natural gas prices in the second quarter 2018.

Fuel and purchased power energy transactions do not have a significant impact on earnings since these fuel expenses are generally offset by fuel revenues through Georgia Power's fuel cost recovery mechanism. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Retail Regulatory Matters – Fuel Cost Recovery" of Georgia Power in Item 7 of the Form 10-K for additional information.

Details of Georgia Power's generation and purchased power were as follows:

	Second Quarter 2018	Second Quarter 2017	Year-to-Date 2018	Year-to-Date 2017
Total generation <i>(in billions of KWHs)</i>	15	16	31	30
Total purchased power <i>(in billions of KWHs)</i>	8	6	14	13
Sources of generation <i>(percent)</i> —				
Gas	40	37	42	41
Coal	29	36	29	32
Nuclear	28	25	26	25
Hydro	3	2	3	2
Cost of fuel, generated <i>(in cents per net KWH)</i> —				
Gas	2.61	2.75	2.67	2.76
Coal	3.26	3.20	3.31	3.23
Nuclear	0.83	0.84	0.83	0.84
Average cost of fuel, generated <i>(in cents per net KWH)</i>	2.30	2.43	2.37	2.41
Average cost of purchased power <i>(in cents per net KWH)</i> (*)	4.37	4.76	4.81	4.61

(*) Average cost of purchased power includes fuel purchased by Georgia Power for tolling agreements where power is generated by the provider.

Fuel

In the second quarter 2018, fuel expense was \$378 million compared to \$445 million in the corresponding period in 2017. The decrease was primarily due to a 9.3% decrease in the volume of KWHs generated largely due to scheduled generation outages and a 5.4% decrease in the average cost of fuel per KWH generated primarily due to lower natural gas prices.

For year-to-date 2018, fuel expense was \$790 million compared to \$815 million in the corresponding period in 2017. The decrease was primarily due to a 7.3% decrease in the volume of KWHs generated by coal largely due to scheduled generation outages and a 3.3% decrease in the average cost of fuel per KWH generated by natural gas, partially offset by a 2.5% increase in the average cost of fuel per KWH generated by coal.

Purchased Power – Non-Affiliates

In the second quarter 2018, purchased power expense from non-affiliates was \$111 million compared to \$103 million in the corresponding period in 2017. The increase was primarily due to a 3.6% increase in the average cost per KWH purchased primarily due to higher energy prices and a 1.9% increase in the volume of KWHs purchased primarily due to scheduled generation outages and warmer weather.

For year-to-date 2018, purchased power expense from non-affiliates was \$233 million compared to \$191 million in the corresponding period in 2017. The increase was primarily due to an 11.4% increase in the volume of KWHs purchased due to colder weather in the first quarter 2018, warmer weather in the second quarter 2018, and

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

scheduled generation outages and a 10.5% increase in the average cost per KWH purchased due to higher energy prices.

Energy purchases from non-affiliates will vary depending on the market prices of wholesale energy as compared to the cost of the Southern Company system's generation, demand for energy within the Southern Company system's electric service territory, and the availability of the Southern Company system's generation.

Purchased Power – Affiliates

In the second quarter 2018 , purchased power expense from affiliates was \$178 million compared to \$138 million in the corresponding period in 2017 . The increase was primarily due to a 31.4% increase in the volume of KWHs purchased due to scheduled generation outages and warmer weather, partially offset by an 11.6% decrease in the average cost per KWH purchased primarily resulting from lower energy prices.

For year-to-date 2018 , purchased power expense from affiliates was \$349 million compared to \$310 million in the corresponding period in 2017 . The increase was primarily due to a 2.4% increase in the volume of KWHs purchased due to colder weather in the first quarter 2018 and scheduled generation outages and warmer weather in the second quarter 2018 .

Energy purchases from affiliates will vary depending on demand and the availability and cost of generating resources at each company within the Southern Company system. These purchases are made in accordance with the IIC or other contractual agreements, all as approved by the FERC.

Other Operations and Maintenance Expenses

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$40	9.6	\$47	5.8

In the second quarter 2018 , other operations and maintenance expenses were \$457 million compared to \$417 million in the corresponding period in 2017 . The increase was primarily due to \$20 million of expenses from unregulated sales of products and services that were reclassified as other operations and maintenance expenses as a result of the adoption of ASC 606. In prior periods, these expenses were included in other income (expense), net. Also contributing to the increase were \$8 million related to the timing of scheduled generation outage costs, \$5 million primarily related to the timing of distribution overhead and underground line maintenance, \$4 million in demand-side management costs related to the timing of new programs, and \$3 million in billing adjustments with integrated transmission system owners, partially offset by a decrease of \$7 million associated with an employee attrition plan.

For year-to-date 2018 , other operations and maintenance expenses were \$863 million compared to \$816 million in the corresponding period in 2017 . The increase was primarily due to \$35 million of expenses from unregulated sales of products and services that were reclassified as other operations and maintenance expenses as a result of the adoption of ASC 606. In prior periods, these expenses were included in other income (expense), net. Also contributing to the increase were a \$19 million decrease in gains from sales of integrated transmission system assets and an \$11 million increase in demand-side management costs related to the timing of new programs, partially offset by decreases of \$10 million related to affiliate labor billing adjustments and \$6 million associated with an employee attrition plan.

See Note (A) to the Condensed Financial Statements herein for additional information regarding Georgia Power's adoption of ASC 606.

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Depreciation and Amortization

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$7	3.1	\$14	3.2

In the second quarter 2018 , depreciation and amortization was \$230 million compared to \$223 million in the corresponding period in 2017 . For year-to-date 2018 , depreciation and amortization was \$458 million compared to \$444 million in the corresponding period in 2017 . The increases were primarily due to increases of \$8 million and \$15 million related to additional plant in service in the second quarter and year-to-date 2018 , respectively.

Taxes Other Than Income Taxes

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$5	5.0	\$15	7.5

In the second quarter 2018 , taxes other than income taxes were \$106 million compared to \$101 million in the corresponding period in 2017 . For year-to-date 2018 , taxes other than income taxes were \$214 million compared to \$199 million in the corresponding period in 2017 . The increases were primarily due to increases in property taxes of \$4 million and \$7 million in the second quarter and year-to-date 2018 , respectively, as a result of an increase in the assessed value of property. Also contributing to the increase for year-to-date 2018 was a \$7 million increase in municipal franchise fees largely related to higher retail revenues.

Estimated Loss on Plant Vogtle Units 3 and 4

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$1,060	N/M	\$1,060	N/M

N/M - Not meaningful

In the second quarter 2018, an estimated probable loss of \$1.1 billion was recorded to reflect Georgia Power's revised estimate to complete construction and start-up of Plant Vogtle Units 3 and 4, which reflects the increase in costs included in the revised base capital cost forecast for which Georgia Power does not intend to seek rate recovery and costs included in the revised construction contingency estimate for which Georgia Power may seek rate recovery as and when such costs are appropriately included in the base capital cost forecast. See Note (B) to the Condensed Financial Statements under "Nuclear Construction" herein for additional information.

Income Taxes (Benefit)

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(342)	N/M	\$(405)	N/M

N/M - Not meaningful

In the second quarter 2018 , income tax benefit was \$143 million compared to income tax expense of \$199 million in the corresponding period in 2017 . For year-to-date 2018 , income tax benefit was \$50 million compared to income tax expense of \$355 million in the corresponding period in 2017 . The changes were primarily due to the reduction in pre-tax earnings (loss) resulting from the estimated probable loss related to Plant Vogtle Units 3 and 4 and a lower federal income tax rate as a result of the Tax Reform Legislation. See Note (B) to the Condensed Financial Statements under "Nuclear Construction" herein for additional information on the estimated loss related to Georgia

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Power's construction of Plant Vogtle Units 3 and 4. Also, see Note (H) to the Condensed Financial Statements under " Effective Tax Rate " herein for additional information on the Tax Reform Legislation.

Dividends on Preferred and Preference Stock

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(5)	(100.0)	\$(9)	(100.0)

In the second quarter and year-to-date 2018 , there were no dividends on preferred and preference stock compared to \$5 million and \$9 million , respectively, in the corresponding periods in 2017 . The decrease s were due to the redemption in October 2017 of all outstanding shares of Georgia Power's preferred and preference stock. See Note 6 to the financial statements of Georgia Power under "Outstanding Classes of Capital Stock" in Item 8 of the Form 10-K for additional information.

FUTURE EARNINGS POTENTIAL

The results of operations discussed above are not necessarily indicative of Georgia Power's future earnings potential. The level of Georgia Power's future earnings depends on numerous factors that affect the opportunities, challenges, and risks of Georgia Power's business of providing electric service. These factors include Georgia Power's ability to maintain a constructive regulatory environment that continues to allow for the timely recovery of prudently-incurred costs during a time of increasing costs and limited projected demand growth over the next several years. Plant Vogtle Units 3 and 4 construction and rate recovery are also major factors. Future earnings will be driven primarily by customer growth. Earnings will also depend upon maintaining and growing sales, considering, among other things, the adoption and/or penetration rates of increasingly energy-efficient technologies, increasing volumes of electronic commerce transactions, and more multi-family home construction, all of which could contribute to a net reduction in customer usage. Earnings are subject to a variety of other factors. These factors include weather, competition, new energy contracts with other utilities, energy conservation practiced by customers, the use of alternative energy sources by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth or decline in Georgia Power's service territory. Demand for electricity is primarily driven by the pace of economic growth that may be affected by changes in regional and global economic conditions, which may impact future earnings.

For additional information relating to these issues, see RISK FACTORS in Item 1A and MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL of Georgia Power in Item 7 of the Form 10-K.

Environmental Matters

Georgia Power's operations are regulated by state and federal environmental agencies through a variety of laws and regulations governing air, water, land, and protection of other natural resources. Georgia Power maintains comprehensive environmental compliance and greenhouse gas (GHG) strategies to assess upcoming requirements and compliance costs associated with these environmental laws and regulations. The costs, including capital expenditures and operations and maintenance costs, required to comply with environmental laws and regulations and to achieve stated goals may impact future unit retirement and replacement decisions, results of operations, cash flows, and financial condition. Related costs may result from the installation of additional environmental controls, closure and monitoring of CCR facilities, unit retirements, and adding or changing fuel sources for certain existing units, as well as related upgrades to the transmission system. A major portion of these costs are expected to be recovered through existing ratemaking provisions. The ultimate impact of environmental laws and regulations and the GHG goals discussed below will depend on various factors, such as state adoption and implementation of requirements, the availability and cost of any deployed control technology, and the outcome of pending and/or future legal challenges.

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

New or revised environmental laws and regulations could affect many areas of Georgia Power's operations. The impact of any such changes cannot be determined at this time. Environmental compliance costs could affect earnings if such costs cannot continue to be fully recovered in rates on a timely basis. Georgia Power's Environmental Compliance Cost Recovery (ECCR) tariff allows for the recovery of capital and operations and maintenance costs related to environmental controls mandated by state and federal regulations. Further, increased costs that are recovered through regulated rates could contribute to reduced demand for electricity, which could negatively affect results of operations, cash flows, and financial condition. Additionally, many commercial and industrial customers may also be affected by existing and future environmental requirements, which for some may have the potential to ultimately affect their demand for electricity. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters" of Georgia Power in Item 7 and Note 3 to the financial statements of Georgia Power under "Environmental Matters" in Item 8 of the Form 10-K for additional information.

Environmental Laws and Regulations

Water Quality

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters – Environmental Laws and Regulations – Water Quality" of Georgia Power in Item 7 of the Form 10-K for additional information regarding the effluent limitations guidelines (ELG) rule.

On May 2, 2018, the EPA updated its anticipated final rulemaking schedule for ELG from September 2020 to December 2019. The impact of any changes to the ELG rule will depend on the content of the final rule and the outcome of any legal challenges and cannot be determined at this time.

Coal Combustion Residuals

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters – Environmental Laws and Regulations – Coal Combustion Residuals" of Georgia Power in Item 7 of the Form 10-K for additional information regarding the Disposal of Coal Combustion Residuals from Electric Utilities rule (CCR Rule).

On July 30, 2018, the EPA published certain amendments to the CCR Rule, which will be effective August 29, 2018. These amendments extend the date from April 2019 to October 31, 2020 to cease sending CCR and other waste streams to impoundments that demonstrate compliance with all except two specified criteria. These amendments also establish groundwater protection standards for four constituents that do not have established EPA maximum contaminant levels and allow a participating state director or the EPA (where the EPA is the permitting authority) to suspend groundwater monitoring requirements under certain circumstances. Specific site impacts are being evaluated by Georgia Power.

Georgia Power continues to perform engineering studies related to its plans to close the ash ponds at all of its generating plants, including one jointly owned with Gulf Power, in compliance with federal and state CCR rules. Georgia Power also continues to refine its closure strategy and cost estimates for each ash pond and is preparing permit applications as required by the State of Georgia CCR rule. While Georgia Power believes its recorded liability for ash pond closures appropriately reflects its obligations under the current closure strategies it has elected, changes to such strategies and cost estimates would likely result in additional closure costs which would increase Georgia Power's ARO liability. It is not currently possible to determine the magnitude of an increase related to a change in closure strategies nor an increase related to ongoing engineering studies for the current closure strategies, and the timing of future cash outflows are indeterminable at this time. As permit applications advance, engineering studies continue, and the timing of ash pond closures develop further on a plant-by-plant basis during the second half of 2018 and in the future, Georgia Power will record any changes as necessary to its ARO liability, which could be material. Georgia Power expects to continue to periodically update these cost estimates as necessary, which could change further as additional information becomes available. See Note (A) to the Condensed Financial Statements under "Asset Retirement Obligations" herein for additional information.

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Absent continued recovery of ARO costs through regulated rates, Georgia Power's results of operations, cash flows, and financial condition could be materially impacted. The ultimate outcome of these matters cannot be determined at this time.

Global Climate Issues

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters – Global Climate Issues" of Georgia Power in Item 7 of the Form 10-K for additional information.

Through 2017, the Southern Company system has achieved an estimated GHG emission reduction of 36% since 2007. In April 2018, Southern Company established an intermediate goal of a 50% reduction in carbon emissions from 2007 levels by 2030 and a long-term goal of low- to no-carbon operations by 2050. To achieve these goals, the Southern Company system expects to continue growing its renewable energy portfolio, optimize technology advancements to modernize its transmission and distribution systems, increase the use of natural gas for generation, complete construction of Plant Vogtle Units 3 and 4, invest in energy efficiency, and continue research and development efforts focused on technologies to lower GHG emissions. The Southern Company system's ability to achieve these goals also will be dependent on many external factors, including supportive national energy policies, low natural gas prices, and the development, deployment, and advancement of relevant energy technologies. The ultimate outcome of this matter cannot be determined at this time.

FERC Matters

Market-Based Rate Authority

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "FERC Matters" of Georgia Power in Item 7 of the Form 10-K for additional information regarding proceedings related to the traditional electric operating companies' (including Georgia Power's) and Southern Power's 2014 and 2017 triennial market power analyses.

On May 4, 2018, the FERC issued an order terminating both proceedings, finding that the traditional electric operating companies (including Georgia Power) and Southern Power satisfy the FERC's standards for market-based rates. On May 9, 2018, the traditional electric operating companies (including Georgia Power) and Southern Power made the compliance filing required by the order. These proceedings are essentially concluded.

Open Access Transmission Tariff

On May 10, 2018, the Alabama Municipal Electric Authority and Cooperative Energy filed with the FERC a complaint against SCS and the traditional electric operating companies (including Georgia Power) claiming that the current 11.25% base ROE used in calculating the annual transmission revenue requirements of the traditional electric operating companies' (including Georgia Power's) open access transmission tariff is unjust and unreasonable as measured by the applicable FERC standards. The complaint requests that the base ROE be set no higher than 8.65% and that the FERC order refunds for the difference in revenue requirements that results from applying a just and reasonable ROE established in this proceeding upon determining the current ROE is unjust and unreasonable. On June 18, 2018, SCS and the traditional electric operating companies (including Georgia Power) filed their response challenging the adequacy of the showing presented by the complainants and offering support for the current ROE. The ultimate outcome of this matter cannot be determined at this time.

Retail Regulatory Matters

Georgia Power's revenues from regulated retail operations are collected through various rate mechanisms subject to the oversight of the Georgia PSC. Georgia Power currently recovers its costs from the regulated retail business through the 2013 ARP, which includes traditional base tariff rates, Demand-Side Management tariffs, ECCR tariffs, and Municipal Franchise Fee tariffs. In addition, financing costs related to certified construction costs of Plant Vogtle Units 3 and 4 are being collected through the NCCR tariff and fuel costs are collected through a separate fuel cost recovery tariff. See " Nuclear Construction " herein and Note 3 to the financial statements of Georgia Power

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

under "Retail Regulatory Matters – Nuclear Construction" in Item 8 of the Form 10-K for additional information regarding the NCCR tariff. Also see MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Retail Regulatory Matters – Fuel Cost Recovery" of Georgia Power in Item 7 of the Form 10-K for additional information regarding fuel cost recovery.

Rate Plans

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Retail Regulatory Matters – Rate Plans" of Georgia Power in Item 7 of the Form 10-K for additional information regarding Georgia Power's 2013 ARP and the Georgia PSC's 2018 order related to the Tax Reform Legislation.

On April 3, 2018, the Georgia PSC approved the Tax Reform Settlement Agreement. Pursuant to the Tax Reform Settlement Agreement, to reflect the federal income tax rate reduction impact of the Tax Reform Legislation, Georgia Power will refund to customers a total of \$330 million through bill credits of \$131 million in October 2018, \$96 million in June 2019, and \$103 million in February 2020. In addition, Georgia Power is deferring as a regulatory liability (i) the revenue equivalent of the tax expense reduction resulting from legislation lowering the Georgia state income tax rate from 6.00% to 5.75% in 2019 and (ii) the entire benefit of approximately \$700 million in federal and state excess accumulated deferred income taxes. The amortization of these regulatory liabilities is expected to be addressed in Georgia Power's next base rate case, which is scheduled to be filed by July 1, 2019. If there is not a base rate case in 2019, customers will receive \$185 million in annual bill credits beginning in 2020, with any additional federal and state income tax savings deferred as a regulatory liability, until Georgia Power's next base rate case.

To address the negative cash flow and credit metric impacts of the Tax Reform Legislation, the Georgia PSC also approved an increase in Georgia Power's retail equity ratio to the lower of (i) Georgia Power's actual common equity weight in its capital structure or (ii) 55%, until Georgia Power's next base rate case. Benefits from reduced federal income tax rates in excess of the amounts refunded to customers will be retained by Georgia Power to cover the carrying costs of the incremental equity in 2018 and 2019.

Nuclear Construction

See Note 3 to the financial statements of Georgia Power under "Retail Regulatory Matters – Nuclear Construction" in Item 8 of the Form 10-K for additional information regarding the construction of Plant Vogtle Units 3 and 4, VCM reports, and the NCCR tariff.

In 2009, the Georgia PSC certified construction of Plant Vogtle Units 3 and 4. In 2012, the NRC issued the related combined construction and operating licenses, which allowed full construction of the two AP1000 nuclear units (with electric generating capacity of approximately 1,100 MWs each) and related facilities to begin. Until March 2017, construction on Plant Vogtle Units 3 and 4 continued under the Vogtle 3 and 4 Agreement, which was a substantially fixed price agreement. In March 2017, the EPC Contractor filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy Code.

In connection with the EPC Contractor's bankruptcy filing, Georgia Power, acting for itself and as agent for the Vogtle Owners, entered into the Interim Assessment Agreement with the EPC Contractor to allow construction to continue. The Interim Assessment Agreement expired in July 2017 when Georgia Power, acting for itself and as agent for the other Vogtle Owners, and the EPC Contractor entered into the Vogtle Services Agreement. Under the Vogtle Services Agreement, Westinghouse provides facility design and engineering services, procurement and technical support, and staff augmentation on a time and materials cost basis. The Vogtle Services Agreement will continue until the start-up and testing of Plant Vogtle Units 3 and 4 are complete and electricity is generated and sold from both units. The Vogtle Services Agreement is terminable by the Vogtle Owners upon 30 days' written notice.

In October 2017, Georgia Power, acting for itself and as agent for the other Vogtle Owners, entered into a construction completion agreement with Bechtel, whereby Bechtel will serve as the primary contractor for the remaining construction activities for Plant Vogtle Units 3 and 4 (Bechtel Agreement). The Bechtel Agreement is a

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

cost reimbursable plus fee arrangement, whereby Bechtel is reimbursed for actual costs plus a base fee and an at-risk fee, which is subject to adjustment based on Bechtel's performance against cost and schedule targets. Each Vogtle Owner is severally (not jointly) liable for its proportionate share, based on its ownership interest, of all amounts owed to Bechtel under the Bechtel Agreement. The Vogtle Owners may terminate the Bechtel Agreement at any time for their convenience, provided that the Vogtle Owners will be required to pay amounts related to work performed prior to the termination (including the applicable portion of the base fee), certain termination-related costs, and, at certain stages of the work, the applicable portion of the at-risk fee. Bechtel may terminate the Bechtel Agreement under certain circumstances, including certain Vogtle Owner suspensions of work, certain breaches of the Bechtel Agreement by the Vogtle Owners, Vogtle Owner insolvency, and certain other events. Pursuant to the Loan Guarantee Agreement between Georgia Power and the DOE, Georgia Power is required to obtain the DOE's approval of the Bechtel Agreement prior to obtaining any further advances under the Loan Guarantee Agreement.

In December 2017, the Georgia PSC approved Georgia Power's seventeenth VCM report, which included a recommendation to continue construction of Plant Vogtle Units 3 and 4, with Southern Nuclear serving as project manager and Bechtel serving as the primary construction contractor.

Cost and Schedule

In preparation for its nineteenth VCM filing, Georgia Power requested Southern Nuclear to perform a full cost reforecast for the project. Georgia Power's approximate proportionate share of the remaining estimated capital cost to complete Plant Vogtle Units 3 and 4 by the expected in-service dates of November 2021 and November 2022, respectively, is as follows:

	<i>(in billions)</i>
Base project capital cost forecast ^{(a)(b)}	\$ 8.0
Construction contingency estimate	0.4
Total project capital cost forecast ^{(a)(b)}	8.4
Net investment as of June 30, 2018 ^(b)	(4.0)
Remaining estimate to complete ^(a)	\$ 4.4

(a) Excludes financing costs expected to be capitalized through AFUDC of approximately \$350 million .

(b) Net of \$1.7 billion received from Toshiba in 2017 under the Guarantee Settlement Agreement and \$188 million in Customer Refunds recognized as a regulatory liability in 2017.

Georgia Power estimates that its financing costs for construction of Plant Vogtle Units 3 and 4 will total approximately \$3.2 billion , of which \$1.7 billion had been incurred through June 30, 2018 .

The \$0.7 billion increase to the base capital cost forecast reflected in the table above primarily results from changed assumptions related to the finalization of contract scopes and management responsibilities for Bechtel and over 60 subcontractors, labor productivity rates, and craft labor incentives, as well as the related levels of project management, oversight, and support, including field supervision and engineering support.

Although Georgia Power believes these incremental costs are reasonable and necessary to complete the project and the Georgia PSC's order in the seventeenth VCM proceeding specifically states that the construction of Plant Vogtle Units 3 and 4 is not subject to a cost cap, Georgia Power does not intend to seek rate recovery for these cost increases included in the current base capital cost forecast (or any related financing costs), which will be filed with the Georgia PSC in the nineteenth VCM report at the end of August 2018. In connection with future VCM filings, Georgia Power may request the Georgia PSC to evaluate costs currently included in the construction contingency estimate for rate recovery as and when they are appropriately included in the base capital cost forecast. After considering the significant level of uncertainty that exists regarding the future recoverability of costs included in the construction contingency estimate since the ultimate outcome of these matters is subject to the outcome of future assessments by management, as well as Georgia PSC decisions in these future regulatory proceedings, Georgia

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Power has recorded a total pre-tax charge to income of \$1.1 billion (\$0.8 billion after tax), which includes the total increase in the capital cost forecast and construction contingency estimate as of June 30, 2018 .

Subsequent to the EPC Contractor bankruptcy filing, a number of subcontractors to the EPC Contractor alleged non-payment by the EPC Contractor for amounts owed for work performed on Plant Vogtle Units 3 and 4. Georgia Power, acting for itself and as agent for the Vogtle Owners, has taken actions to remove liens filed by these subcontractors through the posting of surety bonds. Related to such liens, certain subcontractors have filed, and additional subcontractors may file, lawsuits against the EPC Contractor and the Vogtle Owners to preserve their payment rights with respect to such claims. All known amounts associated with the removal of subcontractor liens and other EPC Contractor pre-petition accounts payable have been paid or accrued as of June 30, 2018 . The ultimate liability is expected to be finalized in connection with the completion of the sale of Westinghouse.

As construction continues, challenges with management of contractors, subcontractors, and vendors; labor productivity, availability, and/or cost escalation; procurement, fabrication, delivery, assembly, and/or installation, including any required engineering changes, of plant systems, structures, and components (some of which are based on new technology that is just beginning initial operation in the global nuclear industry at this scale); or other issues could arise and change the projected schedule and estimated cost.

There have been technical and procedural challenges to the construction and licensing of Plant Vogtle Units 3 and 4 at the federal and state level and additional challenges may arise. Processes are in place that are designed to assure compliance with the requirements specified in the Westinghouse Design Control Document and the combined construction and operating licenses, including inspections by Southern Nuclear and the NRC that occur throughout construction. As a result of such compliance processes, certain license amendment requests have been filed and approved or are pending before the NRC. Various design and other licensing-based compliance matters, including the timely resolution of Inspections, Tests, Analyses, and Acceptance Criteria and the related approvals by the NRC, may arise, which may result in additional license amendments or require other resolution. If any license amendment requests or other licensing-based compliance issues are not resolved in a timely manner, there may be delays in the project schedule that could result in increased costs.

The ultimate outcome of these matters cannot be determined at this time. However, any extension of the project schedule is currently estimated to result in additional base capital costs of approximately \$50 million per month, based on Georgia Power's ownership interests, and AFUDC of approximately \$12 million per month. While Georgia Power is not precluded from seeking recovery of any future capital cost forecast increase, management will ultimately determine whether or not to seek recovery. Any further changes to the capital cost forecast that are not expected to be recoverable through regulated rates will be required to be charged to income and such charges could be material.

Joint Owner Contracts

In November 2017, the Vogtle Owners entered into an amendment to their joint ownership agreements for Plant Vogtle Units 3 and 4 (as amended, Vogtle Joint Ownership Agreements) to provide for, among other conditions, additional Vogtle Owner approval requirements. Pursuant to the Vogtle Joint Ownership Agreements, the holders of at least 90% of the ownership interests in Plant Vogtle Units 3 and 4 must vote to continue construction if certain adverse events occur, including: (i) the bankruptcy of Toshiba; (ii) termination or rejection in bankruptcy of certain agreements, including the Vogtle Services Agreement or the Bechtel Agreement; (iii) the Georgia PSC or Georgia Power determines that any of Georgia Power's costs relating to the construction of Plant Vogtle Units 3 and 4 will not be recovered in retail rates because such costs are deemed unreasonable or imprudent; or (iv) an increase in the construction budget contained in the seventeenth VCM report of more than \$1 billion or extension of the project schedule contained in the seventeenth VCM report of more than one year . In addition, pursuant to the Vogtle Joint Ownership Agreements, the required approval of holders of ownership interests in Plant Vogtle Units 3 and 4 is at least (i) 90% for a change of the primary construction contractor and (ii) 67% for material amendments to the Vogtle Services Agreement or agreements with Southern Nuclear or the primary construction contractor, including the Bechtel Agreement. The Vogtle Joint Ownership Agreements also confirm that the Vogtle Owners' sole recourse against Georgia Power or Southern Nuclear for any action or inaction in connection with their performance as agent

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

for the Vogtle Owners is limited to removal of Georgia Power and/or Southern Nuclear as agent, except in cases of willful misconduct.

As a result of the increase in the total project capital cost forecast and Georgia Power's decision not to seek rate recovery of the increase in the base capital costs as described in "Cost and Schedule" herein, the holders of at least 90% of the ownership interests in Plant Vogtle Units 3 and 4 must vote to continue construction. The Vogtle Owners are expected to conduct these votes in the third quarter 2018.

If the holders of at least 90% of the ownership interests in Plant Vogtle Units 3 and 4 do not vote to continue construction, the Vogtle Joint Ownership Agreements provide that the project will be cancelled, and construction will cease. In the event that fewer than 90% of the Vogtle Owners vote to continue construction, Georgia Power and the other Vogtle Owners will assess options for Plant Vogtle Units 3 and 4. If Plant Vogtle Units 3 and 4 were cancelled and Georgia Power was unable to recover costs it has incurred in connection with the project, Georgia Power's results of operations, cash flow, and financial condition would be materially impacted. The ultimate outcome of this matter cannot be determined at this time.

Regulatory Matters

In 2009, the Georgia PSC voted to certify construction of Plant Vogtle Units 3 and 4 with a certified capital cost of \$4.418 billion . In addition, in 2009 the Georgia PSC approved inclusion of the Plant Vogtle Units 3 and 4 related CWIP accounts in rate base, and the State of Georgia enacted the Georgia Nuclear Energy Financing Act, which allows Georgia Power to recover financing costs for Plant Vogtle Units 3 and 4. Financing costs are recovered on all applicable certified costs through annual adjustments to the NCCR tariff up to the certified capital cost of \$4.418 billion . As of June 30, 2018 , Georgia Power had recovered approximately \$1.7 billion of financing costs. Financing costs related to capital costs above \$4.418 billion will be recovered through AFUDC; however, Georgia Power will not record AFUDC related to any capital costs in excess of the total deemed reasonable by the Georgia PSC (currently \$7.3 billion) and not requested for rate recovery.

Georgia Power is required to file semi-annual VCM reports with the Georgia PSC by February 28 and August 31 of each year. In 2013, in connection with the eighth VCM report, the Georgia PSC approved a stipulation between Georgia Power and the staff of the Georgia PSC to waive the requirement to amend the Plant Vogtle Units 3 and 4 certificate in accordance with the 2009 certification order until the completion of Plant Vogtle Unit 3, or earlier if deemed appropriate by the Georgia PSC and Georgia Power.

In 2016, the Georgia PSC voted to approve a settlement agreement (Vogtle Cost Settlement Agreement) resolving certain prudency matters in connection with the fifteenth VCM report. In December 2017, the Georgia PSC voted to approve (and issued its related order on January 11, 2018) certain recommendations made by Georgia Power in the seventeenth VCM report and modifying the Vogtle Cost Settlement Agreement. The Vogtle Cost Settlement Agreement, as modified by the January 11, 2018 order, resolved the following regulatory matters related to Plant Vogtle Units 3 and 4: (i) none of the \$3.3 billion of costs incurred through December 31, 2015 and reflected in the fourteenth VCM report should be disallowed from rate base on the basis of imprudence; (ii) the Contractor Settlement Agreement was reasonable and prudent and none of the amounts paid pursuant to the Contractor Settlement Agreement should be disallowed from rate base on the basis of imprudence; (iii) (a) capital costs incurred up to \$5.68 billion would be presumed to be reasonable and prudent with the burden of proof on any party challenging such costs, (b) Georgia Power would have the burden to show that any capital costs above \$5.68 billion were prudent, and (c) a revised capital cost forecast of \$7.3 billion (after reflecting the impact of payments received under the Guarantee Settlement Agreement and Customer Refunds) was found reasonable; (iv) construction of Plant Vogtle Units 3 and 4 should be completed, with Southern Nuclear serving as project manager and Bechtel as primary contractor; (v) approved and deemed reasonable Georgia Power's revised schedule placing Plant Vogtle Units 3 and 4 in service in November 2021 and November 2022, respectively; (vi) confirmed that the revised cost forecast does not represent a cost cap and that prudence decisions on cost recovery will be made at a later date, consistent with applicable Georgia law; (vii) reduced the ROE used to calculate the NCCR tariff (a) from 10.95% (the ROE rate setting point authorized by the Georgia PSC in the 2013 ARP) to 10.00% effective January 1, 2016, (b) from 10.00% to 8.30%, effective January 1, 2020, and (c) from 8.30% to 5.30%, effective January 1, 2021

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(provided that the ROE in no case will be less than Georgia Power's average cost of long-term debt); (viii) reduced the ROE used for AFUDC equity for Plant Vogtle Units 3 and 4 from 10.00% to Georgia Power's average cost of long-term debt, effective January 1, 2018; and (ix) agreed that upon Unit 3 reaching commercial operation, retail base rates would be adjusted to include carrying costs on those capital costs deemed prudent in the Vogtle Cost Settlement Agreement. The January 11, 2018 order also stated that if Plant Vogtle Units 3 and 4 are not commercially operational by June 1, 2021 and June 1, 2022, respectively, the ROE used to calculate the NCCR tariff will be further reduced by 10 basis points each month (but not lower than Georgia Power's average cost of long-term debt) until the respective unit is commercially operational. The ROE reductions negatively impacted earnings by approximately \$25 million in 2017 and are estimated to have negative earnings impacts of approximately \$100 million in 2018 and an aggregate of \$585 million from 2019 to 2022.

In its January 11, 2018 order, the Georgia PSC also stated if other conditions change and assumptions upon which Georgia Power's seventeenth VCM report are based do not materialize, the Georgia PSC reserved the right to reconsider the decision to continue construction.

On February 12, 2018, Georgia Interfaith Power & Light, Inc. and Partnership for Southern Equity, Inc. filed a petition appealing the Georgia PSC's January 11, 2018 order with the Fulton County Superior Court. On March 8, 2018, Georgia Watch filed a similar appeal to the Fulton County Superior Court for judicial review of the Georgia PSC's final decision and denial of Georgia Watch's motion for reconsideration. Georgia Power believes the two appeals have no merit; however, an adverse outcome in either appeal could have a material impact on Georgia Power's results of operations, financial condition, and liquidity.

The Georgia PSC has approved seventeen VCM reports covering the periods through June 30, 2017, including total construction capital costs incurred through that date of \$4.4 billion. On August 21, 2018, the Georgia PSC is scheduled to vote on Georgia Power's eighteenth VCM report, which requested approval of \$448 million of construction capital costs (excluding the \$1.7 billion received from Toshiba under the Guarantee Settlement Agreement and the \$188 million in Customer Refunds recognized as a regulatory liability) incurred from July 1, 2017 through December 31, 2017.

On August 31, 2018, Georgia Power will file its nineteenth VCM report with the Georgia PSC, which will reflect the revised capital cost forecast discussed previously and request approval of \$578 million of construction capital costs incurred from January 1, 2018 through June 30, 2018.

The ultimate outcome of these matters cannot be determined at this time.

See RISK FACTORS of Georgia Power in Item 1A herein and of the Form 10-K for a discussion of certain risks associated with the licensing, construction, and operation of nuclear generating units, including potential impacts that could result from a major incident at a nuclear facility anywhere in the world.

DOE Financing

As of June 30, 2018, Georgia Power had borrowed \$2.6 billion related to Plant Vogtle Units 3 and 4 costs through the Loan Guarantee Agreement and a multi-advance credit facility among Georgia Power, the DOE, and the FFB, which provides for borrowings of up to \$3.46 billion, subject to the satisfaction of certain conditions. In September 2017, the DOE issued a conditional commitment to Georgia Power for up to approximately \$1.67 billion in additional guaranteed loans under the Loan Guarantee Agreement. In June 2018, the DOE approved a request by Georgia Power to extend the conditional commitment to September 30, 2018. Any further extension must be approved by the DOE. Final approval and issuance of these additional loan guarantees by the DOE cannot be assured and are subject to the negotiation of definitive agreements, completion of due diligence by the DOE, receipt of any necessary regulatory approvals, and satisfaction of other conditions, including the Vogtle Owners' votes to continue construction. See Note 6 to the financial statements of Georgia Power under "DOE Loan Guarantee Borrowings" in Item 8 of the Form 10-K and Note (F) to the Condensed Financial Statements under "DOE Loan Guarantee Borrowings" herein for additional information, including applicable covenants, events of default, mandatory prepayment events (including any decision not to continue construction of Plant Vogtle Units 3 and 4), and conditions to borrowing.

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The ultimate outcome of these matters cannot be determined at this time.

Income Tax Matters

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Income Tax Matters" of Georgia Power in Item 7 of the Form 10-K and FINANCIAL CONDITION AND LIQUIDITY – "Credit Rating Risk," Note (B) to the Condensed Financial Statements under "Regulatory Matters – Georgia Power," and Note (H) to the Condensed Financial Statements herein for information regarding the Tax Reform Legislation and related regulatory actions.

Other Matters

Georgia Power is involved in various other matters being litigated and regulatory matters that could affect future earnings. In addition, Georgia Power is subject to certain claims and legal actions arising in the ordinary course of business. Georgia Power's business activities are subject to extensive governmental regulation related to public health and the environment, such as laws and regulations governing air, water, land, and protection of natural resources. Litigation over environmental issues and claims of various types, including property damage, personal injury, common law nuisance, and citizen enforcement of environmental laws and regulations has occurred throughout the U.S. This litigation has included claims for damages alleged to have been caused by CO₂ and other emissions, CCR, and alleged exposure to hazardous materials, and/or requests for injunctive relief in connection with such matters.

The ultimate outcome of such pending or potential litigation or regulatory matters cannot be predicted at this time; however, for current proceedings not specifically reported in Note (B) to the Condensed Financial Statements herein, management does not anticipate that the ultimate liabilities, if any, arising from such current proceedings would have a material effect on Georgia Power's financial statements. See Note (B) to the Condensed Financial Statements herein for a discussion of various other contingencies, regulatory matters, and other matters being litigated which may affect future earnings potential.

ACCOUNTING POLICIES

Application of Critical Accounting Policies and Estimates

Georgia Power prepares its financial statements in accordance with GAAP. Significant accounting policies are described in Note 1 to the financial statements of Georgia Power in Item 8 of the Form 10-K. In the application of these policies, certain estimates are made that may have a material impact on Georgia Power's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. See MANAGEMENT'S DISCUSSION AND ANALYSIS – ACCOUNTING POLICIES – "Application of Critical Accounting Policies and Estimates" of Georgia Power in Item 7 of the Form 10-K for a complete discussion of Georgia Power's critical accounting policies and estimates.

Estimated Cost, Schedule, and Rate Recovery for the Construction of Plant Vogtle Units 3 and 4

In December 2016, the Georgia PSC approved the Vogtle Cost Settlement Agreement, which resolved certain prudency matters in connection with Georgia Power's fifteenth VCM report. In December 2017, the Georgia PSC approved Georgia Power's seventeenth VCM report, which included a recommendation to continue construction of Plant Vogtle Units 3 and 4, with Southern Nuclear serving as project manager and Bechtel serving as the primary construction contractor, as well as a modification of the Vogtle Cost Settlement Agreement. The Georgia PSC's related order stated that under the modified Vogtle Cost Settlement Agreement, (i) none of the \$3.3 billion of costs incurred through December 31, 2015 should be disallowed as imprudent; (ii) capital costs incurred up to \$5.68 billion would be presumed to be reasonable and prudent with the burden of proof on any party challenging such costs; (iii) Georgia Power would have the burden of proof to show that any capital costs above \$5.68 billion were prudent; (iv) Georgia Power's total project capital cost forecast of \$7.3 billion (net of \$1.7 billion received under the Guarantee Settlement Agreement and \$188 million in Customer Refunds recognized as a regulatory liability in

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

2017) was found reasonable and did not represent a cost cap; and (v) prudence decisions would be made subsequent to achieving fuel load for Unit 4.

In its order, the Georgia PSC also stated if other conditions change and assumptions upon which Georgia Power's seventeenth VCM report are based do not materialize, the Georgia PSC reserved the right to reconsider the decision to continue construction.

In the second quarter 2018, Georgia Power revised its base cost forecast and estimated contingency to complete construction and start-up of Plant Vogtle Units 3 and 4 to \$8.0 billion and \$0.4 billion, respectively, for a total project capital cost forecast of \$8.4 billion (net of \$1.7 billion received under the Guarantee Settlement Agreement and \$188 million in Customer Refunds recognized as a regulatory liability in 2017). Although Georgia Power believes these incremental costs are reasonable and necessary to complete the project and the Georgia PSC has stated the \$7.3 billion estimate included in the seventeenth VCM proceeding does not represent a cost cap, Georgia Power does not intend to seek rate recovery for the \$0.7 billion increase in costs included in the revised base capital cost forecast, which will be filed with the Georgia PSC in the nineteenth VCM report on August 31, 2018. In connection with future VCM filings, Georgia Power may request the Georgia PSC to evaluate costs included in the revised construction contingency estimate for rate recovery as and when they are appropriately included in the base capital cost forecast. After considering the significant level of uncertainty that exists regarding the future recoverability of costs included in the construction contingency estimate since the ultimate outcome of these matters is subject to the outcome of future assessments by management, as well as Georgia PSC decisions in these future regulatory proceedings, Georgia Power has recorded a total pre-tax charge to income of \$1.1 billion (\$0.8 billion after tax) as of June 30, 2018.

Georgia Power's revised cost estimate reflects an expected in-service date of November 2021 for Unit 3 and November 2022 for Unit 4.

As construction continues, challenges with management of contractors, subcontractors, and vendors; labor productivity, availability, and/or cost escalation; procurement, fabrication, delivery, assembly, and/or installation, including any required engineering changes, of plant systems, structures, and components (some of which are based on new technology that is just beginning initial operation in the global nuclear industry at this scale); or other issues could arise and change the projected schedule and estimated cost.

There have been technical and procedural challenges to the construction and licensing of Plant Vogtle Units 3 and 4 at the federal and state level and additional challenges may arise. Processes are in place that are designed to assure compliance with the requirements specified in the Westinghouse Design Control Document and the combined construction and operating licenses, including inspections by Southern Nuclear and the NRC that occur throughout construction. As a result of such compliance processes, certain license amendment requests have been filed and approved or are pending before the NRC. Various design and other licensing-based compliance matters, including the timely resolution of Inspections, Tests, Analyses, and Acceptance Criteria and the related approvals by the NRC, may arise, which may result in additional license amendments or require other resolution. If any license amendment requests or other licensing-based compliance issues are not resolved in a timely manner, there may be delays in the project schedule that could result in increased costs.

The ultimate outcome of these matters cannot be determined at this time. Any extension of the in-service dates of November 2021 for Unit 3 and November 2022 for Unit 4 is currently estimated to result in additional base capital costs of approximately \$50 million per month, based on Georgia Power's ownership interests, and AFUDC of approximately \$12 million per month. While Georgia Power is not precluded from seeking recovery of any future capital cost forecast increase, management will ultimately determine whether or not to seek recovery. Any further changes to the capital cost forecast that are not expected to be recoverable through regulated rates will be required to be charged to income and such charges could be material.

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Given the significant complexity involved in estimating the future costs to complete construction and start-up of Plant Vogtle Units 3 and 4 and the significant management judgment necessary to assess the related uncertainties surrounding future rate recovery of any projected cost increases, as well as the potential impact on Georgia Power's results of operations and cash flows, Georgia Power considers these items to be critical accounting estimates. See Note 3 to the financial statements of Georgia Power under "Retail Regulatory Matters – Nuclear Construction" in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements under "Nuclear Construction" herein for additional information.

Recently Issued Accounting Standards

See MANAGEMENT'S DISCUSSION AND ANALYSIS – ACCOUNTING POLICIES – "Recently Issued Accounting Standards" of Georgia Power in Item 7 of the Form 10-K for additional information regarding ASU No. 2016-02, *Leases (Topic 842)*. See Note (A) to the Condensed Financial Statements herein for information regarding Georgia Power's recently adopted accounting standards.

FINANCIAL CONDITION AND LIQUIDITY

Overview

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Overview" of Georgia Power in Item 7 of the Form 10-K for additional information. Georgia Power's financial condition remained stable at June 30, 2018. Georgia Power intends to continue to monitor its access to short-term and long-term capital markets as well as bank credit agreements to meet future capital and liquidity needs. See "Capital Requirements and Contractual Obligations," "Sources of Capital," and "Financing Activities" herein for additional information.

Net cash provided from operating activities totaled \$1.07 billion for the first six months of 2018 compared to \$482 million for the corresponding period in 2017. The increase was primarily due to increased fuel cost recovery, a decrease in current income taxes related to the Tax Reform Legislation, income tax refunds received, and the timing of fossil fuel stock purchases and property tax payments. Net cash used for investing activities totaled \$1.39 billion for the first six months of 2018 primarily related to installation of equipment to comply with environmental standards and construction of generation, transmission, and distribution facilities. Net cash used for financing activities totaled \$520 million for the first six months of 2018 primarily due to the redemption and repurchase of senior notes, payments of common stock dividends, and pollution control revenue bond purchases, partially offset by capital contributions from Southern Company. Cash flows from financing activities vary from period to period based on capital needs and the maturity or redemption of securities.

Significant balance sheet changes for the first six months of 2018 include a decrease of \$1.5 billion in long-term debt (including securities due within one year) primarily due to the redemption and repurchase of senior notes and the purchase of pollution control revenue bonds and an increase of \$1.0 billion in property, plant, and equipment to comply with environmental standards and the construction of generation, transmission, and distribution facilities, including \$0.6 billion related to the construction of Plant Vogtle Units 3 and 4. The increase in property, plant, and equipment was more than offset by a \$1.1 billion decrease due to the charge related to the construction of Plant Vogtle Units 3 and 4. Total common stockholder's equity increased \$0.8 billion primarily due to a \$1.5 billion increase in paid-in capital resulting from capital contributions received from Southern Company, partially offset by a \$0.7 billion decrease in retained earnings primarily due to the charge related to Plant Vogtle Units 3 and 4. See Note (B) to the Condensed Financial Statements under "Nuclear Construction" herein for additional information regarding Plant Vogtle Units 3 and 4.

Capital Requirements and Contractual Obligations

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Capital Requirements and Contractual Obligations" of Georgia Power in Item 7 of the Form 10-K for a description of Georgia Power's capital requirements and contractual obligations. Approximately \$509 million will be required through June 30, 2019 to fund maturities of long-term debt. See "Sources of Capital" herein for additional

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

information. Also see FUTURE EARNINGS POTENTIAL – " Retail Regulatory Matters – Nuclear Construction " for additional information regarding Plant Vogtle Units 3 and 4.

Georgia Power's construction program is currently estimated to total approximately \$3.5 billion for 2018, \$3.6 billion for 2019, \$2.8 billion for 2020, \$2.7 billion for 2021, and \$2.4 billion for 2022. These amounts include expenditures of approximately \$1.4 billion, \$1.4 billion, \$0.9 billion, \$1.0 billion, and \$0.6 billion for the construction of Plant Vogtle Units 3 and 4 in 2018, 2019, 2020, 2021, and 2022, respectively. These amounts also include capital expenditures related to contractual purchase commitments for nuclear fuel and capital expenditures covered under LTSAs. Estimated capital expenditures to comply with environmental laws and regulations included in these amounts are \$0.5 billion, \$0.1 billion, \$0.2 billion, \$0.2 billion, and \$0.2 billion for 2018, 2019, 2020, 2021, and 2022, respectively. These estimated expenditures do not include any potential compliance costs associated with the regulation of CO₂ emissions from fossil fuel-fired electric generating units.

Georgia Power also anticipates costs associated with closure and monitoring of ash ponds in accordance with the CCR Rule, which are reflected in Georgia Power's ARO liabilities. These costs, which are expected to change as Georgia Power continues to refine its assumptions underlying the cost estimates and evaluate the method and timing of compliance activities, are estimated to be \$0.2 billion per year for 2018 through 2020 and \$0.3 billion per year for 2021 and 2022. For information regarding expected changes to these cost estimates during the second half of 2018, see FUTURE EARNINGS POTENTIAL – " Environmental Matters – Environmental Laws and Regulations – Coal Combustion Residuals" and Note (A) to the Condensed Financial Statements under "Asset Retirement Obligations" herein. Also see Note 1 to the financial statements of Georgia Power under "Asset Retirement Obligations and Other Costs of Removal" in Item 8 of the Form 10-K for additional information on AROs.

The construction program is subject to periodic review and revision, and actual construction costs may vary from these estimates because of numerous factors. These factors include: changes in business conditions; changes in load projections; changes in environmental laws and regulations; the outcome of any legal challenges to environmental rules; changes in generating plants, including unit retirements and replacements and adding or changing fuel sources at existing generating units, to meet regulatory requirements; changes in FERC rules and regulations; Georgia PSC approvals; changes in the expected environmental compliance program; changes in legislation; the cost and efficiency of construction labor, equipment, and materials; project scope and design changes; storm impacts; and the cost of capital. In addition, there can be no assurance that costs related to capital expenditures will be fully recovered. The construction program also includes Plant Vogtle Units 3 and 4, which includes components based on new technology that is just beginning initial operation in the global nuclear industry at scale and which may be subject to additional revised cost estimates during construction. The ability to control costs and avoid cost and schedule overruns during the development, construction, and operation of new facilities is subject to a number of factors, including, but not limited to, changes in labor costs, availability, and productivity, challenges with management of contractors, subcontractors, or vendors, adverse weather conditions, shortages and inconsistent quality of equipment, materials, and labor, contractor or supplier delay, non-performance under construction, operating, or other agreements, operational readiness, including specialized operator training and required site safety programs, unforeseen engineering or design problems, start-up activities (including major equipment failure and system integration), and/or operational performance. See Note 3 to the financial statements of Georgia Power under "Retail Regulatory Matters – Nuclear Construction" in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements under " Nuclear Construction " herein for information regarding additional factors that may impact construction expenditures.

Sources of Capital

Georgia Power plans to obtain the funds required for construction and other purposes from sources similar to those used in the past, which were primarily from operating cash flows, external security issuances, borrowings from financial institutions, equity contributions from Southern Company, and borrowings from the FFB. However, the amount, type, and timing of any future financings, if needed, will depend upon regulatory approvals, prevailing market conditions, and other factors. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CONDITION AND LIQUIDITY – "Sources of Capital" of Georgia Power in Item 7 of the Form 10-K for additional information.

In 2014, Georgia Power entered into the Loan Guarantee Agreement with the DOE, under which the proceeds of borrowings may be used to reimburse Georgia Power for Eligible Project Costs incurred in connection with its construction of Plant Vogtle Units 3 and 4. Under the Loan Guarantee Agreement, the DOE agreed to guarantee borrowings of up to \$3.46 billion (not to exceed 70% of Eligible Project Costs) to be made by Georgia Power under a multi-advance credit facility (FFB Credit Facility) among Georgia Power, the DOE, and the FFB. As of June 30, 2018, Georgia Power had borrowed \$2.6 billion under the FFB Credit Facility. In July 2017, Georgia Power entered into an amendment to the Loan Guarantee Agreement, which provides that further advances are conditioned upon the DOE's approval of any agreements entered into in replacement of the Vogtle 3 and 4 Agreement and satisfaction of certain other conditions.

In September 2017, the DOE issued a conditional commitment to Georgia Power for up to approximately \$1.67 billion of additional guaranteed loans under the Loan Guarantee Agreement. This conditional commitment expires on September 30, 2018, subject to any further extension approved by the DOE. Final approval and issuance of these additional loan guarantees by the DOE cannot be assured and are subject to the negotiation of definitive agreements, completion of due diligence by the DOE, receipt of any necessary regulatory approvals, and satisfaction of other conditions, including the Vogtle Owners' votes to continue construction. See Note 6 to the financial statements of Georgia Power under "DOE Loan Guarantee Borrowings" in Item 8 of the Form 10-K and Note (F) to the Condensed Financial Statements under "DOE Loan Guarantee Borrowings" herein for additional information regarding the Loan Guarantee Agreement, including applicable covenants, events of default, mandatory prepayment events (including any decision not to continue construction of Plant Vogtle Units 3 and 4), and additional conditions to borrowing. Also see Note (B) to the Condensed Financial Statements under "Nuclear Construction" herein for additional information regarding Plant Vogtle Units 3 and 4.

At June 30, 2018, Georgia Power's current liabilities exceeded current assets by \$1.2 billion primarily due to long-term debt that is due within one year of \$509 million and notes payable of \$480 million. Georgia Power's current liabilities frequently exceed current assets because of scheduled maturities of long-term debt and the periodic use of short-term debt as a funding source, as well as significant seasonal fluctuations in cash needs. Georgia Power intends to utilize operating cash flows, external security issuances, borrowings from financial institutions, equity contributions from Southern Company, and borrowings from the FFB to fund its short-term capital needs. Georgia Power has substantial cash flow from operating activities and access to the capital markets and financial institutions to meet liquidity needs.

At June 30, 2018, Georgia Power had approximately \$11 million of cash and cash equivalents. Georgia Power's committed credit arrangement with banks at June 30, 2018 was \$1.75 billion of which \$1.74 billion was unused. This credit arrangement expires in 2022.

This bank credit arrangement contains a covenant that limits debt levels and contains a cross-acceleration provision to other indebtedness (including guarantee obligations) of Georgia Power. Such cross-acceleration provision to other indebtedness would trigger an event of default if Georgia Power defaulted on indebtedness, the payment of which was then accelerated. At June 30, 2018, Georgia Power was in compliance with this covenant. This bank credit arrangement does not contain a material adverse change clause at the time of borrowing.

Subject to applicable market conditions, Georgia Power expects to renew or replace this credit arrangement, as needed, prior to expiration. In connection therewith, Georgia Power may extend the maturity date and/or increase or decrease the lending commitments thereunder.

See Note 6 to the financial statements of Georgia Power under "Bank Credit Arrangements" in Item 8 of the Form 10-K and Note (F) to the Condensed Financial Statements under "Bank Credit Arrangements" herein for additional information.

A portion of the unused credit with banks is allocated to provide liquidity support to Georgia Power's pollution control revenue bonds and commercial paper program. The amount of variable rate pollution control revenue bonds

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

outstanding requiring liquidity support as of June 30, 2018 was approximately \$550 million . In addition, at June 30, 2018 , Georgia Power had \$232 million of pollution control revenue bonds outstanding that were required to be remarketed within the next 12 months.

Georgia Power may also meet short-term cash needs through a Southern Company subsidiary organized to issue and sell commercial paper at the request and for the benefit of Georgia Power and the other traditional electric operating companies. Proceeds from such issuances for the benefit of Georgia Power are loaned directly to Georgia Power. The obligations of each traditional electric operating company under these arrangements are several and there is no cross-affiliate credit support. Short-term borrowings are included in notes payable in the balance sheets.

Details of short-term borrowings were as follows:

	Short-term Debt at June 30, 2018		Short-term Debt During the Period ^(*)		
	Amount Outstanding	Weighted Average Interest Rate	Average Amount Outstanding	Weighted Average Interest Rate	Maximum Amount Outstanding
	<i>(in millions)</i>		<i>(in millions)</i>		<i>(in millions)</i>
Commercial paper	\$ 480	2.4%	\$ 120	2.3%	\$ 495

(*) Average and maximum amounts are based upon daily balances during the three-month period ended June 30, 2018 .

Georgia Power believes the need for working capital can be adequately met by utilizing the commercial paper program, lines of credit, short-term bank notes, and operating cash flows.

Credit Rating Risk

At June 30, 2018 , Georgia Power did not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade.

There are certain contracts that could require collateral, but not accelerated payment, in the event of a credit rating change to BBB- and/or Baa3 or below. These contracts are for physical electricity purchases and sales, fuel purchases, fuel transportation and storage, energy price risk management, transmission, interest rate management, and construction of new generation at Plant Vogtle Units 3 and 4.

The maximum potential collateral requirements under these contracts at June 30, 2018 were as follows:

Credit Ratings	Maximum Potential Collateral Requirements
	<i>(in millions)</i>
At BBB- and/or Baa3	\$ 87
Below BBB- and/or Baa3	\$ 1,020

Included in these amounts are certain agreements that could require collateral in the event that Georgia Power or Alabama Power (affiliate company of Georgia Power) has a credit rating change to below investment grade. Generally, collateral may be provided by a Southern Company guaranty, letter of credit, or cash. Additionally, a credit rating downgrade could impact the ability of Georgia Power to access capital markets and would be likely to impact the cost at which it does so.

On February 28, 2018, Fitch downgraded the senior unsecured long-term debt rating of Georgia Power to A from A+ with a negative outlook.

As a result of the Tax Reform Legislation, certain financial metrics, such as the funds from operations to debt percentage, used by the credit rating agencies to assess Southern Company and its subsidiaries, including Georgia

GEORGIA POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Power, may be negatively impacted. The Tax Reform Settlement Agreement approved by the Georgia PSC on April 3, 2018 is expected to help mitigate these potential adverse impacts to certain credit metrics by allowing a higher retail equity ratio until Georgia Power's next base rate case. See Note 3 to the financial statements of Georgia Power under "Retail Regulatory Matters – Rate Plans" in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements under "Regulatory Matters – Georgia Power – Rate Plans" herein for additional information.

Financing Activities

In January 2018, Georgia Power repaid its outstanding \$150 million and \$100 million floating rate bank loans due May 31, 2018 and October 26, 2018, respectively.

In March 2018, Georgia Power purchased and held \$104.6 million aggregate principal amount of Development Authority of Burke County (Georgia) Pollution Control Revenue Bonds (Georgia Power Company Plant Vogtle Project), First Series 2013 and \$173 million aggregate principal amount of Development Authority of Bartow County (Georgia) Pollution Control Revenue Bonds (Georgia Power Company Plant Bowen Project), First Series 2009. Georgia Power may reoffer these bonds to the public at a later date.

In April 2018, Georgia Power purchased and held \$55 million aggregate principal amount of Development Authority of Burke County (Georgia) Pollution Control Revenue Bonds (Georgia Power Company Plant Vogtle Project), Fifth Series 1994. Georgia Power may reoffer these bonds to the public at a later date.

Also in April 2018, Georgia Power redeemed all \$250 million aggregate principal amount of its Series 2008B 5.40% Senior Notes due June 1, 2018.

In May 2018, through cash tender offers, Georgia Power repurchased and retired \$89 million of the \$250 million aggregate principal amount outstanding of its Series 2007A 5.65% Senior Notes due March 1, 2037, \$326 million of the \$500 million aggregate principal amount outstanding of its Series 2009A 5.95% Senior Notes due February 1, 2039, and \$335 million of the \$600 million aggregate principal amount outstanding of its Series 2010B 5.40% Senior Notes due June 1, 2040, for an aggregate purchase price, excluding accrued and unpaid interest, of \$902 million.

In June 2018, Georgia Power purchased and held \$65 million aggregate principal amount of Development Authority of Burke County (Georgia) Pollution Control Revenue Bonds (Georgia Power Company Plant Vogtle Project), Second Series 2008. Georgia Power may reoffer these bonds to the public at a later date.

In addition to any financings that may be necessary to meet capital requirements and contractual obligations, Georgia Power plans to continue, when economically feasible, a program to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit.

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

SECOND QUARTER 2018 vs. SECOND QUARTER 2017
AND
YEAR-TO-DATE 2018 vs. YEAR-TO-DATE 2017

OVERVIEW

Gulf Power operates as a vertically integrated utility providing electric service to retail customers within its traditional service territory located in northwest Florida and to wholesale customers in the Southeast.

On May 20, 2018, Southern Company entered into a stock purchase agreement with NextEra Energy to sell Gulf Power for an aggregate cash purchase price of \$5.75 billion (less the amount of indebtedness assumed at closing, which is currently estimated at approximately \$1.4 billion), subject to certain adjustments. The completion of the sale is subject to the satisfaction or waiver of certain closing conditions and is expected to occur in the first half of 2019. The ultimate outcome of this matter cannot be determined at this time. See Note (J) to the Condensed Financial Statements under "Southern Company's Sale of Gulf Power" herein for additional information.

Many factors affect the opportunities, challenges, and risks of Gulf Power's business of providing electric service. These factors include the ability to maintain a constructive regulatory environment, to maintain and grow energy sales and customers, and to effectively manage and secure timely recovery of costs. These costs include those related to projected long-term demand growth, stringent environmental standards, reliability, restoration following major storms, fuel, and capital expenditures. Gulf Power has various regulatory mechanisms that operate to address cost recovery. Effectively operating pursuant to these regulatory mechanisms and appropriately balancing required costs and capital expenditures with customer prices will continue to challenge Gulf Power for the foreseeable future.

As a continuation of a settlement agreement approved by the Florida PSC in April 2017 (2017 Gulf Power Rate Case Settlement Agreement), on March 26, 2018, the Florida PSC approved a stipulation and settlement agreement among Gulf Power and three intervenors addressing the retail revenue requirement effects of the Tax Reform Legislation (Gulf Power Tax Reform Settlement Agreement).

The Gulf Power Tax Reform Settlement Agreement results in annual reductions to Gulf Power's revenues of \$18.2 million from base rates and \$15.6 million from environmental cost recovery rates, implemented April 1, 2018, and also provides for a one-time refund of \$69.4 million for the retail portion of unprotected (not subject to normalization) deferred tax liabilities through a reduced fuel cost recovery rate over the remainder of 2018. Through June 30, 2018, approximately \$28 million of this refund has been reflected in customer bills. As a result of the Gulf Power Tax Reform Settlement Agreement, the Florida PSC also approved an increase in Gulf Power's maximum equity ratio from 52.5% to 53.5% for all retail regulatory purposes.

As part of the Gulf Power Tax Reform Settlement Agreement, a limited scope proceeding to address protected deferred tax liabilities consistent with IRS normalization principles was initiated on April 30, 2018. Pending resolution of this proceeding, Gulf Power is deferring the related amounts for 2018 as a regulatory liability. Through June 30, 2018, amounts deferred totaled \$5 million. Unless otherwise agreed to by the parties to the Gulf Power Tax Reform Settlement Agreement, amounts recorded in this regulatory liability will be refunded to retail customers in 2019 through Gulf Power's fuel cost recovery rates. The ultimate outcome of this matter cannot be determined at this time.

See Note 3 to the financial statements of Gulf Power under "Retail Regulatory Matters – Retail Base Rate Cases" in Item 8 of the Form 10-K for additional information.

Gulf Power continues to focus on several key performance indicators including, but not limited to, customer satisfaction, plant availability, system reliability, and net income.

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

RESULTS OF OPERATIONS
Net Income

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$7	20.0	\$31	58.5

Gulf Power's net income after dividends on preference stock for the second quarter 2018 was \$42 million compared to \$35 million for the corresponding period in 2017. The increase was primarily due to higher retail base revenues, partially offset by depreciation credits recognized in 2017. In addition, the increase in net income reflects lower federal income tax expense as a result of the Tax Reform Legislation, partially offset by a reduction in retail revenues related to the Gulf Power Tax Reform Settlement Agreement.

Gulf Power's net income after dividends on preference stock for year-to-date 2018 was \$84 million compared to \$53 million for the corresponding period in 2017. The increase was primarily due to higher retail base revenues and the first quarter 2017 write-down of \$32.5 million (\$20 million after tax) of Gulf Power's ownership of Plant Scherer Unit 3 in accordance with the 2017 Gulf Power Rate Case Settlement Agreement, partially offset by depreciation credits recognized in 2017. In addition, the increase in net income reflects lower federal income tax expense as a result of the Tax Reform Legislation, partially offset by a reduction in retail revenues related to the Gulf Power Tax Reform Settlement Agreement.

See Note 3 to the financial statements of Gulf Power under "Retail Regulatory Matters – Retail Base Rate Cases" in Item 8 of the Form 10-K for additional information regarding the 2017 Gulf Power Rate Case Settlement Agreement.

Retail Revenues

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(17)	(5.3)	\$(5)	(0.8)

In the second quarter 2018, retail revenues were \$301 million compared to \$318 million for the corresponding period in 2017. For year-to-date 2018, retail revenues were \$591 million compared to \$596 million for the corresponding period in 2017.

Details of the changes in retail revenues were as follows:

	Second Quarter 2018		Year-to-Date 2018	
	<i>(in millions)</i>	<i>(% change)</i>	<i>(in millions)</i>	<i>(% change)</i>
Retail – prior year	\$ 318		\$ 596

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Retail Regulatory Matters" of Gulf Power in Item 7 and Note 1 to the financial statements of Gulf Power under "Revenues" and Note 3 to the financial statements of Gulf Power under "Retail Regulatory Matters" in Item 8 of the Form 10-K for additional information regarding Gulf Power's retail base rate case and cost recovery clauses,

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

including Gulf Power's fuel cost recovery, purchased power capacity recovery, environmental cost recovery, and energy conservation cost recovery clauses.

Revenues associated with changes in rates and pricing decreased in the second quarter and year-to-date 2018 when compared to the corresponding periods in 2017 primarily due to a decrease in revenues effective January 1, 2018 due to the Gulf Power Tax Reform Settlement Agreement, partially offset by an increase in retail base rates effective July 2017 in accordance with the 2017 Gulf Power Rate Case Settlement Agreement.

Revenues attributable to changes in sales increased in the second quarter 2018 when compared to the corresponding period in 2017. For the second quarter 2018, weather-adjusted KWH sales to residential customers increased 3.2% due to customer growth. Weather-adjusted KWH sales to commercial customers increased 1.0% due to customer growth, partially offset by lower energy usage resulting from energy efficiency improvements in appliances and lighting. KWH sales to industrial customers decreased 4.5% for the second quarter 2018 primarily due to changes in customers' operations.

Revenues attributable to changes in sales increased for year-to-date 2018 when compared to the corresponding period in 2017. For year-to-date 2018, weather-adjusted KWH sales to residential customers increased 2.7% due to customer growth. Weather-adjusted KWH sales to commercial customers increased 0.4% due to customer growth, partially offset by lower energy usage resulting from energy efficiency improvements in appliances and lighting. KWH sales to industrial customers decreased 0.7% year-to-date 2018 primarily due to changes in customers' operations.

Fuel and other cost recovery revenues remained essentially flat in the second quarter 2018 when compared to the corresponding period in 2017, primarily due to higher recoverable environmental costs, offset by lower recoverable costs under the purchased power capacity and fuel cost recovery clauses. Fuel and other cost recovery revenues decreased year-to-date 2018 when compared to the corresponding period in 2017, primarily due to lower recoverable costs under the purchased power capacity and fuel cost recovery clauses, partially offset by higher environmental recoverable costs. Fuel and other cost recovery provisions include fuel expenses, the energy component of purchased power costs, purchased power capacity costs, the difference between projected and actual costs and revenues related to energy conservation and environmental compliance, and a credit for certain wholesale revenues as a result of the 2017 Gulf Power Rate Case Settlement Agreement.

See Note 3 to the financial statements of Gulf Power under "Retail Regulatory Matters – Cost Recovery Clauses" and " – Retail Base Rate Cases" in Item 8 of the Form 10-K for additional information regarding cost recovery clauses and the 2017 Gulf Power Rate Case Settlement Agreement, respectively. Also see FUTURE EARNINGS POTENTIAL – " Retail Regulatory Matters – Retail Base Rate Case " herein for additional information regarding the Gulf Power Tax Reform Settlement Agreement.

Wholesale Revenues – Non-Affiliates

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$1	8.3	\$(4)	(13.3)

Wholesale revenues from sales to non-affiliates consist of long-term sales agreements to other utilities in Florida and Georgia and short-term opportunity sales. Capacity revenues from the long-term sales agreements represent the greatest contribution to net income. The energy is generally sold at variable cost. Short-term opportunity sales are made at market-based rates that generally provide a margin above Gulf Power's variable cost of energy. Wholesale energy revenues from sales to non-affiliates will vary depending on fuel prices, the market prices of wholesale energy compared to the cost of Gulf Power's and the Southern Company system's generation, demand for energy within the Southern Company system's electric service territory, and the availability of the Southern Company system's generation.

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

For year-to-date 2018 , wholesale revenues from sales to non-affiliates were \$26 million compared to \$30 million for the corresponding period in 2017 . The decrease was primarily due to a 24.7% decrease in KWH sales resulting from lower opportunity sales due to maintenance outages at Gulf Power generating units.

Wholesale Revenues – Affiliates

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$4	40.0	\$(5)	(10.6)

Wholesale revenues from sales to affiliated companies will vary depending on demand and the availability and cost of generating resources at each company. These affiliate sales are made in accordance with the IIC, as approved by the FERC. These transactions do not have a significant impact on earnings since the revenue related to these energy sales generally offsets the cost of energy sold.

In the second quarter 2018 , wholesale revenues from sales to affiliates were \$14 million compared to \$10 million for the corresponding period in 2017 . The increase was primarily due to a 37.4% increase in KWH sales primarily resulting from increased generation to serve territorial load driven by the warm weather in June 2018.

For year-to-date 2018 , wholesale revenues from sales to affiliates were \$42 million compared to \$47 million for the corresponding period in 2017 . The decrease was primarily due to a 34.8% decrease in KWH sales primarily resulting from lower availability due to the first quarter 2018 planned outages at Gulf Power generating units. Partially offsetting this decrease was a 40.0% increase in the price of energy sold due to dispatching higher-priced generating resources driven by the colder weather in January 2018.

Fuel and Purchased Power Expenses

	Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
	<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
Fuel	\$ 3	3.4	\$ (23)	(11.7)
Purchased power	—	—	12	15.4
Total fuel and purchased power expenses	\$ 3		\$ (11)	

In the second quarter 2018 , total fuel and purchased power expenses were \$135 million compared to \$132 million for the corresponding period in 2017 . The increase was primarily the result of an \$18 million increase related to the volume of KWHs generated and purchased, partially offset by a \$15 million decrease related to the lower average cost of fuel and purchased power due to lower natural gas prices.

For year-to-date 2018 , total fuel and purchased power expenses were \$263 million compared to \$274 million for the corresponding period in 2017 . The decrease was primarily the result of a \$20 million decrease related to the lower average cost of fuel and purchased power resulting from lower natural gas prices, partially offset by a \$9 million net increase related to volume of KWHs generated and purchased.

Fuel and purchased power transactions do not have a significant impact on earnings since energy and capacity expenses are generally offset by energy and capacity revenues through Gulf Power's fuel and purchased power capacity cost recovery clauses and long-term wholesale contracts. See Note 3 to the financial statements of Gulf Power under "Retail Regulatory Matters – Cost Recovery Clauses – Retail Fuel Cost Recovery" and " – Purchased Power Capacity Recovery" in Item 8 of the Form 10-K for additional information.

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Details of Gulf Power's generation and purchased power were as follows:

	Second Quarter 2018	Second Quarter 2017	Year-to-Date 2018	Year-to-Date 2017
Total generation <i>(in millions of KWHs)</i>	2,235	1,898	4,011	4,220
Total purchased power <i>(in millions of KWHs)</i>	1,359	1,218	2,981	2,676
Sources of generation <i>(percent)</i> –				
Coal	56	50	48	52
Gas	44	50	52	48
Cost of fuel, generated <i>(in cents per net KWH)</i> –				
Coal	3.21	3.17	3.18	3.23
Gas	3.40	3.88	3.17	3.54
Average cost of fuel, generated <i>(in cents per net KWH)</i>	3.29	3.53	3.18	3.38
Average cost of purchased power <i>(in cents per net KWH)</i> (*)	4.56	5.37	4.56	4.93

(*) Average cost of purchased power includes fuel purchased by Gulf Power for tolling agreements where power is generated by the provider.

Fuel

In the second quarter 2018, fuel expense was \$91 million compared to \$88 million for the corresponding period in 2017. The increase was primarily due to a 17.8% increase in the volume of KWHs generated primarily to serve higher territorial load driven by the warm weather in June 2018.

For year-to-date 2018, fuel expense was \$173 million compared to \$196 million for the corresponding period in 2017. The decrease was primarily due to a 5.0% decrease in the volume of KWHs generated due to maintenance outages in 2018. Also contributing to the decrease was a 5.9% decrease in the average cost of fuel resulting from lower natural gas prices.

Purchased Power

In the second quarter 2018 and the corresponding period in 2017, purchased power expense was \$44 million. The average cost of purchased power decreased 15.1% in the second quarter 2018 compared to the corresponding period in 2017 due to lower marginal natural gas prices, offset by an 11.6% increase in the volume of KWHs purchased due to higher territorial load.

For year-to-date 2018, purchased power expense was \$90 million compared to \$78 million for the corresponding period in 2017. The increase was primarily due to an 11.4% increase in the volume of KWHs purchased due to higher territorial load, partially offset by a 7.5% decrease in the average cost of purchased power due to lower natural gas prices.

Energy purchases from non-affiliates and affiliates will vary depending on the market prices of wholesale energy as compared to the cost of the Southern Company system's generation, demand for energy within the Southern Company system's electric service territory, and the availability of the Southern Company system's generation. Affiliate purchases are made in accordance with the IIC or other contractual agreements, as approved by the FERC.

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Other Operations and Maintenance Expenses

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$—	—	\$(10)	(5.7)

In the second quarter 2018 and the corresponding period in 2017, other operations and maintenance expenses were \$90 million . A decrease of \$10 million in routine generation maintenance expenses was offset by a \$10 million increase to the property damage reserve accrual.

For year-to-date 2018 , other operations and maintenance expenses were \$166 million compared to \$176 million for the corresponding period in 2017 . The decrease was primarily due to decreases of \$11 million in routine generation maintenance expenses, including environmental expenditures, \$4 million in energy service expenses, and \$4 million in other operations and maintenance, primarily associated with vegetation management and employee benefits, partially offset by a \$9 million increase to the property damage reserve accrual. See Note 1 to the financial statements of Gulf Power under "Property Damage Reserve" in Item 8 of the Form 10-K for additional information.

Expenses from energy services did not have a significant impact on earnings since they were generally offset by associated revenues. Environmental compliance expenses did not have a significant impact on earnings since they were offset by environmental revenues through Gulf Power's environmental cost recovery clause. See Note 3 to the financial statements of Gulf Power under "Retail Regulatory Matters – Cost Recovery Clauses – Environmental Cost Recovery" in Item 8 of the Form 10-K for additional information.

Depreciation and Amortization

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$13	37.1	\$42	79.2

In the second quarter 2018 , depreciation and amortization was \$48 million compared to \$35 million for the corresponding period in 2017 . For year-to-date 2018 , depreciation and amortization was \$95 million compared to \$53 million for the corresponding period in 2017 . The increases were primarily due to depreciation credits of \$8.5 million and \$34 million recognized in the second quarter and year-to-date 2017, respectively, as authorized in a settlement agreement approved by the Florida PSC in 2013. See Note 3 to the financial statements of Gulf Power under "Retail Regulatory Matters – Retail Base Rate Cases" in Item 8 of the Form 10-K for additional information.

Loss on Plant Scherer Unit 3

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$—	—	\$(33)	N/M

N/M - Not meaningful

In the first quarter 2017, Gulf Power recorded a \$32.5 million write-down related to its ownership of Plant Scherer Unit 3 in accordance with the 2017 Gulf Power Rate Case Settlement Agreement. See Note 3 to the financial statements of Gulf Power under "Retail Regulatory Matters – Retail Base Rate Cases" in Item 8 of the Form 10-K for additional information.

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Income Taxes (Benefit)

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(35)	(145.8)	\$(35)	(92.1)

In the second quarter 2018 , income tax benefit was \$11 million compared to tax expense of \$24 million for the corresponding period in 2017 . For year-to-date 2018 , income taxes were \$3 million compared to \$38 million for the corresponding period in 2017 . The changes were primarily due to the reduction in the federal income rate and the benefit from the flowback of excess deferred income taxes as a result of the Tax Reform Legislation as well as lower pre-tax earnings.

See Note (H) to the Condensed Financial Statements under " Effective Tax Rate " herein for additional information. Also see Note 3 to the financial statements of Gulf Power under "Retail Regulatory Matters – Retail Base Rate Cases" in Item 8 of the Form 10-K for more information regarding the 2017 Gulf Power Rate Case Settlement Agreement.

FUTURE EARNINGS POTENTIAL

The results of operations discussed above are not necessarily indicative of Gulf Power's future earnings potential. The level of Gulf Power's future earnings depends on numerous factors that affect the opportunities, challenges, and risks of Gulf Power's business of providing electric service. These factors include Gulf Power's ability to maintain a constructive regulatory environment that continues to allow for the timely recovery of prudently-incurred costs during a time of increasing costs and limited projected demand growth over the next several years. Future earnings will be driven primarily by customer growth. Earnings will also depend upon maintaining and growing sales, considering, among other things, the adoption and/or penetration rates of increasingly energy-efficient technologies due to changes in the minimum allowable equipment efficiencies along with the continuation of changes in customer behavior, both of which could contribute to a net reduction in customer usage. Earnings are subject to a variety of other factors. These factors include weather, competition, energy conservation practiced by customers, the use of alternative energy sources by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth or decline in Gulf Power's service territory. Demand for electricity is primarily driven by the pace of economic growth that may be affected by changes in regional and global economic conditions, which may impact future earnings. For additional information relating to these issues, see RISK FACTORS in Item 1A and MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL of Gulf Power in Item 7 of the Form 10-K.

On May 20, 2018, Southern Company entered into a stock purchase agreement with NextEra Energy to sell all of the capital stock of Gulf Power for an aggregate cash purchase price of \$5.75 billion (less the amount of indebtedness assumed at closing, which is currently estimated at approximately \$1.4 billion), subject to (i) customary adjustments for indebtedness and working capital and (ii) reduction by the amount (if any) by which Gulf Power fails to meet a specified capital expenditure target. The completion of the sale is subject to the satisfaction or waiver of certain closing conditions, including, among others, (i) the expiration or termination of the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act, (ii) approval by the FERC and the Federal Communications Commission, (iii) the entry into certain ancillary agreements, including transmission-related agreements and a transition services agreement, among the parties and their affiliates, and (iv) other customary closing conditions. The sale is expected to occur in the first half of 2019. See Note (J) to the Condensed Financial Statements under " Southern Company's Sale of Gulf Power " herein for additional information. The ultimate outcome of this matter cannot be determined at this time.

Environmental Matters

Gulf Power's operations are regulated by state and federal environmental agencies through a variety of laws and regulations governing air, water, land, and protection of other natural resources. Gulf Power maintains comprehensive environmental compliance and greenhouse gas (GHG) strategies to assess upcoming requirements

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

and compliance costs associated with these environmental laws and regulations. The costs, including capital expenditures and operations and maintenance costs, required to comply with environmental laws and regulations and to achieve stated goals may impact future unit retirement and replacement decisions, results of operations, cash flows, and financial condition. Related costs may result from the installation of additional environmental controls, closure and monitoring of CCR facilities, unit retirements, and adding or changing fuel sources for certain existing units, as well as related upgrades to the transmission system. A major portion of these costs are expected to be recovered through existing ratemaking provisions. The ultimate impact of environmental laws and regulations and the GHG goals discussed below will depend on various factors, such as state adoption and implementation of requirements, the availability and cost of any deployed control technology, and the outcome of pending and/or future legal challenges.

New or revised environmental laws and regulations could affect many areas of Gulf Power's operations. The impact of any such changes cannot be determined at this time. Environmental compliance costs could affect earnings if such costs cannot continue to be fully recovered in rates on a timely basis or through long-term wholesale agreements. The State of Florida has statutory provisions that allow a utility to petition the Florida PSC for recovery of prudent environmental compliance costs that are not being recovered through base rates or any other recovery mechanism. Gulf Power's current long-term wholesale agreements contain provisions that permit charging the customer with costs incurred as a result of changes in environmental laws and regulations. Further, increased costs that are recovered through regulated rates could contribute to reduced demand for electricity, which could negatively affect results of operations, cash flows, and financial condition. Additionally, many commercial and industrial customers may also be affected by existing and future environmental requirements, which for some may have the potential to ultimately affect their demand for electricity. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters," "Retail Regulatory Matters – Cost Recovery Clauses – Environmental Cost Recovery," and "Other Matters" of Gulf Power in Item 7 and Note 3 to the financial statements of Gulf Power under "Environmental Matters" in Item 8 of the Form 10-K for additional information, including a discussion on the State of Florida's statutory provisions on environmental cost recovery.

Environmental Laws and Regulations

Water Quality

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters – Environmental Laws and Regulations – Water Quality" of Gulf Power in Item 7 of the Form 10-K for additional information regarding the effluent limitations guidelines (ELG) rule.

On May 2, 2018, the EPA updated its anticipated final rulemaking schedule for ELG from September 2020 to December 2019. The impact of any changes to the ELG rule will depend on the content of the final rule and the outcome of any legal challenges and cannot be determined at this time.

Coal Combustion Residuals

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters – Environmental Laws and Regulations – Coal Combustion Residuals" of Gulf Power in Item 7 of the Form 10-K for additional information regarding the Disposal of Coal Combustion Residuals from Electric Utilities rule (CCR Rule).

On July 30, 2018, the EPA published certain amendments to the CCR Rule, which will be effective August 29, 2018. These amendments extend the date from April 2019 to October 31, 2020 to cease sending CCR and other waste streams to impoundments that demonstrate compliance with all except two specified criteria. These amendments also establish groundwater protection standards for four constituents that do not have established EPA maximum contaminant levels and allow a participating state director or the EPA (where the EPA is the permitting authority) to suspend groundwater monitoring requirements under certain circumstances. Specific site impacts are being evaluated by Gulf Power.

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Georgia Power continues to perform engineering studies related to its plans to close the ash ponds at all of its generating plants, including Plant Scherer Unit 3 which is jointly owned with Gulf Power, in compliance with federal and state CCR rules. Georgia Power also continues to refine its closure strategy and cost estimates for each ash pond and is preparing permit applications as required by the State of Georgia CCR rule. While Gulf Power believes its recorded liability for ash pond closures appropriately reflects its obligations under the current closure strategy elected for Plant Scherer Unit 3, changes to such strategy and cost estimate would likely result in additional closure costs which would increase Gulf Power's ARO liability. It is not currently possible to determine the magnitude of an increase related to a change in closure strategy nor an increase related to ongoing engineering studies for the current closure strategy, and the timing of future cash outflows are indeterminable at this time. As permit applications advance, engineering studies continue, and the timing of the ash pond closure for Plant Scherer Unit 3 develops further during the second half of 2018 and in the future, Gulf Power will record any changes as necessary to its ARO liability, which could be material. Gulf Power expects to continue to periodically update these cost estimates as necessary, which could change further as additional information becomes available. See Note (A) to the Condensed Financial Statements under "Asset Retirement Obligations" herein for additional information.

Absent continued recovery of ARO costs through regulated rates, Gulf Power's results of operations, cash flows, and financial condition could be materially impacted. The ultimate outcome of these matters cannot be determined at this time.

Global Climate Issues

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters – Global Climate Issues" of Gulf Power in Item 7 of the Form 10-K for additional information.

Through 2017, the Southern Company system has achieved an estimated GHG emission reduction of 36% since 2007. In April 2018, Southern Company established an intermediate goal of a 50% reduction in carbon emissions from 2007 levels by 2030 and a long-term goal of low- to no-carbon operations by 2050. To achieve these goals, the Southern Company system expects to continue growing its renewable energy portfolio, optimize technology advancements to modernize its transmission and distribution systems, increase the use of natural gas for generation, invest in energy efficiency, and continue research and development efforts focused on technologies to lower GHG emissions. The Southern Company system's ability to achieve these goals also will be dependent on many external factors, including supportive national energy policies, low natural gas prices, and the development, deployment, and advancement of relevant energy technologies. The ultimate outcome of this matter cannot be determined at this time.

FERC Matters

Market-Based Rate Authority

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "FERC Matters" of Gulf Power in Item 7 of the Form 10-K for additional information regarding proceedings related to the traditional electric operating companies' (including Gulf Power's) and Southern Power's 2014 and 2017 triennial market power analyses.

On May 4, 2018, the FERC issued an order terminating both proceedings, finding that the traditional electric operating companies (including Gulf Power) and Southern Power satisfy the FERC's standards for market-based rates. On May 9, 2018, the traditional electric operating companies (including Gulf Power) and Southern Power made the compliance filing required by the order. These proceedings are essentially concluded.

Open Access Transmission Tariff

On May 10, 2018, the Alabama Municipal Electric Authority and Cooperative Energy filed with the FERC a complaint against SCS and the traditional electric operating companies (including Gulf Power) claiming that the current 11.25% base ROE used in calculating the annual transmission revenue requirements of the traditional electric operating companies' (including Gulf Power's) open access transmission tariff is unjust and unreasonable as

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

measured by the applicable FERC standards. The complaint requests that the base ROE be set no higher than 8.65% and that the FERC order refunds for the difference in revenue requirements that results from applying a just and reasonable ROE established in this proceeding upon determining the current ROE is unjust and unreasonable. On June 18, 2018, SCS and the traditional electric operating companies (including Gulf Power) filed their response challenging the adequacy of the showing presented by the complainants and offering support for the current ROE. The ultimate outcome of this matter cannot be determined at this time.

Retail Regulatory Matters

Gulf Power's rates and charges for service to retail customers are subject to the regulatory oversight of the Florida PSC. Gulf Power's rates are a combination of base rates and several separate cost recovery clauses for specific categories of costs. These separate cost recovery clauses address such items as fuel and purchased energy costs, purchased power capacity costs, energy conservation and demand side management programs, and the costs of compliance with environmental laws and regulations. Costs not addressed through one of the specific cost recovery clauses are recovered through base rates. See Note 3 to the financial statements of Gulf Power under "Retail Regulatory Matters" in Item 8 of the Form 10-K for additional information. The recovery balance of each regulatory clause for Gulf Power is reported in Note (B) to the Condensed Financial Statements herein.

Retail Base Rate Case

As a continuation of the 2017 Gulf Power Rate Case Settlement Agreement, on March 26, 2018, the Florida PSC approved the Gulf Power Tax Reform Settlement Agreement.

The Gulf Power Tax Reform Settlement Agreement results in annual reductions to Gulf Power's revenues of \$18.2 million from base rates and \$15.6 million from environmental cost recovery rates, implemented April 1, 2018, and also provides for a one-time refund of \$69.4 million for the retail portion of unprotected (not subject to normalization) deferred tax liabilities through a reduced fuel cost recovery rate over the remainder of 2018. Through June 30, 2018, approximately \$28 million of this refund has been reflected in customer bills. As a result of the Gulf Power Tax Reform Settlement Agreement, the Florida PSC also approved an increase in Gulf Power's maximum equity ratio from 52.5% to 53.5% for all retail regulatory purposes.

As part of the Gulf Power Tax Reform Settlement Agreement, a limited scope proceeding to address protected deferred tax liabilities consistent with IRS normalization principles was initiated on April 30, 2018. Pending resolution of this proceeding, Gulf Power is deferring the related amounts for 2018 as a regulatory liability. Through June 30, 2018, amounts deferred totaled \$5 million. Unless otherwise agreed to by the parties to the Gulf Power Tax Reform Settlement Agreement, amounts recorded in this regulatory liability will be refunded to retail customers in 2019 through Gulf Power's fuel cost recovery rates. The ultimate outcome of this matter cannot be determined at this time.

See Note 3 to the financial statements of Gulf Power under "Retail Regulatory Matters – Retail Base Rate Cases" in Item 8 of the Form 10-K for additional information.

Income Tax Matters

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Income Tax Matters" of Gulf Power in Item 7 of the Form 10-K and FINANCIAL CONDITION AND LIQUIDITY – "Credit Rating Risk," Note (B) to the Condensed Financial Statements under "Regulatory Matters – Gulf Power," and Note (H) to the Condensed Financial Statements herein for information regarding the Tax Reform Legislation and related regulatory actions.

Other Matters

Gulf Power is involved in various other matters being litigated and regulatory matters that could affect future earnings. In addition, Gulf Power is subject to certain claims and legal actions arising in the ordinary course of business. Gulf Power's business activities are subject to extensive governmental regulation related to public health and the environment, such as laws and regulations governing air, water, land, and protection of natural resources.

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Litigation over environmental issues and claims of various types, including property damage, personal injury, common law nuisance, and citizen enforcement of environmental laws and regulations has occurred throughout the U.S. This litigation has included claims for damages alleged to have been caused by CO₂ and other emissions, CCR, and alleged exposure to hazardous materials, and/or requests for injunctive relief in connection with such matters.

The ultimate outcome of such pending or potential litigation or regulatory matters cannot be predicted at this time; however, for current proceedings not specifically reported in Note (B) to the Condensed Financial Statements herein, management does not anticipate that the ultimate liabilities, if any, arising from such current proceedings would have a material effect on Gulf Power's financial statements. See Note (B) to the Condensed Financial Statements herein for a discussion of various other contingencies, regulatory matters, and other matters being litigated which may affect future earnings potential.

ACCOUNTING POLICIES

Application of Critical Accounting Policies and Estimates

Gulf Power prepares its financial statements in accordance with GAAP. Significant accounting policies are described in Note 1 to the financial statements of Gulf Power in Item 8 of the Form 10-K. In the application of these policies, certain estimates are made that may have a material impact on Gulf Power's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. See MANAGEMENT'S DISCUSSION AND ANALYSIS – ACCOUNTING POLICIES – "Application of Critical Accounting Policies and Estimates" of Gulf Power in Item 7 of the Form 10-K for a complete discussion of Gulf Power's critical accounting policies and estimates.

Recently Issued Accounting Standards

See MANAGEMENT'S DISCUSSION AND ANALYSIS – ACCOUNTING POLICIES – "Recently Issued Accounting Standards" of Gulf Power in Item 7 of the Form 10-K for additional information regarding ASU No. 2016-02, *Leases (Topic 842)*. See Note (A) to the Condensed Financial Statements herein for information regarding Gulf Power's recently adopted accounting standards.

FINANCIAL CONDITION AND LIQUIDITY

Overview

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Overview" of Gulf Power in Item 7 of the Form 10-K for additional information. Gulf Power's financial condition remained stable at June 30, 2018. Gulf Power intends to continue to monitor its access to short-term and long-term capital markets as well as bank credit agreements to meet future capital and liquidity needs. See "Capital Requirements and Contractual Obligations," "Sources of Capital," and "Financing Activities" herein for additional information.

Net cash provided from operating activities totaled \$157 million for the first six months of 2018 compared to \$124 million for the corresponding period in 2017. The \$33 million increase was primarily due to increased fuel cost recovery. Net cash used for investing activities totaled \$158 million in the first six months of 2018 primarily due to property additions. Net cash provided from financing activities totaled \$4 million for the first six months of 2018 primarily due to an increase in notes payable and capital contributions from Southern Company, partially offset by the payment of common stock dividends. Cash flows from financing activities vary from period to period based on capital needs and the maturity or redemption of securities.

Significant balance sheet changes for the first six months of 2018 include an increase of \$60 million in property, plant, and equipment primarily due to additions at generation and distribution facilities; an increase of \$54 million in other regulatory liabilities, current offset by a decrease of \$74 million in deferred credits related to income taxes primarily as a result of the Gulf Power Tax Reform Settlement Agreement; and an increase of \$45 million in notes payable related to commercial paper borrowings. See FUTURE EARNINGS POTENTIAL – "Retail Regulatory

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Matters – Retail Base Rate Case " herein for additional information regarding the Gulf Power Tax Reform Settlement Agreement.

Capital Requirements and Contractual Obligations

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Capital Requirements and Contractual Obligations" of Gulf Power in Item 7 of the Form 10-K for a description of Gulf Power's capital requirements and contractual obligations. There are no scheduled maturities of long-term debt through June 30, 2019 . See " Financing Activities " herein for additional information.

The construction program is subject to periodic review and revision, and actual construction costs may vary from these estimates because of numerous factors. These factors include: changes in business conditions; changes in load projections; storm impacts; changes in environmental laws and regulations; the outcome of any legal challenges to environmental rules; changes in generating plants, including unit retirements and replacements and adding or changing fuel sources at existing generating units, to meet regulatory requirements; changes in the expected environmental compliance programs; changes in FERC rules and regulations; Florida PSC approvals; changes in legislation; the cost and efficiency of construction labor, equipment, and materials; project scope and design changes; and the cost of capital. In addition, there can be no assurance that costs related to capital expenditures will be fully recovered.

Sources of Capital

Gulf Power plans to obtain the funds required to meet its future capital needs from sources similar to those used in the past, which were primarily from operating cash flows, external security issuances, borrowings from financial institutions, and equity contributions from Southern Company. However, the amount, type, and timing of any future financings, if needed, will depend upon regulatory approval, prevailing market conditions, and other factors. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Sources of Capital" of Gulf Power in Item 7 of the Form 10-K for additional information.

At June 30, 2018 , Gulf Power's current liabilities exceeded current assets by \$29 million. Gulf Power's current liabilities may exceed current assets because of scheduled maturities of long-term debt and the periodic use of short-term debt as a funding source, as well as significant seasonal fluctuations in cash needs.

Gulf Power intends to utilize operating cash flows, external security issuances, and borrowings from financial institutions to fund its short-term capital needs. Gulf Power has substantial cash flow from operating activities and access to the capital markets and financial institutions to meet short-term liquidity needs.

At June 30, 2018 , Gulf Power had approximately \$31 million of cash and cash equivalents. Committed credit arrangements with banks at June 30, 2018 were as follows:

Expires					Executable Term		Expires Within One Year	
2018	2019	2020	Total	Unused	Loans			
					One	Term	No Term	
					Year	Out	Out	
<i>(in millions)</i>								
\$ 20	\$ 25	\$ 235	\$ 280	\$ 280	\$ 45	\$ 45	\$ —	

See Note 6 to the financial statements of Gulf Power under "Bank Credit Arrangements" in Item 8 of the Form 10-K and Note (F) to the Condensed Financial Statements under " Bank Credit Arrangements " herein for additional information.

Most of these bank credit arrangements contain covenants that limit debt levels and contain cross-acceleration provisions to other indebtedness (including guarantee obligations) of Gulf Power. Such cross-acceleration provisions to other indebtedness would trigger an event of default if Gulf Power defaulted on indebtedness, the payment of which was then accelerated. At June 30, 2018 , Gulf Power was in compliance with all such covenants. A

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

portion (\$40 million) of the bank credit arrangements contain material adverse change clauses at the time of borrowings.

Subject to applicable market conditions, Gulf Power expects to renew or replace its bank credit arrangements, as needed, prior to expiration. In connection therewith, Gulf Power may extend the maturity dates and/or increase or decrease the lending commitments thereunder.

Most of the unused credit arrangements with banks are allocated to provide liquidity support to Gulf Power's pollution control revenue bonds and commercial paper program. The amount of variable rate pollution control revenue bonds outstanding requiring liquidity support as of June 30, 2018 was approximately \$82 million. In addition, at June 30, 2018, Gulf Power had approximately \$37 million of fixed rate pollution control revenue bonds outstanding that were required to be remarketed within the next 12 months.

Gulf Power may also meet short-term cash needs through a Southern Company subsidiary organized to issue and sell commercial paper at the request and for the benefit of Gulf Power and the other traditional electric operating companies. Proceeds from such issuances for the benefit of Gulf Power are loaned directly to Gulf Power. The obligations of each traditional electric operating company under these arrangements are several and there is no cross-affiliate credit support. Short-term borrowings are included in notes payable on the balance sheets.

Details of short-term borrowings were as follows:

	Short-term Debt at June 30, 2018		Short-term Debt During the Period ^(*)		
	Amount Outstanding	Weighted Average Interest Rate	Average Amount Outstanding	Weighted Average Interest Rate	Maximum Amount Outstanding
	<i>(in millions)</i>		<i>(in millions)</i>		<i>(in millions)</i>
Commercial paper	\$ 90	2.4%	\$ 62	2.3%	\$ 100

(*) Average and maximum amounts are based upon daily balances during the three-month period ended June 30, 2018.

Gulf Power believes the need for working capital can be adequately met by utilizing the commercial paper program, lines of credit, short-term bank loans, and operating cash flows.

Credit Rating Risk

At June 30, 2018, Gulf Power did not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade.

There are certain contracts that could require collateral, but not accelerated payment, in the event of a credit rating change to BBB- and/or Baa3 or below. These contracts are for physical electricity purchases and sales, fuel transportation and storage, and energy price risk management.

The maximum potential collateral requirements under these contracts at June 30, 2018 were as follows:

Credit Ratings	Maximum Potential Collateral Requirements
	<i>(in millions)</i>
At BBB- and/or Baa3	\$ 117
Below BBB- and/or Baa3	\$ 418

Included in these amounts are certain agreements that could require collateral in the event that Alabama Power or Georgia Power (affiliate companies of Gulf Power) has a credit rating change to below investment grade. Generally, collateral may be provided by a Southern Company guaranty, letter of credit, or cash. Additionally, a credit rating

GULF POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

downgrade could impact the ability of Gulf Power to access capital markets and would be likely to impact the cost at which it does so.

On May 21, 2018, S&P revised its rating outlook for Gulf Power from negative to stable.

As a result of the Tax Reform Legislation, certain financial metrics, such as the funds from operations to debt percentage, used by the credit rating agencies to assess Southern Company and its subsidiaries, including Gulf Power, may be negatively impacted. The Gulf Power Tax Reform Settlement Agreement is expected to help mitigate these potential adverse impacts to Gulf Power's credit metrics by allowing a maximum equity ratio of 53.5% for all retail regulatory purposes. See Note 3 to the financial statements of Gulf Power under "Retail Regulatory Matters" in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements under "Regulatory Matters – Gulf Power" herein for additional information.

Financing Activities

Gulf Power did not issue or redeem any securities during the six months ended June 30, 2018 .

In addition to any financings that may be necessary to meet capital requirements, contractual obligations, and storm recovery, Gulf Power plans to continue, when economically feasible, a program to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit.

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

SECOND QUARTER 2018 vs. SECOND QUARTER 2017
AND
YEAR-TO-DATE 2018 vs. YEAR-TO-DATE 2017

OVERVIEW

Mississippi Power operates as a vertically integrated utility providing electric service to retail customers within its traditional service territory located within the State of Mississippi and to wholesale customers in the Southeast.

Many factors affect the opportunities, challenges, and risks of Mississippi Power's business of providing electric service. These factors include Mississippi Power's ability to maintain and grow energy sales and to operate in a constructive regulatory environment that provides timely recovery of prudently-incurred costs. These costs include those related to reliability, fuel, and stringent environmental standards, as well as ongoing capital and operations and maintenance expenditures and restoration following major storms. Appropriately balancing required costs and capital expenditures with customer prices will continue to challenge Mississippi Power for the foreseeable future.

On July 27, 2018, Mississippi Power and the Mississippi Public Utilities Staff (MPUS) entered into a settlement agreement with respect to the 2018 PEP filing and all unresolved PEP filings for prior years (PEP Settlement Agreement), which was approved by the Mississippi PSC on August 7, 2018. Rates under the PEP Settlement Agreement, which result in approximately \$21.6 million in additional revenue annually, will take effect for the first billing cycle of September 2018.

On August 3, 2018, Mississippi Power and the MPUS entered into a settlement agreement to increase rates approximately \$17 million annually with respect to the 2018 ECO Plan filing (ECO Settlement Agreement), which was approved by the Mississippi PSC on August 7, 2018. Rates under the ECO Settlement Agreement will take effect for the first billing cycle of September 2018.

On May 8, 2018, the Mississippi PSC issued an order to begin an operations review of Mississippi Power in August 2018 with the final report expected by February 28, 2019. Mississippi Power expects that the review will include, but not be limited to, a comparative analysis of its costs, its cost recovery framework, and ways in which it may streamline management operations for the reasonable benefit of ratepayers. The ultimate outcome of this matter cannot be determined at this time.

See FUTURE EARNINGS POTENTIAL – " Retail Regulatory Matters " herein for additional information.

As of June 30, 2018, Mississippi Power recorded charges to income of an immaterial amount for the second quarter 2018 and \$45 million (\$33 million after tax) for year-to-date 2018, primarily resulting from the abandonment and related closure activities for the mine and gasifier-related assets at the Kemper County energy facility. Additional closure costs for the mine and gasifier-related assets, currently estimated to cost up to \$25 million pre-tax (excluding salvage, net of dismantlement costs), are expected to be incurred during the remainder of 2018 and 2019. In addition, period costs, including, but not limited to, costs for compliance and safety, ARO accretion, and property taxes for the mine and gasifier-related assets, are estimated at \$4 million for the remainder of 2018, \$7 million in 2019, and \$4 million annually beginning in 2020. The ultimate outcome of this matter cannot be determined at this time.

On August 6, 2018, Mississippi Power filed its proposed Reserve Margin Plan (RMP), as required by the Mississippi PSC's order in the docket established for the purposes of pursuing a global settlement of the costs related to the Kemper County energy facility (Kemper Settlement Docket). Under the RMP, Mississippi Power proposes alternatives that would reduce its reserve margin, with the most economic of the alternatives being the 2 -year and 7 -year acceleration of the retirement of Plant Watson Units 4 and 5, respectively, to the first quarter 2022 and the 4 -year acceleration of the retirement of Plant Greene County Units 1 and 2 to the third quarter 2021 and the third quarter 2022, respectively, in order to lower or avoid operating costs. The Plant Greene County unit retirements would require the completion by Alabama Power of proposed transmission and system reliability

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

improvements, as well as agreement by Alabama Power. The RMP filing also states that, in the event the Mississippi PSC ultimately approves an alternative that includes an accelerated retirement, Mississippi Power would require authorization to defer in a regulatory asset for future recovery the remaining net book value of the units at the time of retirement. Mississippi Power expects the MPUS and other interested parties to review the proposal prior to resolution by the Mississippi PSC. The ultimate outcome of this matter cannot be determined at this time. However, if approved by the Mississippi PSC, the alternatives are not expected to have any adverse impact on customer rates.

For additional information on the Kemper County energy facility, see Note 3 to the financial statements of Mississippi Power under "Kemper County Energy Facility" in Item 8 of the Form 10-K and FUTURE EARNINGS POTENTIAL – "Kemper County Energy Facility" and Note (B) to the Condensed Financial Statements under "Kemper County Energy Facility" herein.

In March 2018, Mississippi Power issued \$300 million aggregate principal amount of Series 2018A Floating Rate Senior Notes due March 27, 2020 bearing interest based on three-month LIBOR and \$300 million aggregate principal amount of Series 2018B 3.95% Senior Notes due March 30, 2028. In March 2018, Mississippi Power also entered into a \$300 million short-term floating rate bank loan bearing interest based on one-month LIBOR, of which \$200 million was repaid in the second quarter 2018 and \$50 million was repaid on July 31, 2018. Mississippi Power used the proceeds from these financings to repay a \$900 million unsecured term loan.

Mississippi Power continues to focus on several key performance indicators. In recognition that Mississippi Power's long-term financial success is dependent upon how well it satisfies its customers' needs, Mississippi Power's retail base rate mechanism, PEP, includes performance indicators that directly tie customer service indicators to Mississippi Power's allowed ROE. Mississippi Power also focuses on broader measures of customer satisfaction, plant availability, system reliability, and net income after dividends on preferred stock.

RESULTS OF OPERATIONS

Net Income (Loss)

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$2,100	N/M	\$2,113	N/M

N/M - Not meaningful

Mississippi Power's net income after dividends on preferred stock for the second quarter 2018 was \$46 million compared to a loss of \$2.05 billion for the corresponding period in 2017. Mississippi Power's net income after dividends on preferred stock for year-to-date 2018 was \$39 million compared to a loss of \$2.07 billion for the corresponding period in 2017. The changes were related to lower pre-tax charges associated with the Kemper IGCC, slightly offset by the cessation of AFUDC equity related to the Kemper IGCC in the second quarter 2017.

See Note 3 to the financial statements of Mississippi Power under "Kemper County Energy Facility" in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements under "Kemper County Energy Facility" herein for additional information.

Retail Revenues

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(10)	(4.5)	\$(16)	(3.8)

In the second quarter 2018, retail revenues were \$212 million compared to \$222 million for the corresponding period in 2017. For year-to-date 2018, retail revenues were \$406 million compared to \$422 million for the corresponding period in 2017.

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Details of the changes in retail revenues were as follows:

	Second Quarter 2018		Year-to-Date 2018	
	(in millions)	(% change)	(in millions)	(% change)
Retail – prior year	\$ 222		\$ 422	
Estimated change resulting from –				
Rates and pricing	(7)	(3.2)	(14)	(3.3)
Sales decline	(2)	(0.8)	(2)	(0.5)
Weather	4	1.8	10	2.4
Fuel and other cost recovery	(5)	(2.3)	(10)	(2.4)
Retail – current year	\$ 212	(4.5)%	\$ 406	(3.8)%

Revenues associated with changes in rates and pricing decreased in the second quarter and year-to-date 2018 when compared to the corresponding periods in 2017 due to a reduction in base rates related to the Kemper County energy facility that became effective for the first billing cycle of April 2018 of \$5 million and \$6 million, respectively, and decreases of \$2 million and \$8 million, respectively, due to ECO Plan rates implemented in the second quarter 2017 related to the Plant Daniel Units 1 and 2 scrubbers. See Note 3 to the financial statements of Mississippi Power under "Retail Regulatory Matters – Environmental Compliance Overview Plan" and "Kemper County Energy Facility – Rate Recovery" in Item 8 of the Form 10-K for additional information.

Revenues attributable to changes in sales decreased for the second quarter and year-to-date 2018 compared to the corresponding periods in 2017. Weather-adjusted residential KWH sales were relatively flat in the second quarter and year-to-date 2018. Weather-adjusted commercial KWH sales decreased 2.8% and 1.6% for the second quarter and year-to-date 2018, respectively, primarily due to decreased customer usage related to energy efficiency, slightly offset by customer growth. Industrial KWH sales decreased 2.0% and 0.4% for the second quarter and year-to-date 2018, respectively, primarily due to decreased usage by several large industrial customers related to energy efficiency and optimization efforts.

Fuel and other cost recovery revenues decreased in the second quarter and year-to-date 2018 when compared to the corresponding periods in 2017 primarily as a result of lower recoverable fuel costs. Recoverable fuel costs include fuel and purchased power expenses reduced by the fuel portion of wholesale revenues from energy sold to customers outside Mississippi Power's service territory. Electric rates include provisions to adjust billings for fluctuations in fuel costs, including the energy component of purchased power costs. Under these provisions, fuel revenues generally equal fuel expenses, including the energy component of purchased power costs, and do not affect net income.

Wholesale Revenues – Non-Affiliates

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
(change in millions)	(% change)	(change in millions)	(% change)
\$(7)	(11.3)	\$(6)	(4.8)

Wholesale revenues from sales to non-affiliates will vary depending on fuel prices, the market prices of wholesale energy compared to the cost of Mississippi Power's and the Southern Company system's generation, demand for energy within the Southern Company system's electric service territory, and the availability of the Southern Company system's generation. Increases and decreases in energy revenues that are driven by fuel prices are accompanied by an increase or decrease in fuel costs and do not have a significant impact on net income. In addition, Mississippi Power provides service under long-term contracts with rural electric cooperative associations and municipalities located in southeastern Mississippi under cost-based electric tariffs which are subject to regulation by the FERC. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "FERC Matters" of Mississippi Power in Item 7 of the Form 10-K and FUTURE EARNINGS POTENTIAL – "FERC Matters" herein for additional information.

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In the second quarter 2018 , wholesale revenues from sales to non-affiliates were \$55 million compared to \$62 million for the corresponding period in 2017 . For year-to-date 2018 , wholesale revenues from sales to non-affiliates were \$118 million compared to \$124 million for the corresponding period in 2017 . In the second quarter and year-to-date 2018, the decreases primarily resulted from a decrease in revenue under the Shared Services Agreement (SSA) of \$5 million and \$9 million, respectively, as a result of transmission revenue now being recovered under the Open Access Transmission Tariff (OATT). The year-to-date 2018 decrease was partially offset by an increase in sales due to weather.

Wholesale Revenues – Affiliates

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$4	26.7	\$34	N/M

N/M - Not meaningful

Wholesale revenues from sales to affiliated companies will vary depending on demand and the availability and cost of generating resources at each company. These affiliate sales are made in accordance with the IIC, as approved by the FERC. These transactions do not have a significant impact on earnings since this energy is generally sold at marginal cost.

In the second quarter 2018 , wholesale revenues from sales to affiliates were \$19 million compared to \$15 million for the corresponding period in 2017 . For year-to-date 2018 , wholesale revenues from sales to affiliates were \$54 million compared to \$20 million for the corresponding period in 2017 . These increases were primarily due to increases in KWH sales due to increased availability of Mississippi Power's lower cost generation resources to serve the Southern Company system's territorial load in 2018 as compared to 2017.

Other Revenues

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$7	N/M	\$11	N/M

N/M - Not meaningful

In the second quarter 2018 , other revenues were \$11 million compared to \$4 million for the corresponding period in 2017. For year-to-date 2018 , other revenues were \$20 million compared to \$9 million for the corresponding period in 2017. These increases were primarily due to increases in transmission revenue related to SSA customers now being recovered under the OATT.

Fuel and Purchased Power Expenses

	Second Quarter 2018		Year-to-Date 2018 vs. Year-to-Date 2017	
	<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
Fuel	\$ (4)	(3.9)	\$ 17	9.4
Purchased power	1	16.7	2	14.3
Total fuel and purchased power expenses	\$ (3)		\$ 19	

In the second quarter 2018 , total fuel and purchased power expenses were \$105 million compared to \$108 million for the corresponding period in 2017 . The decrease was primarily due to a \$13 million decrease in the cost of

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

natural gas and purchased power, partially offset by a \$10 million increase in the volume of KWHs generated and purchased.

For year-to-date 2018, total fuel and purchased power expenses were \$213 million compared to \$194 million for the corresponding period in 2017. The increase was primarily due to a \$28 million increase in the volume of KWHs generated and purchased, partially offset by a \$10 million decrease in the cost of natural gas and purchased power.

Fuel and purchased power energy transactions do not have a significant impact on earnings since energy expenses are generally offset by energy revenues through Mississippi Power's fuel cost recovery clause.

Details of Mississippi Power's generation and purchased power were as follows:

	Second Quarter 2018	Second Quarter 2017	Year-to-Date 2018	Year-to-Date 2017
Total generation (in millions of KWHs)	4,081	3,927	8,084	7,088
Total purchased power (in millions of KWHs) (*)	238	121	433	362
Sources of generation (percent) –				
Coal	7	7	6	8
Gas	93	93	94	92
Cost of fuel, generated (in cents per net KWH) –				
Coal	3.42	3.61	3.49	3.46
Gas	2.51	2.73	2.56	2.69
Average cost of fuel, generated (in cents per net KWH)	2.58	2.79	2.61	2.76
Average cost of purchased power (in cents per net KWH) (*)	2.86	4.74	3.71	3.80

(*) Includes energy produced during the test period for the Kemper IGCC, which is accounted for in accordance with FERC guidance.

Fuel

In the second quarter 2018, total fuel expense was \$98 million compared to \$102 million for the corresponding period in 2017. The decrease was due to an 8.0% decrease in the cost of natural gas, partially offset by an increase in non-territorial sales as a result of lower prices.

For year-to-date 2018, total fuel expense was \$197 million compared to \$180 million for the corresponding period in 2017. The increase was due to a 14.9% increase in the volume of KWHs generated primarily as a result of higher sales, partially offset by a 5.0% decrease in the cost of natural gas.

Purchased Power

Energy purchases will vary depending on the market prices of wholesale energy as compared to the cost of the Southern Company system's generation, demand for energy within the Southern Company system's service territory, and the availability of the Southern Company system's generation. These purchases are made in accordance with the IIC or other contractual agreements, as approved by the FERC.

Other Operations and Maintenance Expenses

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
(change in millions)	(% change)	(change in millions)	(% change)
\$(5)	(6.9)	\$(7)	(4.7)

In the second quarter 2018, other operations and maintenance expenses were \$67 million compared to \$72 million for the corresponding period in 2017. For year-to date 2018, other operations and maintenance expenses were \$141 million compared to \$148 million for the corresponding period in 2017. These decreases were primarily due to a

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

reduction in professional services related to the combined cycle and associated common facilities portion of the Kemper County energy facility.

Depreciation and Amortization

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$3	7.3	\$3	3.7

In the second quarter 2018, depreciation and amortization was \$44 million compared to \$41 million for the corresponding period in 2017. The increase was primarily related to \$4 million of depreciation for additional plant in service, partially offset by a \$2 million decrease in amortization associated with regulatory assets and liabilities.

For year-to-date 2018, depreciation and amortization was \$84 million compared to \$81 million for the corresponding period in 2017. The increase was primarily related to \$7 million of depreciation for additional plant in service, partially offset by a \$4 million decrease in amortization associated with regulatory assets and liabilities.

Estimated Loss on Kemper IGCC

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(3,012)	(100.0)	\$(3,075)	(98.6)

Estimated losses on the Kemper IGCC were immaterial for the second quarter 2018 and \$45 million for year-to-date 2018, resulting from the abandonment and related closure activities for the mine and gasifier-related assets as compared to \$3.01 billion and \$3.12 billion for the corresponding periods in 2017 related to revisions to the estimated construction costs for, and subsequent suspension of, the Kemper IGCC in June 2017.

See Note 3 to the financial statements of Mississippi Power under "Kemper County Energy Facility" in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements under "Kemper County Energy Facility" herein for additional information.

Allowance for Equity Funds Used During Construction

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(36)	(100.0)	\$(71)	(100.0)

In the second quarter and year-to-date 2018, AFUDC equity was immaterial compared to \$36 million and \$71 million, respectively, recorded for the corresponding periods in 2017 related to the Kemper IGCC construction. These decreases resulted from suspension of the Kemper IGCC construction in June 2017.

See Note 3 to the financial statements of Mississippi Power under "Kemper County Energy Facility" in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements under "Kemper County Energy Facility" herein for additional information.

Interest Expense, Net of Amounts Capitalized

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$4	23.5	\$2	5.4

In the second quarter 2018, interest expense, net of amounts capitalized was \$21 million compared to \$17 million for the corresponding period in 2017. For year-to-date 2018, interest expense, net of amounts capitalized was \$39

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

million compared to \$37 million for the corresponding period in 2017. These increases were primarily due to reductions in AFUDC debt of \$12 million and \$24 million in the second quarter and year-to-date 2018, respectively, related to the Kemper IGCC project suspension in June 2017, largely offset by decreases in interest expense as a result of a decrease in average outstanding debt, the reversal of tax reserves in 2017, and decreases due to the completion of Kemper IGCC carrying cost amortization in 2017.

See Note 3 to the financial statements of Mississippi Power under "Kemper County Energy Facility" in Item 8 of the Form 10-K and Note (H) to the Condensed Financial Statements herein for additional information.

Other Income (Expense)

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$24	N/M	\$22	N/M

N/M - Not Meaningful

In the second quarter 2018, other income (expense), net was \$27 million compared to \$3 million for the corresponding period in 2017. For year-to-date 2018, other income (expense), net was \$27 million compared to \$5 million for the corresponding period in 2017. These increases were primarily due to the settlement of Mississippi Power's Deepwater Horizon claim in May 2018.

See Note (B) to the Condensed Financial Statements under "General Litigation Matters" herein.

Income Taxes (Benefit)

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$894	N/M	\$917	N/M

N/M - Not Meaningful

In the second quarter 2018, income taxes were \$13 million compared to an income tax benefit of \$881 million for the corresponding period in 2017. For year-to-date 2018, income taxes were \$9 million compared to an income tax benefit of \$908 million for the corresponding period in 2017. These changes were primarily due to lower estimated losses on the Kemper IGCC, net of the related non-deductible AFUDC equity in 2018 due to the Kemper IGCC project suspension in 2017. These increases also reflect increases resulting from higher pre-tax earnings, partially offset by the 2017 reversal of tax reserves related to research and experimental deductions and the impact of the Tax Reform Legislation.

See Note (H) to the Condensed Financial Statements herein for additional information.

FUTURE EARNINGS POTENTIAL

The results of operations discussed above are not necessarily indicative of Mississippi Power's future earnings potential. The level of Mississippi Power's future earnings depends on numerous factors that affect the opportunities, challenges, and risks of Mississippi Power's business of providing electric service. These factors include Mississippi Power's ability to recover its prudently-incurred costs in a timely manner during a time of increasing costs and limited projected demand growth over the next several years. Another factor is Mississippi Power's ability to prevail against legal challenges associated with the Kemper County energy facility. Future earnings will be driven primarily by customer growth. Earnings will also depend upon maintaining and growing sales, considering, among other things, the adoption and/or penetration rates of increasingly energy-efficient technologies and increasing volumes of electronic commerce transactions, both of which could contribute to a net reduction in customer usage. Earnings are subject to a variety of other factors. These factors include weather, competition, developing new and maintaining existing energy contracts and associated load requirements with other utilities and other wholesale customers, energy conservation practiced by customers, the use of alternative energy

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

sources by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth or decline in Mississippi Power's service territory. Demand for electricity is primarily driven by the pace of economic growth that may be affected by changes in regional and global economic conditions, which may impact future earnings.

For additional information relating to these issues, see RISK FACTORS in Item 1A and MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL of Mississippi Power in Item 7 of the Form 10-K.

Environmental Matters

Mississippi Power's operations are regulated by state and federal environmental agencies through a variety of laws and regulations governing air, water, land, and protection of other natural resources. Mississippi Power maintains comprehensive environmental compliance and greenhouse gas (GHG) strategies to assess upcoming requirements and compliance costs associated with these environmental laws and regulations. The costs, including capital expenditures and operations and maintenance costs, required to comply with environmental laws and regulations and to achieve stated goals may impact future unit retirement and replacement decisions, results of operations, cash flows, and financial condition. Related costs may result from the installation of additional environmental controls, closure and monitoring of CCR facilities, unit retirements, and adding or changing fuel sources for certain existing units, as well as related upgrades to the transmission system. A major portion of these costs are expected to be recovered through existing ratemaking provisions. The ultimate impact of environmental laws and regulations and the GHG goals discussed below will depend on various factors, such as state adoption and implementation of requirements, the availability and cost of any deployed control technology, and the outcome of pending and/or future legal challenges.

New or revised environmental laws and regulations could affect many areas of Mississippi Power's operations. The impact of any such changes cannot be determined at this time. Environmental compliance costs could affect earnings if such costs cannot continue to be fully recovered in rates on a timely basis or through long-term wholesale agreements. Further, increased costs that are recovered through regulated rates could contribute to reduced demand for electricity, which could negatively affect results of operations, cash flows, and financial condition. Additionally, many commercial and industrial customers may also be affected by existing and future environmental requirements, which for some may have the potential to ultimately affect their demand for electricity. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters" of Mississippi Power in Item 7 and Note 3 to the financial statements of Mississippi Power under "Environmental Matters" in Item 8 of the Form 10-K for additional information.

Environmental Laws and Regulations

Water Quality

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters – Environmental Laws and Regulations – Water Quality" of Mississippi Power in Item 7 of the Form 10-K for additional information regarding the effluent limitations guidelines (ELG) rule.

On May 2, 2018, the EPA updated its anticipated final rulemaking schedule for ELG from September 2020 to December 2019. The impact of any changes to the ELG rule will depend on the content of the final rule and the outcome of any legal challenges and cannot be determined at this time.

Coal Combustion Residuals

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters – Environmental Laws and Regulations – Coal Combustion Residuals" of Mississippi Power in Item 7 of the Form 10-K for additional information regarding the Disposal of Coal Combustion Residuals from Electric Utilities rule (CCR Rule).

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

On July 30, 2018, the EPA published certain amendments to the CCR Rule, which will be effective August 29, 2018. These amendments extend the date from April 2019 to October 31, 2020 to cease sending CCR and other waste streams to impoundments that demonstrate compliance with all except two specified criteria. These amendments also establish groundwater protection standards for four constituents that do not have established EPA maximum contaminant levels and allow a participating state director or the EPA (where the EPA is the permitting authority) to suspend groundwater monitoring requirements under certain circumstances. Specific site impacts are being evaluated by Mississippi Power.

In June 2018, Mississippi Power recorded an increase of approximately \$14 million to its AROs related to the CCR Rule. Approximately \$11 million of the revised cost estimates as of June 30, 2018 are based on information from feasibility studies performed on an ash pond at a plant that is co-owned with Alabama Power. These studies indicated that additional closure costs, primarily related to increases in estimated ash volume, water management requirements, and design revisions, will be required to close the ash pond under the planned closure-in-place methodology. As further analysis is performed and closure details are developed, Mississippi Power expects to periodically update these cost estimates as necessary. See Note (A) to the Condensed Financial Statements under "Asset Retirement Obligations" herein for additional information.

Absent continued recovery of ARO costs through regulated rates, Mississippi Power's results of operations, cash flows, and financial condition could be materially impacted. The ultimate outcome of these matters cannot be determined at this time.

Global Climate Issues

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters – Global Climate Issues" of Mississippi Power in Item 7 of the Form 10-K for additional information.

Through 2017, the Southern Company system has achieved an estimated GHG emission reduction of 36% since 2007. In April 2018, Southern Company established an intermediate goal of a 50% reduction in carbon emissions from 2007 levels by 2030 and a long-term goal of low- to no-carbon operations by 2050. To achieve these goals, the Southern Company system expects to continue growing its renewable energy portfolio, optimize technology advancements to modernize its transmission and distribution systems, increase the use of natural gas for generation, invest in energy efficiency, and continue research and development efforts focused on technologies to lower GHG emissions. The Southern Company system's ability to achieve these goals also will be dependent on many external factors, including supportive national energy policies, low natural gas prices, and the development, deployment, and advancement of relevant energy technologies. The ultimate outcome of this matter cannot be determined at this time.

FERC Matters

Municipal and Rural Association Tariff

See Note 3 to the financial statements of Mississippi Power under "FERC Matters – Municipal and Rural Associations Tariff" in Item 8 of the Form 10-K for additional information.

Mississippi Power expects to make an MRA filing in 2018. The ultimate outcome of this matter cannot be determined at this time.

Fuel Cost Recovery

Mississippi Power has a wholesale MRA and a Market Based (MB) fuel cost recovery factor. At June 30, 2018, the amount of over-recovered wholesale MRA fuel costs included in other regulatory liabilities, current on the condensed balance sheet was approximately \$5 million compared to an immaterial amount at December 31, 2017. Under-recovered wholesale MB fuel costs included in the balance sheets were immaterial at June 30, 2018 and December 31, 2017.

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

See Note 3 to the financial statements of Mississippi Power under "FERC Matters – Fuel Cost Recovery" in Item 8 of the Form 10-K for additional information.

Market-Based Rate Authority

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "FERC Matters – Market-Based Rate Authority" of Mississippi Power in Item 7 of the Form 10-K for additional information regarding proceedings related to the traditional electric operating companies' (including Mississippi Power's) and Southern Power's 2014 and 2017 triennial market power analyses.

On May 4, 2018, the FERC issued an order terminating both proceedings, finding that the traditional electric operating companies (including Mississippi Power) and Southern Power satisfy the FERC's standards for market-based rates. On May 9, 2018, the traditional electric operating companies (including Mississippi Power) and Southern Power made the compliance filing required by the order. These proceedings are essentially concluded.

Cooperative Energy Power Supply Agreement

See Note 3 to the financial statements of Mississippi Power under "FERC Matters – Cooperative Energy Power Supply Agreement" in Item 8 of the Form 10-K for additional information regarding Cooperative Energy's network integration transmission service agreement (NITSA) with SCS.

On March 23, 2018, the FERC accepted the amendment to the NITSA between Cooperative Energy and SCS, effective April 1, 2018.

Open Access Transmission Tariff

On May 10, 2018, the Alabama Municipal Electric Authority and Cooperative Energy filed with the FERC a complaint against SCS and the traditional electric operating companies (including Mississippi Power) claiming that the current 11.25% base ROE used in calculating the annual transmission revenue requirements of the traditional electric operating companies' (including Mississippi Power's) open access transmission tariff is unjust and unreasonable as measured by the applicable FERC standards. The complaint requests that the base ROE be set no higher than 8.65% and that the FERC order refunds for the difference in revenue requirements that results from applying a just and reasonable ROE established in this proceeding upon determining the current ROE is unjust and unreasonable. On June 18, 2018, SCS and the traditional electric operating companies (including Mississippi Power) filed their response challenging the adequacy of the showing presented by the complainants and offering support for the current ROE. The ultimate outcome of this matter cannot be determined at this time.

Retail Regulatory Matters

Mississippi Power's rates and charges for service to retail customers are subject to the regulatory oversight of the Mississippi PSC. Mississippi Power's rates are a combination of base rates under PEP and several separate cost recovery clauses for specific categories of costs. These separate cost recovery clauses address such items as fuel and purchased power, energy efficiency programs, ad valorem taxes, property damage, and the costs of compliance with environmental laws and regulations. Costs not addressed through one of the specific cost recovery clauses are expected to be recovered through Mississippi Power's base rates.

On May 8, 2018, the Mississippi PSC issued an order to begin an operations review of Mississippi Power in August 2018 with the final report expected by February 28, 2019. Mississippi Power expects that the review will include, but not be limited to, a comparative analysis of its costs, its cost recovery framework, and ways in which it may streamline management operations for the reasonable benefit of ratepayers. The ultimate outcome of this matter cannot be determined at this time.

See Note 3 to the financial statements of Mississippi Power under "Retail Regulatory Matters" and "Kemper County Energy Facility" in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements under "Regulatory Matters – Mississippi Power" herein for additional information.

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Performance Evaluation Plan

On February 7, 2018, Mississippi Power submitted its revised 2018 projected PEP filing to the Mississippi PSC, which reflected the impacts of the Tax Reform Legislation, requesting an increase in annual retail revenues of \$26 million based on a performance adjusted ROE of 9.33% and an increased equity ratio of 55%.

On March 22, 2018, Mississippi Power submitted its annual PEP lookback filing for 2017, which reflected no surcharge or refund.

On July 27, 2018, Mississippi Power and the MPUS entered into the PEP Settlement Agreement, which was approved by the Mississippi PSC on August 7, 2018. Rates under the PEP Settlement Agreement will take effect for the first billing cycle of September 2018.

The PEP Settlement Agreement provides for an increase of approximately \$21.6 million in annual base retail revenues, which excludes approximately \$5.5 million requested for certain compensation costs contested by the MPUS. Under the PEP Settlement Agreement, Mississippi Power expects to defer these costs for 2018 and 2019 as a regulatory asset. The Mississippi PSC is currently expected to rule on the appropriate treatment for such costs in connection with Mississippi Power's next base rate case, which is scheduled to be filed in the fourth quarter 2019 (2019 Base Rate Case). The ultimate outcome of this matter cannot be determined at this time.

Pursuant to the PEP Settlement Agreement, Mississippi Power's performance-adjusted allowed ROE will be 9.31% and its allowed equity ratio will remain at 50%, pending further review by the Mississippi PSC. In lieu of the requested equity ratio increase, Mississippi Power will retain \$44 million of excess accumulated deferred income taxes resulting from the Tax Reform Legislation, which had been proposed to be amortized beginning in 2018, until the conclusion of the 2019 Base Rate Case. Further, Mississippi Power will seek equity contributions sufficient to restore its equity ratio (which was 43.5% at June 30, 2018) to the 50% target. In the event Mississippi Power's actual average equity ratio for 2018 is more than 1% higher or lower than the 50% target, Mississippi Power will defer the corresponding difference in its revenue requirement as a regulatory asset or liability for resolution in the 2019 Base Rate Case.

Pursuant to the PEP Settlement Agreement, PEP proceedings will be suspended until after the conclusion of the 2019 Base Rate Case and Mississippi Power will not be required to make any PEP filings for regulatory years 2018, 2019, and 2020. The PEP Settlement Agreement also resolves all open PEP filings with no change to customer rates. As a result, in the third quarter 2018, Mississippi Power expects to recognize revenues of \$5 million previously reserved in connection with the 2012 PEP lookback filing.

Energy Efficiency

On May 8, 2018, the Mississippi PSC issued an order approving Mississippi Power's revised annual projected Energy Efficiency Cost Rider 2018 compliance filing, submitted on May 3, 2018, which increased annual retail revenues by approximately \$3 million effective with the first billing cycle for June 2018.

Environmental Compliance Overview Plan

On August 3, 2018, Mississippi Power and the MPUS entered into the ECO Settlement Agreement, which provides for an increase of approximately \$17 million in annual base retail revenues and was approved by the Mississippi PSC on August 7, 2018. Rates under the ECO Settlement Agreement will take effect for the first billing cycle of September 2018 and will continue in effect until modified by the Mississippi PSC. These revenues are expected to be sufficient to recover the costs included in Mississippi Power's request for 2018, as well as the remaining deferred amounts that were originally expected to be recovered in 2019. In accordance with the ECO Settlement Agreement, ECO Plan proceedings will be suspended until after the conclusion of the 2019 Base Rate Case and Mississippi Power will not be required to make any ECO Plan filings for 2018, 2019, and 2020, with any necessary true-ups to be reflected in the 2019 Base Rate Case. The ECO Settlement Agreement contains the same terms as the PEP Settlement Agreement described herein with respect to allowed ROE and equity ratio.

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Ad Valorem Tax Adjustment

On May 8, 2018, the Mississippi PSC approved Mississippi Power's annual ad valorem tax adjustment factor filing for 2018, which included an annual rate increase of 0.8%, or \$7 million, in annual retail revenues effective with the first billing cycle for June 2018, primarily due to increased assessments.

Kemper County Energy Facility

For additional information on the Kemper County energy facility, see Note 3 to the financial statements of Mississippi Power under "Kemper County Energy Facility" in Item 8 of the Form 10-K.

As the mining permit holder for the Kemper County energy facility, Liberty Fuels Company, LLC has a legal obligation to perform mine reclamation, and Mississippi Power has a contractual obligation to fund all reclamation activities. Mine reclamation began in the first quarter 2018. See Note 1 to the financial statements of Mississippi Power under "Variable Interest Entities" in Item 8 of the Form 10-K for additional information.

As of June 30, 2018, Mississippi Power recorded charges to income of an immaterial amount for the second quarter 2018 and \$45 million (\$33 million after tax) for year-to-date 2018, primarily resulting from the abandonment and related closure activities for the mine and gasifier-related assets at the Kemper County energy facility. Additional closure costs for the mine and gasifier-related assets, currently estimated to cost up to \$25 million pre-tax (excluding salvage, net of dismantlement costs), are expected to be incurred during the remainder of 2018 and 2019. In addition, period costs, including, but not limited to, costs for compliance and safety, ARO accretion, and property taxes for the mine and gasifier-related assets, are estimated at \$4 million for the remainder of 2018, \$7 million in 2019, and \$4 million annually beginning in 2020. The ultimate outcome of this matter cannot be determined at this time.

The combined cycle and associated common facilities portions of the Kemper County energy facility were dedicated as Plant Ratcliffe on April 27, 2018.

Reserve Margin Plan

On August 6, 2018, Mississippi Power filed its proposed RMP, as required by the Mississippi PSC's order in the Kemper Settlement Docket. Under the RMP, Mississippi Power proposes alternatives that would reduce its reserve margin, with the most economic of the alternatives being the 2 -year and 7 -year acceleration of the retirement of Plant Watson Units 4 and 5, respectively, to the first quarter 2022 and the 4 -year acceleration of the retirement of Plant Greene County Units 1 and 2 to the third quarter 2021 and the third quarter 2022, respectively, in order to lower or avoid operating costs. The Plant Greene County unit retirements would require the completion by Alabama Power of proposed transmission and system reliability improvements, as well as agreement by Alabama Power. The RMP filing also states that, in the event the Mississippi PSC ultimately approves an alternative that includes an accelerated retirement, Mississippi Power would require authorization to defer in a regulatory asset for future recovery the remaining net book value of the units at the time of retirement. Mississippi Power expects the MPUS and other interested parties to review the proposal prior to resolution by the Mississippi PSC. The ultimate outcome of this matter cannot be determined at this time. However, if approved by the Mississippi PSC, the alternatives are not expected to have any adverse impact on customer rates.

Income Tax Matters

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Income Tax Matters" of Mississippi Power in Item 7 of the Form 10-K and FINANCIAL CONDITION AND LIQUIDITY – "Credit Rating Risk," Note (B) to the Condensed Financial Statements under "Regulatory Matters – Mississippi Power," and Note (H) to the Condensed Financial Statements herein for information regarding the Tax Reform Legislation and related regulatory actions.

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Other Matters

Mississippi Power is involved in various other matters being litigated and regulatory matters that could affect future earnings. In addition, Mississippi Power is subject to certain claims and legal actions arising in the ordinary course of business. Mississippi Power's business activities are subject to extensive governmental regulation related to public health and the environment, such as laws and regulations governing air, water, land, and protection of natural resources. Litigation over environmental issues and claims of various types, including property damage, personal injury, common law nuisance, and citizen enforcement of environmental laws and regulations has occurred throughout the U.S. This litigation has included claims for damages alleged to have been caused by CO₂ and other emissions, CCR, and alleged exposure to hazardous materials, and/or requests for injunctive relief in connection with such matters.

The ultimate outcome of such pending or potential litigation or regulatory matters cannot be predicted at this time; however, for current proceedings not specifically reported in Note (B) to the Condensed Financial Statements herein, management does not anticipate that the ultimate liabilities, if any, arising from such current proceedings would have a material effect on Mississippi Power's financial statements. See Note (B) to the Condensed Financial Statements herein for a discussion of various other contingencies, regulatory matters, and other matters being litigated which may affect future earnings potential.

On May 14, 2018, Mississippi Power's claim for lost revenue resulting from the Deepwater Horizon oil spill in the Gulf of Mexico in 2010 was settled. The settlement proceeds of \$18 million, net of expenses and income tax, are included in Mississippi Power's earnings for the second quarter 2018.

To mitigate customer rate impacts associated with rising costs and declining sales, Mississippi Power management approved an employee attrition plan on July 13, 2018. Mississippi Power expects to recognize the cost of this plan, currently estimated to be between \$8 million and \$18 million, in the third quarter 2018.

Litigation

In 2016, a complaint against Mississippi Power was filed in Harrison County Circuit Court (Circuit Court) by Biloxi Freezing & Processing Inc., Gulfside Casino Partnership, and John Carlton Dean, which was amended and refiled to include, among other things, Southern Company as a defendant. The individual plaintiff alleged that Mississippi Power and Southern Company violated the Mississippi Unfair Trade Practices Act. All plaintiffs alleged that Mississippi Power and Southern Company concealed, falsely represented, and failed to fully disclose important facts concerning the cost and schedule of the Kemper County energy facility and that these alleged breaches unjustly enriched Mississippi Power and Southern Company. The plaintiffs sought unspecified actual damages and punitive damages; asked the Circuit Court to appoint a receiver to oversee, operate, manage, and otherwise control all affairs relating to the Kemper County energy facility; asked the Circuit Court to revoke any licenses or certificates authorizing Mississippi Power or Southern Company to engage in any business related to the Kemper County energy facility in Mississippi; and sought attorney's fees, costs, and interest. The plaintiffs also sought an injunction to prevent any Kemper County energy facility costs from being charged to customers through electric rates. In June 2017, the Circuit Court ruled in favor of motions by Southern Company and Mississippi Power and dismissed the case. In July 2017, the plaintiffs filed notice of an appeal. On July 13, 2018, Mississippi Power and Southern Company reached a settlement agreement with the plaintiffs and the plaintiffs' appeal was dismissed with prejudice. The settlement had no material impact on Mississippi Power's financial statements.

On May 18, 2018, Southern Company and Mississippi Power received a notice of dispute and arbitration demand filed by Martin Product Sales, LLC (Martin) based on two agreements, both related to Kemper IGCC byproducts for which Mississippi Power provided termination notices in September 2017. Martin alleges breach of contract, breach of good faith and fair dealing, fraud and misrepresentation, and civil conspiracy and makes a claim for damages in the amount of approximately \$143 million, as well as additional unspecified damages, attorney's fees, costs, and interest. Mississippi Power believes this legal challenge has no merit; however, an adverse outcome in this proceeding could have a material impact on Mississippi Power's results of operations, financial condition, and

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

liquidity. Mississippi Power will vigorously defend itself in this matter, the ultimate outcome of which cannot be determined at this time.

ACCOUNTING POLICIES

Application of Critical Accounting Policies and Estimates

Mississippi Power prepares its financial statements in accordance with GAAP. Significant accounting policies are described in Note 1 to the financial statements of Mississippi Power in Item 8 of the Form 10-K. In the application of these policies, certain estimates are made that may have a material impact on Mississippi Power's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. See MANAGEMENT'S DISCUSSION AND ANALYSIS – ACCOUNTING POLICIES – "Application of Critical Accounting Policies and Estimates" of Mississippi Power in Item 7 of the Form 10-K for a complete discussion of Mississippi Power's critical accounting policies and estimates.

Kemper County Energy Facility Closure Costs

As of June 30, 2018, Mississippi Power recorded charges to income of an immaterial amount for the second quarter 2018 and \$45 million (\$33 million after tax) for year-to-date 2018, primarily resulting from the abandonment and related closure activities for the mine and gasifier-related assets at the Kemper County energy facility. Additional closure costs for the mine and gasifier-related assets, currently estimated to cost up to \$25 million pre-tax (excluding salvage, net of dismantlement costs), are expected to be incurred during the remainder of 2018 and 2019. In addition, period costs, including, but not limited to, costs for compliance and safety, ARO accretion, and property taxes for the mine and gasifier-related assets, are estimated at \$4 million for the remainder of 2018, \$7 million in 2019, and \$4 million annually beginning in 2020. The ultimate outcome of this matter cannot be determined at this time.

See Notes 1 and 3 to the financial statements of Mississippi Power under "Variable Interest Entities" and "Kemper County Energy Facility," respectively, in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements under "Kemper County Energy Facility" herein for additional information.

Recently Issued Accounting Standards

See MANAGEMENT'S DISCUSSION AND ANALYSIS – ACCOUNTING POLICIES – "Recently Issued Accounting Standards" of Mississippi Power in Item 7 of the Form 10-K for additional information regarding ASU No. 2016-02, *Leases (Topic 842)*. See Note (A) to the Condensed Financial Statements herein for information regarding Mississippi Power's recently adopted accounting standards.

FINANCIAL CONDITION AND LIQUIDITY

Overview

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Overview" of Mississippi Power in Item 7 of the Form 10-K for additional information.

Mississippi Power's cash requirements primarily consist of funding ongoing operations, capital expenditures, and debt maturities. Capital expenditures and other investing activities include investments to maintain existing generation facilities, to comply with environmental regulations including adding environmental modifications to certain existing generating units, to expand and improve transmission and distribution facilities, and for restoration following major storms.

In March 2018, Mississippi Power issued \$300 million aggregate principal amount of Series 2018A Floating Rate Senior Notes due March 27, 2020 bearing interest based on three-month LIBOR and \$300 million aggregate principal amount of Series 2018B 3.95% Senior Notes due March 30, 2028. In March 2018, Mississippi Power also entered into a \$300 million short-term floating rate bank loan bearing interest based on one-month LIBOR, of which

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

\$200 million was repaid in the second quarter 2018 and \$50 million was repaid on July 31, 2018. Mississippi Power used the proceeds from these financings to repay a \$900 million unsecured term loan.

Net cash provided from operating activities totaled \$297 million for the first six months of 2018, an increase of \$162 million as compared to the corresponding period in 2017. The increase in cash provided from operating activities is primarily related to increased income tax refunds in 2018, partially offset by an increase in ad valorem taxes and the timing of collections of receivables. Net cash used for investing activities totaled \$108 million for the first six months of 2018 primarily due to gross property additions related to steam production, distribution, and transmission. Net cash used for financing activities totaled \$209 million for the first six months of 2018 primarily due to redemptions of long-term debt, partially offset by the issuance of senior notes and short-term borrowings. Cash flows from financing activities vary from period to period based on capital needs and the maturity or redemption of securities.

Significant balance sheet changes for the first six months of 2018 include increases of \$425 million in long-term debt primarily due to the issuance of senior notes and \$96 million in notes payable primarily due to the issuance of a short-term bank loan. Other significant changes include a net change of \$307 million in accumulated deferred income taxes due to the tax abandonment of the Kemper IGCC, as well as a decrease of \$732 million in securities due within one year due to the repayment of a \$900 million unsecured term loan.

Capital Requirements and Contractual Obligations

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Capital Requirements and Contractual Obligations" of Mississippi Power in Item 7 of the Form 10-K for a description of Mississippi Power's capital requirements and contractual obligations. Approximately \$124 million will be required through June 30, 2019 to fund maturities of long-term debt and \$100 million will be required to fund maturities of short-term debt. In addition, Mississippi Power has \$40 million of tax-exempt variable rate demand obligations that are supported by short-term credit facilities and approximately \$93 million of revenue bonds that were required to be remarketed over the next 12 months. Subsequent to June 30, 2018, Mississippi Power purchased and held approximately \$43 million of these pollution control revenue bonds. See "Sources of Capital" herein for additional information.

Mississippi Power's purchase commitments related to LTSAs have changed to approximately \$43 million for 2018, \$28 million for 2019, \$28 million for 2020, \$29 million for 2021, \$49 million for 2022, and \$257 million for 2023 and thereafter due to an increase in estimated expenditures covered under the LTSA for the Kemper County energy facility.

The construction program is subject to periodic review and revision, and actual construction costs may vary from these estimates because of numerous factors. These factors include: changes in business conditions; changes in load projections; storm impacts; changes in environmental laws and regulations; the outcome of any legal challenges to environmental rules; changes in generating plants, including unit retirements and replacements and adding or changing fuel sources at existing electric generating units, to meet regulatory requirements; changes in FERC rules and regulations; Mississippi PSC approvals; changes in the expected environmental compliance program; changes in legislation; the cost and efficiency of construction labor, equipment, and materials; project scope and design changes; and the cost of capital. In addition, there can be no assurance that costs related to capital expenditures will be fully recovered.

Sources of Capital

Mississippi Power plans to obtain the funds required for construction and other purposes from operating cash flows, lines of credit, bank term loans, external security issuances, commercial paper (to the extent it is eligible to participate), monetization of income tax deductions associated with the abandonment of the gasifier portion of the Kemper County energy facility, and equity contributions from Southern Company. The amount, type, and timing of future financings will depend upon regulatory approval, prevailing market conditions, and other factors. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Capital Requirements and Contractual Obligations" in Item 7 of the Form 10-K for additional information.

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

As of June 30, 2018, Mississippi Power's current liabilities exceeded current assets by approximately \$117 million as a result of \$224 million of debt that matures within the next 12 months. Mississippi Power intends to continue to monitor its access to short-term and long-term capital markets as well as its bank credit arrangements to meet future capital and liquidity needs.

At June 30, 2018, Mississippi Power had approximately \$228 million of cash and cash equivalents. Committed credit arrangements with banks at June 30, 2018 were as follows:

Expires		Executable Term Loans			Expires Within One Year	
2018	Total	Unused	One Year	Term Out	No Term Out	
<i>(in millions)</i>						
\$ 100	\$ 100	\$ 100	\$ —	\$ —	\$	100

See Note 6 to the financial statements of Mississippi Power under "Bank Credit Arrangements" in Item 8 of the Form 10-K and Note (F) to the Condensed Financial Statements under "Bank Credit Arrangements" herein for additional information.

All of these bank credit arrangements, as well as Mississippi Power's term loan agreement, contain covenants that limit debt levels and contain cross acceleration to other indebtedness (including guarantee obligations) of Mississippi Power. Such cross-acceleration provisions to other indebtedness would trigger an event of default if Mississippi Power defaulted on indebtedness, the payment of which was then accelerated. At June 30, 2018, Mississippi Power was in compliance with all such covenants. None of the bank credit arrangements contain material adverse change clauses at the time of borrowing.

Subject to applicable market conditions, Mississippi Power expects to seek to renew or replace its credit arrangements as needed, prior to expiration. In connection therewith, Mississippi Power may extend the maturity dates and/or increase or decrease the lending commitments thereunder.

A portion of the \$100 million unused credit arrangements with banks is allocated to provide liquidity support to Mississippi Power's revenue bonds. The amount of variable rate revenue bonds outstanding requiring liquidity support as of June 30, 2018 was approximately \$40 million. In addition, at June 30, 2018, Mississippi Power had approximately \$93 million of revenue bonds outstanding that were required to be remarketed within the next 12 months.

In June 2018, Mississippi Power gave notice that approximately \$43 million of its pollution control revenue bonds would be subject to mandatory tender in July 2018. Subsequent to June 30, 2018, Mississippi Power purchased and held these bonds, which may be remarketed to the public in the future.

Short-term borrowings are included in notes payable in the balance sheets. Details of short-term borrowings were as follows:

	Short-term Debt at June 30, 2018		Short-term Debt During the Period ^(*)		
	Amount Outstanding	Weighted Average Interest Rate	Average Amount Outstanding	Weighted Average Interest Rate	Maximum Amount Outstanding
	<i>(in millions)</i>		<i>(in millions)</i>		
Short-term bank debt	\$ 100	3.3%	\$ 213	1.7%	\$ 300

(*) Average and maximum amounts are based upon daily balances during the three-month period ended June 30, 2018.

MISSISSIPPI POWER COMPANY
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Credit Rating Risk

At June 30, 2018, Mississippi Power does not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade.

In October 2017, Mississippi Power executed agreements with its largest retail customer, Chevron, to continue providing retail service to the Chevron refinery in Pascagoula, Mississippi through 2038. The agreements grant Chevron a security interest in the co-generation assets, with a net book value of approximately \$91 million, located at the refinery that is exercisable upon the occurrence of (i) certain bankruptcy events or (ii) other events of default coupled with specific reductions in steam output at the facility and a downgrade of Mississippi Power's credit rating to below investment grade by two of the three rating agencies.

There are certain contracts that have required or could require collateral, but not accelerated payment, in the event of a credit rating change to BBB and/or Baa2 or below. These contracts are for physical electricity purchases and sales, fuel transportation and storage, energy price risk management, and transmission. At June 30, 2018, the maximum potential collateral requirements at a rating below BBB- and/or Baa3 equaled approximately \$198 million.

Included in these amounts are certain agreements that could require collateral in the event that Alabama Power or Georgia Power (affiliate companies of Mississippi Power) has a credit rating change to below investment grade. Generally, collateral may be provided by a Southern Company guaranty, letter of credit, or cash. Additionally, a credit rating downgrade could impact the ability of Mississippi Power to access capital markets, or, at a minimum, the cost at which it does so.

On February 26, 2018, Moody's revised its rating outlook for Mississippi Power from stable to positive.

On March 14, 2018, S&P upgraded the senior unsecured long-term debt rating of Mississippi Power to A- from BBB+. The outlook remained negative.

As a result of the Tax Reform Legislation, certain financial metrics, such as the funds from operations to debt percentage, used by the credit rating agencies to assess Southern Company and its subsidiaries, including Mississippi Power, may be negatively impacted. The PEP Settlement Agreement is expected to help mitigate these potential adverse impacts by allowing Mississippi Power to retain the excess deferred taxes resulting from the Tax Reform Legislation until the conclusion of the 2019 Base Rate Case. In addition, Mississippi Power has committed to seek equity contributions sufficient to restore its equity ratio to the 50% target. See Note 3 to the financial statements of Mississippi Power under "Retail Regulatory Matters" in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements under "Regulatory Matters – Mississippi Power" herein for additional information.

Financing Activities

In March 2018, Mississippi Power issued \$300 million aggregate principal amount of Series 2018A Floating Rate Senior Notes due March 27, 2020 bearing interest based on three-month LIBOR and \$300 million aggregate principal amount of Series 2018B 3.95% Senior Notes due March 30, 2028. In March 2018, Mississippi Power also entered into a \$300 million short-term floating rate bank loan bearing interest based on one-month LIBOR, of which \$200 million was repaid in the second quarter 2018 and \$50 million was repaid on July 31, 2018. Mississippi Power used the proceeds from these financings to repay a \$900 million unsecured term loan.

Subsequent to June 30, 2018, approximately \$43 million in pollution control revenue bonds of Mississippi Power were purchased and held by Mississippi Power. These bonds may be remarketed to the public in the future.

In addition to any financings that may be necessary to meet capital requirements and contractual obligations, Mississippi Power plans, when economically feasible, to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit.

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

SECOND QUARTER 2018 vs. SECOND QUARTER 2017
AND
YEAR-TO-DATE 2018 vs. YEAR-TO-DATE 2017

OVERVIEW

Southern Power develops, constructs, acquires, owns, and manages power generation assets, including renewable energy projects, and sells electricity at market-based rates in the wholesale market. Southern Power continually seeks opportunities to execute its strategy to create value through various transactions including acquisitions and sales of assets, development and construction of new generating facilities, and entry into PPAs primarily with investor-owned utilities, independent power producers, municipalities, electric cooperatives, and other load-serving entities, as well as commercial and industrial customers. In general, Southern Power has committed to the construction or acquisition of new generating capacity only after entering into or assuming long-term PPAs for the new facilities.

In May 2018, Southern Power completed the sale of a 33% equity interest in SPSH, a newly-formed limited partnership indirectly owning substantially all of Southern Power's solar facilities, for an aggregate purchase price of approximately \$1.2 billion, subject to customary working capital adjustments. Southern Power maintains control and overall operational responsibilities for the solar facilities.

Also in May 2018, Southern Power entered into an agreement to sell all of its equity interests in two natural gas-fired operating facilities, Plant Oleander and Plant Stanton Unit A (together, the Florida Plants), for an aggregate purchase price of \$195 million, subject to customary working capital and timing adjustments. The sale is subject to certain closing and timing conditions and approvals and is expected to occur in the first half of 2019. As a result of this pending transaction, Southern Power recorded an asset impairment charge of approximately \$119 million (\$89 million after tax) in the second quarter 2018. See Note (J) to the Condensed Financial Statements under "Southern Power" herein for additional information. The ultimate outcome of this matter cannot be determined at this time.

Southern Power is pursuing the sale of a noncontrolling interest in a portfolio of eight operating wind facilities through the use of third-party tax equity, which, if successful, is expected to close in the fourth quarter 2018. See FUTURE EARNINGS POTENTIAL – "Income Tax Matters – Legal Entity Reorganizations" herein for additional information. The ultimate outcome of this matter cannot be determined at this time.

During the six months ended June 30, 2018, Southern Power acquired and placed in-service the 20-MW Gaskell West 1 solar facility, acquired and began construction of the 100-MW Wild Horse Mountain wind facility, and continued construction of the 148-MW Cactus Flats wind facility and the expansion of the 345-MW Mankato natural gas facility. See FUTURE EARNINGS POTENTIAL – "Acquisitions" and "Construction Projects" herein for additional information.

At June 30, 2018, Southern Power's average investment coverage ratio for its generating assets (including the Florida Plants), based on the ratio of investment under contract to total investment using the respective generation facilities' net book value (or expected in-service value for facilities under construction and acquisitions discussed herein) as the investment amount, was 92% through 2022 and 90% through 2027, with an average remaining contract duration of approximately 15 years. See FUTURE EARNINGS POTENTIAL – "Power Sales Agreements" herein for additional information.

See FINANCIAL CONDITION AND LIQUIDITY – "Capital Requirements and Contractual Obligations" herein for information regarding Southern Power's revised capital expenditure forecasts for 2018 through 2022.

Southern Power continues to focus on several key performance indicators, including, but not limited to, peak season equivalent forced outage rate, contract availability, and net income.

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

RESULTS OF OPERATIONS

Net Income Attributable to Southern Power

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(60)	(73.2)	\$(8)	(5.3)

Net income attributable to Southern Power for the second quarter 2018 was \$22 million compared to \$82 million for the corresponding period in 2017. Net income attributable to Southern Power for year-to-date 2018 was \$143 million compared to \$151 million for the corresponding period in 2017. The decreases were primarily due to a \$119 million asset impairment charge (\$89 million after tax) as a result of the pending sale of the Florida Plants. The year-to-date decrease was partially offset by approximately \$54 million in state income tax benefits arising from the reorganization of Southern Power's legal entities that own and operate its solar facilities.

Operating Revenues

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$26	4.9	\$85	8.7

Total operating revenues include PPA capacity revenues, which are derived primarily from long-term contracts involving natural gas and biomass generating facilities, and PPA energy revenues from Southern Power's generation facilities. To the extent Southern Power has capacity not contracted under a PPA, it may sell power into the wholesale market and, to the extent the generation assets are part of the IIC, as approved by the FERC, it may sell power into the power pool.

Natural Gas and Biomass Capacity and Energy Revenue

Capacity revenues generally represent the greatest contribution to net income and are designed to provide recovery of fixed costs plus a return on investment.

Energy is generally sold at variable cost or is indexed to published natural gas indices. Energy revenues will vary depending on the energy demand of Southern Power's customers and their generation capacity, as well as the market prices of wholesale energy compared to the cost of Southern Power's energy. Energy revenues also include fees for support services, fuel storage, and unit start charges. Increases and decreases in energy revenues under PPAs that are driven by fuel or purchased power prices are accompanied by an increase or decrease in fuel and purchased power costs and do not have a significant impact on net income.

Solar and Wind Energy Revenue

Southern Power's energy sales from solar and wind generating facilities are predominantly through long-term PPAs that do not have a capacity charge. Customers either purchase the energy output of a dedicated renewable facility through an energy charge or pay a fixed price related to the energy sold to the grid. As a result, Southern Power's ability to recover fixed and variable operations and maintenance expenses is dependent upon the level of energy generated from these facilities, which can be impacted by weather conditions, equipment performance, transmission constraints, and other factors.

See FUTURE EARNINGS POTENTIAL – " Power Sales Agreements " herein for additional information regarding Southern Power's PPAs.

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Details of Southern Power's operating revenues were as follows:

	Second Quarter 2018	Second Quarter 2017	Year-to-Date 2018	Year-to-Date 2017
	<i>(in millions)</i>			
PPA capacity revenues	\$ 144	\$ 149	\$ 282	\$ 298
PPA energy revenues	302	270	556	466
Total PPA revenues	446	419	838	764
Non-PPA revenues	106	107	221	209
Other revenues	3	3	5	6
Total operating revenues	\$ 555	\$ 529	\$ 1,064	\$ 979

In the second quarter 2018, total operating revenues were \$555 million, reflecting a \$26 million, or 5%, increase from the corresponding period in 2017. The increase in operating revenues was primarily due to the following:

- PPA capacity revenues decreased \$5 million, or 3%, primarily due to the contractual expiration of an affiliate natural gas PPA.
- PPA energy revenues increased \$32 million, or 12%, primarily due to an \$18 million increase from new natural gas PPAs from existing facilities and a \$10 million increase from renewable facilities primarily due to an increase in the volume of KWHs sold, including new solar facilities in service.

For year-to-date 2018, total operating revenues were \$1.1 billion, reflecting an \$85 million, or 9%, increase from the corresponding period in 2017. The increase in operating revenues was primarily due to the following:

- PPA capacity revenues decreased \$16 million, or 5%, primarily due to the contractual expiration of an affiliate natural gas PPA.
- PPA energy revenues increased \$90 million, or 19%, primarily due to \$37 million in increased fuel costs that are contractually recovered through existing PPAs, a \$36 million increase from new natural gas PPAs from existing facilities, and an \$18 million increase from renewable facilities primarily due to an increase in the volume of KWHs sold, including new solar facilities in service.
- Non-PPA revenues increased \$12 million, or 6%, primarily due to an increase in the volume of KWHs sold from uncovered natural gas capacity through short-term sales.

Fuel and Purchased Power Expenses

Fuel costs constitute one of the largest expenses for Southern Power. In addition, Southern Power purchases a portion of its electricity needs from the wholesale market including the power pool. Details of Southern Power's generation and purchased power were as follows:

	Second Quarter 2018	Second Quarter 2017	Year-to-Date 2018	Year-to-Date 2017
	<i>(in billions of KWHs)</i>			
Generation	12.2	10.9	22.0	20.6
Purchased power	1.2	1.2	2.2	2.2
Total generation and purchased power	13.4	12.1	24.2	22.8
Total generation and purchased power, excluding solar, wind, and tolling agreements	7.2	5.6	13.9	10.5

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Southern Power's PPAs for natural gas and biomass generation generally provide that the purchasers are responsible for either procuring the fuel (tolling agreements) or reimbursing Southern Power for substantially all of the cost of fuel relating to the energy delivered under such PPAs. Consequently, changes in such fuel costs are generally accompanied by a corresponding change in related fuel revenues and do not have a significant impact on net income. Southern Power is responsible for the cost of fuel for generating units that are not covered under PPAs. Power from these generating units is sold into the wholesale market or into the power pool for capacity owned directly by Southern Power.

Purchased power expenses will vary depending on demand, availability, and the cost of generating resources throughout the Southern Company system and other contract resources. Load requirements are submitted to the power pool on an hourly basis and are fulfilled with the lowest cost alternative, whether that is generation owned by Southern Power, an affiliate company, or external parties. Such purchased power costs are generally recovered through PPA revenues.

Details of Southern Power's fuel and purchased power expenses were as follows:

	Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
	<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
Fuel	\$ 14	10.1	\$ 50	18.5
Purchased power	(1)	(2.5)	30	42.9
Total fuel and purchased power expenses	\$ 13		\$ 80	

In the second quarter 2018, total fuel and purchased power expenses increased \$13 million, or 7%, compared to the corresponding period in 2017. Fuel expense increased \$14 million primarily due to a \$48 million increase in the volume of KWHs generated, excluding solar, wind, and tolling agreements, partially offset by a \$37 million decrease in the average cost of natural gas per KWH generated.

For year-to-date 2018, total fuel and purchased power expenses increased \$80 million, or 23%, compared to the corresponding period in 2017. Fuel expense increased \$50 million primarily due to a \$108 million increase in the volume of KWHs generated, excluding solar, wind, and tolling agreements, partially offset by a \$59 million decrease in the average cost of natural gas per KWH generated. Purchased power expense increased \$30 million primarily due to an increase in the average cost of purchased power in first quarter 2018.

Asset Impairment

In the second quarter 2018, a \$119 million asset impairment charge was recorded as a result of the pending sale of the Florida Plants, expected to occur in the first half 2019.

See Note (J) under "Southern Power – Sale of Florida Plants" to the Condensed Financial Statements herein for additional information.

Income Taxes (Benefit)

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(35)	(92.1)	\$(82)	(91.1)

In the second quarter 2018, income tax benefit was \$73 million compared to \$38 million for the corresponding period in 2017. For year-to-date 2018, income tax benefit was \$172 million compared to \$90 million for the corresponding period in 2017. The increases were primarily due to lower pre-tax earnings, primarily resulting from the asset impairment charge, and income tax benefits arising from a reorganization of Southern Power's legal entities that own and operate substantially all of its solar facilities related to certain changes in state apportionment

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

rates. See FUTURE EARNINGS POTENTIAL – " Income Tax Matters – Legal Entity Reorganizations " and Note (H) to the Condensed Financial Statements herein for additional information.

FUTURE EARNINGS POTENTIAL

The results of operations discussed above are not necessarily indicative of Southern Power's future earnings potential. The level of Southern Power's future earnings depends on numerous factors that affect the opportunities, challenges, and risks of Southern Power's competitive wholesale business. These factors include: Southern Power's ability to achieve sales growth while containing costs; regulatory matters; creditworthiness of customers; total generating capacity available in Southern Power's market areas; the successful remarketing of capacity as current contracts expire; and Southern Power's ability to execute its strategy, including successful additional investments in renewable and other energy projects, and to develop and construct generating facilities.

In May 2018, Southern Power completed the sale of a 33% equity interest in SPSH, a newly-formed limited partnership indirectly owning substantially all of Southern Power's solar facilities, to Global Atlantic Financial Group Limited (Global Atlantic) for approximately \$1.2 billion, subject to customary working capital adjustments. Accordingly, Global Atlantic will receive 33% of all cash distributions paid by SPSH. Southern Power continues to consolidate the assets and liabilities of SPSH with Global Atlantic's share of partnership earnings reflected in net income attributable to noncontrolling interests in the Condensed Consolidated Statements of Income.

Also in May 2018, Southern Power entered into an equity interest purchase agreement with NextEra Energy to sell all of its equity interests in the Florida Plants for an aggregate purchase price of \$195 million, subject to customary working capital and timing adjustments. The ultimate purchase price will decrease \$110,000 per day for each day after December 31, 2018 through the closing of the transaction. Conversely, the ultimate purchase price will increase \$110,000 per day for each day the closing occurs prior to December 31, 2018. The sale is expected to occur in the first half of 2019. Excluding any interest allocation for corporate debt, the pre-tax net income for the Florida Plants was \$14 million and \$11 million for the three months ended June 30, 2018 and 2017, respectively, and \$24 million and \$20 million for the six months ended June 30, 2018 and 2017, respectively. The ultimate outcome of this matter cannot be determined at this time.

Southern Power is pursuing the sale of a noncontrolling interest in a portfolio of eight operating wind facilities through the use of third-party tax equity, which, if successful, is expected to close in the fourth quarter 2018. See " Income Tax Matters – Legal Entity Reorganizations " herein for additional information. The ultimate outcome of this matter cannot be determined at this time. If the transaction is completed, the tax equity partner, or partners, will have a claim to certain cash distributions and an allocation of tax attributes.

Demand for electricity is primarily driven by the pace of economic growth that may be affected by changes in regional and global economic conditions, as well as renewable portfolio standards, which may impact future earnings. Other factors that could influence future earnings include weather, transmission constraints, cost of generation from units within the power pool, and operational limitations. For additional information relating to these factors, see RISK FACTORS in Item 1A and MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL of Southern Power in Item 7 of the Form 10-K.

Power Sales Agreements

See BUSINESS – "The Southern Company System – Southern Power" in Item 1 of the Form 10-K for additional information regarding Southern Power's PPAs. Generally, under the solar and wind generation PPAs, the purchasing party retains the right to keep or resell the renewable energy credits.

At June 30, 2018, Southern Power's average investment coverage ratio for its generating assets (including the Florida Plants), based on the ratio of investment under contract to total investment using the respective generation facilities' net book value (or expected in-service value for facilities under construction and acquisitions discussed herein) as the investment amount, was 92% through 2022 and 90% through 2027, with an average remaining contract duration of approximately 15 years.

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Environmental Matters

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters" of Southern Power in Item 7 of the Form 10-K for information on the development by federal and state environmental regulatory agencies of additional control strategies for emissions of air pollution from industrial sources, including electric generating facilities. Compliance with possible additional federal or state legislation or regulations related to global climate change, air quality, water quality, or other environmental and health concerns could also significantly affect Southern Power. While Southern Power's PPAs generally contain provisions that permit charging the counterparty with some of the new costs incurred as a result of changes in environmental laws and regulations, the full impact of any such legislative or regulatory changes cannot be determined at this time.

Water Quality

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters – Environmental Laws and Regulations – Water Quality" of Southern Power in Item 7 of the Form 10-K for additional information regarding the effluent limitations guidelines (ELG) rule.

On May 2, 2018, the EPA updated its anticipated final rulemaking schedule for ELG from September 2020 to December 2019. The impact of any changes to the ELG rule will depend on the content of the final rule and the outcome of any legal challenges and cannot be determined at this time.

FERC Matters

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "FERC Matters" of Southern Power in Item 7 of the Form 10-K for additional information regarding proceedings related to the traditional electric operating companies' and Southern Power's 2014 and 2017 triennial market power analyses.

On May 4, 2018, the FERC issued an order terminating both proceedings, finding that the traditional electric operating companies and Southern Power satisfy the FERC's standards for market-based rates. On May 9, 2018, the traditional electric operating companies and Southern Power made the compliance filing required by the order. These proceedings are essentially concluded.

Acquisitions

During the six months ended June 30, 2018, one of Southern Power's wholly-owned subsidiaries acquired and completed construction of the Gaskell West 1 solar facility. Acquisition-related costs were expensed as incurred and were not material. See Note (J) to the Condensed Financial Statements under "Southern Power" herein and MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Capital Requirements and Contractual Obligations" of Southern Power in Item 7 of the Form 10-K for additional information.

Project Facility	Resource	Approximate Nameplate Capacity (MW)	Location	Percentage Ownership	Actual COD	PPA Counterparties	PPA Contract Period
Gaskell West 1	Solar	20	Kern County, CA	100% of (*) Class B	March 2018	Southern California Edison	20 years

(*) Southern Power owns 100% of the class B membership interests under a tax equity partnership agreement.

The Gaskell West 1 facility did not have operating revenues or activities prior to completion of construction and the assets being placed in service during March 2018.

Construction Projects

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Acquisitions" and "Construction Projects" of Southern Power in Item 7 of the Form 10-K and FINANCIAL CONDITION AND LIQUIDITY – "Capital Requirements and Contractual Obligations" herein for additional information.

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Construction Projects Completed and in Progress

During the six months ended June 30, 2018, Southern Power started or continued construction of the projects set forth in the table below. Total aggregate construction costs, excluding the acquisition costs, are expected to be between \$520 million and \$590 million for the Cactus Flats, Mankato, and Wild Horse Mountain facilities. At June 30, 2018, construction costs included in CWIP related to these projects totaled \$353 million. The ultimate outcome of these matters cannot be determined at this time.

Project Facility	Resource	Approximate Nameplate Capacity (MW)	Location	Actual/Expected COD	PPA Counterparties	PPA Contract Period
Projects Under Construction as of June 30, 2018						
Cactus Flats ^(a)	Wind	148	Concho County, TX	July 2018	General Motors, LLC and General Mills Operations, LLC	12 years and 15 years
Mankato	Natural Gas	345	Mankato, MN	First half 2019	Northern States Power Company	20 years
Wild Horse Mountain ^(b)	Wind	100	Pushmataha County, OK	Fourth quarter 2019	Arkansas Electric Cooperative	20 years

(a) In July 2017, Southern Power purchased 100% of the Cactus Flats facility and commenced construction. Subsequent to June 30, 2018, the facility was placed in service and Southern Power expects to close on a tax equity partnership agreement, which would result in Southern Power owning 100% of the class B membership interests.

(b) In May 2018, Southern Power purchased 100% of the Wild Horse Mountain facility and commenced construction. Southern Power may enter into a tax equity partnership agreement, in which case it would then own 100% of the class B membership interests.

Development Projects

During 2017, as part of its renewable development strategy, Southern Power purchased wind turbine equipment from Siemens Gamesa Renewable Energy Inc. and Vestas-American Wind Technology, Inc. to be used for various development and construction projects. Any wind projects reaching commercial operation by 2021 are expected to qualify for 80% PTCs.

During 2016, Southern Power entered into a joint development agreement with Renewable Energy Systems Americas, Inc. to develop and construct wind projects. In addition, in 2016, Southern Power purchased wind turbine equipment from Siemens Wind Power, Inc. and Vestas-American Wind Technology, Inc. to be used for construction of the facilities. Any wind projects reaching commercial operation by 2020 are expected to qualify for 100% PTCs.

In response to the previously disclosed decrease of planned expenditures for plant acquisitions and placeholder growth, Southern Power continues to refine the deployment of wind turbine equipment to projects and the amount of MW capacity to be constructed. While the expectation is that the majority of the equipment will be deployed in a manner to qualify for the 100% and 80% PTCs, Southern Power may consider other strategies, such as selling equipment or interests in projects. See FINANCIAL CONDITION AND LIQUIDITY – "Capital Requirements and Contractual Obligations" herein.

The ultimate outcome of these matters cannot be determined at this time.

Income Tax Matters

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Income Tax Matters" of Southern Power in Item 7 of the Form 10-K and FINANCIAL CONDITION AND LIQUIDITY – "Credit Rating Risk" and Note (H) to the Condensed Financial Statements herein for information regarding the Tax Reform Legislation.

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Legal Entity Reorganizations

In March 2018, Southern Power substantially completed a legal entity reorganization of various direct and indirect subsidiaries that own and operate substantially all of its solar facilities, including certain subsidiaries owned in partnership with various third parties. The reorganization resulted in net state tax benefits related to certain changes in apportionment rates totaling approximately \$50 million, which were recorded in the first quarter 2018. In April 2018, Southern Power completed the final stage of the reorganization resulting in additional net state tax benefits of approximately \$4 million.

Southern Power is pursuing the sale of a noncontrolling interest in a portfolio of eight operating wind facilities through the use of third-party tax equity, which, if successful, is expected to close in the fourth quarter 2018. In the third quarter 2018, various direct and indirect subsidiaries of Southern Power that own and operate these wind facilities are expected to be reorganized under a new holding company in which the tax equity partner would invest. The reorganization is expected to result in estimated net state tax benefits totaling approximately \$10 million related to certain changes in apportionment rates. The ultimate outcome of this matter cannot be determined at this time.

Other Matters

Southern Power is involved in various other matters being litigated and regulatory matters that could affect future earnings. In addition, Southern Power is subject to certain claims and legal actions arising in the ordinary course of business. Southern Power's business activities are subject to extensive governmental regulation related to public health and the environment, such as laws and regulations governing air, water, land, and protection of natural resources. Litigation over environmental issues and claims of various types, including property damage, personal injury, common law nuisance, and citizen enforcement of environmental laws and regulations has occurred throughout the U.S. This litigation has included claims for damages alleged to have been caused by CO₂ and other emissions and alleged exposure to hazardous materials, and/or requests for injunctive relief in connection with such matters.

The ultimate outcome of such pending or potential litigation or regulatory matters cannot be predicted at this time; however, for current proceedings not specifically reported in Note (B) to the Condensed Financial Statements herein, management does not anticipate that the ultimate liabilities, if any, arising from such current proceedings would have a material effect on Southern Power's financial statements.

ACCOUNTING POLICIES

Application of Critical Accounting Policies and Estimates

Southern Power prepares its consolidated financial statements in accordance with GAAP. Significant accounting policies are described in Note 1 to the financial statements of Southern Power in Item 8 of the Form 10-K. In the application of these policies, certain estimates are made that may have a material impact on Southern Power's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. See MANAGEMENT'S DISCUSSION AND ANALYSIS – ACCOUNTING POLICIES – "Application of Critical Accounting Policies and Estimates" of Southern Power in Item 7 of the Form 10-K for a complete discussion of Southern Power's critical accounting policies and estimates.

Recently Issued Accounting Standards

See MANAGEMENT'S DISCUSSION AND ANALYSIS – ACCOUNTING POLICIES – "Recently Issued Accounting Standards" of Southern Power in Item 7 of the Form 10-K for additional information regarding ASU No. 2016-02, *Leases (Topic 842)*. See Note (A) to the Condensed Financial Statements herein for information regarding Southern Power's recently adopted accounting standards.

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FINANCIAL CONDITION AND LIQUIDITY

Overview

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Overview" of Southern Power in Item 7 of the Form 10-K for additional information. Southern Power's financial condition remained stable at June 30, 2018 . Southern Power intends to continue to monitor its access to short-term and long-term capital markets as well as bank credit agreements as needed to meet future capital and liquidity needs. See " Sources of Capital " herein for additional information on lines of credit.

Southern Power also utilizes third-party tax equity partnerships as one of the financing sources to fund its renewable growth strategy where the tax partner takes significantly all of the federal tax benefits. These tax equity partnerships are consolidated in Southern Power's financial statements using a hypothetical liquidation at book value (HLBV) methodology to allocate partnership gains and losses to Southern Power. In the first half of 2018, Southern Power secured third-party tax equity funding for the Gaskell West 1 solar project of approximately \$26 million and expects to obtain tax equity funding for the Cactus Flats wind project in the third quarter 2018. See Note (A) to the Condensed Financial Statements under " Hypothetical Liquidation at Book Value " herein for additional information on the HLBV methodology.

In May 2018, Southern Power received approximately \$1.2 billion from the sale of a 33% equity interest in SPSH, a newly-formed limited partnership indirectly owning substantially all of Southern Power's solar facilities. The proceeds were used to repay \$770 million of existing indebtedness, to return capital of \$250 million to Southern Company, and for other general corporate purposes, including working capital.

Southern Power is pursuing the sale of a noncontrolling interest in a portfolio of eight operating wind facilities through the use of third-party tax equity, which, if successful, is expected to close in the fourth quarter 2018. The ultimate outcome of this matter cannot be determined at this time.

Net cash provided from operating activities totaled \$127 million for the first six months of 2018 compared to \$348 million for the first six months of 2017 . The decrease in net cash provided from operating activities was primarily due to income tax payments. See FUTURE EARNINGS POTENTIAL – "Income Tax Matters – Bonus Depreciation" of Southern Power in Item 7 of the Form 10-K for additional information. Net cash used for investing activities totaled \$277 million for the first six months of 2018 primarily due to the construction of generating facilities and payments for renewable acquisitions. Net cash provided from financing activities totaled \$152 million for the first six months of 2018 primarily due to proceeds from the sale of a 33% equity interest in SPSH, primarily offset by debt repayments and equity distributions. Cash flows from financing activities may vary from period to period based on capital needs and the maturity or redemption of securities.

Significant balance sheet changes for the first six months of 2018 include a \$1.7 billion increase in noncontrolling interests, a \$639 million reduction in paid in capital, and a \$298 million increase in accumulated deferred income tax assets primarily due to the sale of a 33% equity interest in SPSH and a \$770 million decrease in securities due within one year due to repayments in May and June 2018.

See FUTURE EARNINGS POTENTIAL – " Acquisitions , " " Construction Projects , " and " Income Tax Matters – Legal Entity Reorganizations " herein for additional information.

Capital Requirements and Contractual Obligations

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Capital Requirements and Contractual Obligations" of Southern Power in Item 7 of the Form 10-K for a description of Southern Power's capital requirements and contractual obligations. There are no scheduled maturities of long-term debt through June 30, 2019 .

Southern Power's construction program includes estimates for potential plant acquisitions and placeholder growth, new construction and development, capital improvements, and work to be performed under LTSAs and is subject to periodic review and revision. Subsequent to the Tax Reform Legislation, planned expenditures for plant acquisitions

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

and placeholder growth are now expected to average approximately \$0.5 billion per year for 2018 through 2022 and may vary materially due to market opportunities and Southern Power's ability to execute its growth strategy. Southern Power's capital expenditures for committed construction, capital improvements, and work to be performed under LTSAs remain unchanged and total approximately \$0.9 billion for the five years ending 2022. Actual construction costs may vary from these estimates because of numerous factors such as: changes in business conditions; changes in the expected environmental compliance program; changes in environmental laws and regulations; the outcome of any legal challenges to environmental rules; changes in FERC rules and regulations; changes in load projections; changes in legislation; the cost and efficiency of construction labor, equipment, and materials; project scope and design changes; and the cost of capital. See FUTURE EARNINGS POTENTIAL – " Acquisitions " and " Construction Projects " herein for additional information.

Sources of Capital

Southern Power plans to obtain the funds required for acquisitions, construction, development, debt maturities, and other purposes from operating cash flows, external securities issuances, borrowings from financial institutions, tax equity partnership contributions, divestitures, and equity contributions from Southern Company. However, the amount, type, and timing of any future financings, if needed, will depend upon prevailing market conditions, regulatory approval, and other factors. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Sources of Capital" of Southern Power in Item 7 of the Form 10-K for additional information.

Southern Power's current liabilities sometimes exceed current assets due to the use of short-term debt as a funding source and construction payables, as well as fluctuations in cash needs, due to seasonality. Southern Power believes the need for working capital can be adequately met by utilizing the commercial paper program, the Facility (as defined below), bank term loans, the debt capital markets, and operating cash flows.

As of June 30, 2018 , Southern Power had cash and cash equivalents of approximately \$142 million .

Southern Power's commercial paper program is used to finance acquisition and construction costs related to electric generating facilities, for general corporate purposes, and to finance maturing debt. Commercial paper is included in notes payable on the condensed consolidated balance sheets.

Details of short-term borrowings were as follows:

	Short-term Debt at June 30, 2018		Short-term Debt During the Period (*)		
	Amount Outstanding	Weighted Average Interest Rate	Average Amount Outstanding	Weighted Average Interest Rate	Maximum Amount Outstanding
	<i>(in millions)</i>		<i>(in millions)</i>		<i>(in millions)</i>
Commercial paper	\$ 64	2.4%	\$ 171	2.3%	\$ 304
Short-term loans	200	2.7%	76	2.6%	200
Total	\$ 264	2.6%	\$ 247	2.4%	

(*) Average and maximum amounts are based upon daily balances during the three-month period ended June 30, 2018 .

At June 30, 2018 , Southern Power had a committed credit facility (Facility) of \$750 million , of which \$22 million has been used for letters of credit and \$728 million remains unused. The Facility expires in 2022. Proceeds from the Facility may be used for working capital and general corporate purposes as well as liquidity support for Southern Power's commercial paper program. Subject to applicable market conditions, Southern Power expects to renew or replace the Facility, as needed, prior to expiration. In connection therewith, Southern Power may extend the maturity date and/or increase or decrease the lending commitment thereunder. See Note 6 to the financial statements of Southern Power under "Bank Credit Arrangements" in Item 8 of the Form 10-K and Note (F) to the Condensed Financial Statements under " Bank Credit Arrangements " herein for additional information.

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The Facility, as well as Southern Power's term loan agreements, contains a covenant that limits the ratio of debt to capitalization (as defined in the Facility) to a maximum of 65% and contains a cross-default provision that is restricted only to indebtedness of Southern Power. For purposes of this definition, debt excludes any project debt incurred by certain subsidiaries of Southern Power to the extent such debt is non-recourse to Southern Power, and capitalization excludes the capital stock or other equity attributable to such subsidiary. Southern Power is currently in compliance with all covenants in the Facility.

Southern Power also has a \$120 million continuing letter of credit facility expiring in 2019 for standby letters of credit. At June 30, 2018, \$97 million has been used for letters of credit, primarily as credit support for PPA requirements, and \$23 million remains unused.

In addition, at June 30, 2018, Southern Power had \$106 million of cash collateral posted related to PPA requirements.

Southern Power's subsidiaries do not borrow under the commercial paper program and are not parties to, and do not borrow under, the Facility or the continuing letter of credit facility.

Credit Rating Risk

Southern Power does not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade.

There are certain contracts that could require collateral, but not accelerated payment, in the event of a credit rating change to BBB and/or Baa2, or below. These contracts are for physical electricity purchases and sales, fuel transportation and storage, energy price risk management, and transmission.

The maximum potential collateral requirements under these contracts at June 30, 2018 were as follows:

Credit Ratings	Maximum Potential Collateral Requirements	
	<i>(in millions)</i>	
At BBB and/or Baa2	\$	37
At BBB- and/or Baa3	\$	377
At BB+ and/or Ba1 (*)	\$	955

(*) Any additional credit rating downgrades at or below BB- and/or Ba3 could increase collateral requirements up to an additional \$38 million.

Included in these amounts are certain agreements that could require collateral in the event that Alabama Power or Georgia Power (affiliate companies of Southern Power) has a credit rating change to below investment grade. Generally, collateral may be provided by a Southern Company guaranty, letter of credit, or cash. Additionally, a credit rating downgrade could impact the ability of Southern Power to access capital markets and would be likely to impact the cost at which it does so.

In addition, Southern Power has a PPA that could require collateral, but not accelerated payment, in the event of a downgrade of Southern Power's credit. The PPA requires credit assurances without stating a specific credit rating. The amount of collateral required would depend upon actual losses resulting from a credit downgrade.

As a result of the Tax Reform Legislation, certain financial metrics, such as the funds from operations to debt percentage, used by the credit rating agencies to assess Southern Company and its subsidiaries, including Southern Power, may be negatively impacted. Absent actions by Southern Power to mitigate the resulting impacts, which, among other alternatives, could include adjusting Southern Power's capital structure, Southern Power's credit ratings could be negatively affected.

SOUTHERN POWER COMPANY AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Financing Activities

In May 2018, Southern Power entered into two short-term floating rate bank loans, each for an aggregate principal amount of \$100 million, which bear interest based on one-month LIBOR.

In the second quarter 2018, Southern Power used a portion of the proceeds from the sale of a 33% equity interest in SPSH to repay \$420 million aggregate principal amount of long-term floating rate bank loans and \$350 million aggregate principal amount of Series 2015A 1.50% Senior Notes due June 1, 2018. See Note (J) to the Condensed Financial Statements under "Southern Power – Sale of Solar Facility Interests" herein for additional information.

Southern Power received approximately \$26 million of third-party tax equity during the six months ended June 30, 2018 related to the Gaskell West 1 solar facility.

In addition to any financings that may be necessary to meet capital requirements and contractual obligations, Southern Power plans to continue, when economically feasible, a program to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit.

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

SECOND QUARTER 2018 vs. SECOND QUARTER 2017
AND
YEAR-TO-DATE 2018 vs. YEAR-TO-DATE 2017

OVERVIEW

Southern Company Gas is an energy services holding company whose primary business is the distribution of natural gas. Subsequent to the dispositions of Elizabethtown Gas, Elkton Gas, and Florida City Gas discussed below, Southern Company Gas has natural gas distribution utilities in four states – Illinois, Georgia, Virginia, and Tennessee. Southern Company Gas and its subsidiaries are also involved in several other complementary businesses.

Southern Company Gas has four reportable segments – gas distribution operations, gas marketing services, wholesale gas services, and gas midstream operations – and one non-reportable segment – all other. For additional information on these segments, see Note (L) to the Condensed Financial Statements herein and "BUSINESS – The Southern Company System – Southern Company Gas" in Item 1 of the Form 10-K.

Many factors affect the opportunities, challenges, and risks of Southern Company Gas' business. These factors include the ability to maintain safety, to maintain constructive regulatory environments, to maintain and grow natural gas sales and number of customers, and to effectively manage and secure timely recovery of costs. These costs include those related to projected long-term demand growth, environmental standards, reliability, natural gas, and capital expenditures, including updating and expanding the natural gas distribution systems. The natural gas distribution utilities have various regulatory mechanisms that address cost recovery. Effectively operating pursuant to these regulatory mechanisms and appropriately balancing required costs and capital expenditures with customer prices will continue to challenge Southern Company Gas for the foreseeable future.

On June 4, 2018, Southern Company Gas completed the stock sale of Pivotal Home Solutions to American Water Enterprises LLC for a total cash purchase price of \$358 million and an additional \$6 million for working capital. This disposition resulted in a net loss of \$76 million, which included \$40 million of income tax expense. In contemplation of the transaction, a goodwill impairment charge of \$42 million was recorded during the first quarter 2018.

On July 1, 2018, a Southern Company Gas subsidiary, Pivotal Utility Holdings, completed the sales of the assets of two of its natural gas distribution utilities, Elizabethtown Gas and Elkton Gas, to South Jersey Industries, Inc. for a total cash purchase price of \$1.7 billion and an additional \$40 million for working capital. This disposition resulted in an estimated pre-tax gain of approximately \$235 million and an after-tax gain of approximately \$12 million, which will be recorded in the third quarter 2018.

On July 29, 2018, Southern Company Gas and its wholly-owned direct subsidiary, NUI Corporation, completed the stock sale of Pivotal Utility Holdings, which primarily consisted of Florida City Gas, to NextEra Energy for a total cash purchase price of \$530 million (less \$3 million of indebtedness assumed at closing for customer deposits) and an additional \$60 million for cash and other working capital. This disposition resulted in an estimated pre-tax gain of approximately \$126 million and an after-tax gain of approximately \$4 million, which will be recorded in the third quarter 2018.

The after-tax impacts of these dispositions included income tax expense on goodwill not deductible for tax purposes and for which a deferred tax liability had not been recorded previously. Additionally, each of these dispositions is subject to a final working capital adjustment that may impact the cash proceeds from disposition, but not the gain recorded. See Note (J) to the Condensed Financial Statements under "Southern Company Gas" herein for additional information on these dispositions.

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Operating Metrics

Southern Company Gas continues to focus on several operating metrics, including Heating Degree Days, customer count, and volumes of natural gas sold. For additional information on these indicators, see MANAGEMENT'S DISCUSSION AND ANALYSIS – OVERVIEW – "Operating Metrics" of Southern Company Gas in Item 7 of the Form 10-K.

Southern Company Gas measures weather and the effect on its business using Heating Degree Days. Generally, increased Heating Degree Days result in higher demand for natural gas on Southern Company Gas' distribution system. With the exception of Nicor Gas, Southern Company Gas has various regulatory mechanisms, such as weather normalization and straight-fixed-variable rate design, which limit its exposure to weather changes within typical ranges in each of its utilities' respective service territory. However, the utility customers in Illinois and the gas marketing services customers primarily in Georgia and Illinois can be impacted by warmer- or colder-than-normal weather. Southern Company Gas utilizes weather hedges to reduce negative earnings impact in the event of warmer-than-normal weather, while retaining most of the earnings upside for these businesses.

The number of customers served by gas distribution operations and gas marketing services can be impacted by natural gas prices, economic conditions, and competition from alternative fuels. Gas marketing services' customers are primarily located in Georgia, Illinois, and Ohio.

Southern Company Gas' natural gas volume metrics for gas distribution operations and gas marketing services illustrate the effects of weather and customer demand for natural gas. Wholesale gas services' physical sales volumes represent the daily average natural gas volumes sold to its customers.

See RESULTS OF OPERATIONS herein for additional information on these operating metrics.

Seasonality of Results

Heating Season is the period from November through March when natural gas usage and operating revenues are generally higher as more customers are connected to the gas distribution systems and natural gas usage is higher in periods of colder weather. Occasionally in the summer, wholesale gas services' operating revenues are impacted due to peak usage by power generators in response to summer energy demands. Southern Company Gas' base operating expenses, excluding cost of natural gas, bad debt expense, and certain incentive compensation costs, are incurred relatively evenly throughout the year. Seasonality also affects the comparison of certain balance sheet items across quarters, including receivables, unbilled revenues, natural gas for sale, and notes payable. However, these items are comparable when reviewing Southern Company Gas' annual results. Operating results for the interim periods presented are not necessarily indicative of annual results and can vary significantly from quarter to quarter.

RESULTS OF OPERATIONS

Net Income (Loss)

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(80)	(163.3)	\$(40)	(13.9)

Southern Company Gas' net loss for the second quarter 2018 was \$31 million compared to net income of \$49 million for the corresponding period in 2017. For year-to-date 2018, net income was \$248 million compared to \$288 million for the corresponding period in 2017. The decreases were primarily due to the \$36 million pre-tax loss (\$76 million after tax) on the disposition of Pivotal Home Solutions, a reserve for a settlement of class action litigation to facilitate the sale of Pivotal Home Solutions, derivative losses at wholesale gas services, disposition-related costs, and increased interest expense. These decreases were partially offset by additional revenues from infrastructure investments recovered through replacement programs less the associated increase in depreciation, as well as base rate changes at gas distribution operations, higher commercial activity at wholesale gas services, and revenues from the Dalton Pipeline, which was placed in service in August 2017. Also contributing to the decrease for year-to-date

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

2018 was a goodwill impairment charge of \$42 million recorded during the first quarter 2018 in contemplation of the sale of Pivotal Home Solutions.

See Note (J) to the Condensed Financial Statements under " Southern Company Gas – Sale of Pivotal Home Solutions " herein for additional information.

Natural Gas Revenues , including Alternative Revenue Programs

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$22	3.2	\$100	4.5

In the second quarter 2018 , natural gas revenues, including alternative revenue programs, were \$706 million compared to \$684 million for the corresponding period in 2017 . For year-to-date 2018 , natural gas revenues, including alternative revenue programs, were \$2.3 billion compared to \$2.2 billion for the corresponding period in 2017 .

Details of the changes in natural gas revenues were as follows:

	Second Quarter 2018		Year-to-Date 2018	
	<i>(in millions)</i>	<i>(% change)</i>	<i>(in millions)</i>	<i>(% change)</i>
Natural gas revenues – prior year	\$ 684		\$ 2,214	
Estimated change resulting from –				
Infrastructure replacement programs and base rate changes	38	5.6 %	48	2.2 %
Gas costs and other cost recovery	(4)	(0.6)%	(2)	(0.1)%
Weather	8	1.2 %	16	0.7 %
Wholesale gas services	(4)	(0.6)%	31	1.4 %
Other	(16)	(2.4)%	7	0.3 %
Natural gas revenues – current year	\$ 706	3.2 %	\$ 2,314	4.5 %

The increases in natural gas revenues in the second quarter and year-to-date 2018 were primarily related to continued infrastructure investments recovered through replacement programs and base rate changes at gas distribution operations. These changes include base rate increases as a result of rate cases, partially offset by revenue reductions for the impacts of the Tax Reform Legislation. See Note (B) to the Condensed Financial Statements herein under " Regulatory Matters – Southern Company Gas " for additional information.

Revenues associated with gas costs and other cost recovery decreased due to reduced natural gas prices during 2018 compared to the corresponding periods in 2017 , partially offset by increased volumes of natural gas sold in 2018 as a result of colder weather. See "Cost of Natural Gas" herein for additional information.

Revenues increased due to colder weather in 2018 compared to the corresponding periods in 2017 that affected the utility customers in Illinois and the gas marketing services customers in Georgia and Illinois. See the weather discussion herein for additional information.

Revenues from wholesale gas services decreased in the second quarter 2018 primarily due to derivative losses, partially offset by increased commercial activity and increased for year-to-date 2018 primarily due to increased commercial activity, partially offset by derivative losses. See "Wholesale Gas Services" herein for additional information.

Natural gas distribution rates include provisions to adjust billings for fluctuations in natural gas costs. Therefore, gas costs recovered through natural gas revenues generally equal the amount expensed in cost of natural gas and do

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

not affect net income from gas distribution operations. See " Cost of Natural Gas " herein for additional information. Revenue impacts from weather and customer growth are described further below.

During Heating Season, natural gas usage and operating revenues are generally higher. Weather typically does not have a significant net income impact other than during the Heating Season. The following table presents the Heating Degree Days information for Illinois and Georgia, the primary locations where Southern Company Gas' operations are impacted by weather.

	Second Quarter			2018 vs. 2017		Year-to-Date			2018 vs. 2017	
	Normal ^(*)	2018	2017	colder	colder	Normal ^(*)	2018	2017	colder	colder (warmer)
Illinois	628	767	555	38.2%	22.1%	3,698	3,809	3,110	22.5%	3.0 %
Georgia	122	175	75	133.3%	43.4%	1,578	1,539	1,000	53.9%	(2.5)%

(*) Normal represents the 10-year average from January 1, 2008 through June 30, 2017 for Illinois at Chicago Midway International Airport and for Georgia at Atlanta Hartsfield-Jackson International Airport, based on information obtained from the National Oceanic and Atmospheric Administration, National Climatic Data Center.

Southern Company Gas hedged its exposure to warmer-than-normal weather in Illinois for gas distribution operations and in Illinois and Georgia for gas marketing services, which limited the negative income impacts reflected in the chart below.

	Gas Distribution Operations				Gas Marketing Services			
	Second Quarter		Year-to-Date		Second Quarter		Year-to-Date	
	2018	2017	2018	2017	2018	2017	2018	2017
	<i>(in millions)</i>				<i>(in millions)</i>			
Pre-tax	\$ 4	\$ 1	\$ 2	\$ (5)	\$ 2	\$ (3)	\$ (1)	\$ (10)
After tax	3	1	2	(3)	1	(2)	(1)	(6)

The following table provides the number of customers served by Southern Company Gas at June 30, 2018 and 2017 :

	June 30,		2018 vs. 2017
	2018	2017	
	<i>(in thousands, except market share %)</i>		<i>(% change)</i>
Gas distribution operations ^(a)	4,609	4,573	0.8 %
Gas marketing services ^(b)			
Energy customers ^(c)	696	768	(9.4)%
Market share of energy customers in Georgia	29.4%	29.1%	

(a) Includes total customers of approximately 407,000 and 403,000 at June 30, 2018 and 2017, respectively, related to Elizabethtown Gas, Elkton Gas, and Florida City Gas, which were sold subsequent to June 30, 2018. See Note (J) to the Condensed Financial Statements under " Southern Company Gas – Sale of Elizabethtown Gas and Elkton Gas " and " – Sale of Florida City Gas " herein for additional information.

(b) On June 4, 2018, Southern Company Gas completed the sale of Pivotal Home Solutions, which served approximately 1.2 million contracts prior to disposition. See Note (J) to the Condensed Financial Statements under "Southern Company Gas – Sale of Pivotal Home Solutions" herein for additional information.

(c) The decrease at June 30, 2018 is primarily due to approximately 70,000 fewer customers in Ohio contracted through an annual auction process to serve for 12 months beginning April 1, 2018. At June 30, 2017, there were approximately 140,000 customers in Ohio contracted through an annual auction process to serve for 12 months beginning April 1, 2017.

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Southern Company Gas anticipates overall customer growth trends at the remaining four natural gas distribution utilities in gas distribution operations to continue as it expects continued improvement in the new housing market and low natural gas prices. Southern Company Gas uses a variety of targeted marketing programs to attract new customers and to retain existing customers.

Cost of Natural Gas

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(4)	(1.7)	\$(2)	(0.2)

Natural gas distribution rates include provisions to adjust billings for fluctuations in natural gas costs. Therefore, gas costs recovered through natural gas revenues generally equal the amount expensed in cost of natural gas and do not affect net income from gas distribution operations. Cost of natural gas at gas distribution operations represented 84% of total cost of natural gas for both the second quarter and year-to-date 2018. For additional information, see MANAGEMENT'S DISCUSSION AND ANALYSIS – RESULTS OF OPERATIONS – "Cost of Natural Gas and Other Sales" of Southern Company Gas in Item 7 of the Form 10-K and "Natural Gas Revenues" herein.

In the second quarter 2018, cost of natural gas was \$228 million compared to \$232 million for the corresponding period in 2017. The decrease reflects a 12% decrease in natural gas prices during the second quarter 2018 compared to the corresponding period in 2017, partially offset by an increase in the volume of natural gas sold in 2018 as a result of colder weather.

For year-to-date 2018, cost of natural gas was \$949 million compared to \$951 million for the corresponding period in 2017. The decrease reflects an 11% decrease in natural gas prices during year-to-date 2018 compared to the corresponding period in 2017, partially offset by an increase in volumes of natural gas sold in 2018 as a result of colder weather.

The following table details the volumes of natural gas sold during all periods presented.

	Second Quarter		2018 vs. 2017	Year-to-Date		2018 vs. 2017
	2018	2017		2018	2017

<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$24	11.2	\$44	9.4

In the second quarter 2018 , other operations and maintenance expenses were \$238 million compared to \$214 million for the corresponding period in 2017 . The increase was primarily due to an \$11 million reserve for a settlement of class action litigation to facilitate the sale of Pivotal Home Solutions, a \$6 million increase in compensation and benefit costs, and \$4 million of disposition-related costs.

For year-to-date 2018 , other operations and maintenance expenses were \$514 million compared to \$470 million for the corresponding period in 2017 . The increase was primarily due to an \$11 million reserve for a settlement of class action litigation to facilitate the sale of Pivotal Home Solutions, a \$22 million increase in compensation and benefit costs, a \$12 million one-time increase for the adoption of a new paid time off policy to align with the Southern Company system, and \$6 million of disposition-related costs. These increases were partially offset by an \$8 million decrease in recoverable costs, primarily related to bad debt expense, at gas distribution operations. See Notes (B) and (J) to the Condensed Financial Statements under "General Litigation Matters – Southern Company Gas" and " Southern Company Gas – Sale of Pivotal Home Solutions," respectively, herein for additional information. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Other Matters" of Southern Company Gas in Item 7 of the Form 10-K for additional information on the new paid time off policy.

Depreciation and Amortization

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$1	0.8	\$11	4.5

In the second quarter 2018 , depreciation and amortization was \$126 million compared to \$125 million for the corresponding period in 2017 . For year-to-date 2018 , depreciation and amortization was \$255 million compared to \$244 million for the corresponding period in 2017 . These increase s were primarily due to continued infrastructure investments recovered through replacement programs at gas distribution operations, partially offset by timing of amortization of intangible assets as a result of fair value adjustments in acquisition accounting at gas marketing services and ceasing recognition of depreciation and amortization on Pivotal Home Solutions' assets classified as held for sale and subsequently sold in the second quarter 2018 .

Taxes Other Than Income Taxes

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$4	9.1	\$11	9.6

In the second quarter 2018 , taxes other than income taxes were \$48 million compared to \$44 million for the corresponding period in 2017 . For year-to-date 2018 , taxes other than income taxes were \$125 million compared to \$114 million for the corresponding period in 2017 . These increase s primarily reflect an increase in revenue tax expenses as a result of higher revenues as well as payroll taxes related to benefits under the new paid time off policy.

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Other Matters" of Southern Company Gas in Item 7 of the Form 10-K for additional information on the new paid time off policy.

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Goodwill Impairment

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$—	N/A	\$42	N/A

N/A - Not applicable

For year-to-date 2018 , a goodwill impairment charge of \$42 million was recorded during the first quarter 2018 in contemplation of the sale of Pivotal Home Solutions. See Note (A) to the Condensed Financial Statements under " Goodwill and Other Intangible Assets " and Note (J) to the Condensed Financial Statements under " Southern Company Gas – Sale of Pivotal Home Solutions " herein for additional information.

Loss on Disposition

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$36	N/A	\$36	N/A

N/A - Not applicable

The sale of Pivotal Home Solutions was structured as a stock sale for book purposes; however, both parties elected to treat it as an asset sale for tax purposes. The resulting increase in the book loss is offset by a reduction in deferred tax expense. See "Income Taxes" herein and Note (J) to the Condensed Financial Statements under "Southern Company Gas – Sale of Pivotal Home Solutions" herein for additional information.

Earnings from Equity Method Investments

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$2	6.9	\$6	8.8

In the second quarter 2018 , earnings from equity method investments were \$31 million compared to \$29 million for the corresponding period in 2017 . The increase was primarily due to higher earnings from SNG. For year-to-date 2018 , earnings from equity method investments were \$74 million compared to \$68 million for the corresponding period in 2017 . The increase was primarily due to higher earnings from SNG.

Interest Expense, Net of Amounts Capitalized

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$11	22.9	\$24	25.5

In the second quarter 2018 , interest expense, net of amounts capitalized was \$59 million compared to \$48 million for the corresponding period in 2017 . For year-to-date 2018 , interest expense, net of amounts capitalized was \$118 million compared to \$94 million for the corresponding period in 2017 . These increases were primarily due to additional interest expense on new debt issuances and additional commercial paper borrowings as well as a reduction in capitalized interest due to the Dalton Pipeline being placed in service in August 2017.

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Other Income (Expense), Net

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(1)	(25.0)	\$5	50.0

For year-to-date 2018 , other income (expense), net was \$15 million compared to \$10 million for the corresponding period in 2017 . The increase was primarily due to a \$7 million gain from the settlement of a contractor litigation claim, partially offset by a decrease in interest income. See Note (B) to the Condensed Financial Statements under "Regulatory Matters – Southern Company Gas – Atlanta Gas Light's Pipeline Replacement Program " herein for additional information.

Income Taxes

Second Quarter 2018 vs. Second Quarter 2017		Year-to-Date 2018 vs. Year-to-Date 2017	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$24	77.4	\$(21)	(11.7)

In the second quarter 2018 , income taxes were \$55 million compared to \$31 million for the corresponding period in 2017 . The increase was primarily due to \$40 million of income taxes associated with the sale of Pivotal Home Solutions, primarily due to goodwill not deductible for tax purposes and for which a deferred tax liability had not been recorded previously, partially offset by the reduction in deferred tax expense as a result of treating the sale as an asset sale for tax purposes. In addition, this increase was partially offset by lower pre-tax earnings as well as a lower federal income tax rate and the flowback of excess deferred taxes as a result of the Tax Reform Legislation.

For year-to-date 2018 , income taxes were \$159 million compared to \$180 million for the corresponding period in 2017 . The decrease was primarily due to lower pre-tax earnings as well as a lower federal income tax rate and the flowback of excess deferred taxes as a result of the Tax Reform Legislation. This decrease was partially offset by \$40 million of income taxes recorded for the sale of Pivotal Home Solutions which includes the reduction in deferred tax expense as a result of treating the sale as an asset sale for tax purposes.

See Notes (H) and (J) to the Condensed Financial Statements under " Effective Tax Rate " and " Southern Company Gas – Sale of Pivotal Home Solutions," respectively, herein for additional information.

Performance and Non-GAAP Measures

Adjusted operating margin is a non-GAAP measure that is calculated as operating revenues less cost of natural gas, cost of other sales, and revenue tax expense. Adjusted operating margin excludes other operations and maintenance expenses, depreciation and amortization, taxes other than income taxes, goodwill impairment, and loss on disposition, which are included in the calculation of operating income as calculated in accordance with GAAP and reflected in the statements of income. The presentation of adjusted operating margin is believed to provide useful information regarding the contribution resulting from customer growth at gas distribution operations since the cost of natural gas and revenue tax expense can vary significantly and are generally billed directly to customers. Southern Company Gas further believes that utilizing adjusted operating margin at gas marketing services, wholesale gas services, and gas midstream operations allows it to focus on a direct measure of adjusted operating margin before overhead costs. The applicable reconciliation of operating income to adjusted operating margin is provided herein.

Adjusted operating margin should not be considered an alternative to, or a more meaningful indicator of, Southern Company Gas' operating performance than operating income as determined in accordance with GAAP. In addition, Southern Company Gas' adjusted operating margin may not be comparable to similarly titled measures of other companies.

See Note (A) to the Condensed Financial Statements under " Goodwill and Other Intangible Assets " and Note (J) to the Condensed Financial Statements under " Southern Company Gas – Sale of Pivotal Home Solutions " herein for additional information.

(c) Operating expenses for gas marketing services include the loss on disposition. Net loss for gas marketing services includes the loss on disposition and the associated income tax expense. See Note (J) to the Condensed Financial Statements under " Southern Company Gas – Sale of Pivotal Home Solutions " herein for additional information.

Gas Distribution Operations

Gas distribution operations is the largest component of Southern Company Gas' business and is subject to regulation and oversight by agencies in each of the states it serves. These agencies approve natural gas rates designed to provide Southern Company Gas with the opportunity to generate revenues to recover the cost of natural gas delivered to its customers and its fixed and variable costs, including depreciation, interest, maintenance, taxes, and overhead costs, and to earn a reasonable return on its investments.

With the exception of Atlanta Gas Light, Southern Company Gas' second largest utility that operates in a deregulated natural gas market and has a straight-fixed-variable rate design that minimizes the variability of its revenues based on consumption, the earnings of the natural gas distribution utilities can be affected by customer consumption patterns that are a function of weather conditions, price levels for natural gas, and general economic conditions that may impact customers' ability to pay for natural gas consumed. Southern Company Gas has various weather mechanisms, such as weather normalization mechanisms and weather derivative instruments, that limit its exposure to weather changes within typical ranges in its natural gas distribution utilities' service territories.

Second Quarter 2018 vs. Second Quarter 2017

In the second quarter 2018 , net income increase d \$14 million , or 25.9% , compared to the corresponding period in 2017 . This increase primarily relates to an increase of \$20 million in adjusted operating margin and a decrease in income tax expense of \$11 million, partially offset by an increase of \$12 million in operating expenses and an increase of \$5 million in interest expense, net of amounts capitalized. The increase in adjusted operating margin primarily reflects \$39 million in additional revenue from continued infrastructure investments recovered through replacement programs and base rates. The decrease in income taxes is primarily due to a lower federal income tax rate and the flowback of excess deferred taxes as a result of the Tax Reform Legislation. The increase in operating expenses primarily reflects additional depreciation due to additional assets placed in service and increased compensation and benefit costs, partially offset by a decrease in recoverable costs, primarily related to bad debt expense. The increase in interest expense includes the impact of the issuance of first mortgage bonds at Nicor Gas in 2017 and additional commercial paper borrowings during the second quarter 2018 .

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Year-to-Date 2018 vs. Year-to-Date 2017

For year-to-date 2018, net income increased \$45 million, or 26.3%, compared to the corresponding period in 2017. This increase primarily relates to an increase of \$35 million in adjusted operating margin, an increase of \$4 million in other income (expense), net, and a decrease in income tax expense of \$38 million, partially offset by an increase of \$21 million in operating expenses and an increase of \$11 million in interest expense, net of amounts capitalized. The increase in adjusted operating margin primarily reflects \$86 million in additional revenue from continued infrastructure investments recovered through replacement programs and base rates, partially offset by revenue deferrals totaling \$38 million for regulatory liabilities associated with the Tax Reform Legislation impacts. The increase in other income (expense), net primarily reflects a gain from the settlement of a contractor litigation claim in 2018, partially offset by a decrease in interest income. The decrease in income taxes is primarily due to a lower federal income tax rate and the flowback of excess deferred taxes as a result of the Tax Reform Legislation. The increase in operating expenses primarily reflects additional depreciation due to additional assets placed in service and increased compensation and benefit costs, partially offset by a decrease in recoverable costs, primarily related to bad debt expense. The increase in interest expense includes the impact of the issuance of first mortgage bonds at Nicor Gas in 2017 and additional commercial paper borrowings during year-to-date 2018.

Gas Marketing Services

Gas marketing services consists of several businesses that provide energy-related products and services to natural gas markets, including warranty sales. Gas marketing services is weather sensitive and uses a variety of hedging strategies, such as weather derivative instruments and other risk management tools, to partially mitigate potential weather impacts. On June 4, 2018, Southern Company Gas completed the sale of Pivotal Home Solutions to American Water Enterprises LLC. See Note (J) under "Southern Company Gas" herein for additional information.

Second Quarter 2018 vs. Second Quarter 2017

In the second quarter 2018, net income decreased \$80 million compared to the corresponding period in 2017. This decrease was driven by a \$76 million loss on the sale of Pivotal Home Solutions, which included \$40 million of income tax expense on goodwill not deductible for tax purposes and for which a deferred tax liability had not been recorded previously and an \$11 million pre-tax reserve for a settlement of class action litigation to facilitate the sale of Pivotal Home Solutions. See Notes (B) and (J) to the Condensed Financial Statements under "General Litigation Matters – Southern Company Gas" and "Southern Company Gas – Sale of Pivotal Home Solutions," respectively, herein for additional information.

Year-to-Date 2018 vs. Year-to-Date 2017

For year-to-date 2018, net income decreased \$98 million compared to the corresponding period in 2017. This decrease was driven by a \$76 million loss on the sale of Pivotal Home Solutions, which included \$40 million of income tax expense on goodwill not deductible for tax purposes and for which a deferred tax liability had not been recorded previously, a \$42 million goodwill impairment charge recorded in contemplation of the sale of Pivotal Home Solutions, and an \$11 million pre-tax reserve for a settlement of class action litigation to facilitate the sale of Pivotal Home Solutions, partially offset by an increase in adjusted operating margin of \$13 million, a decrease in depreciation and amortization of \$10 million, primarily due to the timing of amortization of intangible assets as a result of fair value adjustments recorded during acquisition accounting as well as the sale of Pivotal Home Solutions, and a decrease in the federal income tax rate. Adjusted operating margin increased by \$13 million due to \$9 million for colder weather in 2018, \$6 million for fixed and guaranteed bill revenue as a result of adopting a new revenue recognition standard, and \$2 million from energy customers contracted through an annual auction process to serve for 12 months beginning April 1, 2017, partially offset by the sale of Pivotal Home Solutions during the second quarter 2018. See Note (A) under "Recently Adopted Accounting Standards" and "Goodwill and Other Intangible Assets," Note (B) under "General Litigation Matters – Southern Company Gas," and Note (J) under "Southern Company Gas – Sale of Pivotal Home Solutions" to the Condensed Financial Statements herein for additional information.

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Wholesale Gas Services

Wholesale gas services is involved in asset management and optimization, storage, transportation, producer and peaking services, natural gas supply, natural gas services, and wholesale gas marketing. Southern Company Gas has positioned the business to generate positive economic earnings on an annual basis even under low volatility market conditions that can result from a number of factors. When market price volatility increases, wholesale gas services is well positioned to capture significant value and generate stronger results. Operating expenses primarily reflect employee compensation and benefits.

Second Quarter 2018 vs. Second Quarter 2017

In the second quarter 2018, net income decreased \$4 million, or 23.5%, compared to the corresponding period in 2017. This decrease was primarily due to interest incurred on a promissory note issued during 2018 to meet working capital needs.

Year-to-Date 2018 vs. Year-to-Date 2017

For year-to-date 2018, net income increased \$32 million, or 62.7%, compared to the corresponding period in 2017. This increase primarily relates to a \$29 million increase in adjusted operating margin and a decrease of \$11 million in income tax expense, partially offset by an increase of \$7 million in operating expenses. Details of the increase in adjusted operating margin are provided in the table below. The increase in operating expenses primarily reflects higher compensation and benefit expense. The decrease in income tax expense was driven by a lower federal income tax rate, partially offset by higher pretax earnings.

	Second Quarter 2018	Second Quarter 2017	Year-to-Date 2018	Year-to-Date 2017
	<i>(in millions)</i>			
Commercial activity recognized	\$ 17	\$ (18)	\$ 189	\$ 69
Gain (loss) on storage derivatives	—	17	1	18
Gain (loss) on transportation and forward commodity derivatives	(28)	(2)	(44)	37
LOCOM adjustments, net of current period recoveries	—	(1)	(3)	(1)
Purchase accounting adjustments to fair value inventory and contracts	(5)	(9)	4	(5)
Adjusted operating margin	\$ (16)	\$ (13)	\$ 147	\$ 118

Change in Commercial Activity

The increase in commercial activity in the second quarter and year-to-date 2018 compared to the corresponding periods in 2017 was primarily due to natural gas price volatility that was generated by favorable weather and a corresponding increase in power generation volumes coupled with decreased natural gas supply.

Change in Storage and Transportation Derivatives

Volatility in the natural gas market arises from a number of factors, such as weather fluctuations or changes in supply or demand for natural gas in different regions of the U.S. The volatility of natural gas commodity prices has a significant impact on Southern Company Gas' customer rates, long-term competitive position against other energy sources, and the ability of wholesale gas services to capture value from locational and seasonal spreads. Forward storage or time spreads applicable to the locations of wholesale gas services' specific storage positions in 2018 remained consistent with the 2017 spreads. Transportation and forward commodity derivative losses in 2018 are primarily the result of widening transportation spreads due to favorable weather, which impacted forward prices at natural gas receipt and delivery points, primarily in the Northeast and Midwest regions.

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Withdrawal Schedule and Physical Transportation Transactions

The expected natural gas withdrawals from storage and expected offset to prior hedge losses/gains associated with the transportation portfolio of wholesale gas services are presented in the following table, along with the net operating revenues expected at the time of withdrawal from storage and the physical flow of natural gas between contracted transportation receipt and delivery points. Wholesale gas services' expected net operating revenues exclude storage and transportation demand charges, as well as other variable fuel, withdrawal, receipt, and delivery charges, and exclude estimated profit sharing under asset management agreements. Further, the amounts that are realizable in future periods are based on the inventory withdrawal schedule, planned physical flow of natural gas between the transportation receipt and delivery points, and forward natural gas prices at June 30, 2018. A portion of wholesale gas services' storage inventory and transportation capacity is economically hedged with futures contracts, which results in the realization of substantially fixed net operating revenues.

	Storage withdrawal schedule		Physical transportation transactions – expected net operating gains	
	Total storage ^(a)	Expected net operating gains ^(b)	operating gains ^(c)	
	<i>(in mmBtu in millions)</i>	<i>(in millions)</i>	<i>(in millions)</i>	
2018	25.9	\$ 4	\$	10
2019 and thereafter	9.0	4		34
Total at June 30, 2018	34.9	\$ 8	\$	44

(a) At June 30, 2018, the WACOG of wholesale gas services' expected natural gas withdrawals from storage was \$2.51 per mmBtu.

(b) Represents expected operating gains from planned storage withdrawals associated with existing inventory positions and could change as wholesale gas services adjusts its daily injection and withdrawal plans in response to changes in future market conditions and forward NYMEX price fluctuations.

(c) Represents the periods associated with the transportation derivative gains and (losses) during which the derivatives will be settled and the physical transportation transactions will occur that offset the derivative gains and losses that were previously recognized.

The unrealized storage and transportation derivative gains do not change the underlying economic value of wholesale gas services' storage and transportation positions and will be reversed when the related transactions occur and are recognized. For more information on wholesale gas services' energy marketing and risk management activities, see MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Market Price Risk" of Southern Company Gas in Item 7 of the Form 10-K.

Gas Midstream Operations

Gas midstream operations consists primarily of gas pipeline investments, with storage and fuels also aggregated into this segment. Gas pipeline investments include SNG, Horizon Pipeline, Atlantic Coast Pipeline, PennEast Pipeline, Dalton Pipeline, and Magnolia Enterprise Holdings, Inc. See Note (K) to the Condensed Financial Statements herein and Note 4 to the financial statements of Southern Company Gas in Item 8 of the Form 10-K for additional information.

Second Quarter 2018 vs. Second Quarter 2017

In the second quarter 2018, net income increased \$5 million, or 55.6%, compared to the corresponding period in 2017. This increase primarily relates to a \$6 million increase in adjusted operating margin primarily due to the Dalton Pipeline being placed in service in August 2017 and a \$2 million net increase in earnings from equity method investments in SNG, PennEast Pipeline, and Horizon Pipeline, partially offset by an increase in interest expense due to lower amounts capitalized after the Dalton Pipeline was placed in service.

Year-to-Date 2018 vs. Year-to-Date 2017

For year-to-date 2018, net income increased \$13 million, or 52.0%, compared to the corresponding period in 2017. This increase primarily relates to a \$13 million increase in adjusted operating margin primarily due to the Dalton

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Pipeline being placed in service in August 2017, lower costs at the storage facilities, and a \$6 million net increase in earnings from equity method investments in SNG, PennEast Pipeline, and Horizon Pipeline, partially offset by an increase in interest expense due to lower interest capitalized after the Dalton Pipeline was placed in service.

All Other

All other includes Southern Company Gas' investment in Triton, AGL Services Company, and Southern Company Gas Capital, as well as various corporate operating expenses that are not allocated to the reportable segments and interest income (expense) associated with affiliate financing arrangements.

Second Quarter 2018 vs. Second Quarter 2017

In the second quarter 2018, net income decreased \$15 million compared to the corresponding period in 2017. This decrease primarily reflects a \$6 million increase in operating expenses that includes \$4 million of disposition-related costs, a \$2 million increase in interest expense, net of amounts capitalized primarily due to new debt issuances and additional commercial paper borrowings, and a \$4 million increase in income taxes due to tax allocation changes.

Year-to-Date 2018 vs. Year-to-Date 2017

For year-to-date 2018, net income decreased \$32 million compared to the corresponding period in 2017. This decrease primarily reflects a \$23 million increase in operating expenses and a \$6 million increase in interest expense. The increase in operating expenses primarily reflects a \$12 million increase in compensation expense resulting from the adoption of the new paid time off policy and \$6 million of disposition-related costs. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Other Matters" of Southern Company Gas in Item 7 of the Form 10-K for additional information on the new paid time off policy. The increase in interest expense was primarily associated with new debt issuances and additional commercial paper borrowings.

Segment Reconciliations

Reconciliations of operating income to adjusted operating margin for the second quarter 2018 and 2017 are reflected in the following tables. See Note (L) to the Condensed Financial Statements herein for additional information.

(b) Nicor Gas' revenue tax expenses, which are passed through directly to customers.

FUTURE EARNINGS POTENTIAL

The results of operations discussed above are not necessarily indicative of Southern Company Gas' future earnings potential. The level of Southern Company Gas' future earnings depends on numerous factors that affect the opportunities, challenges, and risks of Southern Company Gas' primary business of natural gas distribution and its complementary businesses in the gas marketing services, wholesale gas services, and gas midstream operations sectors. These factors include Southern Company Gas' ability to maintain a constructive regulatory environment that allows for the timely recovery of prudently-incurred costs, the completion and subsequent operation of ongoing infrastructure and other construction projects, creditworthiness of customers, its ability to optimize its transportation and storage positions, and its ability to re-contract storage rates at favorable prices.

Future earnings will be driven by customer growth and are subject to a variety of other factors. These factors include weather, competition, new energy contracts with other utilities and other wholesale customers, energy conservation practiced by customers, the use of alternative energy sources by customers, the price of natural gas, the price elasticity of demand, and the rate of economic growth or decline in Southern Company Gas' service territories.

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Demand for natural gas is primarily driven by the pace of economic growth that may be affected by changes in regional and global economic conditions, which may impact future earnings.

Volatility of natural gas prices has a significant impact on Southern Company Gas' customer rates, long-term competitive position against other energy sources, and the ability of its gas marketing services and wholesale gas services segments to capture value from locational and seasonal spreads. Additionally, changes in commodity prices subject a significant portion of Southern Company Gas' operations to earnings variability. Over the longer term, volatility is expected to be low to moderate and locational and/or transportation spreads are expected to decrease as new pipelines are built to reduce the existing supply constraints in the shale areas of the Northeast U.S. To the extent these pipelines are delayed or not built, volatility could increase. Additional economic factors may contribute to this environment, including a significant drop in oil and natural gas prices, which could lead to consolidation of natural gas producers or reduced levels of natural gas production. Further, if economic conditions continue to improve, including the new housing market, the demand for natural gas may increase, which may cause natural gas prices to rise and drive higher volatility in the natural gas markets on a longer-term basis.

As part of its business strategy, Southern Company Gas regularly considers and evaluates joint development arrangements as well as acquisitions and dispositions of businesses and assets.

On June 4, 2018, Southern Company Gas completed the stock sale of Pivotal Home Solutions to American Water Enterprises LLC. For year-to-date 2018, net income attributable to Pivotal Home Solutions, exclusive of the loss on the disposition and the related goodwill impairment charge, was immaterial. Southern Company Gas and American Water Enterprises LLC entered into a transition services agreement whereby Southern Company Gas will provide certain administrative and operational services through no later than February 3, 2019.

On July 1, 2018, a Southern Company Gas subsidiary, Pivotal Utility Holdings, completed the sales of the assets of two of its natural gas distribution utilities, Elizabethtown Gas and Elkton Gas, to South Jersey Industries, Inc. For year-to-date 2018, net income attributable to Elizabethtown Gas and Elkton Gas was \$26 million. However, due to the seasonal nature of the natural gas business and other factors including, but not limited to, weather, regulation, competition, customer demand, and general economic conditions, the year-to-date 2018 net income is not necessarily indicative of the results to be expected for any other period. Southern Company Gas and South Jersey Industries, Inc. entered into transition services agreements whereby Southern Company Gas will provide certain administrative and operational services through no later than January 31, 2020.

On July 29, 2018, Southern Company Gas and its wholly-owned direct subsidiary, NUI Corporation, completed the stock sale of Pivotal Utility Holdings, which primarily consisted of Florida City Gas, to NextEra Energy. For year-to-date 2018, net income attributable to Florida City Gas was \$8 million. However, due to the seasonal nature of the natural gas business and other factors including, but not limited to, weather, regulation, competition, customer demand, and general economic conditions, the year-to-date 2018 net income is not necessarily indicative of the results to be expected for any other period. Southern Company Gas and NextEra Energy entered into a transition services agreement whereby Southern Company Gas will provide certain administrative and operational services through no later than July 29, 2020.

See Note (J) to the Condensed Financial Statements under "Southern Company Gas" herein for additional information on these dispositions. See OVERVIEW – "Seasonality of Results" for additional information on seasonality.

Environmental Matters

New or revised environmental laws and regulations could affect many areas of Southern Company Gas' operations. The impact of any such changes cannot be determined at this time. Environmental compliance costs could affect earnings if such costs cannot continue to be fully recovered in rates on a timely basis. Further, increased costs that are recovered through regulated rates could contribute to reduced demand for natural gas, which could negatively affect results of operations, cash flows, and financial condition. Additionally, many commercial and industrial customers may also be affected by existing and future environmental requirements, which for some may have the potential to ultimately affect their demand for natural gas. See Note (B) under "Environmental Matters –

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Environmental Remediation " to the Condensed Financial Statements herein and MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Environmental Matters" of Southern Company Gas in Item 7 and Note 3 to the financial statements of Southern Company Gas under "Environmental Matters" in Item 8 of the Form 10-K for additional information.

Regulatory Matters

See Note 3 to the financial statements of Southern Company Gas under "Regulatory Matters" in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements under " Regulatory Matters – Southern Company Gas " herein for additional information regarding Southern Company Gas' regulatory matters.

Riders

On April 19, 2018, the Illinois Commission approved Nicor Gas' variable income tax adjustment rider. This rider provides for refund or recovery of changes in income tax expense that result from income tax rates that differ from those used in Nicor Gas' last rate case. Customer refunds began on July 1, 2018 related to the January 1, 2018 through May 4, 2018 impacts of the Tax Reform Legislation. The impact of the Tax Reform Legislation subsequent to May 4, 2018 was addressed in Nicor Gas' approved rehearing request discussed herein under "Settled Base Rate Cases."

Natural Gas Cost Recovery

Southern Company Gas has established natural gas cost recovery rates approved by the relevant state regulatory agencies in the states in which it serves. Natural gas cost recovery revenues are adjusted for differences in actual recoverable natural gas costs and amounts billed in current regulated rates. Changes in the billing factor will not have a significant effect on Southern Company Gas' revenues or net income, but will affect cash flows.

Base Rate Cases

Settled Base Rate Cases

On February 23, 2018, Atlanta Gas Light revised its annual base rate filing to reflect the impacts of the Tax Reform Legislation and requested a \$16 million rate reduction in 2018. On May 15, 2018, the Georgia PSC approved a stipulation for Atlanta Gas Light's annual base rates to remain at the 2017 level for 2018 and 2019, with customer credits of \$8 million in each of July 2018 and October 2018 to reflect the impacts of the Tax Reform Legislation. The Georgia PSC maintained Atlanta Gas Light's previously authorized earnings band based on a ROE between 10.55% and 10.95% and increased the allowed equity ratio by 4% to an equity ratio of 55% to address the negative cash flow and credit metric impacts of the Tax Reform Legislation. Additionally, Atlanta Gas Light is required to file a traditional base rate case on or before June 1, 2019 for rates effective January 1, 2020.

On May 2, 2018, the Illinois Commission approved Nicor Gas' rehearing request for revised base rates to incorporate the reduction in the federal income tax rate as a result of the Tax Reform Legislation. The resulting decrease of approximately \$44 million in annual base rate revenues became effective May 5, 2018. Nicor Gas' previously-authorized capital structure and ROE of 9.8% were not addressed in the rehearing and remain unchanged. The impact of the Tax Reform Legislation prior to May 5, 2018 was addressed in the variable income tax rider discussed herein under "Riders."

Pending Base Rate Case

On February 15, 2018, Chattanooga Gas filed a general base rate case with the Tennessee Public Utility Commission (PUC) requesting a \$7 million increase in annual base rate revenues. The requested increase, which, in accordance with a Tennessee PUC order, incorporated the effects of the Tax Reform Legislation, was based on a projected test year ending June 30, 2019 and a ROE of 11.25% . The Tennessee PUC is expected to rule on the requested increase in the third quarter 2018.

The ultimate outcome of this matter cannot be determined at this time.

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Other

The Virginia Commission issued an order effective January 1, 2018 that requires utilities in the state to defer as a regulatory liability the impact of the Tax Reform Legislation, including the reduction in the corporate income tax rate to 21% and the impact of the flowback of excess deferred income taxes.

On April 25, 2018, the Virginia Commission issued an order indicating that any proposal beyond a proposed base rate reduction to reflect the cost savings from the Tax Reform Legislation must be made through a general base rate case. Virginia Natural Gas expects to address the cost savings from the Tax Reform Legislation in the third quarter 2018 by filing an annual information form. The Virginia Commission is expected to rule on the impact of the Tax Reform Legislation by the first half of 2019. The ultimate outcome of this matter cannot be determined at this time.

Asset Management Agreements

Upon closing the sales of Elizabethtown Gas and Elkton Gas, an affiliate of South Jersey Industries, Inc. assumed the asset management agreements with wholesale gas services for Elizabethtown Gas and Elkton Gas. See Note (J) to the Condensed Financial Statements under "Southern Company Gas" herein for additional information on these dispositions. For additional information, see MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Regulatory Matters – Asset Management Agreements" of Southern Company Gas in Item 7 of the Form 10-K.

Regulatory Infrastructure Programs

Southern Company Gas is engaged in various infrastructure programs that update or expand its gas distribution systems to improve reliability and help ensure the safety of its utility infrastructure and recovers in rates its investment and a return associated with these infrastructure programs. Excluding the natural gas distribution utilities sold subsequent to June 30, 2018, infrastructure expenditures incurred in the first six months of 2018 were as follows:

Utility	Program	Year-to-Date 2018
		<i>(in millions)</i>
Nicor Gas	Investing in Illinois	\$ 135
Atlanta Gas Light	Georgia Rate Adjustment Mechanism (GRAM) infrastructure spending	139
Virginia Natural Gas	Steps to Advance Virginia's Energy	24
Total		\$ 298

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Regulatory Matters – Infrastructure Replacement Programs and Capital Projects" of Southern Company Gas in Item 7 and Note 3 to the financial statements of Southern Company Gas under "Regulatory Matters – Regulatory Infrastructure Programs" in Item 8 of the Form 10-K for additional information.

Income Tax Matters

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FUTURE EARNINGS POTENTIAL – "Income Tax Matters" of Southern Company Gas in Item 7 of the Form 10-K and FINANCIAL CONDITION AND LIQUIDITY – "Credit Rating Risk," Note (B) to the Condensed Financial Statements under "Regulatory Matters – Southern Company Gas," and Note (H) to the Condensed Financial Statements herein for information regarding the Tax Reform Legislation and related regulatory actions.

Other Matters

Southern Company Gas is involved in various other matters being litigated and regulatory matters that could affect future earnings. In addition, Southern Company Gas is subject to certain claims and legal actions arising in the ordinary course of business. The ultimate outcome of such pending or potential litigation or regulatory matters

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

cannot be predicted at this time; however, for current proceedings not specifically reported in Note (B) to the Condensed Financial Statements herein, management does not anticipate that the ultimate liabilities, if any, arising from such current proceedings would have a material effect on Southern Company Gas' financial statements. See Note (B) to the Condensed Financial Statements herein for a discussion of various other contingencies and regulatory matters, and other matters being litigated which may affect future earnings potential.

Southern Company Gas owns a 50% interest in a planned LNG liquefaction and storage facility in Jacksonville, Florida. Once construction is complete and the facility is operational, it will be outfitted with a 2.0 million gallon storage tank with the capacity to produce in excess of 120,000 gallons of LNG per day. It is expected to be operational in the third quarter 2018. The ultimate outcome of this matter cannot be determined at this time.

ACCOUNTING POLICIES

Application of Critical Accounting Policies and Estimates

Southern Company Gas prepares its financial statements in accordance with GAAP. Significant accounting policies are described in Note 1 to the financial statements of Southern Company Gas in Item 8 of the Form 10-K. In the application of these policies, certain estimates are made that may have a material impact on Southern Company Gas' results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. See MANAGEMENT'S DISCUSSION AND ANALYSIS – ACCOUNTING POLICIES – "Application of Critical Accounting Policies and Estimates" of Southern Company Gas in Item 7 of the Form 10-K for a complete discussion of Southern Company Gas' critical accounting policies and estimates.

Recently Issued Accounting Standards

See MANAGEMENT'S DISCUSSION AND ANALYSIS – ACCOUNTING POLICIES – "Recently Issued Accounting Standards" of Southern Company Gas in Item 7 of the Form 10-K for additional information regarding ASU No. 2016-02, *Leases (Topic 842)*. See Note (A) to the Condensed Financial Statements herein for information regarding Southern Company Gas' recently adopted accounting standards.

FINANCIAL CONDITION AND LIQUIDITY

Overview

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Overview" of Southern Company Gas in Item 7 of the Form 10-K for additional information. Southern Company Gas' financial condition remained stable at June 30, 2018. Southern Company Gas intends to continue to monitor its access to short-term and long-term capital markets as well as bank credit agreements to meet future capital and liquidity needs. See "Capital Requirements and Contractual Obligations," "Sources of Capital," and "Financing Activities" herein for additional information.

By regulation, Nicor Gas is restricted, to the extent of its retained earnings balance, in the amount it can dividend or loan to affiliates and is not permitted to make money pool loans to affiliates. Prior to the disposition of Elizabethtown Gas, the New Jersey BPU restricted the amount Elizabethtown Gas could dividend to its parent company to 70% of its quarterly net income. At June 30, 2018, the amount of subsidiary retained earnings and net income restricted to dividend totaled \$796 million. These restrictions did not have any impact on Southern Company Gas' ability to meet its cash obligations. Subsequent to the disposition of Elizabethtown Gas, management does not expect the remaining restriction to materially impact Southern Company Gas' ability to meet its currently anticipated cash obligations.

Net cash provided from operating activities totaled \$1.3 billion for the first six months of 2018, an increase of \$169 million from the corresponding period in 2017. The increase was primarily due to increased volumes of natural gas sold during the first six months of 2018 as a result of colder weather compared to the prior year, partially offset by higher income tax payments. Net cash used for investing activities totaled \$381 million for the first six months of 2018 primarily due to gross property additions related to capital expenditures for infrastructure investments

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

recovered through replacement programs at gas distribution operations and capital contributed to equity method investments in pipelines, partially offset by proceeds from the disposition of Pivotal Home Solutions. Net cash used for financing activities totaled \$940 million for the first six months of 2018 primarily due to net repayments of commercial paper borrowings, the redemption of gas facility revenue bonds, and a common stock dividend payment to Southern Company. Cash flows from financing activities vary from period to period based on capital needs and the maturity or redemption of securities.

Significant balance sheet changes for the first six months of 2018 include the reclassification of \$2.3 billion and \$412 million in total assets and liabilities held for sale, respectively, associated with Elizabethtown Gas, Elkton Gas, and Florida City Gas as described in Note (J) to the Condensed Financial Statements herein under "Southern Company Gas" and "Assets Held for Sale," a decrease of \$295 million in natural gas for sale, net of temporary LIFO liquidation, due to the use of stored natural gas, and a \$515 million decrease in notes payable primarily related to net repayments of commercial paper borrowings. Other significant balance sheet changes include decreases of \$71 million in accounts payable as well as \$156 million and \$61 million in energy marketing receivables and payables, respectively, due to lower natural gas prices and an increase of \$462 million in total property, plant, and equipment primarily due to capital expenditures for rate base investments and pre-approved rider and infrastructure investments recovered through replacement programs.

Capital Requirements and Contractual Obligations

See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Capital Requirements and Contractual Obligations" of Southern Company Gas in Item 7 of the Form 10-K for a description of Southern Company Gas' capital requirements and contractual obligations. Approximately \$155 million will be required through June 30, 2019 to fund maturities of long-term debt. See "Sources of Capital" herein for additional information.

The regulatory infrastructure programs and other construction programs are subject to periodic review and revision, and actual costs may vary from these estimates because of numerous factors. These factors include: changes in business conditions; changes in FERC rules and regulations; state regulatory approvals; changes in legislation; the cost and efficiency of labor, equipment, and materials; project scope and design changes; and the cost of capital. In addition, there can be no assurance that costs related to capital expenditures will be fully recovered. See Note 3 to the consolidated financial statements of Southern Company Gas in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements herein for information regarding additional factors that may impact infrastructure investment expenditures.

Sources of Capital

Southern Company Gas plans to obtain the funds to meet its future capital needs through operating cash flows, external securities issuances, borrowings from financial institutions, and borrowings and equity contributions from Southern Company. In addition, Southern Company Gas plans to utilize the proceeds from the dispositions of Elizabethtown Gas, Elkton Gas, Florida City Gas, and Pivotal Home Solutions to pay the income taxes resulting from the sales, to retire existing debt, and for general corporate purposes. However, the amount, type, and timing of any future financings, if needed, depend upon prevailing market conditions, regulatory approval, and other factors. The issuance of securities by Nicor Gas is generally subject to the approval of the Illinois Commission. See MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Sources of Capital" of Southern Company Gas in Item 7 of the Form 10-K for additional information.

The assets and liabilities associated with Elizabethtown Gas, Elkton Gas, and Florida City Gas are classified as held for sale and recorded as current assets and liabilities on the balance sheet at June 30, 2018 as described in Note (J) to the Condensed Financial Statements herein under "Southern Company Gas" and "Assets Held for Sale." Excluding the assets and liabilities classified as held for sale, Southern Company Gas' current liabilities exceeded current assets by \$1.3 billion primarily as a result of \$1.0 billion in notes payable. Southern Company Gas' current liabilities frequently exceed current assets because of commercial paper borrowings used to fund daily operations, scheduled maturities of long-term debt, and significant seasonal fluctuations in cash needs. Southern Company Gas

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

intends to utilize operating cash flows, external securities issuances, borrowings from financial institutions, borrowings and equity contributions from Southern Company, and the proceeds from its dispositions to fund its short-term capital needs. Southern Company Gas has substantial cash flow from operating activities and access to the capital markets and financial institutions to meet liquidity needs.

At June 30, 2018, Southern Company Gas had \$69 million of cash and cash equivalents. Committed credit arrangements with banks at June 30, 2018 were as follows:

Company	Expires 2022		Unused
	<i>(in millions)</i>		
Southern Company Gas Capital ^(a)	\$	1,400	\$ 1,395
Nicor Gas		500	500
Total ^(b)	\$	1,900	\$ 1,895

(a) Southern Company Gas guarantees the obligations of Southern Company Gas Capital.

(b) Pursuant to the credit arrangement, the allocations between Southern Company Gas Capital and Nicor Gas may be adjusted.

See Note 6 to the consolidated financial statements of Southern Company Gas under "Bank Credit Arrangements" in Item 8 of the Form 10-K and Note (F) to the Condensed Financial Statements under "Bank Credit Arrangements" herein for additional information.

The multi-year credit arrangement of Southern Company Gas Capital and Nicor Gas (Facility) contains a covenant that limits the ratio of debt to capitalization (as defined in the Facility) to a maximum of 70% for each of Southern Company Gas and Nicor Gas and contains a cross-acceleration provision to other indebtedness (including guarantee obligations) of the applicable company. Such cross-acceleration provision to other indebtedness would trigger an event of default of the applicable company if Southern Company Gas or Nicor Gas defaulted on indebtedness, the payment of which was then accelerated. At June 30, 2018, both companies were in compliance with such covenant. The Facility does not contain a material adverse change clause at the time of borrowings.

Subject to applicable market conditions, the applicable company expects to renew or replace the Facility as needed, prior to expiration. In connection therewith, the applicable company may extend the maturity dates and/or increase or decrease the lending commitments thereunder. A portion of unused credit with banks provides liquidity support to Southern Company Gas.

Southern Company Gas makes short-term borrowings primarily through commercial paper programs that have the liquidity support of the committed bank credit arrangements described above. Commercial paper borrowings are included in notes payable in the balance sheets.

Details of short-term borrowings were as follows:

	Short-Term Debt at June 30, 2018		Short-Term Debt During the Period ^(a)		
	Amount Outstanding	Weighted Average Interest Rate	Average Amount Outstanding	Weighted Average Interest Rate	Maximum Amount Outstanding
	<i>(in millions)</i>		<i>(in millions)</i>		
Commercial paper:					
Southern Company Gas Capital	\$ 573	2.4%	\$ 709	2.4%	\$ 855
Nicor Gas	154	2.3%	104	2.2%	180
Short-term loans:					
Southern Company Gas ^(b)	276	2.8%	111	2.7%	276
Total	\$ 1,003	2.5%	\$ 924	2.4%	

(a) Average and maximum amounts are based upon daily balances during the three-month period ended June 30, 2018.

(b) Subsequent to June 30, 2018, Southern Company Gas repaid all \$276 million of short-term loans.

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Southern Company Gas believes the need for working capital can be adequately met by utilizing commercial paper programs, lines of credit, and operating cash flows.

Additionally, Pivotal Utility Holdings redeemed five series of gas facility revenue bonds issued under loan agreements with the New Jersey Economic Development Authority and Brevard County, Florida totaling \$200 million during the second quarter 2018. See " Financing Activities " herein for additional information regarding the redemption of these bonds.

Credit Rating Risk

Southern Company Gas does not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade.

There are certain contracts that could require collateral, but not accelerated payment, in the event of a credit rating change below BBB- and/or Baa3. These contracts are for physical gas purchases and sales and energy price risk management. The maximum potential collateral requirement under these contracts at June 30, 2018 was approximately \$10 million.

Generally, collateral may be provided by a Southern Company guaranty, letter of credit, or cash. Additionally, a credit rating downgrade could impact the ability of Southern Company Gas to access capital markets and would be likely to impact the cost at which it does so.

As a result of the Tax Reform Legislation, certain financial metrics, such as the funds from operations to debt percentage, used by the credit rating agencies to assess Southern Company and its subsidiaries, including Southern Company Gas, may be negatively impacted. Southern Company Gas and certain of its subsidiaries are taking actions to mitigate the resulting impacts, which, among other alternatives, include adjusting capital structure. Absent actions by Southern Company and its subsidiaries that fully mitigate the impacts, Southern Company Gas', Southern Company Gas Capital's, and Nicor Gas' credit ratings could be negatively affected. The Georgia PSC's May 15, 2018 approval of a stipulation for Atlanta Gas Light's annual rate adjustment maintained the previously authorized earnings band and increased the equity ratio to address the negative cash flow and credit metric impacts of the Tax Reform Legislation. See Note 3 to the financial statements of Southern Company Gas under "Regulatory Matters" in Item 8 of the Form 10-K and Note (B) to the Condensed Financial Statements under " Regulatory Matters – Southern Company Gas " herein for additional information.

Financing Activities

The long-term debt on Southern Company Gas' balance sheets includes both principal and non-principal components. As of June 30, 2018 , the non-principal components totaled \$483 million, which consisted of the unamortized portions of the fair value adjustment recorded in purchase accounting, debt premiums, debt discounts, and debt issuance costs.

On January 4, 2018, Southern Company Gas issued a floating rate promissory note to Southern Company in an aggregate principal amount of \$100 million bearing interest based on one-month LIBOR. On March 28, 2018, Southern Company Gas repaid this promissory note.

In the second quarter 2018, Pivotal Utility Holdings caused \$200 million aggregate principal amount of gas facility revenue bonds to be redeemed. Also in the second quarter 2018, Pivotal Utility Holdings, as borrower, and Southern Company Gas, as guarantor, entered into a \$181 million short-term delayed draw floating rate bank term loan bearing interest based on one-month LIBOR, which Pivotal Utility Holdings used to repay the gas facility revenue bonds. Subsequent to June 30, 2018, Pivotal Utility Holdings repaid this short-term loan.

In May 2018, Southern Company Gas Capital borrowed \$95 million pursuant to a short-term uncommitted bank credit arrangement, guaranteed by Southern Company Gas, bearing interest at a rate agreed upon by Southern Company Gas Capital and the bank from time to time and payable on no less than 30 days' demand by the bank. The proceeds of the loan were used to pay down short-term debt. Subsequent to June 30, 2018, Southern Company Gas Capital repaid this loan.

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Subsequent to June 30, 2018, Nicor Gas agreed to issue \$300 million aggregate principal amount of first mortgage bonds in a private placement, \$100 million of which is expected to be issued in August 2018 and \$200 million of which is expected to be issued in November 2018.

In addition to any financings that may be necessary to meet capital requirements and contractual obligations, Southern Company Gas plans to continue, when economically feasible, a program to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit.

Market Price Risk

Other than the items discussed below, there were no material changes to Southern Company Gas' disclosures about market price risk during the second quarter 2018. For an in-depth discussion of Southern Company Gas' market price risks, see MANAGEMENT'S DISCUSSION AND ANALYSIS – FINANCIAL CONDITION AND LIQUIDITY – "Market Price Risk" of Southern Company Gas in Item 7 of the Form 10-K. Also see Notes (D) and (I) to the Condensed Financial Statements herein for information relating to derivative instruments.

Southern Company Gas is exposed to market risks, primarily commodity price risk, interest rate risk, and weather risk. Due to various cost recovery mechanisms, the natural gas distribution utilities of Southern Company Gas that sell natural gas directly to end-use customers have limited exposure to market volatility of natural gas prices. Certain natural gas distribution utilities of Southern Company Gas manage fuel-hedging programs implemented per the guidelines of their respective state regulatory agencies to hedge the impact of market fluctuations in natural gas prices for customers. For the weather risk associated with Nicor Gas, Southern Company Gas has a corporate weather hedging program that utilizes weather derivatives to reduce the risk of lower operating margins potentially resulting from significantly warmer-than-normal weather. In addition, certain non-regulated operations routinely utilize various types of derivative instruments to economically hedge certain commodity price and weather risks inherent in the natural gas industry. These instruments include a variety of exchange-traded and over-the-counter energy contracts, such as forward contracts, futures contracts, options contracts, and swap agreements. Some of these economic hedge activities may not qualify, or are not designated, for hedge accounting treatment. For the periods presented below, the changes in net fair value of Southern Company Gas' derivative contracts were as follows:

	Second Quarter 2018	Second Quarter 2017	Year-to-Date 2018	Year-to-Date 2017
<i>(in millions)</i>				
Contracts outstanding at beginning of period, assets (liabilities), net	\$ (70)	\$ 64	\$ (106)	\$ 12
Contracts realized or otherwise settled	2	(20)	51	(16)
Current period changes ^(a)	(22)	7	(35)	55
Contracts outstanding at the end of period, assets (liabilities), net	\$ (90)	\$ 51	\$ (90)	\$ 51
Netting of cash collateral	183	71	183	71
Cash collateral and net fair value of contracts outstanding at end of period ^(b)	\$ 93	\$ 122	\$ 93	\$ 122

(a) Current period changes also include the fair value of new contracts entered into during the period, if any.

(b) Net fair value of derivative contracts outstanding excludes premium and the intrinsic value associated with weather derivatives of \$3 million at June 30, 2018 and includes premium and the intrinsic value associated with weather derivatives of \$11 million at June 30, 2017.

SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The maturities of Southern Company Gas' energy-related derivative contracts at June 30, 2018 were as follows:

	Fair Value Measurements			
	June 30, 2018			
	Total Fair Value	Maturity		
Year 1		Years 2 & 3	Years 4 and thereafter	
	<i>(in millions)</i>			
Level 1 ^(a)	\$ (135)	\$ (24)	\$ (77)	\$ (34)
Level 2 ^(b)	45	13	33	(1)
Fair value of contracts outstanding at end of period ^(c)	\$ (90)	\$ (11)	\$ (44)	\$ (35)

(a) Valued using NYMEX futures prices.

(b) Valued using basis transactions that represent the cost to transport natural gas from a NYMEX delivery point to the contract delivery point. These transactions are based on quotes obtained either through electronic trading platforms or directly from brokers.

(c) Excludes cash collateral of \$183 million as well as premium and associated intrinsic value associated with weather derivatives of \$3 million at June 30, 2018 .

NOTES TO THE CONDENSED FINANCIAL STATEMENTS:
(UNAUDITED)

(A) INTRODUCTION

The condensed quarterly financial statements of each registrant included herein have been prepared by such registrant, without audit, pursuant to the rules and regulations of the SEC. The Condensed Balance Sheets as of December 31, 2017 have been derived from the audited financial statements of each registrant. In the opinion of each registrant's management, the information regarding such registrant furnished herein reflects all adjustments, which, except as otherwise disclosed, are of a normal recurring nature, necessary to present fairly the results of operations for the periods ended June 30, 2018 and 2017. Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations, although each registrant believes that the disclosures regarding such registrant are adequate to make the information presented not misleading. Disclosures which would substantially duplicate the disclosures in the Form 10-K and details which have not changed significantly in amount or composition since the filing of the Form 10-K are generally omitted from this Quarterly Report on Form 10-Q unless specifically required by GAAP. Therefore, these Condensed Financial Statements should be read in conjunction with the financial statements and the notes thereto included in the Form 10-K. Due to the seasonal variations in the demand for energy, operating results for the periods presented are not necessarily indicative of the operating results to be expected for the full year.

Certain prior year data presented in the financial statements have been reclassified to conform to the current year presentation. These reclassifications had no impact on the results of operations, financial position, or cash flows of any registrant.

Recently Adopted Accounting Standards

See Note 1 to the financial statements of the registrants under "Recently Issued Accounting Standards" in Item 8 of the Form 10-K for additional information.

Revenue

In 2014, the FASB issued ASC 606, *Revenue from Contracts with Customers* (ASC 606), replacing the existing accounting standard and industry-specific guidance for revenue recognition with a five-step model for recognizing and measuring revenue from contracts with customers. The underlying principle of the standard is to recognize revenue to depict the transfer of goods or services to customers at the amount expected to be collected. ASC 606 became effective on January 1, 2018 and the registrants adopted it using the modified retrospective method applied to open contracts and only to the version of the contracts in effect as of January 1, 2018. In accordance with the modified retrospective method, the registrants' previously issued financial statements have not been restated to comply with ASC 606 and the registrants did not have a cumulative-effect adjustment to retained earnings. The adoption of ASC 606 had no significant impact on the timing of revenue recognition compared to previously reported results; however, it requires enhanced disclosures regarding the nature, amount, timing, and uncertainty of revenue and the related cash flows arising from contracts with customers, which are included in Note (C).

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

ASC 606 provided additional clarity on financial statement presentation that resulted in reclassifications into other revenues and other operations and maintenance from other income/(expense), net at Alabama Power and Georgia Power related to certain unregulated sales of products and services. In addition, contract assets related to Southern Company's unregulated distributed generation business have been reclassified from unbilled revenue in accordance with the guidance in ASC 606. These reclassifications did not affect the timing or amount of revenues recognized or cash flows. ASC 606 also provided additional guidance on over-time revenue recognition, resulting in a change in the timing of revenue recognized from guaranteed and fixed billing arrangements at Southern Company Gas. The changes in natural gas revenues recognized in the second quarter and year-to-date 2018 relate primarily to the seasonal nature of natural gas usage.

The net impact of accounting for revenue under ASC 606 decreased Southern Company's consolidated net income by \$5 million for the three months ended June 30, 2018 and increased Southern Company's consolidated net income by \$5 million for the six months ended June 30, 2018 .

The specific impacts of applying ASC 606 to revenues from contracts with customers on the financial statements of Southern Company, Alabama Power, Georgia Power, and Southern Company Gas compared to previously recognized guidance is shown below.

Other

In 2016, the FASB issued ASU No. 2016-18, *Statement of Cash Flows (Topic 230): Restricted Cash* (ASU 2016-18). ASU 2016-18 eliminates the need to reflect transfers between cash and restricted cash in operating, investing, and financing activities in the statements of cash flows. In addition, the net change in cash and cash

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

equivalents during the period includes amounts generally described as restricted cash or restricted cash equivalents. The registrants adopted ASU 2016-18 effective January 1, 2018 with no material impact on their financial statements. Southern Company, Southern Power, and Southern Company Gas retrospectively applied ASU 2016-18 effective January 1, 2018 and have restated prior periods in the statements of cash flows by immaterial amounts. The change in restricted cash in the statements of cash flows was previously disclosed in operating activities for Southern Company and Southern Company Gas and in investing activities for Southern Company and Southern Power. See " Restricted Cash " herein for additional information.

In March 2017, the FASB issued ASU No. 2017-07, *Compensation – Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost* (ASU 2017-07). ASU 2017-07 requires that an employer report the service cost component in the same line item or items as other compensation costs and requires the other components of net periodic pension and postretirement benefit costs to be separately presented in the statements of income outside of income from operations. Additionally, only the service cost component is eligible for capitalization, when applicable. The registrants adopted ASU 2017-07 effective January 1, 2018 with no material impact on their financial statements. ASU 2017-07 has been applied retrospectively for the presentation of the service cost component and the other components of net periodic benefit costs in the statements of income for Southern Company, the traditional electric operating companies, and Southern Company Gas. Since Southern Power did not participate in the qualified pension and postretirement benefit plans until December 2017, no retrospective presentation of Southern Power's net periodic benefits costs is required. The requirement to limit capitalization to the service cost component of net periodic benefit costs has been applied on a prospective basis from the date of adoption for all registrants. The presentation changes resulted in a decrease in operating income and an increase in other income for the three and six months ended June 30, 2018 and 2017 for Southern Company, the traditional electric operating companies, and Southern Company Gas.

In August 2017, the FASB issued ASU No. 2017-12, *Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities* (ASU 2017-12). ASU 2017-12 makes more financial and non-financial hedging strategies eligible for hedge accounting, amends the related presentation and disclosure requirements, and simplifies hedge effectiveness assessment requirements. ASU 2017-12 is effective for fiscal years beginning after December 15, 2018, with early adoption permitted. The registrants adopted ASU 2017-12 effective January 1, 2018 with no material impact on their financial statements. See Note (I) for disclosures required by ASU 2017-12.

On February 14, 2018, the FASB issued ASU No. 2018-02, *Income Statement – Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income* (ASU 2018-02) to address the application of ASC 740, *Income Taxes* (ASC 740) to certain provisions of the Tax Reform Legislation. ASU 2018-02 specifically addresses the ASC 740 requirement that the effect of a change in tax laws or rates on deferred tax assets and liabilities be included in income from continuing operations, even when the tax effects were initially recognized directly in OCI at the previous rate, which strands the income tax rate differential in accumulated OCI. The amendments in ASU 2018-02 allow a reclassification from accumulated OCI to retained earnings for stranded tax effects resulting from the Tax Reform Legislation. The registrants adopted ASU 2018-02 effective January 1, 2018 with no material impact on their financial statements.

Asset Retirement Obligations

See Note 1 to the financial statements of Southern Company and the traditional electric operating companies under "Asset Retirement Obligations and Other Costs of Removal" in Item 8 of the Form 10-K for additional information regarding each company's AROs and the EPA's Disposal of Coal Combustion Residuals from Electric Utilities final rule (CCR Rule).

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

As of June 30, 2018, details of the AROs, including those related to the CCR Rule, included in the condensed balance sheets of Southern Company, Alabama Power, and Mississippi Power were as follows:

	Southern Company		Alabama Power		Mississippi Power	
			<i>(in millions)</i>			
Balance at December 31, 2017	\$	4,824	\$	1,709	\$	174
Liabilities incurred		1		—		—
Liabilities settled		(97)		(19)		(15)
Accretion		95		41		2
Cash flow revisions		1,493		1,451		15
Reclassification to held for sale		(148)		—		—
Balance at June 30, 2018	\$	6,168	\$	3,182	\$	176

In June 2018, Alabama Power recorded an increase of approximately \$1.2 billion to its AROs related to the CCR Rule. The revised cost estimates as of June 30, 2018 are based on information from feasibility studies performed on ash ponds in use at plants operated by Alabama Power, including a plant jointly-owned by Mississippi Power. During the second quarter 2018, Alabama Power's management completed its analysis of these studies which indicated that additional closure costs, primarily related to increases in estimated ash volume, water management requirements, and design revisions, will be required to close these ash ponds under the planned closure-in-place methodology. As a result of these revised cost estimates, in June 2018, Mississippi Power recorded an increase of approximately \$11 million to its AROs related to an ash pond at the plant jointly-owned with Alabama Power.

Georgia Power continues to perform engineering studies related to its plans to close the ash ponds at all of its generating plants, including one jointly owned with Gulf Power, in compliance with federal and state CCR rules. Georgia Power also continues to refine its closure strategy and cost estimates for each ash pond and is preparing permit applications as required by the State of Georgia CCR rule. While each of Georgia Power and Gulf Power believes its recorded liability for ash pond closures appropriately reflects its obligations under the current closure strategies it has elected, changes to such strategies and cost estimates would likely result in additional closure costs which would increase each of Georgia Power's and Gulf Power's ARO liability. It is not currently possible to determine the magnitude of an increase related to a change in closure strategies nor an increase related to ongoing engineering studies for the current closure strategies, and the timing of future cash outflows are indeterminable at this time. As permit applications advance, engineering studies continue, and the timing of ash pond closures develop further on a plant-by-plant basis during the second half of 2018 and in the future, Georgia Power will record any changes as necessary to its ARO liability, which could be material. Georgia Power expects to continue to periodically update these cost estimates as necessary, which could change further as additional information becomes available. Gulf Power will record any incremental AROs, which could be material, related to its share of Plant Scherer Unit 3, which is co-owned with Georgia Power, once Georgia Power further refines its cost estimate of the impact on its ARO liability.

As further analysis is performed and closure details are developed with respect to ash pond closures, the traditional electric operating companies expect to periodically update their cost estimates as necessary. Absent continued recovery of ARO costs through regulated rates, Southern Company's and the traditional electric operating companies' results of operations, cash flows, and financial condition could be materially impacted. The ultimate outcome of this matter cannot be determined at this time.

In June 2018, Alabama Power completed an updated decommissioning cost site study for Plant Farley. The estimated cost of decommissioning based on the study resulted in an increase in Southern Company's and Alabama Power's ARO liability of approximately \$300 million. See " Nuclear Decommissioning " below for additional information.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

The reclassification of a portion of the ARO liability to liabilities held for sale by Southern Company represents the AROs related to Gulf Power. See Note (J) under " Southern Company's Sale of Gulf Power " and " Assets Held for Sale " for additional information.

Nuclear Decommissioning

See Note 1 to the financial statements of Southern Company and Alabama Power under "Nuclear Decommissioning" in Item 8 of the Form 10-K for additional information.

In June 2018, Alabama Power completed an updated decommissioning cost site study for Plant Farley. The estimated costs of decommissioning based on the 2018 site study are as follows:

Decommissioning periods:	
Beginning year	2037
Completion year	2076
<i>(in millions)</i>	
Site study costs:	
Radiated structures	\$ 1,621
Non-radiated structures	99
Total site study costs	\$ 1,720

The decommissioning cost estimates are based on prompt dismantlement and removal of the plant from service. The actual decommissioning costs may vary from the above estimates because of changes in the assumed date of decommissioning, changes in NRC requirements, or changes in the assumptions used in making these estimates.

For ratemaking purposes, Alabama Power's decommissioning costs are based on the site study. Significant assumptions used to determine these costs for ratemaking were an inflation rate of 4.5% and a trust earnings rate of 7.0% . The next site study is expected to be completed in 2023 .

Amounts previously contributed to the external trust funds are currently projected to be adequate to meet the updated decommissioning obligations. Alabama Power will continue to provide site specific estimates of the decommissioning costs and related projections of funds in the external trust to the Alabama PSC and, if necessary, would seek the Alabama PSC's approval to address any changes in a manner consistent with the NRC and other applicable requirements.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

Goodwill and Other Intangible Assets

The following table presents year-to-date changes in goodwill balances for Southern Company and Southern Company Gas:

	Goodwill				
	Southern Company	Southern Company Gas			Total
		Gas Distribution Operations	Gas Marketing Services		
		<i>(in millions)</i>			
Balance at December 31, 2017	\$ 6,268	\$ 4,702	\$ 1,265	\$	5,967
Impairment ^(a)	(42)	—	(42)		(42)
Sale of Pivotal Home Solutions ^(a)	(242)	—	(242)		(242)
Reclassification to held for sale ^(b)	(668)	(668)	—		(668)
Balance at June 30, 2018	\$ 5,315 ^(c)	\$ 4,034	\$ 981	\$	5,015

(a) On April 11, 2018, Southern Company Gas entered into a stock purchase agreement for the sale of Pivotal Home Solutions. In contemplation of the transaction, a goodwill impairment charge of \$42 million was recorded in the first quarter 2018. On June 4, 2018, Southern Company Gas and Pivotal Home Solutions completed this transaction. See Note (J) under "Southern Company Gas" for additional information.

(b) Reflects goodwill associated with Elizabethtown Gas, Elkton Gas, and Florida City Gas, which were sold subsequent to June 30, 2018. See Note (J) under "Southern Company Gas" and "Assets Held for Sale" for additional information.

(c) Total does not add due to rounding.

Goodwill is not amortized but is subject to an annual impairment test during the fourth quarter of each year or more frequently if impairment indicators arise.

Restricted Cash

The registrants adopted ASU 2016-18 as of January 1, 2018. See " Recently Adopted Accounting Standards – Other " herein for additional information.

At December 31, 2017 , Southern Power had restricted cash primarily related to certain acquisitions and construction projects. At both June 30, 2018 and December 31, 2017 , Southern Company Gas had restricted cash held as collateral for worker's compensation, life insurance, and long-term disability insurance.

The following tables provide a reconciliation of cash, cash equivalents, and restricted cash reported within the condensed balance sheets that total to the amounts shown in the condensed statements of cash flows for the registrants that had restricted cash at June 30, 2018 and/or December 31, 2017 :

Total cash, cash equivalents, and restricted cash	\$	2,147	\$	140	\$	78

Natural Gas for Sale

Southern Company Gas' natural gas distribution utilities, with the exception of Nicor Gas, carry natural gas inventory on a WACOG basis.

Nicor Gas' natural gas inventory is carried at cost on a LIFO basis. Inventory decrements occurring during the year that are restored prior to year end are charged to cost of natural gas at the estimated annual replacement cost. Inventory decrements that are not restored prior to year end are charged to cost of natural gas at the actual LIFO

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

cost of the inventory layers liquidated. Southern Company Gas' inventory decrement at June 30, 2018 is expected to be restored prior to year end. The cost of natural gas, including inventory costs, is recovered from customers under a purchased gas recovery mechanism adjusted for differences between actual costs and amounts billed; therefore, LIFO liquidations have no impact on Southern Company's or Southern Company Gas' net income.

Natural gas inventories for Southern Company Gas' non-utility businesses are carried at the lower of weighted average cost or current market price, with cost determined on a WACOG basis. For any declines in market prices below the WACOG considered to be other than temporary, an adjustment is recorded to reduce the value of natural gas inventories to market value. Southern Company Gas had no material Locom adjustment in any period presented.

Hypothetical Liquidation at Book Value

Southern Power has consolidated renewable generation projects that are partially funded by a third-party tax equity investor. The related contractual provisions represent profit-sharing arrangements because the allocations of cash distributions and tax benefits are not based on fixed ownership percentages. Therefore, the noncontrolling interest is accounted for under a balance sheet approach utilizing the hypothetical liquidation at book value (HLBV) method. The HLBV method calculates each partner's share of income based on the change in net equity the partner can legally claim in a hypothetical liquidation at the end of the period compared to the beginning of the period.

(B) CONTINGENCIES AND REGULATORY MATTERS

See Note 3 to the financial statements of the registrants in Item 8 of the Form 10-K for information relating to various lawsuits, other contingencies, and regulatory matters.

General Litigation Matters

Each registrant is subject to certain claims and legal actions arising in the ordinary course of business. In addition, the business activities of Southern Company's subsidiaries are subject to extensive governmental regulation related to public health and the environment, such as laws and regulations governing air, water, land, and protection of natural resources. Litigation over environmental issues and claims of various types, including property damage, personal injury, common law nuisance, and citizen enforcement of environmental laws and regulations has occurred throughout the U.S. This litigation has included claims for damages alleged to have been caused by CO₂ and other emissions, CCR, and alleged exposure to hazardous materials, and/or requests for injunctive relief in connection with such matters.

The ultimate outcome of such pending or potential litigation against each registrant and any subsidiaries cannot be predicted at this time; however, for current proceedings not specifically reported herein, management does not anticipate that the ultimate liabilities, if any, arising from such current proceedings would have a material effect on such registrant's financial statements.

Southern Company

In January 2017, a putative securities class action complaint was filed against Southern Company, certain of its officers, and certain former Mississippi Power officers in the U.S. District Court for the Northern District of Georgia, Atlanta Division, by Monroe County Employees' Retirement System on behalf of all persons who purchased shares of Southern Company's common stock between April 25, 2012 and October 29, 2013. The complaint alleges that Southern Company, certain of its officers, and certain former Mississippi Power officers made materially false and misleading statements regarding the Kemper County energy facility in violation of certain provisions under the Securities Exchange Act of 1934, as amended. The complaint seeks, among other things, compensatory damages and litigation costs and attorneys' fees. In June 2017, the plaintiffs filed an amended complaint that provided additional detail about their claims, increased the purported class period by one day, and added certain other former Mississippi Power officers as defendants. In July 2017, the defendants filed a motion to dismiss the plaintiffs' amended complaint with prejudice, to which the plaintiffs filed an opposition in September 2017. On March 29, 2018, the U.S. District Court for the Northern District of Georgia, Atlanta Division, issued an

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

order granting, in part, the defendants' motion to dismiss. The court dismissed certain claims against certain officers of Southern Company and Mississippi Power and dismissed the allegations related to a number of the statements that plaintiffs challenged as being false or misleading. On April 26, 2018, the defendants filed a motion for reconsideration of the court's order, seeking dismissal of the remaining claims in the lawsuit.

In February 2017, Jean Vineyard filed a shareholder derivative lawsuit and, in May 2017, Judy Mesirov filed a shareholder derivative lawsuit, each in the U.S. District Court for the Northern District of Georgia. Each of these lawsuits names as defendants Southern Company, certain of its directors, certain of its officers, and certain former Mississippi Power officers. In August 2017, these two shareholder derivative lawsuits were consolidated in the U.S. District Court for the Northern District of Georgia. The complaints allege that the defendants caused Southern Company to make false or misleading statements regarding the Kemper County energy facility cost and schedule. Further, the complaints allege that the defendants were unjustly enriched and caused the waste of corporate assets and also allege that the individual defendants violated their fiduciary duties. Each plaintiff seeks to recover, on behalf of Southern Company, unspecified actual damages and, on each plaintiff's own behalf, attorneys' fees and costs in bringing the lawsuit. Each plaintiff also seeks certain changes to Southern Company's corporate governance and internal processes. On April 25, 2018, the court entered an order staying this lawsuit until 30 days after the resolution of any dispositive motions or any settlement, whichever is earlier, in the putative securities class action.

In May 2017, Helen E. Piper Survivor's Trust filed a shareholder derivative lawsuit in the Superior Court of Gwinnett County, State of Georgia that names as defendants Southern Company, certain of its directors, certain of its officers, and certain former Mississippi Power officers. The complaint alleges that the individual defendants, among other things, breached their fiduciary duties in connection with schedule delays and cost overruns associated with the construction of the Kemper County energy facility. The complaint further alleges that the individual defendants authorized or failed to correct false and misleading statements regarding the Kemper County energy facility schedule and cost and failed to implement necessary internal controls to prevent harm to Southern Company. The plaintiff seeks to recover, on behalf of Southern Company, unspecified actual damages and disgorgement of profits and, on its behalf, attorneys' fees and costs in bringing the lawsuit. The plaintiff also seeks certain unspecified changes to Southern Company's corporate governance and internal processes. The court entered an order staying this lawsuit until 30 days after the resolution of any dispositive motions or any settlement, whichever is earlier, in the putative securities class action.

Southern Company believes these legal challenges have no merit; however, an adverse outcome in any of these proceedings could have an impact on Southern Company's results of operations, financial condition, and liquidity. Southern Company will vigorously defend itself in these matters, the ultimate outcome of which cannot be determined at this time.

Alabama Power

On March 2, 2018, the Alabama Department of Environmental Management (ADEM) issued proposed administrative orders assessing a penalty of \$1.25 million to Alabama Power for unpermitted discharge of fluids and/or pollutants to groundwater at five electric generating plants. The proposed orders also require the submission to the ADEM of a plan with a schedule for implementation of a comprehensive groundwater investigation, including an assessment of corrective measures, a report evaluating any deficiencies at the facilities that may have led to the unpermitted discharges, and quarterly progress reports. Alabama Power is awaiting finalization of the orders. The ultimate outcome of this matter cannot be determined at this time.

Georgia Power

In 2011, plaintiffs filed a putative class action against Georgia Power in the Superior Court of Fulton County, Georgia alleging that Georgia Power's collection in rates of municipal franchise fees (all of which are remitted to municipalities) exceeded the amounts allowed in orders of the Georgia PSC and alleging certain state tort law claims. In 2016, the Georgia Court of Appeals reversed the trial court's previous dismissal of the case and remanded the case to the trial court. Georgia Power filed a petition for writ of certiorari with the Georgia Supreme Court, which was granted in August 2017. On June 18, 2018, the Georgia Supreme Court affirmed the judgment of the

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

Georgia Court of Appeals and the case has been remanded to the trial court for further proceedings. Georgia Power believes the plaintiffs' claims have no merit and intends to vigorously defend itself in this matter. The amount of any possible losses cannot be calculated at this time because, among other factors, it is unknown whether any class will ultimately be certified; the scope of such a class, if certified; and whether any losses would be subject to recovery from any municipalities. The ultimate outcome of this matter cannot be determined at this time.

Mississippi Power

In 2016, a complaint against Mississippi Power was filed in Harrison County Circuit Court (Circuit Court) by Biloxi Freezing & Processing Inc., Gulfside Casino Partnership, and John Carlton Dean, which was amended and refiled to include, among other things, Southern Company as a defendant. The individual plaintiff alleged that Mississippi Power and Southern Company violated the Mississippi Unfair Trade Practices Act. All plaintiffs alleged that Mississippi Power and Southern Company concealed, falsely represented, and failed to fully disclose important facts concerning the cost and schedule of the Kemper County energy facility and that these alleged breaches unjustly enriched Mississippi Power and Southern Company. The plaintiffs sought unspecified actual damages and punitive damages; asked the Circuit Court to appoint a receiver to oversee, operate, manage, and otherwise control all affairs relating to the Kemper County energy facility; asked the Circuit Court to revoke any licenses or certificates authorizing Mississippi Power or Southern Company to engage in any business related to the Kemper County energy facility in Mississippi; and sought attorney's fees, costs, and interest. The plaintiffs also sought an injunction to prevent any Kemper County energy facility costs from being charged to customers through electric rates. In June 2017, the Circuit Court ruled in favor of motions by Southern Company and Mississippi Power and dismissed the case. In July 2017, the plaintiffs filed notice of an appeal. On July 13, 2018, Mississippi Power and Southern Company reached a settlement agreement with the plaintiffs and the plaintiffs' appeal was dismissed with prejudice. The settlement had no material impact on Southern Company's or Mississippi Power's financial statements.

On May 18, 2018, Southern Company and Mississippi Power received a notice of dispute and arbitration demand filed by Martin Product Sales, LLC (Martin) based on two agreements, both related to Kemper IGCC byproducts for which Mississippi Power provided termination notices in September 2017. Martin alleges breach of contract, breach of good faith and fair dealing, fraud and misrepresentation, and civil conspiracy and makes a claim for damages in the amount of approximately \$143 million, as well as additional unspecified damages, attorney's fees, costs, and interest. Southern Company and Mississippi Power believe this legal challenge has no merit; however, an adverse outcome in this proceeding could have a material impact on Southern Company's and Mississippi Power's results of operations, financial condition, and liquidity. Southern Company and Mississippi Power will vigorously defend themselves in this matter, the ultimate outcome of which cannot be determined at this time.

On May 14, 2018, Mississippi Power's claim for lost revenue resulting from the Deepwater Horizon oil spill in the Gulf of Mexico in 2010 was settled. The settlement proceeds of \$18 million, net of expenses and income tax, are included in Southern Company's and Mississippi Power's earnings for the second quarter 2018.

Southern Power

Southern Power indirectly owns a 51% membership interest in RE Roserock LLC (Roserock), the owner of the Roserock facility in Pecos County, Texas. Prior to the facility being placed in service in November 2016, certain solar panels were damaged during installation by the construction contractor, McCarthy Building Companies, Inc. (McCarthy), and certain solar panels were damaged by a hail event that also occurred during construction. In May 2017, Roserock filed a lawsuit in the state district court in Pecos County, Texas, (State Court lawsuit) against XL Insurance America, Inc. (XL) and North American Elite Insurance Company (North American Elite) seeking recovery from an insurance policy for damages resulting from the hail storm and McCarthy's installation practices. On June 1, 2018, the court in the State Court lawsuit granted Roserock's motion for partial summary judgment, finding that the insurers were in breach of contract and in violation of the Texas Insurance Code for failing to pay any monies owed for the hail claim. Roserock is working to distinguish its damages between those attributable to the hail event versus damages attributable to installation. In addition to the State Court lawsuit, lawsuits were filed

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

between Roserock and McCarthy, as well as other parties, and that litigation has been consolidated in the U.S. District Court for the Western District of Texas. Southern Power intends to vigorously pursue and defend these matters, the ultimate outcome of which cannot be determined at this time.

Southern Company Gas

Nicor Energy Services Company, doing business as Pivotal Home Solutions, formerly a wholly-owned subsidiary of Southern Company Gas, was a defendant in a putative class action initially filed in 2017 in the state court in Indiana. The plaintiffs purported to represent a class of the customers who purchased products from Nicor Energy Services Company and alleged that the marketing, sale, and billing of the products violated the Indiana Consumer Fraud and Deceptive Business Practices Act, constituting common law fraud and resulting in unjust enrichment of these entities. In 2018, Nicor Energy Services Company was named in a second class action filed in the state court of Ohio asserting nearly identical allegations and legal claims. The plaintiffs sought, on behalf of the classes they purported to represent, actual and punitive damages, interest costs, attorney fees, and injunctive relief. To facilitate the sale of Pivotal Home Solutions, Southern Company Gas retained most of the financial responsibility for these lawsuits following the completion of the sale. On June 12, 2018, the parties settled these claims and Southern Company Gas recorded an \$11 million charge, which is reflected in other operations and maintenance expenses on the statements of income.

Environmental Matters

Environmental Remediation

The Southern Company system must comply with environmental laws and regulations governing the handling and disposal of waste and releases of hazardous substances. Under these various laws and regulations, the Southern Company system could incur substantial costs to clean up affected sites. The traditional electric operating companies and the natural gas distribution utilities in Illinois, New Jersey, Georgia, and Florida have all received authority from their respective state PSCs or other applicable state regulatory agencies to recover approved environmental compliance costs through regulatory mechanisms. These regulatory mechanisms are adjusted annually or as necessary within limits approved by the state PSCs or other applicable state regulatory agencies.

Georgia Power's environmental remediation liability was \$25 million and \$22 million as of June 30, 2018 and December 31, 2017, respectively. Georgia Power has been designated or identified as a potentially responsible party at sites governed by the Georgia Hazardous Site Response Act and/or by the federal Comprehensive Environmental Response, Compensation, and Liability Act, and assessment and potential cleanup of such sites is expected.

Gulf Power's environmental remediation liability includes estimated costs of environmental remediation projects of approximately \$48 million and \$52 million as of June 30, 2018 and December 31, 2017, respectively. These estimated costs primarily relate to site closure criteria by the Florida Department of Environmental Protection (FDEP) for potential impacts to soil and groundwater from herbicide applications at Gulf Power's substations. The schedule for completion of the remediation projects is subject to FDEP approval.

At June 30, 2018, Southern Company Gas' environmental remediation liability was \$305 million based on the estimated cost of environmental investigation and remediation associated with known current and former manufactured gas plant operating sites, with an additional \$77 million liability related to Elizabethtown Gas classified as held for sale. At December 31, 2017, Southern Company Gas' total environmental remediation liability was \$388 million, of which \$85 million related to Elizabethtown Gas. These environmental remediation expenditures are recoverable from customers through rate mechanisms approved by the applicable state regulatory agencies of the natural gas distribution utilities, with the exception of one site representing \$2 million of the total accrued remediation costs. See Note (J) under "Southern Company Gas" and "Assets Held for Sale" for additional information.

The ultimate outcome of these matters cannot be determined at this time; however, as a result of the regulatory treatment for environmental remediation expenses described above, the final disposition of these matters is not

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

expected to have a material impact on the financial statements of Southern Company, Georgia Power, Gulf Power, or Southern Company Gas.

FERC Matters

Market-Based Rate Authority

See Note 3 to the financial statements of Southern Company, the traditional electric operating companies, and Southern Power under "FERC Matters" in Item 8 of the Form 10-K for additional information regarding proceedings related to the traditional electric operating companies' and Southern Power's 2014 and 2017 triennial market power analyses.

On May 4, 2018, the FERC issued an order terminating both proceedings, finding that the traditional electric operating companies and Southern Power satisfy the FERC's standards for market-based rates. On May 9, 2018, the traditional electric operating companies and Southern Power made the compliance filing required by the order. These proceedings are essentially concluded.

Open Access Transmission Tariff

On May 10, 2018, the Alabama Municipal Electric Authority and Cooperative Energy filed with the FERC a complaint against SCS and the traditional electric operating companies claiming that the current 11.25% base ROE used in calculating the annual transmission revenue requirements of the traditional electric operating companies' open access transmission tariff is unjust and unreasonable as measured by the applicable FERC standards. The complaint requests that the base ROE be set no higher than 8.65% and that the FERC order refunds for the difference in revenue requirements that results from applying a just and reasonable ROE established in this proceeding upon determining the current ROE is unjust and unreasonable. On June 18, 2018, SCS and the traditional electric operating companies filed their response challenging the adequacy of the showing presented by the complainants and offering support for the current ROE. The ultimate outcome of this matter cannot be determined at this time.

Cooperative Energy Power Supply Agreement

See Note 3 to the financial statements of Mississippi Power under "FERC Matters – Cooperative Energy Power Supply Agreement" in Item 8 of the Form 10-K for additional information regarding Cooperative Energy's network integration transmission service agreement (NITSA) with SCS.

On March 23, 2018, the FERC accepted the amendment to the NITSA between Cooperative Energy and SCS, effective April 1, 2018.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

Regulatory Matters

Alabama Power

See Note 3 to the financial statements of Southern Company and Alabama Power under "Regulatory Matters – Alabama Power" and "Retail Regulatory Matters," respectively, in Item 8 of the Form 10-K for additional information regarding Alabama Power's recovery of retail costs through various regulatory clauses and accounting orders. The balance of each regulatory clause recovery on the balance sheet follows:

Regulatory Clause	Balance Sheet Line Item	June 30, 2018	December 31, 2017
<i>(in millions)</i>			
Rate CNP Compliance	Deferred under recovered regulatory clause revenues	\$ 30	\$ 17
Rate CNP PPA	Deferred under recovered regulatory clause revenues	11	12
Retail Energy Cost Recovery	Deferred under recovered regulatory clause revenues	80	25
	Under recovered regulatory clause revenues	28	—
Natural Disaster Reserve	Other regulatory liabilities, deferred	30	38

On May 1, 2018, the Alabama PSC approved modifications to Rate RSE and other commitments designed to position Alabama Power to address the growing pressure on its credit quality resulting from the Tax Reform Legislation, without increasing retail rates under Rate RSE in the near term. Alabama Power plans to reduce growth in total debt by increasing equity, with corresponding reductions in debt issuances, thereby de-leveraging its capital structure. Alabama Power's goal is to achieve an equity ratio of approximately 55% by the end of 2025. At June 30, 2018, Alabama Power's equity ratio was approximately 46.6% .

Rate RSE

The approved modifications to Rate RSE became effective June 2018 and are applicable for January 2019 billings and thereafter. The modifications include reducing the top of the allowed weighted common equity return (WCER) range from 6.21% to 6.15% and modifications to the refund mechanism applicable to prior year actual results. The modifications to the refund mechanism allow Alabama Power to retain a portion of the revenue that causes the actual WCER for a given year to exceed the allowed range.

Generally, if Alabama Power's actual WCER range is between 6.15% and 7.65% , customers will receive 25% of the amount between 6.15% and 6.65% , 40% of the amount between 6.65% and 7.15% , and 75% of the amount between 7.15% and 7.65% . Customers will receive all amounts in excess of an actual WCER of 7.65% .

In conjunction with these modifications to Rate RSE, on May 8, 2018, Alabama Power consented to a moratorium on any upward adjustments under Rate RSE for 2019 and 2020. Additionally, Alabama Power will return \$50 million to customers through bill credits in 2019.

In accordance with an established retail tariff that provides for an interim adjustment to customer billings to recognize the impact of a change in the statutory income tax rate, Alabama Power is returning approximately \$257 million to retail customers through bill credits in the second half of 2018 as a result of the change in the federal income tax rate under the Tax Reform Legislation.

Rate ECR

On May 1, 2018, the Alabama PSC approved an increase to Rate ECR from 2.015 cents per KWH to 2.353 cents per KWH effective July 2018 which is expected to result in additional collections of approximately \$100 million through December 31, 2018. The approved increase in the Rate ECR factor will have no significant effect on

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

Alabama Power's net income, but will increase operating cash flows related to fuel cost recovery in 2018. The rate will return to 5.910 cents per KWH in 2019, absent a further order from the Alabama PSC.

Accounting Order

On May 1, 2018, the Alabama PSC approved an accounting order that authorizes Alabama Power to defer the benefits of federal excess deferred income taxes associated with the Tax Reform Legislation for the year ending December 31, 2018 as a regulatory liability and to use up to \$30 million of such deferrals to offset under recovered amounts under Rate ECR. Any remaining amounts will be used for the benefit of customers as determined by the Alabama PSC. As of June 30, 2018, Alabama Power had applied approximately \$30 million of such deferrals to offset the under recovered balance under Rate ECR and expects the total deferrals for the year ending December 31, 2018 to be approximately \$50 million. See Note 5 to the financial statements of Southern Company and Alabama Power under "Federal Tax Reform Legislation" and of Alabama Power under "Current and Deferred Income Taxes" in Item 8 of the Form 10-K for additional information.

Plant Greene County

Alabama Power jointly owns Plant Greene County with an affiliate, Mississippi Power. See Note 4 to the financial statements of Alabama Power in Item 8 of the Form 10-K for additional information regarding the joint ownership agreement. On August 6, 2018, Mississippi Power filed its proposed Reserve Margin Plan (RMP) with the Mississippi PSC, which proposes a 4 -year acceleration of the retirement of Plant Greene County Units 1 and 2 to the third quarter 2021 and the third quarter 2022, respectively. Mississippi Power's proposed Plant Greene County unit retirements would require the completion of proposed transmission and system reliability improvements, as well as agreement by Alabama Power. Alabama Power will monitor Mississippi Power's proposed RMP and associated regulatory process as well as the proposed transmission and system reliability improvements. Alabama Power will review all the facts and circumstances and will evaluate all its alternatives prior to reaching a final determination on the ongoing operations of Plant Greene County. The ultimate outcome of this matter cannot be determined at this time.

Georgia Power

Georgia Power's revenues from regulated retail operations are collected through various rate mechanisms subject to the oversight of the Georgia PSC. Georgia Power currently recovers its costs from the regulated retail business through the 2013 ARP, which includes traditional base tariff rates, Demand-Side Management tariffs, Environmental Compliance Cost Recovery tariffs, and Municipal Franchise Fee tariffs. In addition, financing costs related to certified construction costs of Plant Vogtle Units 3 and 4 are being collected through the NCCR tariff and fuel costs are collected through a separate fuel cost recovery tariff. See " Nuclear Construction " herein and Note 3 to the financial statements of Southern Company under "Nuclear Construction" and Georgia Power under "Retail Regulatory Matters – Nuclear Construction" in Item 8 of the Form 10-K for additional information regarding the NCCR tariff. Also see " Fuel Cost Recovery " herein and Note 3 to the financial statements of Southern Company under "Regulatory Matters – Georgia Power – Fuel Cost Recovery" and Georgia Power under "Retail Regulatory Matters – Fuel Cost Recovery" in Item 8 of the Form 10-K for additional information regarding fuel cost recovery.

Rate Plans

See Note 3 to the financial statements of Southern Company and Georgia Power under "Regulatory Matters – Georgia Power – Rate Plans" and "Retail Regulatory Matters – Rate Plans," respectively, in Item 8 of the Form 10-K for additional information regarding Georgia Power's 2013 ARP and the Georgia PSC's 2018 order related to the Tax Reform Legislation.

On April 3, 2018, the Georgia PSC approved a settlement agreement between Georgia Power and the staff of the Georgia PSC regarding the retail rate impact of the Tax Reform Legislation (Georgia Power Tax Reform Settlement Agreement). Pursuant to the Georgia Power Tax Reform Settlement Agreement, to reflect the federal income tax rate reduction impact of the Tax Reform Legislation, Georgia Power will refund to customers a total of \$330 million through bill credits of \$131 million in October 2018, \$96 million in June 2019, and \$103 million in February 2020.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

In addition, Georgia Power is deferring as a regulatory liability (i) the revenue equivalent of the tax expense reduction resulting from legislation lowering the Georgia state income tax rate from 6.00% to 5.75% in 2019 and (ii) the entire benefit of approximately \$700 million in federal and state excess accumulated deferred income taxes. The amortization of these regulatory liabilities is expected to be addressed in Georgia Power's next base rate case, which is scheduled to be filed by July 1, 2019. If there is not a base rate case in 2019, customers will receive \$185 million in annual bill credits beginning in 2020, with any additional federal and state income tax savings deferred as a regulatory liability, until Georgia Power's next base rate case.

To address the negative cash flow and credit metric impacts of the Tax Reform Legislation, the Georgia PSC also approved an increase in Georgia Power's retail equity ratio to the lower of (i) Georgia Power's actual common equity weight in its capital structure or (ii) 55% , until Georgia Power's next base rate case. Benefits from reduced federal income tax rates in excess of the amounts refunded to customers will be retained by Georgia Power to cover the carrying costs of the incremental equity in 2018 and 2019.

Fuel Cost Recovery

As of June 30, 2018 and December 31, 2017 , Georgia Power's under recovered fuel balance totaled \$159 million and \$165 million , respectively, and is included as under recovered fuel clause revenues on Southern Company's and Georgia Power's condensed balance sheets. The Georgia PSC will review Georgia Power's cumulative over or under recovered fuel balance no later than September 1, 2018 and evaluate the need to file a fuel case. Georgia Power continues to be allowed to adjust its fuel cost recovery rates under an interim fuel rider prior to the next fuel case if the under or over recovered fuel balance exceeds \$200 million .

Fuel cost recovery revenues are adjusted for differences in actual recoverable fuel costs and amounts billed in current regulated rates. Accordingly, changes in the billing factor will not have a significant effect on Southern Company's or Georgia Power's revenues or net income, but will affect cash flow.

Gulf Power

See Note 3 to the financial statements of Gulf Power under "Retail Regulatory Matters" in Item 8 of the Form 10-K for additional information regarding Gulf Power's rates and charges for service to retail customers.

Retail Base Rate Case

See Note 3 to the financial statements of Southern Company and Gulf Power under "Regulatory Matters – Gulf Power – Retail Base Rate Cases" and "Retail Regulatory Matters – Retail Base Rate Cases," respectively, in Item 8 of the Form 10-K for additional information.

As a continuation of a settlement agreement approved by the Florida PSC in April 2017 (2017 Gulf Power Rate Case Settlement Agreement), on March 26, 2018, the Florida PSC approved a stipulation and settlement agreement among Gulf Power and three intervenors addressing the retail revenue requirement effects of the Tax Reform Legislation (Gulf Power Tax Reform Settlement Agreement).

The Gulf Power Tax Reform Settlement Agreement results in annual reductions to Gulf Power's revenues of \$18.2 million from base rates and \$15.6 million from environmental cost recovery rates, implemented April 1, 2018, and also provides for a one-time refund of \$69.4 million for the retail portion of unprotected (not subject to normalization) deferred tax liabilities through a reduced fuel cost recovery rate over the remainder of 2018. Through June 30, 2018 , approximately \$28 million of this refund has been reflected in customer bills. As a result of the Gulf Power Tax Reform Settlement Agreement, the Florida PSC also approved an increase in Gulf Power's maximum equity ratio from 52.5% to 53.5% for all retail regulatory purposes.

As part of the Gulf Power Tax Reform Settlement Agreement, a limited scope proceeding to address protected deferred tax liabilities consistent with IRS normalization principles was initiated on April 30, 2018. Pending resolution of this proceeding, Gulf Power is deferring the related amounts for 2018 as a regulatory liability. Through June 30, 2018 , amounts deferred totaled \$5 million . Unless otherwise agreed to by the parties to the Gulf Power Tax Reform Settlement Agreement, amounts recorded in this regulatory liability will be refunded to retail customers in

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

2019 through Gulf Power's fuel cost recovery rates. The ultimate outcome of this matter cannot be determined at this time.

Cost Recovery Clauses

See Note 3 to the financial statements of Gulf Power under "Retail Regulatory Matters – Cost Recovery Clauses" in Item 8 of the Form 10-K for additional information regarding Gulf Power's recovery of retail costs through various regulatory clauses and accounting orders, as approved by the Florida PSC. Regulatory clause recovery balances included in the balance sheets are as follows:

Regulatory Clause	Balance Sheet Line Item	June 30, 2018	December 31, 2017
<i>(in millions)</i>			
Fuel Cost Recovery	Under recovered regulatory clause revenues	\$ —	\$ 22
Fuel Cost Recovery	Other regulatory liabilities, current	5	—
Purchased Power Capacity Recovery	Under recovered regulatory clause revenues	2	2
Environmental Cost Recovery (*)	Under recovered regulatory clause revenues	1	2
Energy Conservation Cost Recovery	Other regulatory liabilities, current	1	—

(*) At June 30, 2018 and December 31, 2017, the under recovered balance included in the balance sheets represents the current portion of the regulatory assets associated with projected environmental expenditures of approximately \$11 million and \$13 million, respectively, partially offset by the over recovered environmental cost recovery balance of approximately \$10 million and \$11 million, respectively.

Mississippi Power

See Note 3 to the financial statements of Mississippi Power under "Retail Regulatory Matters" in Item 8 of the Form 10-K for additional information.

On May 8, 2018, the Mississippi PSC issued an order to begin an operations review of Mississippi Power in August 2018 with the final report expected by February 28, 2019. Mississippi Power expects that the review will include, but not be limited to, a comparative analysis of its costs, its cost recovery framework, and ways in which it may streamline management operations for the reasonable benefit of ratepayers. The ultimate outcome of this matter cannot be determined at this time.

Performance Evaluation Plan

In each of 2014, 2015, 2016, and 2017, Mississippi Power submitted its annual PEP lookback filing for the prior year, which for 2013 and 2014 each indicated no surcharge or refund and for each of 2015 and 2016 indicated a \$5 million surcharge. Additionally, in July 2016, in November 2016, and on November 15, 2017, Mississippi Power submitted its annual projected PEP filings for 2016, 2017, and 2018, respectively, which for 2016 and 2017 indicated no change in rates and for 2018 indicated a rate increase of 4%, or \$38 million in annual revenues. The Mississippi PSC suspended each of these filings to allow more time for review.

On February 7, 2018, Mississippi Power submitted its revised 2018 projected PEP filing to the Mississippi PSC, which reflected the impacts of the Tax Reform Legislation, requesting an increase in annual retail revenues of \$26 million based on a performance adjusted ROE of 9.33% and an increased equity ratio of 55%.

On March 22, 2018, Mississippi Power submitted its annual PEP lookback filing for 2017, which reflected no surcharge or refund.

On July 27, 2018, Mississippi Power and the Mississippi Public Utilities Staff (MPUS) entered into a settlement agreement with respect to the 2018 PEP filing and all unresolved PEP filings for prior years (PEP Settlement)

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

Agreement), which was approved by the Mississippi PSC on August 7, 2018. Rates under the PEP Settlement Agreement will take effect for the first billing cycle of September 2018.

The PEP Settlement Agreement provides for an increase of approximately \$21.6 million in annual base retail revenues, which excludes approximately \$5.5 million requested for certain compensation costs contested by the MPUS. Under the PEP Settlement Agreement, Mississippi Power expects to defer these costs for 2018 and 2019 as a regulatory asset. The Mississippi PSC is currently expected to rule on the appropriate treatment for such costs in connection with Mississippi Power's next base rate case, which is scheduled to be filed in the fourth quarter 2019 (2019 Base Rate Case). The ultimate outcome of this matter cannot be determined at this time.

Pursuant to the PEP Settlement Agreement, Mississippi Power's performance-adjusted allowed ROE will be 9.31% and its allowed equity ratio will remain at 50% , pending further review by the Mississippi PSC. In lieu of the requested equity ratio increase, Mississippi Power will retain \$44 million of excess accumulated deferred income taxes resulting from the Tax Reform Legislation, which had been proposed to be amortized beginning in 2018, until the conclusion of the 2019 Base Rate Case. Further, Mississippi Power will seek equity contributions sufficient to restore its equity ratio (which was 43.5% at June 30, 2018) to the 50% target. In the event Mississippi Power's actual average equity ratio for 2018 is more than 1% higher or lower than the 50% target, Mississippi Power will defer the corresponding difference in its revenue requirement as a regulatory asset or liability for resolution in the 2019 Base Rate Case.

Pursuant to the PEP Settlement Agreement, PEP proceedings will be suspended until after the conclusion of the 2019 Base Rate Case and Mississippi Power will not be required to make any PEP filings for regulatory years 2018, 2019, and 2020. The PEP Settlement Agreement also resolves all open PEP filings with no change to customer rates. As a result, in the third quarter 2018, Mississippi Power expects to recognize revenues of \$5 million previously reserved in connection with the 2012 PEP lookback filing.

Energy Efficiency

On May 8, 2018, the Mississippi PSC issued an order approving Mississippi Power's revised annual projected Energy Efficiency Cost Rider 2018 compliance filing, submitted on May 3, 2018, which increased annual retail revenues by approximately \$3 million effective with the first billing cycle for June 2018.

Environmental Compliance Overview Plan

On August 3, 2018, Mississippi Power and the MPUS entered into a settlement agreement with respect to the 2018 ECO Plan filing (ECO Settlement Agreement), which provides for an increase of approximately \$17 million in annual base retail revenues and was approved by the Mississippi PSC on August 7, 2018. Rates under the ECO Settlement Agreement will take effect for the first billing cycle of September 2018 and will continue in effect until modified by the Mississippi PSC. These revenues are expected to be sufficient to recover the costs included in Mississippi Power's request for 2018, as well as the remaining deferred amounts that were originally expected to be recovered in 2019. In accordance with the ECO Settlement Agreement, ECO Plan proceedings will be suspended until after the conclusion of the 2019 Base Rate Case and Mississippi Power will not be required to make any ECO Plan filings for 2018, 2019, and 2020, with any necessary true-ups to be reflected in the 2019 Base Rate Case. The ECO Settlement Agreement contains the same terms as the PEP Settlement Agreement described herein with respect to allowed ROE and equity ratio.

Ad Valorem Tax Adjustment

On May 8, 2018, the Mississippi PSC approved Mississippi Power's annual ad valorem tax adjustment factor filing for 2018, which included an annual rate increase of 0.8% , or \$7 million , in annual retail revenues effective with the first billing cycle for June 2018, primarily due to increased assessments.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

Southern Company Gas

See Note 3 to the financial statements of Southern Company and Southern Company Gas under "Regulatory Matters – Southern Company Gas" and "Regulatory Matters," respectively, in Item 8 of the Form 10-K for additional information regarding Southern Company Gas' regulatory matters.

Riders

On April 19, 2018, the Illinois Commission approved Nicor Gas' variable income tax adjustment rider. This rider provides for refund or recovery of changes in income tax expense that result from income tax rates that differ from those used in Nicor Gas' last rate case. Customer refunds began on July 1, 2018 related to the January 1, 2018 through May 4, 2018 impacts of the Tax Reform Legislation. The impact of the Tax Reform Legislation subsequent to May 4, 2018 was addressed in Nicor Gas' approved rehearing request discussed herein under "Settled Base Rate Cases."

Natural Gas Cost Recovery

Southern Company Gas has established natural gas cost recovery rates approved by the relevant state regulatory agencies in the states in which it serves. Natural gas cost recovery revenues are adjusted for differences in actual recoverable natural gas costs and amounts billed in current regulated rates. Changes in the billing factor will not have a significant effect on Southern Company's or Southern Company Gas' revenues or net income, but will affect cash flows.

Base Rate Cases

Settled Base Rate Cases

In October 2017, Florida City Gas filed a general base rate case with the Florida PSC requesting an annual revenue increase of \$19 million, which included an interim rate increase of \$5 million annually that was approved and became effective January 12, 2018, subject to refund. On March 26, 2018, the Florida PSC approved a settlement that, after including the impact of the Tax Reform Legislation, provides for an \$11.5 million increase in annual base rate revenues, effective June 1, 2018, based on a ROE of 10.19%.

On February 23, 2018, Atlanta Gas Light revised its annual base rate filing to reflect the impacts of the Tax Reform Legislation and requested a \$16 million rate reduction in 2018. On May 15, 2018, the Georgia PSC approved a stipulation for Atlanta Gas Light's annual base rates to remain at the 2017 level for 2018 and 2019, with customer credits of \$8 million in each of July 2018 and October 2018 to reflect the impacts of the Tax Reform Legislation. The Georgia PSC maintained Atlanta Gas Light's previously authorized earnings band based on a ROE between 10.55% and 10.95% and increased the allowed equity ratio by 4% to an equity ratio of 55% to address the negative cash flow and credit metric impacts of the Tax Reform Legislation. Additionally, Atlanta Gas Light is required to file a traditional base rate case on or before June 1, 2019 for rates effective January 1, 2020.

On May 2, 2018, the Illinois Commission approved Nicor Gas' rehearing request for revised base rates to incorporate the reduction in the federal income tax rate as a result of the Tax Reform Legislation. The resulting decrease of approximately \$44 million in annual base rate revenues became effective May 5, 2018. Nicor Gas' previously-authorized capital structure and ROE of 9.8% were not addressed in the rehearing and remain unchanged. The impact of the Tax Reform Legislation prior to May 5, 2018 was addressed in the variable income tax rider discussed herein under "Riders."

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

Pending Base Rate Case

On February 15, 2018, Chattanooga Gas filed a general base rate case with the Tennessee Public Utility Commission (PUC) requesting a \$7 million increase in annual base rate revenues. The requested increase, which, in accordance with a Tennessee PUC order, incorporated the effects of the Tax Reform Legislation, was based on a projected test year ending June 30, 2019 and a ROE of 11.25%. The Tennessee PUC is expected to rule on the requested increase in the third quarter 2018.

The ultimate outcome of this matter cannot be determined at this time.

Other

The New Jersey BPU, Maryland PSC, and Virginia Commission each issued an order effective January 1, 2018 that requires utilities in their respective states to defer as a regulatory liability the impact of the Tax Reform Legislation, including the reduction in the corporate income tax rate to 21% and the impact of the flowback of excess deferred income taxes. On June 22, 2018, the New Jersey BPU approved a \$12 million reduction in Elizabethtown Gas' annual base rate revenues. On March 28, 2018, the Maryland PSC approved a \$0.1 million reduction in Elkton Gas' annual base rate revenues effective April 1, 2018. Credits were issued to customers in Maryland in May 2018 and will be issued to customers in New Jersey in the third quarter 2018 for the impact of the Tax Reform Legislation on the January 2018 through March 2018 billing periods.

On April 25, 2018, the Virginia Commission issued an order indicating that any proposal beyond a proposed base rate reduction to reflect the cost savings from the Tax Reform Legislation must be made through a general base rate case. Virginia Natural Gas expects to address the cost savings from the Tax Reform Legislation in the third quarter 2018 by filing an annual information form. The Virginia Commission is expected to rule on the impact of the Tax Reform Legislation by the first half of 2019. The ultimate outcome of this matter cannot be determined at this time.

Regulatory Infrastructure Programs

Southern Company Gas is engaged in various infrastructure programs that update or expand its gas distribution systems to improve reliability and help ensure the safety of its utility infrastructure, and recovers in rates its investment and a return associated with these infrastructure programs. See Note 3 to the financial statements of Southern Company and Southern Company Gas under "Regulatory Matters – Southern Company Gas – Regulatory Infrastructure Programs" and "Regulatory Matters – Regulatory Infrastructure Programs," respectively, in Item 8 of the Form 10-K for additional information.

Atlanta Gas Light's Pipeline Replacement Program

One of the capital projects under Atlanta Gas Light's Pipeline Replacement Program experienced construction issues and Atlanta Gas Light was required to complete mitigation work prior to placing it in service. In the first quarter 2018, Atlanta Gas Light recovered \$7 million from the final settlement of contractor litigation claims. Mitigation costs recovered through the legal process are retained by Atlanta Gas Light. For additional information on the Pipeline Replacement Program settlement, see Note 3 to the financial statements of Southern Company Gas under "Regulatory Matters – PRP Settlement" in Item 8 of the Form 10-K.

Nuclear Construction

See Note 3 to the financial statements of Southern Company and Georgia Power under "Nuclear Construction" and "Retail Regulatory Matters – Nuclear Construction," respectively, in Item 8 of the Form 10-K for additional information regarding Georgia Power's construction of Plant Vogtle Units 3 and 4, VCM reports, and the NCCR tariff.

In 2009, the Georgia PSC certified construction of Plant Vogtle Units 3 and 4. In 2012, the NRC issued the related combined construction and operating licenses, which allowed full construction of the two AP1000 nuclear units (with electric generating capacity of approximately 1,100 MWs each) and related facilities to begin. Until March 2017, construction on Plant Vogtle Units 3 and 4 continued under the Vogtle 3 and 4 Agreement, which was a

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

substantially fixed price agreement. In March 2017, the EPC Contractor filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy Code.

In connection with the EPC Contractor's bankruptcy filing, Georgia Power, acting for itself and as agent for the Vogtle Owners, entered into the Interim Assessment Agreement with the EPC Contractor to allow construction to continue. The Interim Assessment Agreement expired in July 2017 when Georgia Power, acting for itself and as agent for the other Vogtle Owners, and the EPC Contractor entered into the Vogtle Services Agreement. Under the Vogtle Services Agreement, Westinghouse provides facility design and engineering services, procurement and technical support, and staff augmentation on a time and materials cost basis. The Vogtle Services Agreement will continue until the start-up and testing of Plant Vogtle Units 3 and 4 are complete and electricity is generated and sold from both units. The Vogtle Services Agreement is terminable by the Vogtle Owners upon 30 days' written notice.

In October 2017, Georgia Power, acting for itself and as agent for the other Vogtle Owners, entered into a construction completion agreement with Bechtel, whereby Bechtel will serve as the primary contractor for the remaining construction activities for Plant Vogtle Units 3 and 4 (Bechtel Agreement). The Bechtel Agreement is a cost reimbursable plus fee arrangement, whereby Bechtel is reimbursed for actual costs plus a base fee and an at-risk fee, which is subject to adjustment based on Bechtel's performance against cost and schedule targets. Each Vogtle Owner is severally (not jointly) liable for its proportionate share, based on its ownership interest, of all amounts owed to Bechtel under the Bechtel Agreement. The Vogtle Owners may terminate the Bechtel Agreement at any time for their convenience, provided that the Vogtle Owners will be required to pay amounts related to work performed prior to the termination (including the applicable portion of the base fee), certain termination-related costs, and, at certain stages of the work, the applicable portion of the at-risk fee. Bechtel may terminate the Bechtel Agreement under certain circumstances, including certain Vogtle Owner suspensions of work, certain breaches of the Bechtel Agreement by the Vogtle Owners, Vogtle Owner insolvency, and certain other events. Pursuant to the Loan Guarantee Agreement between Georgia Power and the DOE, Georgia Power is required to obtain the DOE's approval of the Bechtel Agreement prior to obtaining any further advances under the Loan Guarantee Agreement.

In December 2017, the Georgia PSC approved Georgia Power's seventeenth VCM report, which included a recommendation to continue construction of Plant Vogtle Units 3 and 4, with Southern Nuclear serving as project manager and Bechtel serving as the primary construction contractor.

Cost and Schedule

In preparation for its nineteenth VCM filing, Georgia Power requested Southern Nuclear to perform a full cost reforecast for the project. Georgia Power's approximate proportionate share of the remaining estimated capital cost to complete Plant Vogtle Units 3 and 4 by the expected in-service dates of November 2021 and November 2022, respectively, is as follows:

	<i>(in billions)</i>	
Base project capital cost forecast ^{(a)(b)}	\$	8.0
Construction contingency estimate		0.4
Total project capital cost forecast ^{(a)(b)}		8.4
Net investment as of June 30, 2018 ^(b)		(4.0)
Remaining estimate to complete ^(a)	\$	4.4

(a) Excludes financing costs expected to be capitalized through AFUDC of approximately \$350 million .

(b) Net of \$1.7 billion received from Toshiba in 2017 under the Guarantee Settlement Agreement and \$188 million in Customer Refunds recognized as a regulatory liability in 2017.

Georgia Power estimates that its financing costs for construction of Plant Vogtle Units 3 and 4 will total approximately \$3.2 billion , of which \$1.7 billion had been incurred through June 30, 2018 .

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

The \$0.7 billion increase to the base capital cost forecast reflected in the table above primarily results from changed assumptions related to the finalization of contract scopes and management responsibilities for Bechtel and over 60 subcontractors, labor productivity rates, and craft labor incentives, as well as the related levels of project management, oversight, and support, including field supervision and engineering support.

Although Georgia Power believes these incremental costs are reasonable and necessary to complete the project and the Georgia PSC's order in the seventeenth VCM proceeding specifically states that the construction of Plant Vogtle Units 3 and 4 is not subject to a cost cap, Georgia Power does not intend to seek rate recovery for these cost increases included in the current base capital cost forecast (or any related financing costs), which will be filed with the Georgia PSC in the nineteenth VCM report at the end of August 2018. In connection with future VCM filings, Georgia Power may request the Georgia PSC to evaluate costs currently included in the construction contingency estimate for rate recovery as and when they are appropriately included in the base capital cost forecast. After considering the significant level of uncertainty that exists regarding the future recoverability of costs included in the construction contingency estimate since the ultimate outcome of these matters is subject to the outcome of future assessments by management, as well as Georgia PSC decisions in these future regulatory proceedings, Georgia Power has recorded a total pre-tax charge to income of \$1.1 billion (\$0.8 billion after tax), which includes the total increase in the capital cost forecast and construction contingency estimate as of June 30, 2018 .

Subsequent to the EPC Contractor bankruptcy filing, a number of subcontractors to the EPC Contractor alleged non-payment by the EPC Contractor for amounts owed for work performed on Plant Vogtle Units 3 and 4. Georgia Power, acting for itself and as agent for the Vogtle Owners, has taken actions to remove liens filed by these subcontractors through the posting of surety bonds. Related to such liens, certain subcontractors have filed, and additional subcontractors may file, lawsuits against the EPC Contractor and the Vogtle Owners to preserve their payment rights with respect to such claims. All known amounts associated with the removal of subcontractor liens and other EPC Contractor pre-petition accounts payable have been paid or accrued as of June 30, 2018 . The ultimate liability is expected to be finalized in connection with the completion of the sale of Westinghouse.

As construction continues, challenges with management of contractors, subcontractors, and vendors; labor productivity, availability, and/or cost escalation; procurement, fabrication, delivery, assembly, and/or installation, including any required engineering changes, of plant systems, structures, and components (some of which are based on new technology that is just beginning initial operation in the global nuclear industry at this scale); or other issues could arise and change the projected schedule and estimated cost.

There have been technical and procedural challenges to the construction and licensing of Plant Vogtle Units 3 and 4 at the federal and state level and additional challenges may arise. Processes are in place that are designed to assure compliance with the requirements specified in the Westinghouse Design Control Document and the combined construction and operating licenses, including inspections by Southern Nuclear and the NRC that occur throughout construction. As a result of such compliance processes, certain license amendment requests have been filed and approved or are pending before the NRC. Various design and other licensing-based compliance matters, including the timely resolution of Inspections, Tests, Analyses, and Acceptance Criteria and the related approvals by the NRC, may arise, which may result in additional license amendments or require other resolution. If any license amendment requests or other licensing-based compliance issues are not resolved in a timely manner, there may be delays in the project schedule that could result in increased costs.

The ultimate outcome of these matters cannot be determined at this time. However, any extension of the project schedule is currently estimated to result in additional base capital costs of approximately \$50 million per month, based on Georgia Power's ownership interests, and AFUDC of approximately \$12 million per month. While Georgia Power is not precluded from seeking recovery of any future capital cost forecast increase, management will ultimately determine whether or not to seek recovery. Any further changes to the capital cost forecast that are not expected to be recoverable through regulated rates will be required to be charged to income and such charges could be material.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

Joint Owner Contracts

In November 2017, the Vogtle Owners entered into an amendment to their joint ownership agreements for Plant Vogtle Units 3 and 4 (as amended, Vogtle Joint Ownership Agreements) to provide for, among other conditions, additional Vogtle Owner approval requirements. Pursuant to the Vogtle Joint Ownership Agreements, the holders of at least 90% of the ownership interests in Plant Vogtle Units 3 and 4 must vote to continue construction if certain adverse events occur, including: (i) the bankruptcy of Toshiba; (ii) termination or rejection in bankruptcy of certain agreements, including the Vogtle Services Agreement or the Bechtel Agreement; (iii) the Georgia PSC or Georgia Power determines that any of Georgia Power's costs relating to the construction of Plant Vogtle Units 3 and 4 will not be recovered in retail rates because such costs are deemed unreasonable or imprudent; or (iv) an increase in the construction budget contained in the seventeenth VCM report of more than \$1 billion or extension of the project schedule contained in the seventeenth VCM report of more than one year. In addition, pursuant to the Vogtle Joint Ownership Agreements, the required approval of holders of ownership interests in Plant Vogtle Units 3 and 4 is at least (i) 90% for a change of the primary construction contractor and (ii) 67% for material amendments to the Vogtle Services Agreement or agreements with Southern Nuclear or the primary construction contractor, including the Bechtel Agreement. The Vogtle Joint Ownership Agreements also confirm that the Vogtle Owners' sole recourse against Georgia Power or Southern Nuclear for any action or inaction in connection with their performance as agent for the Vogtle Owners is limited to removal of Georgia Power and/or Southern Nuclear as agent, except in cases of willful misconduct.

As a result of the increase in the total project capital cost forecast and Georgia Power's decision not to seek rate recovery of the increase in the base capital costs as described in "Cost and Schedule" herein, the holders of at least 90% of the ownership interests in Plant Vogtle Units 3 and 4 must vote to continue construction. The Vogtle Owners are expected to conduct these votes in the third quarter 2018.

If the holders of at least 90% of the ownership interests in Plant Vogtle Units 3 and 4 do not vote to continue construction, the Vogtle Joint Ownership Agreements provide that the project will be cancelled, and construction will cease. In the event that fewer than 90% of the Vogtle Owners vote to continue construction, Georgia Power and the other Vogtle Owners will assess options for Plant Vogtle Units 3 and 4. If Plant Vogtle Units 3 and 4 were cancelled and Georgia Power was unable to recover costs it has incurred in connection with the project, Southern Company's and Georgia Power's results of operations, cash flow, and financial condition would be materially impacted. The ultimate outcome of this matter cannot be determined at this time.

Regulatory Matters

In 2009, the Georgia PSC voted to certify construction of Plant Vogtle Units 3 and 4 with a certified capital cost of \$4.418 billion. In addition, in 2009 the Georgia PSC approved inclusion of the Plant Vogtle Units 3 and 4 related CWIP accounts in rate base, and the State of Georgia enacted the Georgia Nuclear Energy Financing Act, which allows Georgia Power to recover financing costs for Plant Vogtle Units 3 and 4. Financing costs are recovered on all applicable certified costs through annual adjustments to the NCCR tariff up to the certified capital cost of \$4.418 billion. As of June 30, 2018, Georgia Power had recovered approximately \$1.7 billion of financing costs. Financing costs related to capital costs above \$4.418 billion will be recovered through AFUDC; however, Georgia Power will not record AFUDC related to any capital costs in excess of the total deemed reasonable by the Georgia PSC (currently \$7.3 billion) and not requested for rate recovery.

Georgia Power is required to file semi-annual VCM reports with the Georgia PSC by February 28 and August 31 of each year. In 2013, in connection with the eighth VCM report, the Georgia PSC approved a stipulation between Georgia Power and the staff of the Georgia PSC to waive the requirement to amend the Plant Vogtle Units 3 and 4 certificate in accordance with the 2009 certification order until the completion of Plant Vogtle Unit 3, or earlier if deemed appropriate by the Georgia PSC and Georgia Power.

In 2016, the Georgia PSC voted to approve a settlement agreement (Vogtle Cost Settlement Agreement) resolving certain prudency matters in connection with the fifteenth VCM report. In December 2017, the Georgia PSC voted to approve (and issued its related order on January 11, 2018) certain recommendations made by Georgia Power in the

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

seventeenth VCM report and modifying the Vogtle Cost Settlement Agreement. The Vogtle Cost Settlement Agreement, as modified by the January 11, 2018 order, resolved the following regulatory matters related to Plant Vogtle Units 3 and 4: (i) none of the \$3.3 billion of costs incurred through December 31, 2015 and reflected in the fourteenth VCM report should be disallowed from rate base on the basis of imprudence; (ii) the Contractor Settlement Agreement was reasonable and prudent and none of the amounts paid pursuant to the Contractor Settlement Agreement should be disallowed from rate base on the basis of imprudence; (iii) (a) capital costs incurred up to \$5.68 billion would be presumed to be reasonable and prudent with the burden of proof on any party challenging such costs, (b) Georgia Power would have the burden to show that any capital costs above \$5.68 billion were prudent, and (c) a revised capital cost forecast of \$7.3 billion (after reflecting the impact of payments received under the Guarantee Settlement Agreement and Customer Refunds) was found reasonable; (iv) construction of Plant Vogtle Units 3 and 4 should be completed, with Southern Nuclear serving as project manager and Bechtel as primary contractor; (v) approved and deemed reasonable Georgia Power's revised schedule placing Plant Vogtle Units 3 and 4 in service in November 2021 and November 2022, respectively; (vi) confirmed that the revised cost forecast does not represent a cost cap and that prudence decisions on cost recovery will be made at a later date, consistent with applicable Georgia law; (vii) reduced the ROE used to calculate the NCCR tariff (a) from 10.95% (the ROE rate setting point authorized by the Georgia PSC in the 2013 ARP) to 10.00% effective January 1, 2016, (b) from 10.00% to 8.30% , effective January 1, 2020, and (c) from 8.30% to 5.30% , effective January 1, 2021 (provided that the ROE in no case will be less than Georgia Power's average cost of long-term debt); (viii) reduced the ROE used for AFUDC equity for Plant Vogtle Units 3 and 4 from 10.00% to Georgia Power's average cost of long-term debt, effective January 1, 2018; and (ix) agreed that upon Unit 3 reaching commercial operation, retail base rates would be adjusted to include carrying costs on those capital costs deemed prudent in the Vogtle Cost Settlement Agreement. The January 11, 2018 order also stated that if Plant Vogtle Units 3 and 4 are not commercially operational by June 1, 2021 and June 1, 2022, respectively, the ROE used to calculate the NCCR tariff will be further reduced by 10 basis points each month (but not lower than Georgia Power's average cost of long-term debt) until the respective unit is commercially operational. The ROE reductions negatively impacted earnings by approximately \$25 million in 2017 and are estimated to have negative earnings impacts of approximately \$100 million in 2018 and an aggregate of \$585 million from 2019 to 2022.

In its January 11, 2018 order, the Georgia PSC also stated if other conditions change and assumptions upon which Georgia Power's seventeenth VCM report are based do not materialize, the Georgia PSC reserved the right to reconsider the decision to continue construction.

On February 12, 2018, Georgia Interfaith Power & Light, Inc. and Partnership for Southern Equity, Inc. filed a petition appealing the Georgia PSC's January 11, 2018 order with the Fulton County Superior Court. On March 8, 2018, Georgia Watch filed a similar appeal to the Fulton County Superior Court for judicial review of the Georgia PSC's final decision and denial of Georgia Watch's motion for reconsideration. Georgia Power believes the two appeals have no merit; however, an adverse outcome in either appeal could have a material impact on Southern Company's and Georgia Power's results of operations, financial condition, and liquidity.

The Georgia PSC has approved seventeen VCM reports covering the periods through June 30, 2017, including total construction capital costs incurred through that date of \$4.4 billion . On August 21, 2018, the Georgia PSC is scheduled to vote on Georgia Power's eighteenth VCM report, which requested approval of \$448 million of construction capital costs (excluding the \$1.7 billion received from Toshiba under the Guarantee Settlement Agreement and the \$188 million in Customer Refunds recognized as a regulatory liability) incurred from July 1, 2017 through December 31, 2017.

On August 31, 2018, Georgia Power will file its nineteenth VCM report with the Georgia PSC, which will reflect the revised capital cost forecast discussed previously and request approval of \$578 million of construction capital costs incurred from January 1, 2018 through June 30, 2018.

The ultimate outcome of these matters cannot be determined at this time.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

DOE Financing

As of June 30, 2018, Georgia Power had borrowed \$2.6 billion related to Plant Vogtle Units 3 and 4 costs through the Loan Guarantee Agreement and a multi-advance credit facility among Georgia Power, the DOE, and the FFB, which provides for borrowings of up to \$3.46 billion, subject to the satisfaction of certain conditions. In September 2017, the DOE issued a conditional commitment to Georgia Power for up to approximately \$1.67 billion in additional guaranteed loans under the Loan Guarantee Agreement. In June 2018, the DOE approved a request by Georgia Power to extend the conditional commitment to September 30, 2018. Any further extension must be approved by the DOE. Final approval and issuance of these additional loan guarantees by the DOE cannot be assured and are subject to the negotiation of definitive agreements, completion of due diligence by the DOE, receipt of any necessary regulatory approvals, and satisfaction of other conditions, including the Vogtle Owners' votes to continue construction. See Note 6 to the financial statements of Southern Company and Georgia Power under "DOE Loan Guarantee Borrowings" in Item 8 of the Form 10-K and Note (F) under "DOE Loan Guarantee Borrowings" for additional information, including applicable covenants, events of default, mandatory prepayment events (including any decision not to continue construction of Plant Vogtle Units 3 and 4), and conditions to borrowing.

The ultimate outcome of these matters cannot be determined at this time.

Kemper County Energy Facility

For additional information on the Kemper County energy facility, see Note 3 to the financial statements of Southern Company and Mississippi Power under "Kemper County Energy Facility" in Item 8 of the Form 10-K.

As the mining permit holder for the Kemper County energy facility, Liberty Fuels Company, LLC has a legal obligation to perform mine reclamation, and Mississippi Power has a contractual obligation to fund all reclamation activities. Mine reclamation began in the first quarter 2018. See Note 1 to the financial statements of Southern Company and Mississippi Power under "Asset Retirement Obligations and Other Costs of Removal" and of Mississippi Power under "Variable Interest Entities" in Item 8 of the Form 10-K for additional information.

As of June 30, 2018, Mississippi Power recorded charges to income of an immaterial amount for the second quarter 2018 and \$45 million (\$33 million after tax) for year-to-date 2018, primarily resulting from the abandonment and related closure activities for the mine and gasifier-related assets at the Kemper County energy facility. Additional closure costs for the mine and gasifier-related assets, currently estimated to cost up to \$25 million pre-tax (excluding salvage, net of dismantlement costs), are expected to be incurred during the remainder of 2018 and 2019. In addition, period costs, including, but not limited to, costs for compliance and safety, ARO accretion, and property taxes for the mine and gasifier-related assets, are estimated at \$4 million for the remainder of 2018, \$7 million in 2019, and \$4 million annually beginning in 2020. The ultimate outcome of this matter cannot be determined at this time.

Reserve Margin Plan

On August 6, 2018, Mississippi Power filed its proposed RMP, as required by the Mississippi PSC's order in the docket established for the purposes of pursuing a global settlement of the costs related to the Kemper County energy facility. Under the RMP, Mississippi Power proposes alternatives that would reduce its reserve margin, with the most economic of the alternatives being the 2-year and 7-year acceleration of the retirement of Plant Watson Units 4 and 5, respectively, to the first quarter 2022 and the 4-year acceleration of the retirement of Plant Greene County Units 1 and 2 to the third quarter 2021 and the third quarter 2022, respectively, in order to lower or avoid operating costs. The Plant Greene County unit retirements would require the completion by Alabama Power of proposed transmission and system reliability improvements, as well as agreement by Alabama Power. The RMP filing also states that, in the event the Mississippi PSC ultimately approves an alternative that includes an accelerated retirement, Mississippi Power would require authorization to defer in a regulatory asset for future recovery the remaining net book value of the units at the time of retirement. Mississippi Power expects the MPUS and other interested parties to review the proposal prior to resolution by the Mississippi PSC. The ultimate outcome of this matter cannot be determined at this time. However, if approved by the Mississippi PSC, the alternatives are not expected to have any adverse impact on customer rates.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

Other Matters

Investments in Leveraged Leases

See Note 1 to the financial statements of Southern Company under "Leveraged Leases" in Item 8 of the Form 10-K for additional information regarding a Southern Company Holdings Inc. (Southern Holdings) subsidiary's leveraged lease agreements and concerns about the financial and operational performance of one of the lessees and the associated generation assets.

The ability of the lessees to make required payments to the Southern Holdings subsidiary is dependent on the operational performance of the assets. As a result of operational improvements in the first half of 2018, the June 2018 lease payment was paid in full and the December 2018 lease payment is currently expected to be paid in full. However, operational issues and the resulting cash liquidity challenges persist and significant concerns continue regarding the lessee's ability to make the remaining semi-annual lease payments. These operational challenges may also impact the expected residual value of the assets at the end of the lease term in 2047. If any future lease payment is not paid in full, the Southern Holdings subsidiary may be unable to make its corresponding payment to the holders of the underlying non-recourse debt related to the generation assets. Failure to make the required payment to the debtholders would represent an event of default that would give the debtholders the right to foreclose on, and take ownership of, the generation assets from the Southern Holdings subsidiary, in effect terminating the lease and resulting in the write-off of the related lease receivable, which would result in a reduction in net income of approximately \$86 million after tax based on the lease receivable balance as of June 30, 2018. Southern Company has evaluated the recoverability of the lease receivable and the expected residual value of the generation assets at the end of the lease under various scenarios and has concluded that its investment in the leveraged lease is not impaired as of June 30, 2018. Southern Company will continue to monitor the operational performance of the underlying assets and evaluate the ability of the lessee to continue to make the required lease payments. The ultimate outcome of this matter cannot be determined at this time.

Natural Gas Storage

A wholly-owned subsidiary of Southern Company Gas owns and operates a natural gas storage facility consisting of two salt dome caverns in Louisiana. Periodic integrity tests are required in accordance with rules of the Louisiana Department of Natural Resources (DNR). In August 2017, in connection with an ongoing integrity project, updated seismic mapping indicated the proximity of one of the caverns to the edge of the salt dome may be less than the required minimum and could result in Southern Company Gas retiring the cavern early. At June 30, 2018, the facility's property, plant, and equipment had a net book value of \$111 million, of which the cavern itself represents approximately 20%. A potential early retirement of this cavern is dependent upon several factors including compliance with an order from the Louisiana DNR detailing the requirements to place the cavern back in service, which includes, among other things, obtaining core samples to determine the composition of the sheath surrounding the edge of the salt dome.

The cavern continues to maintain its pressures and overall structural integrity. Southern Company Gas intends to monitor the cavern and comply with the Louisiana DNR order through 2020 and place the cavern back in service in 2021. These events were considered in connection with Southern Company Gas' 2017 long-lived asset impairment analysis, which determined there was no impairment. Any future changes in results of monitoring activities, rates at which expiring capacity contracts are re-contracted, timing of placing the cavern back in service, or Louisiana DNR requirements could trigger impairment. Further, early retirement of the cavern could trigger impairment of other long-lived assets associated with the natural gas storage facility. The ultimate outcome of this matter cannot be determined at this time, but could have a significant impact on Southern Company's financial statements and a material impact on Southern Company Gas' financial statements.

(C) REVENUE FROM CONTRACTS WITH CUSTOMERS

The registrants generate revenues from a variety of sources, some of which are excluded from the scope of ASC 606, such as leases, derivatives, and certain cost recovery mechanisms. See Note (A) under "Recently Adopted

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

Accounting Standards – Revenue " for additional information on the adoption of ASC 606 for revenue from contracts with customers.

The majority of the revenues of the traditional electric operating companies and Southern Company Gas are generated from contracts with retail electric and natural gas distribution customers. Revenues from this integrated service to deliver electricity or gas when and if called upon by the customer is recognized as a single performance obligation satisfied over time and is recognized at a tariff rate as electricity or gas is delivered to the customer during the month. The traditional electric operating companies and Southern Company Gas exclude taxes imposed on the customer and collected on behalf of governmental agencies to be remitted to these agencies from the transaction price in determining the revenue related to contracts with a customer.

The traditional electric operating companies and Southern Power also have contracts with multiple performance obligations, such as capacity and energy in a wholesale PPA, where the contract's total transaction price is allocated to each performance obligation based on the standalone selling price. The standalone selling price is primarily determined by the price charged to customers for the specific goods or services transferred with the performance obligations. Generally, the registrants recognize revenue as the performance obligations are satisfied over time as electricity or natural gas is delivered to the customer or as generation capacity is available to the customer. At Southern Company Gas, the performance obligations related to wholesale gas services are satisfied, and revenue is recognized, at a point in time when natural gas is delivered to the customer.

The registrants generally have a right to consideration in an amount that corresponds directly with the value to the customer of the entity's performance completed to date and may recognize revenue in the amount to which the entity has a right to invoice and has elected to recognize revenue for its sales of electricity, capacity, and natural gas using the invoice practical expedient. In addition, payment for goods and services rendered is typically due in the subsequent month following satisfaction of the registrants' performance obligation.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)

The following tables disaggregate revenue sources for the three and six months ended June 30, 2018 :

	For the Three Months Ended June 30, 2018	For the Six Months Ended June 30, 2018
	<i>(in millions)</i>	
Southern Company		
Operating revenues		
Retail electric revenues ^(a)		
Residential	\$ 1,579	\$ 3,118
Commercial	1,315	2,557
Industrial	814	1,569
Other	32	64
Natural gas distribution revenues	642	1,865
Alternative revenue programs ^(b)	(4)	(27)
Total retail electric and gas distribution revenues	\$ 4,378	\$ 9,146
Wholesale energy revenues ^{(c)(d)}	459	928
Wholesale capacity revenues ^(d)	152	302
Other natural gas revenues ^(e)	68	476
Other revenues ^(f)	570	1,147
Total operating revenues	\$ 5,627	\$ 11,999

(a) Retail electric revenues include \$18 million and \$36 million of leases for the three and six months ended June 30, 2018 , respectively, and a net increase of \$68 million and \$101 million for the three and six months ended June 30, 2018 , respectively, from certain cost recovery mechanisms that are not accounted for as revenue under ASC 606. See Note 3 to the financial statements of Southern Company under "Regulatory Matters" in Item 8 of the Form 10-K for additional information on cost recovery mechanisms.

(b) See Note 1 to the financial statements of Southern Company under "Revenues" in Item 8 of the Form 10-K for additional information on alternative revenue programs at the natural gas distribution utilities. Alternative revenue program revenues are presented net of any previously recognized program amounts billed to customers during the same accounting period.

(c) Wholesale energy revenues include \$61 million and \$155 million for the three and six months ended June 30, 2018 , respectively, of revenues accounted for as derivatives, primarily related to physical energy sales in the wholesale electricity market. See Note (I) for additional information on energy-related derivative contracts.

(d) Wholesale energy and wholesale capacity revenues include \$118 million and \$31 million , respectively, for the three months ended June 30, 2018 and \$187 million and \$61 million , respectively, for the six months ended June 30, 2018 of PPA contracts accounted for as leases.

(e) Other natural gas revenues related to Southern Company Gas' energy and risk management activities are presented net of the related costs of those activities and include gross third-party revenues of \$1.3 billion and \$3.3 billion for the three and six months ended June 30, 2018 , respectively, of which \$0.7 billion and \$1.8 billion , respectively, relates to contracts that are accounted for as derivatives. See Note (L) under " Southern Company Gas " for additional information on the components of wholesale gas services operating revenues.

(f) Other revenues include \$89 million and \$183 million for the three and six months ended June 30, 2018 , respectively, of revenues not accounted for under ASC 606.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)
Contract Balances

The following table reflects the closing balances of receivables, contract assets, and contract liabilities related to revenues from contracts with customers as of June 30, 2018 :

	Receivables	Contract Assets	Contract Liabilities
	<i>(in millions)</i>		
Southern Company	\$ 2,785	\$ 33	\$ 36
Alabama Power	603	—	10
Georgia Power	840	9	9
Gulf Power	169	—	1
Mississippi Power	83	—	—
Southern Power	136	—	4
Southern Company Gas	570	—	1

As of June 30, 2018, Alabama Power had contract liabilities for outstanding performance obligations primarily related to extended service agreements. Georgia Power had contract assets primarily related to unregulated service agreements where payment is contingent on project completion. Georgia Power had contract liabilities for outstanding performance obligations primarily related to fixed retail customer bill programs where the payment is contingent upon Georgia Power's continued performance and the customer's continued participation in the program over the one-year contract term. Southern Company's unregulated distributed generation business had \$23 million and \$16 million of contract assets and contract liabilities, respectively, remaining for outstanding performance obligations.

Remaining Performance Obligations

The traditional electric operating companies and Southern Power have long-term contracts with customers in which revenues are recognized as performance obligations are satisfied over the contract term. These contracts primarily relate to PPAs whereby the traditional electric operating companies and Southern Power provide electricity and generation capacity to a customer. The revenue recognized for the delivery of electricity is variable; however, certain PPAs include a fixed payment for fixed generation capacity over the term of the contract. Southern Company's unregulated distributed generation business also has partially satisfied performance obligations related to certain fixed price contracts. Revenues from contracts with customers related to these performance obligations remaining at June 30, 2018 are expected to be recognized as follows:

	2018	2019	2020	2021	2022	2023 and Thereafter
	<i>(in millions)</i>					
Southern Company (*)	\$ 263	\$ 352	\$ 322	\$ 322	\$ 310	\$ 1,960
Alabama Power	11	22	22	26	23	161
Georgia Power	20	41	38	40	30	113
Gulf Power	11	22	—	—	—	—
Mississippi Power	2	3	3	1	—	—
Southern Power (*)	211	310	283	277	276	1,809

(*) Excludes amounts related to held for sale assets. See Note (J) under "Southern Company's Sale of Gulf Power" and "Southern Power – Sale of Florida Plants" for additional information.

(a) Excludes \$3 million associated with premiums and certain weather derivatives accounted for based on intrinsic value rather than fair value.

(b) Excludes cash collateral of \$183 million .

(c) For additional detail, see the nuclear decommissioning trusts sections for Alabama Power and Georgia Power in this table.

(d) Excludes receivables related to investment income, pending investment sales, payables related to pending investment purchases, and currencies.

(e) Includes the investment securities pledged to creditors and collateral received and excludes payables related to the securities lending program. As of June 30, 2018 , approximately \$63 million of the fair market value of Georgia Power's nuclear decommissioning trust funds' securities were on loan to creditors under the funds' managers' securities lending program.

Southern Company, Alabama Power, and Georgia Power continue to elect the option to fair value investment securities held in the nuclear decommissioning trust funds. The fair value of the funds at Southern Company, including reinvested interest and dividends and excluding the funds' expenses, increased by \$14 million and \$4 million , respectively, for the three and six months ended June 30, 2018 and increased by \$55 million and \$118 million , respectively, for the three and six months ended June 30, 2017 . Alabama Power recorded an increase in fair value of \$15 million and \$10 million , respectively, for the three and six months ended June 30, 2018 and an increase of \$28 million and \$62 million , respectively, for the three and six months ended June 30, 2017 as a change in regulatory liabilities related to its AROs. Georgia Power recorded a decrease in fair value of \$1 million and \$6 million , respectively, for the three and six months ended June 30, 2018 and an increase of \$27 million and \$56 million , respectively, for the three and six months ended June 30, 2017 as a change in its regulatory asset related to its AROs.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

Valuation Methodologies

The energy-related derivatives primarily consist of exchange-traded and over-the-counter financial products for natural gas and physical power products, including, from time to time, basis swaps. These are standard products used within the energy industry and are valued using the market approach. The inputs used are mainly from observable market sources, such as forward natural gas prices, power prices, implied volatility, and overnight index swap interest rates. Interest rate derivatives are also standard over-the-counter products that are valued using observable market data and assumptions commonly used by market participants. The fair value of interest rate derivatives reflects the net present value of expected payments and receipts under the swap agreement based on the market's expectation of future interest rates. Additional inputs to the net present value calculation may include the contract terms, counterparty credit risk, and occasionally, implied volatility of interest rate options. The fair value of cross-currency swaps reflects the net present value of expected payments and receipts under the swap agreement based on the market's expectation of future foreign currency exchange rates. Additional inputs to the net present value calculation may include the contract terms, counterparty credit risk, and discount rates. The interest rate derivatives and cross-currency swaps are categorized as Level 2 under Fair Value Measurements as these inputs are based on observable data and valuations of similar instruments. See Note (I) for additional information on how these derivatives are used.

The NRC requires licensees of commissioned nuclear power reactors to establish a plan for providing reasonable assurance of funds for future decommissioning. For fair value measurements of the investments within the nuclear decommissioning trusts, external pricing vendors are designated for each asset class with each security specifically assigned a primary pricing source. For investments held within commingled funds, fair value is determined at the end of each business day through the net asset value, which is established by obtaining the underlying securities' individual prices from the primary pricing source. A market price secured from the primary source vendor is then evaluated by management in its valuation of the assets within the trusts. As a general approach, fixed income market pricing vendors gather market data (including indices and market research reports) and integrate relative credit information, observed market movements, and sector news into proprietary pricing models, pricing systems, and mathematical tools. Dealer quotes and other market information, including live trading levels and pricing analysts' judgments, are also obtained when available. See Note 1 to the financial statements of Southern Company, Alabama Power, and Georgia Power under "Nuclear Decommissioning" in Item 8 of the Form 10-K for additional information.

Southern Power has contingent payment obligations related to certain acquisitions whereby Southern Power is primarily obligated to make generation-based payments to the seller, which commenced at the commercial operation date of the respective facility and continue through 2026. The obligation is categorized as Level 3 under Fair Value Measurements as the fair value is determined using significant unobservable inputs for the forecasted facility generation in MW-hours, as well as other inputs such as a fixed dollar amount per MW-hour, and a discount rate. The fair value of contingent consideration reflects the net present value of expected payments and any periodic change arising from forecasted generation is expected to be immaterial.

"Other investments" include investments that are not traded in the open market. The fair value of these investments has been determined based on market factors including comparable multiples and the expectations regarding cash flows and business plan executions.

As of June 30, 2018, the fair value measurements of private equity investments held in the nuclear decommissioning trusts that are calculated at net asset value per share (or its equivalent) as a practical expedient, as well as the nature and risks of those investments, were as follows:

As of June 30, 2018:	Fair Value	Unfunded Commitments	Redemption Frequency	Redemption Notice Period
	<i>(in millions)</i>			
Southern Company	\$ 33	\$ 33	Not Applicable	Not Applicable
Alabama Power	\$ 33	\$ 33	Not Applicable	Not Applicable

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

Private equity funds include a fund-of-funds that invests in high-quality private equity funds across several market sectors, funds that invest in real estate assets, and a fund that acquires companies to create resale value. Private equity funds do not have redemption rights. Distributions from these funds will be received as the underlying investments in the funds are liquidated. Liquidations are expected to occur at various times over the next 10 years .

As of June 30, 2018 , other financial instruments for which the carrying amount did not equal fair value were as follows:

	Carrying Amount	Fair Value
	<i>(in millions)</i>	
Long-term debt, including securities due within one year:		
Southern Company	\$ 45,806	\$ 46,481
Alabama Power	8,119	8,435
Georgia Power	10,294	10,499
Gulf Power	1,285	1,311
Mississippi Power	1,779	1,760
Southern Power	5,037	5,094
Southern Company Gas	5,823	5,957

The fair values are determined using Level 2 measurements and are based on quoted market prices for the same or similar issues or on the current rates available to Southern Company, Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Southern Power, and Southern Company Gas.

(E) STOCKHOLDERS' EQUITY

Earnings per Share

For Southern Company, the only difference in computing basic and diluted earnings per share is attributable to awards outstanding under stock-based compensation plans. See Note 8 to the financial statements of Southern Company in Item 8 of the Form 10-K for information on stock-based compensation plans. The effect of stock-based compensation plans was determined using the treasury stock method. Shares used to compute diluted earnings per share were as follows:

	Three Months Ended June 30, 2018	Three Months Ended June 30, 2017	Six Months Ended June 30, 2018	Six Months Ended June 30, 2017
	<i>(in millions)</i>			
As reported shares	1,014	998	1,012	996
Effect of stock-based compensation	—	7	5	7
Diluted shares	1,014	1,005	1,017	1,003

Stock-based compensation awards that were not included in the diluted earnings per share calculation because they were anti-dilutive totaled approximately 5.3 million shares for the three months ended June 30, 2018 and were immaterial for the three months ended June 30, 2017 and six months ended June 30, 2018 and 2017 .

(UNAUDITED)

(F) FINANCING

Bank Credit Arrangements

Bank credit arrangements provide liquidity support to the registrants' commercial paper borrowings and the traditional electric operating companies' revenue bonds. The amount of variable rate revenue bonds of the traditional electric operating companies outstanding requiring liquidity support as of June 30, 2018 was approximately \$1.5 billion (comprised of approximately \$854 million at Alabama Power, \$550 million at Georgia Power, \$82 million at Gulf Power, and \$40 million at Mississippi Power). In addition, at June 30, 2018, the traditional electric operating companies had approximately \$482 million (comprised of approximately \$120 million at Alabama Power, \$232 million at Georgia Power, \$37 million at Gulf Power, and \$93 million at Mississippi Power) of revenue bonds outstanding that were required to be remarketed within the next 12 months. Subsequent to June 30, 2018, approximately \$43 million of these pollution control revenue bonds of Mississippi Power were purchased and held by Mississippi Power. See Note 6 to the financial statements of each registrant under "Bank Credit Arrangements" in Item 8 of the Form 10-K and "Financing Activities" herein for additional information.

The following table outlines the committed credit arrangements by company as of June 30, 2018 :

Company	Expires				Total	Unused	Executable Term	Expires Within	
	2018	2019	2020	2022			Loans	One Year	
							One	Term	No Term
							Year	Out	Out
<i>(in millions)</i>

Southern Company Consolidated	\$ 122	\$ 86	\$ 735	\$ 7,200	\$ 8,143	\$ 8,101	\$ 45	\$ 45	\$ 163

(a) Represents the Southern Company parent entity.

(b) Does not include Southern Power's \$120 million continuing letter of credit facility for standby letters of credit expiring in 2019, of which \$23 million remains unused at June 30, 2018.

(c) Southern Company Gas, as the parent entity, guarantees the obligations of Southern Company Gas Capital, which is the borrower of \$1.4 billion of these arrangements. Southern Company Gas' committed credit arrangements also include \$500 million for which Nicor Gas is the borrower and which is restricted for working capital needs of Nicor Gas.

Subject to applicable market conditions, Southern Company and its subsidiaries expect to renew or replace their bank credit arrangements as needed, prior to expiration. In connection therewith, Southern Company and its subsidiaries may extend the maturity dates and/or increase or decrease the lending commitments thereunder.

DOE Loan Guarantee Borrowings

See Note 6 to the financial statements of Southern Company and Georgia Power under "DOE Loan Guarantee Borrowings" in Item 8 of the Form 10-K for additional information regarding Georgia Power's Loan Guarantee Agreement.

On July 27, 2017, Georgia Power entered into an amendment to the Loan Guarantee Agreement (LGA Amendment) in connection with the DOE's consent to Georgia Power's entry into the Vogtle Services Agreement and the related intellectual property licenses (IP Licenses). Under the terms of the Loan Guarantee Agreement, upon termination of

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

the Vogtle 3 and 4 Agreement, further advances are conditioned upon the DOE's approval of any agreements entered into in replacement of the Vogtle 3 and 4 Agreement. Under the terms of the LGA Amendment, Georgia Power will not request any advances unless and until certain conditions are satisfied, including (i) receipt of the DOE's approval of the Bechtel Agreement (together with the Vogtle Services Agreement and the IP Licenses, the Replacement EPC Arrangements) and (ii) Georgia Power's entry into a further amendment to the Loan Guarantee Agreement with the DOE to reflect the Replacement EPC Arrangements.

In September 2017, the DOE issued a conditional commitment to Georgia Power for up to approximately \$1.67 billion in additional guaranteed loans under the Loan Guarantee Agreement. In June 2018, the DOE approved a request by Georgia Power to extend the conditional commitment to September 30, 2018. Any further extension must be approved by the DOE. Final approval and issuance of these additional loan guarantees by the DOE cannot be assured and are subject to the negotiation of definitive agreements, completion of due diligence by the DOE, receipt of any necessary regulatory approvals, and satisfaction of other conditions, including the Vogtle Owners' votes to continue construction.

As of June 30, 2018, Georgia Power had \$2.6 billion of borrowings outstanding under the multi-advance term loan facility (FFB Credit Facility) among Georgia Power, the DOE, and the FFB.

Under the Loan Guarantee Agreement, Georgia Power is subject to customary borrower affirmative and negative covenants and events of default. In addition, Georgia Power is subject to project-related reporting requirements and other project-specific covenants and events of default.

In the event certain mandatory prepayment events (including any decision not to continue construction of Plant Vogtle Units 3 and 4) occur, the FFB's commitment to make further advances under the FFB Credit Facility will terminate and Georgia Power will be required to prepay the outstanding principal amount of all borrowings under the FFB Credit Facility over a period of five years (with level principal amortization). Among other things, these mandatory prepayment events include (i) the termination of the Vogtle Services Agreement or rejection of the Vogtle Services Agreement in bankruptcy if Georgia Power does not maintain access to intellectual property rights under the IP Licenses; (ii) a decision by Georgia Power not to continue construction of Plant Vogtle Units 3 and 4; (iii) cancellation of Plant Vogtle Units 3 and 4 by the Georgia PSC, or by Georgia Power if authorized by the Georgia PSC; and (iv) cost disallowances by the Georgia PSC that could have a material adverse effect on completion of Plant Vogtle Units 3 and 4 or Georgia Power's ability to repay the outstanding borrowings under the FFB Credit Facility. Under certain circumstances, insurance proceeds and any proceeds from an event of taking must be applied to immediately prepay outstanding borrowings under the FFB Credit Facility. In addition, if Georgia Power discontinues construction of Plant Vogtle Units 3 and 4, Georgia Power would be obligated to immediately repay a portion of the outstanding borrowings under the FFB Credit Facility to the extent such outstanding borrowings exceed 70% of Eligible Project Costs, net of the proceeds received by Georgia Power under the Guarantee Settlement Agreement. Georgia Power also may voluntarily prepay outstanding borrowings under the FFB Credit Facility. Under the FFB Credit Facility, any prepayment (whether mandatory or optional) will be made with a make-whole premium or discount, as applicable.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

Financing Activities

The following table outlines the long-term debt financing activities for Southern Company and its subsidiaries for the first six months of 2018 :

Company	Senior Note Issuances	Senior Note Maturities, Redemptions, and Repurchases	Revenue Bond Maturities, Redemptions, and Repurchases	Other Long-Term Debt Redemptions and Maturities (*)
	<i>(in millions)</i>			
Alabama Power	\$ 500	\$ —	\$ —	\$ —
Georgia Power	—	1,000	398	104
Mississippi Power	600	—	—	900
Southern Power	—	350	—	420
Southern Company Gas	—	—	200	—
Other	—	—	—	7
Southern Company Consolidated	\$ 1,100	\$ 1,350	\$ 598	\$ 1,431

(*) Includes reductions in capital lease obligations resulting from cash payments under capital leases.

Southern Company

In March 2018, Southern Company entered into a \$900 million short-term floating rate bank loan bearing interest based on one -month LIBOR. The proceeds were used for working capital and other general corporate purposes.

In April 2018, Southern Company borrowed \$250 million pursuant to a short-term uncommitted bank credit arrangement, which bears interest at a rate agreed upon by Southern Company and the bank from time to time and is payable on no less than 30 days' demand by the bank.

In June 2018, Southern Company repaid at maturity two \$100 million short-term floating rate bank term loans.

Alabama Power

In June 2018, Alabama Power issued \$500 million aggregate principal amount of Series 2018A 4.30% Senior Notes due July 15, 2048. The proceeds were used to repay outstanding commercial paper and for general corporate purposes, including Alabama Power's continuous construction program.

Georgia Power

In January 2018, Georgia Power repaid its outstanding \$150 million and \$100 million floating rate bank loans due May 31, 2018 and October 26, 2018, respectively.

In March 2018, Georgia Power purchased and held \$104.6 million aggregate principal amount of Development Authority of Burke County (Georgia) Pollution Control Revenue Bonds (Georgia Power Company Plant Vogtle Project), First Series 2013 and \$173 million aggregate principal amount of Development Authority of Bartow County (Georgia) Pollution Control Revenue Bonds (Georgia Power Company Plant Bowen Project), First Series 2009. Georgia Power may reoffer these bonds to the public at a later date.

In April 2018, Georgia Power purchased and held \$55 million aggregate principal amount of Development Authority of Burke County (Georgia) Pollution Control Revenue Bonds (Georgia Power Company Plant Vogtle Project), Fifth Series 1994. Georgia Power may reoffer these bonds to the public at a later date.

Also in April 2018, Georgia Power redeemed all \$250 million aggregate principal amount of its Series 2008B 5.40% Senior Notes due June 1, 2018.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

In May 2018, through cash tender offers, Georgia Power repurchased and retired \$89 million of the \$250 million aggregate principal amount outstanding of its Series 2007A 5.65% Senior Notes due March 1, 2037, \$326 million of the \$500 million aggregate principal amount outstanding of its Series 2009A 5.95% Senior Notes due February 1, 2039, and \$335 million of the \$600 million aggregate principal amount outstanding of its Series 2010B 5.40% Senior Notes due June 1, 2040, for an aggregate purchase price, excluding accrued and unpaid interest, of \$902 million .

In June 2018, Georgia Power purchased and held \$65 million aggregate principal amount of Development Authority of Burke County (Georgia) Pollution Control Revenue Bonds (Georgia Power Company Plant Vogtle Project), Second Series 2008. Georgia Power may reoffer these bonds to the public at a later date.

Mississippi Power

In March 2018, Mississippi Power issued \$300 million aggregate principal amount of Series 2018A Floating Rate Senior Notes due March 27, 2020 bearing interest based on three -month LIBOR and \$300 million aggregate principal amount of Series 2018B 3.95% Senior Notes due March 30, 2028. In March 2018, Mississippi Power also entered into a \$300 million short-term floating rate bank loan bearing interest based on one -month LIBOR, of which \$200 million was repaid in the second quarter 2018 and \$50 million was repaid subsequent to June 30, 2018. Mississippi Power used the proceeds from these financings to repay a \$900 million unsecured term loan.

Southern Power

In May 2018, Southern Power entered into two short-term floating rate bank loans, each for an aggregate principal amount of \$100 million , which bear interest based on one -month LIBOR.

In the second quarter 2018, Southern Power used a portion of the proceeds from the sale of a 33% equity interest in SPSH to repay \$420 million aggregate principal amount of long-term floating rate bank loans and \$350 million aggregate principal amount of Series 2015A 1.50% Senior Notes due June 1, 2018. See Note (J) under "Southern Power – Sale of Solar Facility Interests " for additional information.

Southern Company Gas

On January 4, 2018, Southern Company Gas issued a floating rate promissory note to Southern Company in an aggregate principal amount of \$100 million bearing interest based on one -month LIBOR. On March 28, 2018, Southern Company Gas repaid this promissory note.

In the second quarter 2018, Pivotal Utility Holdings caused \$200 million aggregate principal amount of gas facility revenue bonds to be redeemed. Also in the second quarter 2018, Pivotal Utility Holdings, as borrower, and Southern Company Gas, as guarantor, entered into a \$181 million short-term delayed draw floating rate bank term loan bearing interest based on one -month LIBOR, which Pivotal Utility Holdings used to repay the gas facility revenue bonds. Subsequent to June 30, 2018, Pivotal Utility Holdings repaid this short-term loan.

In May 2018, Southern Company Gas Capital borrowed \$95 million pursuant to a short-term uncommitted bank credit arrangement, guaranteed by Southern Company Gas, bearing interest at a rate agreed upon by Southern Company Gas Capital and the bank from time to time and payable on no less than 30 days' demand by the bank. The proceeds of the loan were used to pay down short-term debt. Subsequent to June 30, 2018, Southern Company Gas Capital repaid this loan.

(G) RETIREMENT BENEFITS

On January 1, 2018, the qualified defined benefit pension plan of Southern Company Gas was merged into the qualified defined benefit pension plan of Southern Company. Following the plan merger, Southern Company has a qualified defined benefit, trustee, pension plan covering substantially all employees, with the exception of employees at PowerSecure. The Southern Company qualified defined benefit pension plan is funded in accordance with requirements of the Employee Retirement Income Security Act of 1974, as amended (ERISA). No mandatory

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

contributions to the Southern Company qualified defined benefit pension plan are anticipated for the year ending December 31, 2018 .

In addition, the Southern Company Gas non-qualified retirement plans were merged into the Southern Company non-qualified retirement plan (defined benefit and defined contribution). Following the non-qualified retirement plan mergers, Southern Company continues to provide certain non-qualified defined benefits for a select group of management and highly compensated employees, which are funded on a cash basis.

Furthermore, Southern Company provides certain medical care and life insurance benefits for retired employees through other postretirement benefit plans. The traditional electric operating companies fund related other postretirement trusts to the extent required by their respective regulatory commissions. Southern Company Gas also provides certain medical care and life insurance benefits for eligible retired employees through a postretirement benefit plan. Southern Company Gas has a separate unfunded supplemental retirement health care plan that provides medical care and life insurance benefits to employees of discontinued businesses.

As indicated in Note (A), the registrants adopted ASU 2017-07 as of January 1, 2018. ASU 2017-07 requires that an employer report the service cost component of net periodic benefit costs in the same line item or items as other compensation costs and requires the other components of net periodic benefit costs to be separately presented in the statements of income outside of income from operations. The presentation requirements of ASU 2017-07 have been applied retrospectively with the service cost component of net periodic benefit costs included in operations and maintenance and all other components of net periodic benefit costs included in other income (expense), net in the statements of income for the three and six months ended June 30, 2017.

With respect to the presentation requirements, the registrants have used the practical expedient provided by ASU 2017-07, which permits an employer to use the amounts disclosed in its retirement benefits footnote for prior comparative periods as the estimation basis for applying the retrospective presentation requirements to those periods. The amounts of the other components of net periodic benefit costs reclassified for the prior period are presented in the following tables.

See Note 2 to the financial statements of each registrant in Item 8 of the Form 10-K for additional information.

(UNAUDITED)

(H) INCOME TAXES

See Note 5 to the financial statements of each registrant in Item 8 of the Form 10-K for additional tax information.

Federal Tax Reform Legislation

Following the enactment of the Tax Reform Legislation, the SEC staff issued Staff Accounting Bulletin 118 – "Income Tax Accounting Implications of the Tax Cuts and Jobs Act" (SAB 118), which provides for a measurement period of up to one year from the enactment date to complete accounting under GAAP for the tax effects of the legislation. Due to the complex and comprehensive nature of the enacted tax law changes, and their application under GAAP, the registrants consider all amounts recorded in the financial statements as a result of the Tax Reform Legislation to be "provisional" as discussed in SAB 118 and subject to revision. Each of the registrants is awaiting additional guidance from industry and income tax authorities in order to finalize its accounting. The ultimate impact of the Tax Reform Legislation on deferred income tax assets and liabilities and the related regulatory assets and liabilities cannot be determined at this time. See Note (B) under "Regulatory Matters" for additional information.

Current and Deferred Income Taxes

Tax Credit Carryforwards

Southern Company had federal ITC and PTC carryforwards (primarily related to Southern Power) totaling \$2.3 billion as of June 30, 2018 compared to \$2.1 billion as of December 31, 2017.

The federal ITC and PTC carryforwards begin expiring in 2034 and 2032, respectively, but are expected to be fully utilized by 2021. The estimated tax credit utilization reflects the 2018 abandonment loss related to certain Kemper County energy facility expenditures as well as the projected taxable gains on the various sale transactions described in Note (J) and "Legal Entity Reorganizations" herein. The expected utilization of tax credit carryforwards could be further delayed by numerous factors, including the acquisition of additional renewable projects and increased generation at existing wind facilities. The ultimate outcome of these matters cannot be determined at this time.

Effective Tax Rate

Each registrant's effective tax rate for the six months ended June 30, 2018 varied significantly as compared to the corresponding period in 2017 due to the 14% lower 2018 federal tax rate resulting from the Tax Reform Legislation.

Southern Company

Southern Company's effective tax rate is typically lower than the statutory rate due to employee stock plans' dividend deduction, non-taxable AFUDC equity, and federal income tax benefits from ITCs and PTCs.

Southern Company's effective tax benefit rate was (3.2)% for the six months ended June 30, 2018 compared to a benefit rate of (28.6)% for the corresponding period in 2017. The effective tax rate increase was primarily due to the \$3.1 billion pre-tax loss on the Kemper IGCC, net of the non-deductible AFUDC equity portion, recorded in 2017, partially offset by the \$1.1 billion pre-tax loss related to Plant Vogtle Units 3 and 4 in 2018, the reduction in the federal corporate income tax rate and the benefit from the flowback of excess deferred income taxes as a result of the Tax Reform Legislation, as well as net state income tax benefits related to changes in state apportionment rates arising from the reorganization of Southern Power's legal entities as discussed further herein. See Note 3 to the financial statements of Southern Company under "Kemper County Energy Facility" in Item 8 of the Form 10-K and Note (B) under "Kemper County Energy Facility" for additional information regarding the Kemper IGCC and Note (B) under "Nuclear Construction" for additional information regarding Plant Vogtle Units 3 and 4. See Note (B) under "Regulatory Matters" for additional information on the flowback of excess deferred income taxes.

Southern Company recognizes PTCs when wind energy is generated and sold (using the prescribed KWH rate in applicable federal and state statutes), which may differ significantly from amounts computed on a quarterly basis using an overall estimated annual effective income tax rate. Southern Company uses this method of recognition

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

since the amount of PTCs can be significantly impacted by wind generation. This method can significantly affect the effective income tax rate for the period depending on the amount of pretax income.

Alabama Power

Alabama Power's effective tax rate was 22.8% for the six months ended June 30, 2018 compared to 40.2% for the corresponding period in 2017. The effective tax rate decrease was primarily due to the reduction in the federal corporate income tax rate and the benefit from the flowback of excess deferred income taxes as a result of the Tax Reform Legislation. See Note (B) under "Regulatory Matters – Alabama Power" for additional information.

Georgia Power

Georgia Power's effective tax benefit rate was (53.5)% for the six months ended June 30, 2018 compared to an effective tax rate of 36.6% for the corresponding period in 2017. The effective tax rate decrease was primarily due to the \$1.1 billion pre-tax loss related to the estimated probable loss on Plant Vogtle Units 3 and 4 recorded in 2018, partially offset by the reduction in the federal corporate income tax rate. See Note (B) under "Nuclear Construction" for additional information.

Gulf Power

Gulf Power's effective tax rate was 3.3% for the six months ended June 30, 2018 compared to 39.8% for the corresponding period in 2017. The effective tax rate decrease was primarily due to the reduction in the federal corporate income tax rate and the benefit from the flowback of excess deferred income taxes as a result of the Tax Reform Legislation. See Note (B) under "Regulatory Matters – Gulf Power" for additional information.

Mississippi Power

Mississippi Power's effective tax rate was 18.7% for the six months ended June 30, 2018 compared to a benefit rate of (30.5)% for the corresponding period in 2017. The effective tax rate increase was primarily due to the \$3.1 billion pre-tax loss on the Kemper IGCC, net of the non-deductible AFUDC equity portion, recorded in 2017, partially offset by the reduction in the federal corporate income tax rate as a result of the Tax Reform Legislation. See Note (B) under "Regulatory Matters – Mississippi Power" for additional information.

Southern Power

Southern Power's effective tax benefit rate was (1,386.5)% for the six months ended June 30, 2018 compared to a benefit rate of (114.7)% for the corresponding period in 2017. The effective tax rate decrease was primarily due to lower earnings before income taxes resulting from a \$119 million asset impairment charge related to the sale of Southern Power's equity interests in two natural gas-fired operating facilities, Plant Oleander and Plant Stanton Unit A (together, the Florida Plants) described in Note (J) under "Southern Power – Sale of Florida Plants," as well as the reduction in the federal corporate income tax rate and the net state income tax benefits related to certain changes in apportionment rates arising from the reorganization of Southern Power's legal entities as described below.

Southern Power recognizes PTCs when wind energy is generated and sold (using the prescribed KWH rate in applicable federal and state statutes), which may differ significantly from amounts computed on a quarterly basis using an overall estimated annual effective income tax rate. Southern Power uses this method of recognition since the amount of PTCs can be significantly impacted by wind generation. This method can significantly affect the effective income tax rate for the period depending on the amount of pretax income.

Southern Company Gas

Southern Company Gas' effective tax rate was 39.1% for the six months ended June 30, 2018 compared to 38.5% for the corresponding period in 2017. This increase was primarily related to income taxes recorded related to the sale of Pivotal Home Solutions, including the reduction in deferred tax expense as a result of treating the sale as an asset sale for tax purposes, partially offset by the reduction in the federal corporate income tax rate and the benefit from the flowback of excess deferred income taxes as a result of the Tax Reform Legislation. See Note (B) under

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

"Regulatory Matters – Southern Company Gas" and Note (J) under "Southern Company Gas – Sale of Pivotal Home Solutions " for additional information.

Legal Entity Reorganizations

In March 2018, Southern Power substantially completed a legal entity reorganization of various direct and indirect subsidiaries that own and operate substantially all of its solar facilities, including certain subsidiaries owned in partnership with various third parties. The reorganization resulted in net state tax benefits related to certain changes in apportionment rates totaling approximately \$50 million , which were recorded in the first quarter 2018. In April 2018, Southern Power completed the final stage of the reorganization resulting in additional net state tax benefits of approximately \$4 million .

Southern Power is pursuing the sale of a noncontrolling interest in a portfolio of eight operating wind facilities through the use of third-party tax equity, which, if successful, is expected to close in the fourth quarter 2018. In the third quarter 2018, various direct and indirect subsidiaries of Southern Power that own and operate these wind facilities are expected to be reorganized under a new holding company in which the tax equity partner would invest. The reorganization is expected to result in estimated net state tax benefits totaling approximately \$10 million related to certain changes in apportionment rates. The ultimate outcome of this matter cannot be determined at this time.

Unrecognized Tax Benefits

See Note 5 to the financial statements of each registrant under "Unrecognized Tax Benefits" in Item 8 of the Form 10-K for additional information.

The registrants had no unrecognized tax benefits as of June 30, 2018 . It is reasonably possible that the amount of the unrecognized tax benefits could change within 12 months . The settlement of federal and state audits could impact the balances significantly. At this time, an estimate of the range of reasonably possible outcomes cannot be determined.

The IRS has finalized its audits of Southern Company's consolidated income tax returns through 2016, as well as the pre-Merger Southern Company Gas tax returns. Southern Company is a participant in the Compliance Assurance Process of the IRS. The audits for Southern Company's state income tax returns have either been concluded, or the statute of limitations has expired, for years prior to 2011.

(I) DERIVATIVES

Southern Company, the traditional electric operating companies, Southern Power, and Southern Company Gas are exposed to market risks, including commodity price risk, interest rate risk, weather risk, and occasionally foreign currency exchange rate risk. To manage the volatility attributable to these exposures, each company nets its exposures, where possible, to take advantage of natural offsets and enters into various derivative transactions for the remaining exposures pursuant to each company's policies in areas such as counterparty exposure and risk management practices. Southern Company Gas' wholesale gas operations use various contracts in its commercial activities that generally meet the definition of derivatives. For the traditional electric operating companies, Southern Power, and Southern Company Gas' other businesses, each company's policy is that derivatives are to be used primarily for hedging purposes and mandates strict adherence to all applicable risk management policies. Derivative positions are monitored using techniques including, but not limited to, market valuation, value at risk, stress testing, and sensitivity analysis. Derivative instruments are recognized at fair value in the balance sheets as either assets or liabilities and are presented on a net basis. See Note (D) for additional information. In the statements of cash flows, the cash impacts of settled energy-related and interest rate derivatives are recorded as operating activities. The cash impacts of settled foreign currency derivatives are classified as operating or financing activities to correspond with classification of the hedged interest or principal, respectively.

The registrants adopted ASU 2017-12 as of January 1, 2018. See Note (A) under " Recently Adopted Accounting Standards – Other " for additional information.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

Energy-Related Derivatives

Southern Company, the traditional electric operating companies, Southern Power, and Southern Company Gas enter into energy-related derivatives to hedge exposures to electricity, natural gas, and other fuel price changes. However, due to cost-based rate regulations and other various cost recovery mechanisms, the traditional electric operating companies and the natural gas distribution utilities have limited exposure to market volatility in energy-related commodity prices. Each of the traditional electric operating companies and certain of the natural gas distribution utilities of Southern Company Gas manage fuel-hedging programs, implemented per the guidelines of their respective state PSCs or other applicable state regulatory agencies, through the use of financial derivative contracts, which is expected to continue to mitigate price volatility. The Florida PSC approved a moratorium on Gulf Power's fuel-hedging program until January 1, 2021. The moratorium does not have an impact on the recovery of existing hedges entered into under the previously-approved hedging program. The traditional electric operating companies (with respect to wholesale generating capacity) and Southern Power have limited exposure to market volatility in energy-related commodity prices because their long-term sales contracts shift substantially all fuel cost responsibility to the purchaser. However, the traditional electric operating companies and Southern Power may be exposed to market volatility in energy-related commodity prices to the extent any uncontracted capacity is used to sell electricity. Southern Company Gas retains exposure to price changes that can, in a volatile energy market, be material and can adversely affect its results of operations.

Southern Company Gas also enters into weather derivative contracts as economic hedges of operating margins in the event of warmer-than-normal weather. Exchange-traded options are carried at fair value, with changes reflected in operating revenues. Non-exchange-traded options are accounted for using the intrinsic value method. Changes in the intrinsic value for non-exchange-traded contracts are reflected in operating revenues.

Energy-related derivative contracts are accounted for under one of three methods:

- *Regulatory Hedges* — Energy-related derivative contracts which are designated as regulatory hedges relate primarily to the traditional electric operating companies' and the natural gas distribution utilities' fuel-hedging programs, where gains and losses are initially recorded as regulatory liabilities and assets, respectively, and then are included in fuel expense as the underlying fuel is used in operations and ultimately recovered through the respective fuel cost recovery clauses.
- *Cash Flow Hedges* — Gains and losses on energy-related derivatives designated as cash flow hedges (which are mainly used to hedge anticipated purchases and sales) are initially deferred in OCI before being recognized in the statements of income in the same period and in the same income statement line item as the earnings effect of the hedged transactions.
- *Not Designated* — Gains and losses on energy-related derivative contracts that are not designated or fail to qualify as hedges are recognized in the statements of income as incurred.

Some energy-related derivative contracts require physical delivery as opposed to financial settlement, and this type of derivative is both common and prevalent within the electric and natural gas industries. When an energy-related derivative contract is settled physically, any cumulative unrealized gain or loss is reversed and the contract price is recognized in the respective line item representing the actual price of the underlying goods being delivered.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

At June 30, 2018, the net volume of energy-related derivative contracts for natural gas positions for the Southern Company system, together with the longest hedge date over which the respective entity is hedging its exposure to the variability in future cash flows for forecasted transactions and the longest non-hedge date for derivatives not designated as hedges, were as follows:

	Net Purchased mmBtu	Longest Hedge Date	Longest Non-Hedge Date
	<i>(in millions)</i>		
Southern Company (*)	701	2022	2029
Alabama Power	82	2022	—
Georgia Power	174	2022	—
Gulf Power	13	2020	—
Mississippi Power	66	2022	—
Southern Power	14	2020	—
Southern Company Gas (*)	352	2020	2029

(*) Southern Company's and Southern Company Gas' derivative instruments include both long and short natural gas positions. A long position is a contract to purchase natural gas and a short position is a contract to sell natural gas. Southern Company Gas' volume represents the net of long natural gas positions of 3.9 billion mmBtu and short natural gas positions of 3.6 billion mmBtu as of June 30, 2018, which is also included in Southern Company's total volume.

In addition to the volumes discussed above, the traditional electric operating companies and Southern Power enter into physical natural gas supply contracts that provide the option to sell back excess gas due to operational constraints. The maximum expected volume of natural gas subject to such a feature is 17 million mmBtu for Southern Company, 3 million mmBtu for Alabama Power, 6 million mmBtu for Georgia Power, 1 million mmBtu for Gulf Power, 2 million mmBtu for Mississippi Power, and 5 million mmBtu for Southern Power.

For cash flow hedges of energy-related derivatives, the amounts expected to be reclassified from accumulated OCI to earnings for the next 12-month period ending June 30, 2019 are immaterial for all registrants.

Interest Rate Derivatives

Southern Company and certain subsidiaries may also enter into interest rate derivatives to hedge exposure to changes in interest rates. The derivatives employed as hedging instruments are structured to minimize ineffectiveness. Derivatives related to existing variable rate securities or forecasted transactions are accounted for as cash flow hedges where the derivatives' fair value gains or losses are recorded in OCI and are reclassified into earnings at the same time and presented on the same income statement line item as the earnings effect of the hedged transactions. Derivatives related to existing fixed rate securities are accounted for as fair value hedges, where the derivatives' fair value gains or losses and hedged items' fair value gains or losses are both recorded directly to earnings on the same income statement line item. Fair value gains or losses on derivatives that are not designated or fail to qualify as hedges are recognized in the statements of income as incurred.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

At June 30, 2018 , the following interest rate derivatives were outstanding:

	Notional Amount	Interest Rate Received	Weighted Average Interest Rate Paid	Hedge Maturity Date	Fair Value Gain (Loss) at June 30, 2018
	<i>(in millions)</i>				<i>(in millions)</i>
Fair Value Hedges of Existing Debt					
Southern Company (*)	\$ 300	2.75%	3-month LIBOR + 0.92%	June 2020	\$ (6)
Southern Company (*)	1,500	2.35%	1-month LIBOR + 0.87%	July 2021	(57)
Georgia Power	500	1.95%	3-month LIBOR + 0.76%	December 2018	(3)
Georgia Power	200	4.25%	3-month LIBOR + 2.46%	December 2019	(3)
Southern Company Consolidated	\$ 2,500				\$ (69)

(*) Represents the Southern Company parent entity.

The estimated pre-tax gains (losses) related to interest rate derivatives expected to be reclassified from accumulated OCI to interest expense for the next 12 -month period ending June 30, 2019 are \$(18) million for Southern Company and immaterial for all other registrants. Southern Company and certain subsidiaries have deferred gains and losses expected to be amortized into earnings through 2046 .

Foreign Currency Derivatives

Southern Company and certain subsidiaries may also enter into foreign currency derivatives to hedge exposure to changes in foreign currency exchange rates, such as that arising from the issuance of debt denominated in a currency other than U.S. dollars. Derivatives related to forecasted transactions are accounted for as cash flow hedges where the derivatives' fair value gains or losses are recorded in OCI and are reclassified into earnings at the same time and on the same income statement line as the earnings effect of the hedged transactions, including foreign currency gains or losses arising from changes in the U.S. currency exchange rates. The derivatives employed as hedging instruments are structured to minimize ineffectiveness.

At June 30, 2018 , the following foreign currency derivatives were outstanding:

	Pay Notional	Pay Rate	Receive Notional	Receive Rate	Hedge Maturity Date	Fair Value Gain (Loss) at June 30, 2018
	<i>(in millions)</i>		<i>(in millions)</i>			<i>(in millions)</i>
Cash Flow Hedges of Existing Debt						
Southern Power	\$ 677	2.95%	€ 600	1.00%	June 2022	\$ 54
Southern Power	564	3.78%	500	1.85%	June 2026	55
Total	\$ 1,241		€ 1,100			\$ 109

The estimated pre-tax gains (losses) related to foreign currency derivatives that will be reclassified from accumulated OCI to earnings for the next 12 -month period ending June 30, 2019 are \$(23) million for Southern Company and Southern Power.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

Derivative Financial Statement Presentation and Amounts

Southern Company, the traditional electric operating companies, Southern Power, and Southern Company Gas enter into derivative contracts that may contain certain provisions that permit intra-contract netting of derivative receivables and payables for routine billing and offsets related to events of default and settlements. Southern Company and certain subsidiaries also utilize master netting agreements to mitigate exposure to counterparty credit risk. These agreements may contain provisions that permit netting across product lines and against cash collateral. The fair value amounts of derivative assets and liabilities on the balance sheet are presented net to the extent that there are netting arrangements or similar agreements with the counterparties.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)

Gain (loss) on cash flow hedges ^(a)				
Energy-related derivatives	—	—	(2)	—

(a) Amounts reflect gains or losses on cash flow hedges that were reclassified from accumulated OCI into income.

(b) For fair value hedges presented above, generally changes in the fair value of the derivative contracts are equal to changes in the fair value of the underlying debt and have no material impact on income.

(c) The reclassification from accumulated OCI into other income (expense), net completely offsets currency gains and losses arising from changes in the U.S. currency exchange rates used to record the euro-denominated notes.

For the three and six months ended June 30, 2018 and 2017, the pre-tax effects of cash flow hedge accounting on income for interest rate derivatives were immaterial for Gulf Power and Southern Company Gas.

As of June 30, 2018 and December 31, 2017, the following amounts were recorded on the balance sheets related to cumulative basis adjustments for fair value hedges:

Balance Sheet Location of Hedged Items	Carrying Amount of the Hedged Item		Cumulative Amount of Fair Value Hedging Adjustment included in Carrying Amount of the Hedged Item

	Cost of natural gas	2	(2)	4	(4)
Total derivatives in non-designated hedging relationships		\$ (26)	\$ 14	\$ (39)	\$ 61
Southern Company Gas					
Energy-related derivatives:	Natural gas revenues (*)	\$ (28)	\$ 16	\$ (43)	\$ 65
	Cost of natural gas	2	(2)	4	(4)
Total derivatives in non-designated hedging relationships		\$ (26)	\$ 14	\$ (39)	\$ 61

(*) Excludes gains (losses) recorded in natural gas revenues associated with weather derivatives of \$15 million for the six months ended June 30, 2017 and immaterial amounts for all other periods presented.

For the three and six months ended June 30, 2018 and 2017, the pre-tax effects of energy-related derivatives and interest rate derivatives not designated as hedging instruments were immaterial for the traditional electric operating companies and Southern Power.

Contingent Features

Southern Company, the traditional electric operating companies, Southern Power, and Southern Company Gas do not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade. There are certain derivatives that could require collateral, but not accelerated payment, in the event of various credit rating changes of certain Southern Company subsidiaries. At June 30, 2018, the registrants had no collateral posted with derivative counterparties to satisfy these arrangements.

For the registrants with interest rate derivatives at June 30, 2018, the fair value of interest rate derivative liabilities with contingent features and the maximum potential collateral requirements arising from the credit-risk-related contingent features, at a rating below BBB- and/or Baa3, was immaterial. At June 30, 2018, the fair value of energy-related derivative liabilities with contingent features and the maximum potential collateral requirements arising from the credit-risk-related contingent features, at a rating below BBB- and/or Baa3, were immaterial for all registrants. The maximum potential collateral requirements arising from the credit-risk-related contingent features for the traditional electric operating companies and Southern Power include certain agreements that could require collateral in the event that one or more Southern Company power pool participants has a credit rating change to below investment grade.

Generally, collateral may be provided by a Southern Company guaranty, letter of credit, or cash. If collateral is required, fair value amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral are not offset against fair value amounts recognized for derivatives executed with the same counterparty.

Alabama Power and Southern Power maintain accounts with certain regional transmission organizations to facilitate financial derivative transactions. Based on the value of the positions in these accounts and the associated margin requirements, Alabama Power and Southern Power may be required to post collateral. At June 30, 2018, cash collateral posted in these accounts was immaterial. Southern Company Gas maintains accounts with brokers or the clearing houses of certain exchanges to facilitate financial derivative transactions. Based on the value of the

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

positions in these accounts and the associated margin requirements, Southern Company Gas may be required to deposit cash into these accounts. At June 30, 2018, cash collateral held on deposit in broker margin accounts was \$183 million.

Southern Company, the traditional electric operating companies, Southern Power, and Southern Company Gas are exposed to losses related to financial instruments in the event of counterparties' nonperformance. Southern Company, the traditional electric operating companies, Southern Power, and Southern Company Gas only enter into agreements and material transactions with counterparties that have investment grade credit ratings by Moody's and S&P or with counterparties who have posted collateral to cover potential credit exposure. Southern Company, the traditional electric operating companies, Southern Power, and Southern Company Gas have also established risk management policies and controls to determine and monitor the creditworthiness of counterparties in order to mitigate Southern Company's, the traditional electric operating companies', Southern Power's, and Southern Company Gas' exposure to counterparty credit risk. Southern Company Gas may require counterparties to pledge additional collateral when deemed necessary.

In addition, Southern Company Gas conducts credit evaluations and obtains appropriate internal approvals for the counterparty's line of credit before any transaction with the counterparty is executed. In most cases, the counterparty must have an investment grade rating, which includes a minimum long-term debt rating of Baa3 from Moody's and BBB- from S&P. Generally, Southern Company Gas requires credit enhancements by way of a guaranty, cash deposit, or letter of credit for transaction counterparties that do not have investment grade ratings.

Southern Company Gas also utilizes master netting agreements whenever possible to mitigate exposure to counterparty credit risk. When Southern Company Gas is engaged in more than one outstanding derivative transaction with the same counterparty and it also has a legally enforceable netting agreement with that counterparty, the "net" mark-to-market exposure represents the netting of the positive and negative exposures with that counterparty and a reasonable measure of Southern Company Gas' credit risk. Southern Company Gas also uses other netting agreements with certain counterparties with whom it conducts significant transactions. Master netting agreements enable Southern Company Gas to net certain assets and liabilities by counterparty. Southern Company Gas also nets across product lines and against cash collateral provided the master netting and cash collateral agreements include such provisions. Southern Company Gas may require counterparties to pledge additional collateral when deemed necessary.

Southern Company, the traditional electric operating companies, Southern Power, and Southern Company Gas do not anticipate a material adverse effect on the financial statements as a result of counterparty nonperformance.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

(J) ACQUISITIONS AND DISPOSITIONS

Southern Company's Sale of Gulf Power

On May 20, 2018, Southern Company entered into a stock purchase agreement (Gulf Power SPA) with NextEra Energy and its wholly-owned subsidiary 700 Universe, LLC, which provides for the sale of all of the capital stock of Gulf Power for an aggregate cash purchase price of \$5.75 billion (less the amount of indebtedness assumed at closing, which is currently estimated at approximately \$1.4 billion), subject to (i) customary adjustments for indebtedness and working capital and (ii) reduction by the amount (if any) by which Gulf Power fails to meet a specified capital expenditure target.

The Gulf Power SPA contains customary representations, warranties, and covenants of Southern Company, 700 Universe, LLC, and NextEra Energy. These covenants include, among others, an obligation of Southern Company to cause Gulf Power to operate its business in the ordinary course until the sale is consummated and an obligation for each of the parties to use reasonable best efforts to obtain the governmental and regulatory approvals described below.

The completion of the sale is subject to the satisfaction or waiver of certain closing conditions, including, among others, (i) the expiration or termination of the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act (HSR Act), (ii) approval by the FERC and the Federal Communications Commission, (iii) the entry into certain ancillary agreements, including transmission-related agreements and a transition services agreement, among the parties and their affiliates, and (iv) other customary closing conditions.

The Gulf Power SPA may be terminated by either Southern Company or 700 Universe, LLC under certain circumstances, including if the sale is not consummated by June 28, 2019 (subject to extension to December 31, 2019, if all of the conditions to closing, other than the conditions related to obtaining regulatory approvals, have been satisfied). The Gulf Power SPA further provides that, upon the termination thereof, (i) under certain specified circumstances, 700 Universe, LLC will be required to pay Southern Company a termination fee of \$100 million or \$200 million (such amount depending on the specific circumstances of such termination) and (ii) upon certain other specified circumstances Southern Company will be required to pay 700 Universe, LLC a termination fee of \$100 million.

The sale of Gulf Power is expected to occur in the first half of 2019. The assets and liabilities of Gulf Power are classified as assets held for sale and liabilities held for sale on Southern Company's balance sheet as of June 30, 2018. See "Assets Held for Sale" below for additional information. The ultimate outcome of this matter cannot be determined at this time.

Southern Power

See Note 11 to the financial statements of Southern Power and Note 12 to the financial statements of Southern Company under "Southern Power" in Item 8 of the Form 10-K for additional information.

Acquisitions During the Six Months Ended June 30, 2018

During the six months ended June 30, 2018, one of Southern Power's wholly-owned subsidiaries acquired and completed construction of the Gaskell West 1 solar facility. Acquisition-related costs were expensed as incurred and were not material.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

Project Facility	Resource	Seller; Acquisition Date	Approximate Nameplate Capacity (MW)	Location	Southern Power Percentage Ownership	Actual COD	PPA Contract Period
Gaskell West 1	Solar	Recurrent Energy Development Holdings, LLC January 26, 2018	20	Kern County, CA	100% of (*) Class B	March 2018	20 years

(*) Southern Power owns 100% of the class B membership interests under a tax equity partnership agreement.

The Gaskell West 1 facility did not have operating revenues or activities prior to completion of construction and the assets being placed in service during March 2018.

Construction Projects Completed and in Progress

During the six months ended June 30, 2018, Southern Power started or continued construction of the projects set forth in the table below. Total aggregate construction costs, excluding the acquisition costs, are expected to be between \$520 million and \$590 million for the Cactus Flats, Mankato, and Wild Horse Mountain facilities. At June 30, 2018, construction costs included in CWIP related to these projects totaled \$353 million. The ultimate outcome of these matters cannot be determined at this time.

Project Facility	Resource	Approximate Nameplate Capacity (MW)	Location	Actual/Expected COD	PPA Contract Period
Projects Under Construction as of June 30, 2018					
Cactus Flats ^(a)	Wind	148	Concho County, TX	July 2018	12-15 years
Mankato	Natural Gas	345	Mankato, MN	First half 2019	20 years
Wild Horse Mountain ^(b)	Wind	100	Pushmataha County, OK	Fourth quarter 2019	20 years

(a) In July 2017, Southern Power purchased 100% of the Cactus Flats facility and commenced construction. Subsequent to June 30, 2018, the facility was placed in service and Southern Power expects to close on a tax equity partnership agreement, which would result in Southern Power owning 100% of the class B membership interests.

(b) In May 2018, Southern Power purchased 100% of the Wild Horse Mountain facility and commenced construction. Southern Power may enter into a tax equity partnership agreement, in which case it would then own 100% of the class B membership interests.

Development Projects

During 2017, as part of its renewable development strategy, Southern Power purchased wind turbine equipment from Siemens Gamesa Renewable Energy Inc. and Vestas-American Wind Technology, Inc. to be used for various development and construction projects. Any wind projects reaching commercial operation by 2021 are expected to qualify for 80% PTCs.

During 2016, Southern Power entered into a joint development agreement with Renewable Energy Systems Americas, Inc. to develop and construct wind projects. In addition, in 2016, Southern Power purchased wind turbine equipment from Siemens Wind Power, Inc. and Vestas-American Wind Technology, Inc. to be used for construction of the facilities. Any wind projects reaching commercial operation by 2020 are expected to qualify for 100% PTCs.

In response to the previously disclosed decrease of planned expenditures for plant acquisitions and placeholder growth, Southern Power continues to refine the deployment of wind turbine equipment to projects and the amount of MW capacity to be constructed. While the expectation is that the majority of the equipment will be deployed in a manner to qualify for the 100% and 80% PTCs, Southern Power may consider other strategies, such as selling equipment or interests in projects.

The ultimate outcome of these matters cannot be determined at this time.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

Sale of Solar Facility Interests

In May 2018, Southern Power sold a 33% equity interest in SPSH, a newly-formed limited partnership indirectly owning substantially all of Southern Power's solar facilities, to Global Atlantic Financial Group Limited (Global Atlantic) for approximately \$1.2 billion, subject to customary working capital adjustments. The proceeds were used to repay \$770 million of existing indebtedness, to return capital of \$250 million to Southern Company, and for other general corporate purposes, including working capital. Since Southern Power retains control of the limited partnership through its wholly-owned general partner, the sale was recorded as an equity transaction and Southern Power will continue to consolidate the results of SPSH. On the date of the transaction, the noncontrolling interest was increased by \$511 million to reflect 33% of the carrying value of the partnership. This difference, partially offset by the tax impact and other related transaction charges, also resulted in a \$407 million decrease to Southern Power's common stockholder's equity.

Sale of Florida Plants

In May 2018, Southern Power entered into an equity interest purchase agreement with NextEra Energy to sell all of its equity interests in the Florida Plants, for an aggregate purchase price of \$195 million, subject to customary working capital and timing adjustments.

The sale is subject to certain closing and timing conditions and approvals, including, but not limited to, the expiration or termination of the waiting period under the HSR Act and approval by the FERC. The ultimate purchase price will decrease \$110,000 per day for each day after December 31, 2018 through the closing of the transaction. Conversely, the ultimate purchase price will increase \$110,000 per day for each day the closing occurs prior to December 31, 2018. The transaction is currently expected to occur in the first half of 2019. As a result of this pending transaction, Southern Power recorded an asset impairment charge of approximately \$119 million (\$89 million after tax) in the second quarter 2018. The assets and liabilities of the Florida Plants are classified as assets held for sale and liabilities held for sale on Southern Company's and Southern Power's balance sheets as of June 30, 2018. See "Assets Held for Sale" below for additional information. The ultimate outcome of this matter cannot be determined at this time.

Assets Subject to Lien

Under the terms of the PPA and the expansion PPA for the Mankato project, approximately \$475 million of assets, primarily related to property, plant, and equipment, are subject to lien at June 30, 2018.

Southern Company Gas

Sale of Pivotal Home Solutions

On June 4, 2018, Southern Company Gas completed the stock sale of Pivotal Home Solutions to American Water Enterprises LLC for a total cash purchase price of \$358 million and an additional \$6 million for working capital. This disposition resulted in a net loss of \$76 million, which included \$40 million of income tax expense. In contemplation of the transaction, a goodwill impairment charge of \$42 million was recorded during the first quarter 2018. The after-tax loss included income tax expense on goodwill not deductible for tax purposes and for which a deferred tax liability had not been recorded previously. Additionally, this disposition is subject to a final working capital adjustment that may impact the cash proceeds from disposition, but not the loss recorded. Southern Company Gas and American Water Enterprises LLC entered into a transition services agreement whereby Southern Company Gas will provide certain administrative and operational services through no later than February 3, 2019.

Sale of Elizabethtown Gas and Elkton Gas

On July 1, 2018, a Southern Company Gas subsidiary, Pivotal Utility Holdings, completed the sales of the assets of two of its natural gas distribution utilities, Elizabethtown Gas and Elkton Gas, to South Jersey Industries, Inc. for a total cash purchase price of \$1.7 billion and an additional \$40 million for working capital. This disposition resulted in an estimated pre-tax gain of approximately \$235 million and an after-tax gain of approximately \$12 million.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

which will be recorded in the third quarter 2018. The after-tax gain included income tax expense on goodwill not deductible for tax purposes and for which a deferred tax liability had not been recorded previously. Additionally, this disposition is subject to a final working capital adjustment that may impact the cash proceeds from disposition, but not the gain that will be recorded in the third quarter 2018. Southern Company Gas and South Jersey Industries, Inc. entered into transition services agreements whereby Southern Company Gas will provide certain administrative and operational services through no later than January 31, 2020. The assets and liabilities of Elizabethtown Gas and Elkton Gas are classified as assets held for sale and liabilities held for sale on Southern Company's and Southern Company Gas' balance sheets at June 30, 2018 . See " Assets Held for Sale " below for additional information.

Sale of Florida City Gas

On July 29, 2018, Southern Company Gas and its wholly-owned direct subsidiary, NUI Corporation, completed the stock sale of Pivotal Utility Holdings, which primarily consisted of Florida City Gas, to NextEra Energy for a total cash purchase price of \$530 million (less \$3 million of indebtedness assumed at closing for customer deposits) and an additional \$60 million for cash and other working capital. This disposition resulted in an estimated pre-tax gain of approximately \$126 million and an after-tax gain of approximately \$4 million , which will be recorded in the third quarter 2018. The after-tax gain included income tax expense on goodwill not deductible for tax purposes and for which a deferred tax liability had not been recorded previously. Additionally, this disposition is subject to a final working capital adjustment that may impact the cash proceeds from disposition, but not the gain that will be recorded in the third quarter 2018. Southern Company Gas and NextEra Energy entered into a transition services agreement whereby Southern Company Gas will provide certain administrative and operational services through no later than July 29, 2020. The assets and liabilities of Florida City Gas are classified as assets held for sale and liabilities held for sale on Southern Company's and Southern Company Gas' balance sheets at June 30, 2018 . See " Assets Held for Sale " below for additional information.

Assets Held for Sale

As discussed above, Southern Company, Southern Power, and Southern Company Gas each have assets and liabilities held for sale on their balance sheets at June 30, 2018 . Assets and liabilities held for sale have been classified separately on each company's balance sheet at the lower of carrying value or fair value less costs to sell at the time the criteria for held-for-sale classification were met. For assets and liabilities held for sale recorded at fair value on a nonrecurring basis, the fair value of assets held for sale is based primarily on unobservable inputs (Level 3), which includes the agreed upon sales prices in executed sales agreements.

Upon classification as held for sale in May 2018, Southern Power ceased recognizing depreciation on the Florida Plants' property, plant, and equipment to be sold. Since the depreciation of the assets to be sold in the Gulf Power transaction continues to be reflected in customer rates and will be reflected in the carryover basis of the assets when sold, Southern Company will continue to record depreciation on those assets through the date the transaction closes. Likewise, since the depreciation of the assets sold in the Elizabethtown Gas, Elkton Gas, and Florida City Gas transactions continued to be reflected in customer rates and was reflected in the carryover basis of the assets when sold, Southern Company Gas continued to record depreciation on those assets through the respective date that each transaction closed.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

The following table provides each company's major classes of assets and liabilities classified as held for sale at June 30, 2018 :

	Southern Company	Southern Power	Southern Company Gas
	<i>(in millions)</i>		
Assets Held for Sale:			
Current assets	\$ 487	\$ 17	\$ 81
Total property, plant, and equipment	5,462	168	1,408
Goodwill and other intangible assets	668	—	668
Other non-current assets	705	15	141
Total Assets Held for Sale	\$ 7,322	\$ 200	\$ 2,298
Liabilities Held for Sale:			
Current liabilities	\$ 354	\$ 2	\$ 61
Long-term debt	1,285	—	—
Accumulated deferred income taxes	566	—	26
Other non-current liabilities	1,334	—	325
Total Liabilities Held for Sale	\$ 3,539	\$ 2	\$ 412

Southern Company, Southern Power, and Southern Company Gas each concluded that the sale of these assets, both individually and combined, did not represent a strategic shift in operations that has, or is expected to have, a major effect on its operations and financial results; therefore, none of these assets held for sale have been classified as discontinued operations for any of the periods presented.

Gulf Power and the Florida Plants represent individually significant components of Southern Company and Southern Power, respectively; therefore, pre-tax profit for these components for the three and six months ended June 30, 2018 and 2017 is presented below:

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2018	2017	2018	2017
	<i>(in millions)</i>		<i>(in millions)</i>	
Earnings before income taxes:				
Gulf Power	\$ 31	\$ 61	\$ 87	\$ 95
Southern Power's Florida Plants (*)	\$ 14	\$ 11	\$ 24	\$ 20

(*) Excludes any allocation of interest from Southern Power's corporate debt.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

(K) VARIABLE INTEREST ENTITY AND EQUITY METHOD INVESTMENTS

Southern Power

In May 2018, Southern Power sold a 33% equity interest in SPSH to Global Atlantic. See Note (J) under "Southern Power" for additional information. A wholly-owned subsidiary of Southern Power is the general partner and holds a 1% ownership interest in SPSH and another wholly-owned subsidiary of Southern Power owns the remaining 66% ownership in SPSH. SPSH is a variable interest entity (VIE) because the arrangement is structured as a limited partnership and the 33% limited partner does not have substantive kick-out rights against the general partner. Southern Power previously consolidated SPSH and will continue to do so as the primary beneficiary of the VIE because it controls the most significant activities of the partnership, including operating and maintaining its assets.

At June 30, 2018, SPSH had total assets of \$6.5 billion, total liabilities of \$0.1 billion, and noncontrolling interests related to other partners' interests of \$1.2 billion. Cash distributions from SPSH are allocated 67% to Southern Power and 33% to Global Atlantic in accordance with their membership interests and the limited partnership agreement.

Transfers and sales of the assets in the VIE are subject to limited partner consent and the liabilities do not have recourse to the general credit of Southern Power. Liabilities consist of customary working capital items and do not include any long-term debt.

Southern Company Gas

See Note 4 to the financial statements of Southern Company Gas in Item 8 of the Form 10-K for additional information.

Equity Method Investments

The carrying amounts of Southern Company Gas' equity method investments as of June 30, 2018 and December 31, 2017 and related income from those investments for the three and six -month periods ended June 30, 2018 and June 30, 2017 were as follows:

Investment Balance	June 30, 2018	December 31, 2017
	<i>(in millions)</i>

(L) SEGMENT AND RELATED INFORMATION

Southern Company

The primary businesses of the Southern Company system are electricity sales by the traditional electric operating companies and Southern Power and the distribution of natural gas by Southern Company Gas. The four traditional electric operating companies – Alabama Power, Georgia Power, Gulf Power, and Mississippi Power – are vertically integrated utilities providing electric service in four Southeastern states. Southern Power develops, constructs, acquires, owns, and manages power generation assets, including renewable energy projects, and sells electricity at market-based rates in the wholesale market. Southern Company Gas distributes natural gas through its natural gas distribution utilities in four states and is involved in several other complementary businesses including gas marketing services, wholesale gas services, and gas midstream operations. Through June 30, 2018, Southern Company Gas had seven natural gas distribution utilities in seven states. Subsequent to June 30, 2018, Southern Company Gas completed sales of three of its natural gas distribution utilities. See Note (J) under "Southern Company Gas" for additional information.

Southern Company's reportable business segments are the sale of electricity by the four traditional electric operating companies, the sale of electricity in the competitive wholesale market by Southern Power, and the sale of natural gas and other complementary products and services by Southern Company Gas. Revenues from sales by Southern Power to the traditional electric operating companies were \$109 million and \$192 million for the three and six months ended June 30, 2018, respectively, and \$90 million and \$190 million for the three and six months ended June 30, 2017, respectively. Revenues from sales of natural gas from Southern Company Gas to the traditional electric operating companies were \$8 million for both the three and six months ended June 30, 2018 and \$10 million for both the three and six months ended June 30, 2017. Revenues from sales of natural gas from Southern Company Gas to Southern Power were \$22 million and \$58 million for the three and six months ended June 30, 2018, respectively, and \$33 million and \$56 million for the three and six months ended June 30, 2017, respectively. The "All Other" column includes the Southern Company parent entity, which does not allocate operating expenses to

NOTES TO THE CONDENSED FINANCIAL STATEMENTS: (Continued)
(UNAUDITED)

business segments. Also, this category includes segments below the quantitative threshold for separate disclosure. These segments include providing energy technologies and services to electric utilities and large industrial, commercial, institutional, and municipal customers; as well as investments in telecommunications and leveraged lease projects. All other inter-segment revenues are not material.

Financial data for business segments and products and services for the three and six months ended June 30, 2018 and 2017 was as follows:

	Electric Utilities								Consolidated
	Traditional Electric Operating Companies	Southern Power	Eliminations	Total	Southern Company Gas	All Other	Eliminations		
<i>(in millions)</i>									
Three Months Ended June 30, 2018:

(a) Attributable to Southern Company.

(b) Segment net income (loss) for the traditional electric operating companies includes pre-tax charges for estimated losses on plants under construction of \$1.1 billion (\$0.8 billion after tax) and \$3.0 billion (\$2.1 billion after tax) for the three months ended June 30, 2018 and 2017 , respectively, and \$1.1 billion (\$0.8 billion after tax) and \$3.1 billion (\$2.2 billion after tax) for the six months ended June 30, 2018 and 2017 , respectively. See Note 3 to the financial statements of Southern Company under "Kemper County Energy Facility" in Item 8 of the Form 10-K and Note (B) under " Nuclear Construction " and " Kemper County Energy Facility " for additional information.

(c) Segment net income (loss) for Southern Power includes a pre-tax impairment charge of \$119 million (\$89 million after tax) for the three and six months ended June 30, 2018 related to the pending sale of Southern Power's Florida Plants. See Note (J) under "Southern Power – Sale of Florida Plants " for additional information.

(d) Segment net income (loss) for Southern Company Gas includes a goodwill impairment charge of \$42 million for the six months ended June 30, 2018 related to the sale of Pivotal Home Solutions. See Note (J) under " Southern Company Gas – Sale of Pivotal Home Solutions " for additional information.

(e) Segment net income (loss) for the traditional electric operating companies includes a pre-tax charge for the write-down of Gulf Power's ownership of Plant Scherer Unit 3 of \$33 million (\$20 million after tax) for the six months ended June 30, 2017. See Note 3 to the financial statements of Southern Company under "Regulatory Matters – Gulf Power – Retail Base Rate Cases" in Item 8 of the Form 10-K for additional information.

Southern Company Gas

Southern Company Gas manages its business through four reportable segments – gas distribution operations, gas marketing services, wholesale gas services, and gas midstream operations. The non-reportable segments are combined and presented as all other.

Gas distribution operations is the largest component of Southern Company Gas' business and includes natural gas local distribution utilities that construct, manage, and maintain intrastate natural gas pipelines and gas distribution facilities in seven states. Subsequent to June 30, 2018, Southern Company Gas sold three of its natural gas distribution utilities, Elizabethtown Gas, Elkton Gas, and Florida City Gas. See Note (J) under "Southern Company Gas" for additional information.

Gas marketing services includes natural gas marketing to end-use customers primarily in Georgia and Illinois. On June 4, 2018, Southern Company Gas sold Pivotal Home Solutions. See Note (J) under "Southern Company Gas" for additional information.

Wholesale gas services provides natural gas asset management and/or related logistics services for each of Southern Company Gas' utilities except Nicor Gas as well as for non-affiliated companies. Additionally, wholesale gas services engages in natural gas storage and gas pipeline arbitrage and related activities.

Gas midstream operations primarily consists of Southern Company Gas' pipeline investments, with storage and fuel operations also aggregated into this segment.

The all other column includes segments below the quantitative threshold for separate disclosure, including the subsidiaries that fall below the quantitative threshold for separate disclosure.

PART II — OTHER INFORMATION

Item 1. Legal Proceedings.

See the Notes to the Condensed Financial Statements herein for information regarding certain legal and administrative proceedings in which the registrants are involved.

Item 1A. Risk Factors.

See RISK FACTORS in Item 1A of the Form 10-K for a discussion of the risk factors of the registrants. Except as described below, there have been no material changes to these risk factors from those previously disclosed in the Form 10-K.

Georgia Power may incur additional costs or delays in the construction of Plant Vogtle Units 3 or 4 and may not be able to recover its investments, which could have a material impact on the financial statements of Southern Company and Georgia Power.

Background

In 2009, the Georgia PSC certified construction of Plant Vogtle Units 3 and 4. In 2012, the NRC issued the related combined construction and operating licenses, which allowed full construction of the two AP1000 nuclear units (with electric generating capacity of approximately 1,100 MWs each) and related facilities to begin. Until March 2017, construction on Plant Vogtle Units 3 and 4 continued under the Vogtle 3 and 4 Agreement, which was a substantially fixed price agreement. In March 2017, the EPC Contractor filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy Code.

In connection with the EPC Contractor's bankruptcy filing, Georgia Power, acting for itself and as agent for the Vogtle Owners, entered into the Interim Assessment Agreement with the EPC Contractor to allow construction to continue. The Interim Assessment Agreement expired in July 2017 when Georgia Power, acting for itself and as agent for the other Vogtle Owners, and the EPC Contractor entered into the Vogtle Services Agreement. Under the Vogtle Services Agreement, Westinghouse provides facility design and engineering services, procurement and technical support, and staff augmentation on a time and materials cost basis.

In October 2017, Georgia Power, acting for itself and as agent for the other Vogtle Owners, entered into a construction completion agreement with Bechtel, whereby Bechtel will serve as the primary contractor for the remaining construction activities for Plant Vogtle Units 3 and 4 (Bechtel Agreement). The Bechtel Agreement is a cost reimbursable plus fee arrangement, whereby Bechtel is reimbursed for actual costs plus a base fee and an at-risk fee, which is subject to adjustment based on Bechtel's performance against cost and schedule targets.

In December 2017, the Georgia PSC approved Georgia Power's seventeenth VCM report, which included a recommendation to continue construction of Plant Vogtle Units 3 and 4, with Southern Nuclear serving as project manager and Bechtel serving as the primary construction contractor.

Cost and Schedule

In preparation for its nineteenth VCM filing, Georgia Power requested Southern Nuclear to perform a full cost reforecast for the project. Georgia Power's approximate proportionate share of the remaining estimated capital cost to complete Plant Vogtle Units 3 and 4 by the expected in-service dates of November 2021 and November 2022, respectively, is as follows:

	<i>(in billions)</i>	
Base project capital cost forecast ^{(a)(b)}	\$	8.0
Construction contingency estimate		0.4
Total project capital cost forecast ^{(a)(b)}		8.4
Net investment as of June 30, 2018 ^(b)		(4.0)
Remaining estimate to complete ^(a)	\$	4.4

(a) Excludes financing costs expected to be capitalized through AFUDC of approximately \$350 million .

(b) Net of \$1.7 billion received from Toshiba in 2017 under the Guarantee Settlement Agreement and \$188 million in Customer Refunds recognized as a regulatory liability in 2017.

Georgia Power estimates that its financing costs for construction of Plant Vogtle Units 3 and 4 will total approximately \$3.2 billion , of which \$1.7 billion had been incurred through June 30, 2018.

The \$0.7 billion increase to the base capital cost forecast reflected in the table above primarily results from changed assumptions related to the finalization of contract scopes and management responsibilities for Bechtel and over 60 subcontractors, labor productivity rates, and craft labor incentives, as well as the related levels of project management, oversight, and support, including field supervision and engineering support.

Although Georgia Power believes these incremental costs are reasonable and necessary to complete the project and the Georgia PSC's order in the seventeenth VCM proceeding specifically states that the construction of Plant Vogtle Units 3 and 4 is not subject to a cost cap, Georgia Power does not intend to seek rate recovery for these cost increases included in the current base capital cost forecast (or any related financing costs), which will be filed with the Georgia PSC in the nineteenth VCM report at the end of August 2018. In connection with future VCM filings, Georgia Power may request the Georgia PSC to evaluate costs currently included in the construction contingency estimate for rate recovery as and when they are appropriately included in the base capital cost forecast. After considering the significant level of uncertainty that exists regarding the future recoverability of costs included in the construction contingency estimate since the ultimate outcome of these matters is subject to the outcome of future assessments by management, as well as Georgia PSC decisions in these future regulatory proceedings, Georgia Power has recorded a total pre-tax charge to income of \$1.1 billion (\$0.8 billion after tax), which includes the total increase in the capital cost forecast and construction contingency estimate as of June 30, 2018.

As construction continues, challenges with management of contractors, subcontractors, and vendors; labor productivity, availability, and/or cost escalation; procurement, fabrication, delivery, assembly, and/or installation, including any required engineering changes, of plant systems, structures, and components (some of which are based on new technology that is just beginning initial operation in the global nuclear industry at this scale); or other issues could arise and change the projected schedule and estimated cost.

There have been technical and procedural challenges to the construction and licensing of Plant Vogtle Units 3 and 4 at the federal and state level and additional challenges may arise. Processes are in place that are designed to assure compliance with the requirements specified in the Westinghouse Design Control Document and the combined construction and operating licenses, including inspections by Southern Nuclear and the NRC that occur throughout construction. As a result of such compliance processes, certain license amendment requests have been filed and approved or are pending before the NRC. Various design and other licensing-based compliance matters, including the timely resolution of Inspections, Tests, Analyses, and Acceptance Criteria and the related approvals by the NRC, may arise, which may result in additional license amendments or require other resolution. If any license amendment

requests or other licensing-based compliance issues are not resolved in a timely manner, there may be delays in the project schedule that could result in increased costs.

The ultimate outcome of these matters cannot be determined at this time. However, any extension of the project schedule is currently estimated to result in additional base capital costs of approximately \$50 million per month, based on Georgia Power's ownership interests, and AFUDC of approximately \$12 million per month. While Georgia Power is not precluded from seeking recovery of any future capital cost forecast increase, management will ultimately determine whether or not to seek recovery. Any further changes to the capital cost forecast that are not expected to be recoverable through regulated rates will be required to be charged to income and such charges could be material.

Joint Owner Contracts

In November 2017, the Vogtle Owners entered into an amendment to their joint ownership agreements for Plant Vogtle Units 3 and 4 (as amended, Vogtle Joint Ownership Agreements) to provide for, among other conditions, additional Vogtle Owner approval requirements. Pursuant to the Vogtle Joint Ownership Agreements, the holders of at least 90% of the ownership interests in Plant Vogtle Units 3 and 4 must vote to continue construction if certain adverse events occur, including: (i) the bankruptcy of Toshiba; (ii) termination or rejection in bankruptcy of certain agreements, including the Vogtle Services Agreement or the Bechtel Agreement; (iii) the Georgia PSC or Georgia Power determines that any of Georgia Power's costs relating to the construction of Plant Vogtle Units 3 and 4 will not be recovered in retail rates because such costs are deemed unreasonable or imprudent; or (iv) an increase in the construction budget contained in the seventeenth VCM report of more than \$1 billion or extension of the project schedule contained in the seventeenth VCM report of more than one year. In addition, pursuant to the Vogtle Joint Ownership Agreements, the required approval of holders of ownership interests in Plant Vogtle Units 3 and 4 is at least (i) 90% for a change of the primary construction contractor and (ii) 67% for material amendments to the Vogtle Services Agreement or agreements with Southern Nuclear or the primary construction contractor, including the Bechtel Agreement.

As a result of the increase in the total project capital cost forecast and Georgia Power's decision not to seek rate recovery of the increase in the base capital costs as described in "Cost and Schedule" herein, the holders of at least 90% of the ownership interests in Plant Vogtle Units 3 and 4 must vote to continue construction. The Vogtle Owners are expected to conduct these votes in the third quarter 2018.

If the holders of at least 90% of the ownership interests in Plant Vogtle Units 3 and 4 do not vote to continue construction, the Vogtle Joint Ownership Agreements provide that the project will be cancelled, and construction will cease. In the event that fewer than 90% of the Vogtle Owners vote to continue construction, Georgia Power and the other Vogtle Owners will assess options for Plant Vogtle Units 3 and 4. If Plant Vogtle Units 3 and 4 were cancelled and Georgia Power was unable to recover costs it has incurred in connection with the project, Southern Company's and Georgia Power's results of operations, cash flow, and financial condition would be materially impacted. The ultimate outcome of this matter cannot be determined at this time.

Regulatory Matters

In December 2017, the Georgia PSC voted to approve (and issued its related order on January 11, 2018) Georgia Power's recommendation to continue construction and resolved the following regulatory matters related to Plant Vogtle Units 3 and 4: (i) none of the \$3.3 billion of costs incurred through December 31, 2015 and reflected in the fourteenth VCM report should be disallowed from rate base on the basis of imprudence; (ii) the Contractor Settlement Agreement was reasonable and prudent and none of the amounts paid pursuant to the Contractor Settlement Agreement should be disallowed from rate base on the basis of imprudence; (iii) (a) capital costs incurred up to \$5.68 billion would be presumed to be reasonable and prudent with the burden of proof on any party challenging such costs, (b) Georgia Power would have the burden to show that any capital costs above \$5.68 billion were prudent, and (c) a revised capital cost forecast of \$7.3 billion (after reflecting the impact of payments received under the Guarantee Settlement Agreement and Customer Refunds) was found reasonable; (iv) construction of Plant Vogtle Units 3 and 4 should be completed, with Southern Nuclear serving as project manager and Bechtel as

primary contractor; (v) approved and deemed reasonable Georgia Power's revised schedule placing Plant Vogtle Units 3 and 4 in service in November 2021 and November 2022, respectively; (vi) confirmed that the revised cost forecast does not represent a cost cap and that prudence decisions on cost recovery will be made at a later date, consistent with applicable Georgia law; (vii) reduced the ROE used to calculate the NCCR tariff (a) from 10.95% (the ROE rate setting point authorized by the Georgia PSC in the 2013 ARP) to 10.00% effective January 1, 2016, (b) from 10.00% to 8.30% , effective January 1, 2020, and (c) from 8.30% to 5.30% , effective January 1, 2021 (provided that the ROE in no case will be less than Georgia Power's average cost of long-term debt); (viii) reduced the ROE used for AFUDC equity for Plant Vogtle Units 3 and 4 from 10.00% to Georgia Power's average cost of long-term debt, effective January 1, 2018; and (ix) agreed that upon Unit 3 reaching commercial operation, retail base rates would be adjusted to include carrying costs on those capital costs deemed prudent in the Vogtle Cost Settlement Agreement. The January 11, 2018 order also stated that if Plant Vogtle Units 3 and 4 are not commercially operational by June 1, 2021 and June 1, 2022, respectively, the ROE used to calculate the NCCR tariff will be further reduced by 10 basis points each month (but not lower than Georgia Power's average cost of long-term debt) until the respective unit is commercially operational. The ROE reductions negatively impacted earnings by approximately \$25 million in 2017 and are estimated to have negative earnings impacts of approximately \$100 million in 2018 and an aggregate of \$585 million from 2019 to 2022.

In its January 11, 2018 order, the Georgia PSC also stated if other conditions change and assumptions upon which Georgia Power's seventeenth VCM report are based do not materialize, the Georgia PSC reserved the right to reconsider the decision to continue construction.

On February 12, 2018, Georgia Interfaith Power & Light, Inc. and Partnership for Southern Equity, Inc. filed a petition appealing the Georgia PSC's January 11, 2018 order with the Fulton County Superior Court. On March 8, 2018, Georgia Watch filed a similar appeal to the Fulton County Superior Court for judicial review of the Georgia PSC's final decision and denial of Georgia Watch's motion for reconsideration. Georgia Power believes the two appeals have no merit; however, an adverse outcome in either appeal could have a material impact on Southern Company's and Georgia Power's results of operations, financial condition, and liquidity.

The ultimate outcome of these matters cannot be determined at this time.

See Note (B) to the Condensed Financial Statements under "Nuclear Construction" herein for additional information regarding Plant Vogtle Units 3 and 4.

CONSULTING AGREEMENT

This **CONSULTING AGREEMENT** (“Agreement”) is entered into by and between Southern Company Services, Inc. (the “Company”) and Arthur P. Beattie (“Consultant”).

WITNESSETH:

WHEREAS, the Company desires to retain Consultant to provide certain services to the Company, and Consultant desires to provide such services to the Company, all subject to the terms and conditions set forth herein.

NOW THEREFORE, for and in consideration of the premises, the mutual covenants and agreements contained herein, and for other good and valuable consideration, the receipt, sufficiency and adequacy of which are hereby acknowledged, the parties hereby agree as follows:

1. Engagement as an Independent Consultant.

The Company hereby agrees to engage Consultant as an independent contractor, and Consultant hereby accepts such engagement as an independent contractor, upon the terms and conditions set forth in this Agreement.

2. Term.

The term of this Agreement shall commence on August 1, 2018 and shall expire on December 31, 2018 (“Term”).

3. Duties.

Unless otherwise detailed in a specific letter or memorandum, Consultant shall manage, perform and provide professional consulting services and advice (“Consulting Services”) as the Company may request from time to time. Consultant shall be available to provide Consulting Services for the Company during the Term of this Agreement. The parties expect that Consultant’s work, on average, will not exceed 40 hours per month during the Term of this Agreement. Consultant must obtain prior written approval from an authorized officer of the Company before Consultant contracts with or in any other way employs any agents or subcontractors to perform work in any way related to this Agreement. Consultant shall cause its agents, employees and subcontractors to perform such duties in a professional and competent manner which shall be consistent with the Southern Company Code of Ethics. Additionally, during the Term of this Agreement, Consultant agrees to promote the best interests of the Company and to take no actions that in any way damage the public image or reputation of the Company or its affiliates or to knowingly assist, in any way, a competitor of the Company.

4. Consultant as an Independent Contractor.

In the performance of this Agreement, both Consultant and the Company will be acting in their own separate capacities and not as agents, employees, partners, joint venturers or associates

of one another. It is expressly understood and agreed that Consultant is an independent contractor of the Company in all manners and respects. The parties further agree that:

- (a) Consultant is not authorized to bind the Company to any liability or obligation or to represent that Consultant has any such authority.
- (b) Consultant shall obtain and maintain (at Consultant's own cost) any required insurance or other protection required for the performance of the services under this Agreement.
- (c) Consultant shall be solely and exclusively responsible and liable for all other expenses, costs, liabilities, assessments, taxes, maintenance, insurance, undertakings and other obligations incurred by Consultant at any time and for any reason as a result of this Agreement or the performance of services by Consultant. However, Consultant may be reimbursed for reasonable out-of-pocket expenses in accordance with the Company's policies where prior approval has been received from a Company Officer.
- (d) Consultant shall be solely and exclusively responsible for obtaining and providing (at Consultant's own cost) whatever computer, training, software or other equipment Consultant believes is necessary to complete the services required under this Agreement. Company shall make available to Consultant any Company information or other material determined in the Company's sole discretion to be necessary for Consultant to provide any requested Consulting Services.
- (e) Consultant shall complete the services required under this Agreement according to Consultant's own means and methods of work which shall be in the exclusive charge and control of Consultant and which shall not be subject to the control or supervision of Company, except as to the results of the work.
- (f) Consultant shall not be subject to the Company's employee personnel policies and procedures. Other than as a retired employee of the Company, Consultant also shall not be eligible to receive any employee benefits or participate in any employee benefit plan sponsored by the Company, including, but not limited to, any retirement plan, insurance program, disability plan, medical benefits plan or any other fringe benefit program sponsored and maintained by the Company for its employees.
- (g) The Company and Consultant acknowledge and agree that Consultant shall not provide the services to Company on a full-time basis. Except to the extent restricted under this Agreement, the Consultant may engage in other activities for and on behalf of other clients during the Term of this Agreement.

5. Retainer Fee.

As payment for the Consulting Services rendered pursuant to this Agreement, the Company shall pay, and Consultant shall accept, a retainer fee in the amount of \$400,000.00. The payment of the retainer fee shall be made in five equal installments of \$80,000.00. Each installment will be payable on the first day of each month of the Term of the Agreement, or as soon as practicable after such date.

6. Termination.

The parties to the Agreement may mutually agree in writing to terminate the Agreement prior to the expiration of the Term. The Company may terminate the Agreement for cause if Consultant does not perform Consulting Services under this Agreement in a satisfactory manner that protects the business interests of the Company. This Agreement will terminate automatically on the death of Consultant. Any remaining unpaid retainer fee installments shall be forfeited by Consultant if the Agreement is terminated prior to the expiration of the Term.

7. Confidential Information; Trade Secrets; Ownership of Work Product.

(a) For purposes of this Agreement, the following terms shall have the following respective meanings:

- (1) “Confidential Information” shall mean the proprietary or confidential data, information, documents, or materials (whether oral, written, electronic, or otherwise) belonging to or pertaining to the Company or any current or former subsidiaries or affiliates of The Southern Company (collectively, “Southern Entities”), other than Trade Secrets (as defined below), which is of tangible or intangible value to any of the Southern Entities and the details of which are not generally known to the competitors of the Southern Entities. Confidential Information shall also include: (A) any items that any of the Southern Entities have marked CONFIDENTIAL or some similar designation or are otherwise identified as being confidential; and (B) all non-public information known by or in the possession of Consultant related to or regarding any proceedings involving or related to the Southern Entities before any federal or state regulatory agencies.
 - (2) “Entity or Entities” shall mean any person, business, individual, partnership, joint venture, agency, governmental agency, body or subdivision, association, firm, corporation, limited liability company, or other entity of any kind.
 - (3) “Trade Secrets” shall mean information or data of or about any of the Southern Entities, including, but not limited to, technical or non-technical data, formulas, patterns, compilations, programs, devices, methods, techniques, drawings, processes, financial data, financial plans, product plans, or lists of actual or potential customers or suppliers that: (A) derives economic value, actual or potential, from not being generally known to, and not being readily ascertainable by proper means by, other persons who can obtain economic value from its disclosure or use and (B) is the subject of efforts that are reasonable under the circumstances to maintain its secrecy. Consultant agrees that Trade Secrets include non-public information related to the rate-making process of the Southern Entities and any other information which is defined as a trade secret under applicable law.
 - (4) “Work Product” shall mean all tangible work product, property, data, documentation, concepts or plans, inventions, improvements, techniques, and
-

processes relating to the Southern Entities that were conceived, discovered, created, written, revised, or developed by Consultant conceived, discovered, developed or created by Consultant in performing the Consulting Services pursuant to this Agreement.

- (b) In recognition of the need of the Company to protect its legitimate business interests, Confidential Information, and Trade Secrets, Consultant hereby covenants and agrees that Consultant shall regard and treat Trade Secrets and all Confidential Information as strictly confidential and wholly-owned by the Southern Entities and shall not, for any reason, in any fashion, either directly or indirectly, use, sell, lend, lease, distribute, license, give, transfer, assign, show, disclose, disseminate, reproduce, copy, misappropriate, or otherwise communicate any such item or information to any third party Entity for any purpose other than in accordance with the Agreement or as required by applicable law: (A) with regard to each item constituting a Trade Secret, at all times such information remains a trade secret under applicable law and (B) with regard to any Confidential Information, for a period of three years following the end of the Term of the Agreement.
 - (c) Consultant shall exercise best efforts to ensure the continued confidentiality of all Trade Secrets and Confidential Information and shall immediately notify the Company of any unauthorized disclosure or use of any Trade Secrets or Confidential Information of which Consultant becomes aware. Consultant shall assist the Southern Entities, to the extent necessary, in the protection of or procurement of any intellectual property protection or other rights in any of the Trade Secrets or Confidential Information.
 - (d) All Work Product shall be owned exclusively by the Company. To the greatest extent possible, any Work Product shall be deemed to be work made for hire (as defined in the Copyright Act, 17 U.S.C.A. § 101 et seq., as amended), and Consultant hereby unconditionally and irrevocably transfers and assigns to the Company all right, title, and interest Consultant currently has or may have by operation of law or otherwise in or to any Work Product, including, without limitation, all patents, copyrights, trademarks (and the goodwill associated therewith), trade secrets, service marks (and the goodwill associated therewith), and other intellectual property rights. Consultant agrees to execute and deliver to the Company any transfers, assignments, documents or other instruments which the Company may deem necessary or appropriate, from time to time, to protect the rights granted herein or to vest complete title and ownership of any and all Work Product, and all associated intellectual property and other rights therein, exclusively in the Company.
 - (e) Notwithstanding anything herein to the contrary, nothing in this Agreement will prevent Consultant from providing truthful testimony under oath in a judicial or administrative proceeding or prevent Consultant from providing information to a federal, state, or local agency in connection with the lawful exercise of such agency's functions. Moreover, nothing in this Agreement is intended to prohibit Consultant from engaging in protected activities under applicable law (including protected activities described in Section 211 of
-

the Energy Reorganization Act). Consultant further understands nothing in this Agreement limits Consultant's ability to file a charge or complaint with the Securities and Exchange Commission or any other federal, state or local government agency or commission ("Government Agencies"). Nothing in this Agreement limits Consultant's ability to communicate with any Government Agencies or otherwise participate in any investigation or proceeding that may be conducted by the Government Agency, including providing documents or information without notice to the Company. This Agreement does not limit Consultant's right to receive an award for information provided to any Government Agency.

8. Remedies.

The parties represent and agree that any disclosure or use of any Trade Secrets or Confidential Information by Consultant except as otherwise permitted under this Agreement or authorized by the Company in writing, or any other violation of Section 7, would be wrongful and cause immediate, significant, continuing and irreparable injury and damage to Company that is not fully compensable by monetary damages. Should Consultant breach or threaten to breach any provisions of Section 7, the Company shall be entitled to obtain immediate relief and remedies in a court of competent jurisdiction (including but not limited to damages, preliminary or permanent injunctive relief and an accounting for all profits and benefits arising out of Consultant's breach), cumulative of and in addition to any other rights or remedies to which Company may be entitled by this Agreement, at law or in equity.

9. Return of Materials.

By no later than the end of the Term, Consultant agrees to return to the Company all property of the Southern Entities, including but not limited to data, lists, information, memoranda, documents, identification cards, parking cards, keys, computers, fax machines, pagers, phones, files, and any and all written or descriptive materials of any kind belonging or relating to the Company or any other Southern Entity, including, without limitation, any originals, copies, and abstracts containing any Work Product, intellectual property, Confidential Information, and Trade Secrets in Consultant's possession or control.

10. Laws, Regulations and Public Ordinances.

Consultant shall comply with all federal, state, and local statutes, regulations, and public ordinances governing Consultant's work hereunder and shall indemnify, defend and hold the Company harmless from any and all liability, damage, cost, fine, penalty, fee, and expense arising from Consultant's failure to do so.

11. Notices.

All notices required, necessary or desired to be given pursuant to this Agreement shall be in writing and shall be effective when delivered or on the third day following the date upon which such notice is deposited, postage prepaid, in the United States mail, certified return receipt requested, and addressed to the party at the address set forth below:

If to Consultant:

Arthur P. Beattie
[Home address on file]

If to the Company:

Southern Company Services, Inc.
30 Ivan Allen Jr. Blvd., NW
Atlanta, GA 30308
Attention: Nancy Sykes

12. Indemnification.

Consultant shall and does hereby expressly agree to indemnify and hold harmless the Company, its officers, directors, shareholders, employees, parent, and affiliates against any and all suits, actions, judgments, costs (including, without limitation, all court costs and attorneys' fees), losses, damages, or claims of whatever nature arising out of or related to any acts or omissions of Consultant, Consultant's agents, employees, or subcontractors, including, but not limited to, any injuries to or deaths of persons or any damage to property or equipment. Consultant further agrees to defend any and all such actions in any court or in arbitration.

13. Waiver of Breach.

The waiver of a breach of any provision of the Agreement shall not operate or be construed as a waiver of any other breach. Each of the parties to the Agreement will be entitled to enforce its or his/her rights under the Agreement, specifically, to recover damages by reason of any breach of any provision of the Agreement and to exercise all other rights existing in its or his/her favor.

14. Assignment by Consultant.

Consultant may not assign, transfer or subcontract any of Consultant's rights or obligations under this Agreement to any party without the prior written consent of the Company. Consultant's obligations under this Agreement shall be binding on Consultant's successors and permitted assigns. Any assignment, transfer or subcontracting in violation of this provision shall be null and void.

15. Governing Law.

This Agreement shall be construed and enforced in accordance with the laws of the State of Georgia.

16. Severability.

The unenforceability or invalidity of any particular provision of the Agreement shall not affect its other provisions, and to the extent necessary to give such other provisions effect, they shall be deemed severable. If any of the provisions of the Agreement are determined by any court of law or equity with jurisdiction over this matter to be unreasonable or unenforceable, in whole or in part, as written, the parties hereby consent to and affirmatively request that said court reform the provision so as to be reasonable and enforceable and that said court enforce the provision as reformed. Consultant acknowledges and agrees that the covenants and agreements contained in the Agreement shall be construed as covenants and agreements independent of each

other or any other contract between the parties hereto and that the existence of any claim or cause of action by Consultant against the Company or any Southern Entity, whether predicated upon the Agreement or any other contract, shall not constitute a defense to the enforcement by the Company or any Southern Entity of the covenants and agreements.

17. Interpretation.

The judicial body interpreting the Agreement shall not construe the terms of the Agreement more strictly against one party, it being agreed that both parties and/or their attorneys or agents have negotiated and participated in the preparation hereof.

18. Survival.

Notwithstanding any expiration or termination of this Agreement, the provisions of Sections 8, 10, and 12 through 19 hereof shall survive and remain in full force and effect, as shall any other provision hereof that, by its terms or reasonable interpretation thereof, sets forth obligations that extend beyond the termination of this Agreement.

19. Entire Agreement.

This Agreement embodies the entire agreement of the parties and supersedes all prior agreements between the parties hereto relating to the subject matter hereof. This Agreement may not be modified or amended except by a written instrument signed by both Consultant and an authorized representative of the Company.

[Signatures are on following page.]

IN WITNESS WHEREOF , the undersigned have executed the Agreement on the dates set forth below.

1. I have reviewed this quarterly report on Form 10-Q of Alabama Power Company;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
