Product description

This Valterra 6601 gate valve has 6" female slip connection openings, white PVC (polyvinyl chloride) hubs for resistance to corrosion and mild chemicals, and an acrylonitrile butadiene styrene (ABS) body for dimensional stability and impact resistance. Its shaft, paddle, and handle are made of 304 stainless steel for resistance to corrosion, and its seals are made of thermoplastic vulcanizate (TPV) for dimensional stability and resistance to chemicals. It has a maximum pressure rating of 10 pounds per square inch (psi), a mid-flow maximum pressure rating of 2.5 psi, and a maximum temperature rating of 167 degrees F (75 degrees C). This gate valve measures 31.125 x 11 x 11.125 inches/800 x 279 x 279mm (H x W x D) in a fully open position. (H is height, the vertical distance from bottom to top; W is width, the horizontal distance from left to right; D is depth, the horizontal distance from front to back.) It is suitable for use with landscape and irrigation, pool and spa, aquaculture, and general purpose applications.

Gate valves control flow in a piping system by lifting a gate out of the path of steam, fluids, or gases. They are designed to block or permit flow, as the vibrations and force of flow repeatedly striking a partly lowered gate can damage the gate and seats. To accommodate different flows and pressure requirements, gates come in four types: solid wedge (appropriate for almost all liquid service), flexible wedge (appropriate for steam service), split wedge (appropriate for normal temperature, non-condensing gas and liquid service, including corrosive service), and parallel disc (appropriate for high and low pressure applications). Hand wheels or levers activate the screw mechanism in the valve's bonnet, which comes in various designs, to open and close the gate. Union bonnets are preferable for building service piping, threaded-in (or screw-in) bonnets work well for lighter-duty usage, and bolted body-bonnet connections are used primarily in iron multi-turn valves. Most gate valves have either a rising stem, which moves up and down with the gate, or a non-rising stem, which remains fixed in place. When closed, the gate and its seats form tight planar sealing surfaces, ideal for linear liquid flow. Gate valves are used in air, gas, liquid, and steam applications.

Valterra Products manufactures and distributes valves, hoses, sewer systems, and pool and spa products. The company, founded in 1981, is headquartered in Mission Hills, CA.

Valterra

Valterra PVC Full Port Knife Gate Valves

Designed for quick shut-off in low pressure or vacuum lines. Very inexpensive

Valterra gate valves are ideal for tank drains, wastewater control, septic systems, and other low pressure applications. All models can be rebuilt or resealed without removing the socket end connections.

Valve construction: PVC body with EPDM or comparable seals
Disc material: 3" model: polypropylene; all others: SS
Connections: soc x soc

PIPE SIZE	OVERALL LENGTH	MAX PSI	STOCK #	EACH
2" x 40	3 1/4"	50	18255	\$ 15.99
	4 1/2"	20	18251	20.95
	5 3/16"	18	18252	74.95
	11 1/8"	18	18253	273.95
	13 3/4"	18	18254	384.95

Knife Gate Valve Handle Extensions

Extension shafts for valve sizes 2 to 4" are 1/4" dia aluminum with 1/4"-20NC threaded connectors. Extension shafts for 6 to 8" valves are 5/16" dia SS with 3/16" 18NC threaded connectors. For intermediate sizes, cut a standard model and re-thread one end.

EXTENSION LENGTH	FOR 2" TO 4" VALVES		FOR 6" TO 8" VALVES	
	STOCK #	EACH	STOCK #	EACH
6"	18264	\$ 12.49	18267	\$ 61.95
12"	18266*	23.95	18269*	80.95

Shipping: Additional handling fees apply.

Knife Gate Valves

- SS wetted parts in all models for exceptional corrosion resistance
- Choose from cast-iron wafer style or SS lug style
- Choose from metal or resilient seats

Our handwheel-operated knife gate valves handle a wide variety of fluids in wastewater treatment plants, including sewage, grit and sludge. These wafer- and lug-style valves are commonly used as isolation valves, and can fit into very tight spaces due to their very short face-to-face dimensions.

Choose resilient seat models for zero leakage, or metal seat models for leakage of about 40cc/minute/inch of valve diameter. Wafer-style valves have a cast-iron body and SS gate; lug-style valves have a SS body and gate.

Actuated valves are available as special order. Please contact USABlueBook for more information.

Shipping: All valves 8" and larger ship motor freight.

Valve construction: cast iron or SS
Max psi rating: 150 psi
Application: throttling fluids and sewage
Connections: flanged wafer or lug

Valve Handle Lockouts

- Unique design for easier installation
- Resists chemicals and extreme temperatures

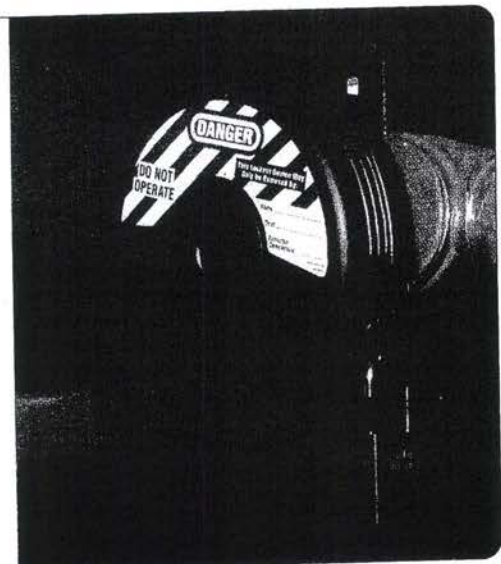

These red valve handle lockouts have a unique rotating design that allows for easier installation in confined spaces. Each lockout allows up to four workers to apply their personal safety locks for protection against accidental valve opening. Each size opens into itself and nests within the next larger size to save space in storage. Tough, lightweight Xenoy® thermoplastic construction resists damage from chemicals and temperatures from -50 to 350°F. Includes an erasable high-visibility safety label for identification and a knockout feature for rising stem valves.

Note: Safety lockout padlocks are not included; purchase separately (see page 1383).

FITS VALVE HANDLE DIA	STOCK #	EACH

Polston Removal Quote

February 20, 2015

Patrick Farrell
Frank Seifert
ESAD Enterprises, LLC
351 Sea Shores Drive
Port St. Joe, FL 32456

REF: Cleaning of the Beaches WWTP in Port St. Joe, FL

Patrick / Frank,

Thank you for the opportunity to provide you a proposal for the sand and grit removal from the Beaches WWTP.

Benefits of Polston Process for *your* Removal:

- Material can be removed in submerged environment.
- High production rate removing material
- Closed loop system, clean operation.
- Limited exposure to confined spaces.
- Minimize overhead loads that are typical of a clam shell operation
- Minimize potential damage exposure to existing structure by not using heavy equipment inside for debris removal

Pricing proposal includes the following:

- Mobilization to facility
- 1 Polston Down Hole Pump Truck and 4 Man Crew with Service Truck
- 1 Polston Pressurized Roll Off Container with Roll off Truck
- Removal of debris from the wastewater plant.
- Optional pricing for disposal offsite to the Springhill Landfill.
- Clean up at completion of project.
- Demobilization from facility

FLORIDA OFFICE
1990 Main Street, Suite 750
Sarasota, FL 34236
(941) 444-1440 / (844) POLSTON Toll Free

www.PolstonProcess.com

MANUFACTURING FACILITY
241 Old Groveton Rd. South
Onalaska, TX 77360
(936) 646-7451

PRICING SCHEDULE:

Beaches WWTP – Onsite Disposal	
Proposal Line Item	Cost
Sand and Grit Removal	\$18,750.00
Lime for onsite disposal	\$260.00
TOTAL	\$19,010.00

Beaches WWTP – Disposal Offsite to Springhill Landfill	
Proposal Line Item	Cost
Sand and Grit Removal	\$18,750.00
Material Testing	\$800.00
Transportation to Springhill Landfill	Est. \$774.00
Disposal – Waste Management – Springhill Landfill Campbellton, FL	Est. \$2,702.00
Disposal – Waste Management Profile Fee	\$50.00
TOTAL	\$23,076.00

Again, thank you for the opportunity to submit a scope and proposal for this project. Pricing for the disposal is an estimated cost to dispose of the systems / generators material removed. Proper testing of the material must be approved by the permitted facility prior to the project starting. Pricing for transportation and disposal of the generators waste is billed at actual from the permitted facility approved for the project. If you have any questions or need clarification on the proposal submitted, please don't hesitate to ask. Thank you for your consideration.

Sincerely,

Richard Smith
Service Account Manager
Polston Applied Technologies

U.S. Submergent Technologies Proposal

May 24, 2018

Frank Siefert
Beaches WWTP
509 4th St
Port St. Joe, Fl. 32457

RE: Sand and Grit Removal from 4 Digester Tanks, 2 Contact Tanks, 2 Clarifier Tanks, and 4 Stabilization Tanks.

Mr. Siefert,

On behalf of U.S. Submergent Technologies (USST), we are pleased to provide this proposal for your consideration to remove accumulated material from the above referenced structure.

Our proposal includes the costs to provide a complete operation of removing, transporting and disposing of the approximated volumes of material to be removed. The Proposal Pricing Schedule (Table 1) summarizes the estimated quantities and unit costs based on our understanding of existing conditions. USST production rates are based on access to structure, distribution of material to be removed across the structure bottom as well as the type and quantity of material to be removed.

The scope of a complete operation for USST includes:

- Mobilization to facility.
- USST Combination³® Truck Service Crew.
- USST Combination³® Truck.
- USST Roll Off Truck (if needed).
- USST will reach and remove material from structures utilizing a combination of vacuum, pumping, jetting and reaching components.
- Proper disposal of material.
- Clean up project site at completion of project.
- Demobilization from facility.

Table 1
PROPOSAL PRICING SCHEDULE

Structure: 4 Digester Tanks, 2 Contact Tanks, 2 Clarifier Tanks, 4 Stabilization Tanks						
Proposal Line Item	QTY	UOM	Unit Cost	EXT. PRICE		
Mobilization to project	1	Ea		Included		
All labor, supervision, material, and equipment for the removal of sand and grit from the tanks listed above	4	Days		Included		
Transportation – Off-site Disposal	4	Per Load		Included		
Material Testing (RCRA – TCLP) ***if required***	1	Ea		N/A		
Disposal Cost – Off-site Material Management	56	Per Ton		Included		
PROPOSAL TOTAL				\$23,500.00		

The pricing proposal schedule shown in Table 1 assumes:

This proposal total is a lump sum price for the estimated amount of material. The quantity of material was estimated for this proposal using a limited number of probes taken along the edge of the structure and other accessible locations. USST will maintain daily performance/production records and provide as necessary.

This proposal assumes the following will be provided by the Owner, if required:

- Proper access for equipment and crew in and around the facility.
- Sufficient suitable water supply for the high-pressure jetting operation (reclaimed is sufficient).
- Proper access including height clearance without obstruction around or in structure so the pump or vacuum head can reach and remove material.
- Warrants that the material will be non-hazardous and is acceptable at selected disposal location.

Should you have any questions or concerns about this proposal, please do not hesitate to contact me directly at (786) 449-6991.

Sincerely,

Randy Cordrey

US Submergent Technologies Quote

December 20, 2017

Mr. Frank Seifert
Owner – Beaches WWTP
509 4th Street
Port St Joe, FL 32457

RE: Sand and Grit Removal – Aerobic Digester #2, Contact Tank #1, Contact Tank #2, Stabilization Tank #1, Stabilization Tank #2

Mr. Seifert,

On behalf of US Submergent Technologies, thank you for the opportunity to submit a proposal to remove accumulated sand and grit from the above referenced tanks at the WWTP. Due to the nature of this work and the unknown quantity and conditions of the material, USST is providing day rates for our technology and service crew. We have estimated an approximate quantity to indicate a projected size and duration of the project. This is based on our understanding of the project having an anticipated amount of accumulated sand and grit built up in the structures that needs to be removed as detailed in the attached line item budget. This budget is for planning purposes only as an anticipated maximum cost.

Please find attached an estimate to provide a complete operation of removing, transport of waste material, and disposal at a location designated by you.

Benefits of US Submergent Technologies for *your* Removal:

- Material can be removed in submerged environment.
- High production rate removing material in large structures.
- Closed loop system, clean operation.
- Limited exposure to confined spaces.
- Minimize overhead loads that are typical of a clam shell operation

Based on our understanding, the scope of the project includes:

- Mobilization to facility.
- US Submergent Service Crew.
- US Submergent Combination³ Truck.
- US Submergent Roll Off Truck (if needed).
- US Submergent will remove accumulated material from the tanks and structures utilizing the 49' remote knuckle boom crane and down-hole hydraulic pump system.
- Transportation of material to designated location for disposal.
- Clean up project site at completion of project.
- Demobilization from facility

December 20, 2017

Page 2

PRICING SCHEDULE

Tank Description: Aerobic Digester #2, Contact Tank #1, Contact Tank #2, Stabilization Tank #1 and #2						
Proposal Line Item	QTY	UOM	Unit Cost	EXT. PRICE		
Mobilization to project	1	Ea	\$3500	\$3500		
All labor, supervision, material, and equipment for the removal of sand and grit from the tanks listed above	1.5	Days	\$7500	\$11,250.00		
Transportation – Off-site Disposal	0	Per Load	\$0	\$0		
Material Testing (RCRA – TCLP) ***if required***	0	Ea	\$800.00	\$0		
Disposal Cost – On-site Material Management	0	Per Ton	\$0	\$0		
TOTAL				\$14,750.00		

This project is being presented as a unit price proposal. All line items will be billed at the unit price provided in the above pricing schedule for the project. This is a maximum estimate based upon the amount of material measured by manual probing of the tanks. Production rates are based upon similar projects and conditions. ACTUAL costs will be based upon the amount of material removed from tanks and the time required to remove it based on daily production performance records submitted to the Owner. This price is good for 30 days and is contingent upon receiving a signed purchase order no later than close of business on December 26, 2017 to allow the work to proceed that week.

Our estimate assumes the Owner will supply:

- Proper access for the equipment in and around the facility
- Sufficient suitable water supply for the high pressure jetting operation (reclaimed is sufficient) as needed
- Proper access for the pump/vacuum heads of the US Submergent process
- Access for tankers and/or roll off trucks
- Client warrants that the material will be non-hazardous
- The cost is based upon 1.5 days of crew and equipment, focused primarily on the tanks in question

Should you have any questions, or need clarification on this proposal, please do not hesitate to contact me directly at (850) 566.9191.

Sincerely,

Michael Edgar

✈ GENERATOR PROPOSAL (Project: Port St. Joe Treatment Plant)

I appreciate the opportunity to provide the following quotation for your consideration.

→ **TAYLOR Model TMC28:** Engine Driven Generator Set
Rated: 28 Kw, EPA Stationary Standby, 120/240 Volt, 3 Phase Delta, 60 Hz

Unit Features:

- ▶ **Perkins Engine**
 - FLEX
 - Heavy Duty Air Cleaner w/Service Indicator
 - 50 C Ambient Radiator
 - Electronic Isochronous Governor with 0.25% Frequency Regulation
- ▶ **Stamford Alternator**
 - Brushless Rotating Field Generator with Class H Insulation
 - 1% AVR
 - Tropical Coating
- ▶ **Circuit Breaker**
 - 90 Amp, T2 Frame, 100% Rated, Thermal Magnetic Trip, Main Line Circuit Breaker
- ▶ **TAYLOR Analog Control Panel**

Taylor Power Systems Analog Auto Start Control Panel. The panel is equipped with AC Voltmeter, AC Frequency Meter, Percent of Load Meter, Running Time Meter, Control Toggle Switch with Off/Auto/Manual positions, and ECU-9988 engine control with specific safety shutdown lights. Oil Pressure Gauge, Water Temperature Gauge, Battery Voltmeter, Fuel Level Gauge, and Hourmeter
- ▶ **Heavy Duty Integral Vibration Isolators between Engine/Alternator and Base**
- ▶ **Oil Drain Kit (Oil Drain Piped to Edge of Skid w/Valve)**
- ▶ **Lube Oil & Antifreeze (Initial Fill)**
- ▶ **Battery Rack & Cables**
- ▶ **TMC Skid Base**

FAITH

VISION

WORK

- ▶ **100 Amp Female Cam-lock Receptacles Mounted**
- ▶ **Flex Fuel Lines**
- ▶ **120V, 530W Block Heater**
- ▶ **Coolant Drain Kit (Coolant Drain Piped to Edge of Skid w/Valve)**
- ▶ **12V Lead Acid Battery, 450CCA**
- ▶ **Battery Disconnect Switch**
- ▶ **Standard Weather Proof Enclosure w/Internal Critical Silencer & Stainless Flex**
 - Heavy Duty 14 Ga. Galvanneal Steel
 - Peaked Roof
 - Lockable Doors
 - Stainless Steel Hinges Hardware & Door Holdbacks
 - Powder Coat Finish
- ▶ **100 Gallon SW Integral Tank Trailer**
 - 5000 LB Single Axle
 - 2-5/16" Ball Hitch

Misc:

- ▶ **One Hour Factory Load Bank Test**
- ▶ **Standard 2 Year Limited Warranty**
- ▶ **Standard Start-Up Inspection (1 Trip)**
- ▶ **(1) Electronic O&M Manual**

Net Unit Price.....\$ 23,756.00

Note: Quoted price does not include any applicable taxes, fees, or rigging.

Freight: Included (Does not include off-loading generator)

Terms: Net 30 days with approved credit

Delivery: Approximately 11-13 weeks after order process is complete.

*Quote valid for **30** days. Created on **03/22/17**

Only items listed in quotation are included in price.

An extra 3% is applied to all credit card charges.

Thank you for this opportunity and please contact me if you have any questions or need additional information.

Sincerely,

Paul Davenport

Gulf County St Joe Beach

Job Site: Sea Shore Drive

St. Joe Beach, FL.

850-229-9292

September 28, 2018

We propose to perform the scope of work stated in this proposal:

Scope of Work:

- A. Labor and materials necessary to install (2) owner furnished Grinder pumps in the existing basin. We will install the owner furnished pumps, rail system, Electric panel, and floats. We will remove the existing pumps and old rail system and haul off job site. Owner will provide the pump out truck to be on site until pumps are working to remove the sewage as we install pumps and rail system. We will make the wiring connections to the provided panel. **No warranty on owner furnished pumps, Rail system, or panel. We will perform the work on a Tuesday or Wednesday during normal working hours.**

Any additional work required to get pumps or panel working will be completed at time and materials

(1)-Year warranty on M & L Plumbing connections only

We will complete the scope of work for the price of: \$6,450.00

Sea Shore Drive

Payment to be made as follows: 100% due upon completion.

NOTE: Before any work can be schedule we must have a copy of signed acceptance of proposal.

All work to be performed in a quality manner according to standard practice. Any alteration or deviation from the above specification involving extra costs will be executed only upon written orders, and will become an extra charge over and above the estimate. All material and work installed will have a one (1) year warranty unless otherwise stated. All contract agreements will be voided under delays or accidents that are beyond our control. Owner will need to carry fire, tornado and other necessary insurance. All M & L Plumbing, Inc. employees are covered by workers compensation insurance.

ACCOUNTS PAST DUE AFTER 15 DAYS: If the invoice for services and materials is not paid in full when due, customer agrees to pay: interest on the unpaid balance, at the rate of 1 1/2% per month from the date payment is due; and all costs and expenses of collection including, but not limited to, reasonable attorney's fees (whether or not suit is filed and including all trial and appellate court proceedings).

Authorized by: _____

M & L Plumbing, Inc. may void this proposal if not accepted in 30 days.

ACCEPTANCE OF THIS PROPOSAL

I have read and understand this proposal and the payment plan listed above. I hereby accept and authorize the work stated in this proposal.
