RE: 2019 Proposed TECO Rate INCREASE (Vote it down).

Florida Public Service Commissioner ^{Polmann} of March 5, 2018
The TECO raise vote increase need to be

voted down by the current PSC Commission. Also, All current PSC Commissioners need to be removed and stronger, Faurea and know-kissing ASS rubber stamp PSC members need to be unamed. Give you AN EXAMPLE, using TECO bills, TECO has asked and received three rate increase in 2018 from the PSC Jan. 2018, Sept. 2018 and Jan. 2019 (which TECO claims is a decrease in 13 years which is a mother fucking lie). I had a bill dispute with TECO in 2012, I have the bill and the first 1000 kWh was 05533, its 05787 in 2019. lastly, on Jan. 17, 2019, the Tampa Bay Times reported TECO has asked the Florida PSC for another rate increase which if approved will be effective in April 2019. The TECO consumer bill will go from 99.53 to 103.58. ~~Is~~ Is this the work of stronga and fairer Florida PSC, hell no! Its the work of a weak rubber stamp Florida PSC, vote the rate increase down, this is desoll stealing by TECO and the PSC. Ricky A. Bell

Tampa Electric seeks rate hike

Pointing to higher-than-expected natural gas costs, Tampa Electric Co. on Tuesday asked state regulators to approve an increase in customer bills that would take effect in April, the News Service of Florida reported. The request stems from a process that involves utilities passing through power-plant fuel costs to customers. The state Public Service Commission each fall approves fuel costs that will be charged during the coming year. But utilities can seek changes if the estimates are off by more than 10 percent. Tampa Electric on Tuesday said higher-than-expected gas costs would lead to such an "under-recovery" of money in 2019. As a result, it is seeking to increase customer bills, with the proposal translating to about a 4 percent increase for typical residential customers. Under the proposal, residential customers who use 1,000 kilowatt hours of electricity a month — a common benchmark in the utility industry — would see their bills go from \$99.53 to \$103.58 in April. The Public Service Commission could take up the issue in March. Tampa Electric has about 750,000 customers in west-central Florida.

Lower bills coming in January

Beginning in January, your bill will reflect Tampa Electric's lowest rates in 13 years. The average residential bill is dropping more than \$8 a month, or about 8 percent. Small and mid-size business bills also are dropping about 8 percent. The decrease, approved by the Florida Public Service Commission, is a result of certain factors of the bill going down and others going up. Costs going down include fuel and the benefits from the previously approved tax reform. Costs going up are base rates for increased solar and conservation programs. Overall, Tampa Electric bills are decreasing and remain among the lowest in Florida.
