**VIA E-PORTAL FILING**

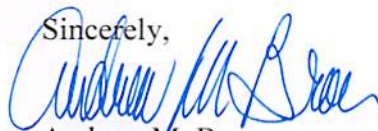

Ms. Carlotta S. Stauffer  
Commission Clerk  
Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, Florida 32399-0850

Re: Docket No. 20180186-GU- Petition for approval of demand side management goals and residential customer assisted and commercial walk-through energy audit programs, by Peoples Gas System

Dear Ms. Stauffer:

Attached for electronic filing in the above docket on behalf of Peoples Gas System, please find its Clarification of Demand Side Management ("DSM") Program Descriptions and Standards. Peoples Gas System ("Peoples" or "the company"), filed a petition to the Florida Public Service Commission ("Commission") for approval of the company's proposed Demand Side Management ("DSM") goals, Residential Customer Assisted (Online) and Commercial Walk-Through Energy Audit DSM programs on October 15, 2018 (Docket No. 20180186-GU). The Residential Customer Assisted (Online) and Commercial Walk-Through Energy Audit DSM programs descriptions also included the associated programs standards for these two DSM programs within the Petition and were included within Exhibit's B and C respectively. To provide clarification, Peoples Gas System is submitting these revised Bate Stamped Pages 79, 82 and 83 for those pages within Exhibits B and C of the Petition and clarification of the changes.

Your assistance in this matter is greatly appreciated.

Sincerely,  
  
Andrew M. Brown

Mr. Mark R. Roche

**Program: Residential Customer Assisted Energy Audit**

**Program Start Date:** TBD

**Program Description**

A conservation program designed to save energy by increasing residential customer awareness of natural gas energy use in personal residences. This program allows for residential customers to engage in an online energy audit. Savings are dependent on the customer implementing energy conservation measure and practice recommendations. Recommendations provided to the customer includes an estimated range of energy savings including insightful advice on how to manage their overall energy usage.

To access this free audit, customers can participate by either logging in to Peoples Gas customer portal and completing the survey utilizing their actual historical natural gas usage or can complete the energy audit without logging in and using values the customer enters. Personalized audit results are immediately displayed on the customer's computer for review and implementation. The audit recommendations are based on the customers' answers to the questions and their actual energy consumption.

**Program Participation Standards**

Program Standards are being submitted concurrently with this DSM Program Description.

**Program Savings**

Program savings from the Residential Customer Assisted Energy Audit primarily come from behavioral savings. Because the savings primarily come through behavioral type changes and action taken by a customer to install a natural gas measure would likely be captured in another of the company's DSM programs. The savings per participant are as follows:

Annual Energy: 0.000 Therms

**Program Costs**

Based on projected costs, the administrative cost per audit is estimated to be \$10. There are no rebates or incentives for this program.

**Program Monitoring and Evaluation**

Peoples Gas System will monitor, evaluate and report the results of this program through the company's annual Demand Side Management filings to the Commission.

**Program: Commercial Walk-Through Energy Audit**

**Program Start Date:** TBD

**Program Description**

A conservation program designed to reduce demand and energy consumption of commercial/industrial facilities by increasing customer awareness of the energy use in their facilities. The savings are dependent upon the customer's implementation of conservation measures and practices recommended.

The audit is conducted by a trained commercial energy auditor who will perform at a minimum the following:

1. Identify, note and recommend only those conservation measures and practices that apply to the specific commercial or industrial facility.
2. Encourage customer and organization participation in available conservation programs in which the specific commercial facility will benefit.
3. Energy usage profiling and benchmarking showing the historical energy usage and forecasted usage with no changes.
4. Identify and communicate to the customer identified no-cost, low-cost and capital cost conservation measures and practices including those that have less than a two-year payback.

Recommendations are tailored to the specific commercial facility based upon the replacement of less efficient equipment and systems or modifications to operations to enhance the customer's overall efficiency. Recommendations are primarily standardized and encourage the customer to implement measures that, if cost-effective, move the customer beyond the efficiency level typically installed in the marketplace.

**Program Participation Standards**

Program Standards are being submitted concurrently with this DSM Program Description.

**Program Savings**

Program savings from the Commercial Walk-Through Energy Audit primarily come from behavioral savings. Because the savings primarily come through behavioral type changes and action taken by a customer to install a natural gas measure would likely be captured in another of the company's DSM programs. The savings per participant are as follows:

Annual Energy: 0.0 Therms

### **Program Costs**

Based on projected costs, the administrative cost per audit is estimated to be \$180. There are no rebates or incentives for this program.

### **Program Monitoring and Evaluation**

Peoples Gas System will monitor, evaluate and report the results of this program through the company's annual Demand Side Management filings to the Commission.
