Re: Fuel and Purchased Power Cost Recovery Clause with Generating  
Performance Incentive Factor; FPSC Docket No. 20190001-EI

Dear Mr. Teitzman:

Enclosed for filing in the above docket are the original and seven (7) copies of Tampa Electric Company's Request for Confidential Classification of certain highlighted information contained in the company's 2018 Hedging Activity True-Up, identified as Exhibit \_\_\_ (JBC-1) of witness J. Brent Caldwell.

Please acknowledge receipt and filing of the above by stamping the duplicate copy of this letter and returning same to this writer.

Thank you for your assistance in connection with this matter.

Sincerely,

  
James D. Beasley

DOCKET NO. 20190001-EI

FILED: April 3, 2019

**TAMPA ELECTRIC COMPANY'S  
REQUEST FOR CONFIDENTIAL CLASSIFICATION**

Tampa Electric Company (“Tampa Electric” or “the company”), pursuant to Section 366.093, Florida Statutes, and Rule 25-22.006, Florida Administrative Code, hereby requests confidential classification of the highlighted information on pages 12 and 14 of the company’s 2018 Hedging Activity True-Up (“the Report”) filed this date on a confidential basis in the above docket, with the duration of that confidential classification to be a minimum of three years. In support of its request, Tampa Electric states as follows:

1. Subsection 366.093(1), Florida Statutes, provides that any records “found by the Commission to be propriety confidential business information shall be kept confidential and shall be exempt from s. 119.07(1) [requiring disclosure under the Public Records Act].” Proprietary confidential business information includes, but is not limited to “[i]nformation concerning . . . contractual data, the disclosure of which would impair the efforts of the public utility or its affiliates to contract for goods or services on favorable terms.” Subsection 366.093(3)(d), Florida Statutes. Proprietary confidential business information also includes “[i]nformation relating to competitive interests, the disclosure of which would impair the competitive business of the provider of the information.” Subsection 366.093(3)(e), Florida Statutes. The designated portions of the Report fall within these statutory categories and, thus, constitute propriety confidential business information entitled to protection under Section 366.093 and Rule 25-22.006.

2. Disclosure of the highlighted information on pages, 12 and 14 of the Report would disclose Tampa Electric's current purchasing strategy (both with respect to fuel and purchased power) and risk exposure. Those who have an interest in supplying Tampa Electric's fuel and purchased power needs could use this valuable information to help them negotiate more favorable terms, to the detriment of Tampa Electric and its ratepayers, than would otherwise be the case. They could learn of the company's plans and needs and use that information in exacting better prices for meeting those needs.

3. Disclosing the company's risk exposure levels on a monthly basis would provide an indicator of vulnerability to market price. Would-be suppliers of both fuel and purchased power could simply withhold supply and price their fuel and purchase power offerings at a higher level than they would otherwise. Power suppliers could perform maintenance on their units during months when the company's exposure is low, so that they would have their power to sell through at high prices during months that Tampa Electric's exposure is high.

4. Disclosure of the highlighted information in the Report would also provide highly sensitive information to recipients regarding the manner and timing of Tampa Electric's entry into the fuel and purchased power markets. Knowledge of this information would allow the opportunity for market manipulation through transactions made in anticipation of the company's entry into the market. Market manipulations based on knowledge of the highlighted information would increase the price of fuel and purchased power paid by Tampa Electric's customers as well as the price paid by the company to hedge the customers' price of fuel and purchased power. These effects of disclosure would impair the efforts of Tampa Electric to contract for goods and services on favorable terms for the benefit of its customers.

5. The highlighted contractual fuel price information shown in the Report represents contract prices that are less than two years old, within the period of time that contract prices are typically protected to preserve the company's competitive position in negotiating fuel supply contracts. Any contract price shown in the Report without highlighting represents an older, and therefore no longer competitively sensitive, price. Disclosing Tampa Electric's highlighted actual contractual fuel prices and the market indexes upon which fuel contract prices are based would impair Tampa Electric's future efforts to contract for goods and services on favorable terms. The information could be used by suppliers to affect the price of fuel that Tampa Electric will need to purchase in the future since the provider's bids might be influenced if they had knowledge of existing contract rates. Knowledge of this information would allow fuel suppliers to use this valuable information to help them negotiate more favorable terms, to the detriment of Tampa Electric and its ratepayers, than would otherwise be the case.

6. The highlighted information contained in the company's Report for which confidential classification is sought is intended to be and is treated by Tampa Electric as private and has not been publicly disclosed.

7. On August 1, 2018 in Order No. PSC-2018-0379-CFO-EI, the Commission granted Tampa Electric's Request for Confidential Classification of portions of the company's Hedging Activity True-Up Report filed on April 3, 2018 with respect to the same information for which Confidential Classification is sought in the Report filed this date.

**Requested Duration of Confidential Classification**

8. Tampa Electric requests that the Report be treated by the Commission as confidential proprietary business information for a minimum of three years. This Report provides detailed strategies many of which are of a continuing nature and which could well be in

place beyond the standard eighteen-month period that confidential information is treated by the Commission as such. The various risk management strategy components build upon each other and disclosing the company's basic plan sooner than three years after it is submitted would arm would-be suppliers of goods and services, as well as competitors of Tampa Electric, with the bulk of the company's risk management strategies. A minimum of three years is essential to prevent those entities in the fuel and purchased power markets from having access to information they could use to the competitive disadvantage of Tampa Electric, which would increase the fuel and purchased power costs borne by Tampa Electric's customers.

WHEREFORE, Tampa Electric respectfully requests that the highlighted information set forth on pages 12 and 14 of the company's Report be accorded confidential classification for the reasons set forth above.

DATED this 3<sup>rd</sup> day of April 2019.

Respectfully submitted,

JAMES D. BEASLEY
