Matthew R. Bernier ASSOCIATE GENERAL COUNSEL

May 1, 2019

VIA ELECTRONIC DELIVERY

Mr. Adam Teitzman, Commission Clerk Florida Public Service Commission 2540 Shumard Oak Boulevard Tallahassee, Florida 32399-0850

Re: Energy Conservation Cost Recovery Clause/ Docket No. 20190002-EG

Dear Mr. Teitzman:

On behalf of Duke Energy Florida, LLC ("DEF"), please find enclosed for electronic filing in the above-referenced docket:

- DEF's Petition for Approval of True-Up Amount for the period January 2018 through December 2018; and
- Direct Testimony of Lori Cross with attached Exhibit No. (LJC-1T).

Thank you for your assistance in this matter. Please feel free to call me at (850) 521-1428 should you have any questions concerning this filing.

Sincerely,

s/ Matthew R. Bernier

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In Re: Energy Conservation Cost Recovery Clause

Docket No. 20190002-EG

Filed: May 1, 2019

DUKE ENERGY FLORIDA, LLC PETITION FOR APPROVAL OF TRUE-UP AMOUNT

Pursuant to Order No. PSC-2019-0082-PCO-EG, issued February 26, 2019 in the above-referenced docket, Duke Energy Florida, LLC ("DEF" or "the Company") petitions the Florida Public Service Commission ("Commission") for approval of an under-recovery of \$2,335,393 as DEF's adjusted net true-up amount for the period January 2018 through December 2018. In support of this petition, DEF states:

1. The name and address of the affected agency are:

Florida Public Service Commission 2540 Shumard Oak Boulevard Tallahassee, Florida 32399-0850

2. The Petitioner's name and address are:

Duke Energy Florida, LLC 299 First Avenue North St. Petersburg, Florida 33701

Notices, orders, pleadings and correspondence to be served upon DEF in this proceeding

should be directed to:

Dianne M. Triplett Deputy General Counsel Duke Energy Florida 299 1st Avenue North St. Petersburg, FL 33701 (727) 820-4692 telephone Dianne.Triplett@duke-energy.com Matthew R. Bernier Associate General Counsel Duke Energy Florida 106 East College Avenue, Suite 800 Tallahassee, FL 32301 (850) 521-1428 telephone Matthew.Bernier@duke-energy.com 3. DEF is a public utility subject to the Commission's jurisdiction pursuant to Chapter 366, Florida Statutes. Pursuant to Section 366.82, Florida Statutes, and Rule 25-17.015, Florida Administrative Code, DEF recovers its reasonable and prudent unreimbursed costs for conservation audits, conservation programs and implementation of DEF's conservation plan through the Energy Conservation Cost Recovery ("ECCR") clause. DEF has substantial interests in the proper calculation and recovery of its ECCR factor and the final true-up which is used in the computation of the ECCR factor.

4. DEF seeks Commission approval of an under-recovery of \$2,335,393 as the adjusted net true-up amount for the period January 2018 through December 2018. DEF's final adjusted net true-up amount for the period January 2018 through December 2018 was calculated consistently with the methodology set forth in Schedule 1 attached to Commission Order No. 10093, dated June 19, 1981. This calculation and supporting documentation are contained in Exhibit No. (LJC-1T), an exhibit attached to the prefiled testimony of DEF's witness Lori J. Cross, which is being filed in conjunction with this petition.

5. As reflected on Schedule CT-1 of Exhibit No. ___(LJC-1T) to Ms. Cross' testimony, the adjusted net true-up for the period January 2018 through December 2018 is an under-recovery of \$2,335,393, which is the difference of the actual true-up over-recovery of \$5,979,386 and the estimated/actual true-up over-recovery of \$8,314,779.

WHEREFORE, DEF respectfully requests that the Commission approve an under-recovery of \$2,335,393 as the final adjusted net true-up amount for the period January 2018 through December 2018.

2

Respectfully submitted,

/s/ Matthew R. Bernier

Dianne M. Triplett Deputy General Counsel Duke Energy Florida 299 1st Avenue North St. Petersburg, FL 33701 (727) 820-4692 telephone Dianne.Triplett@duke-energy.com Matthew R. DOCKET NO. 20190002-EG

Energy Conservation and Cost Recovery Final True-up for the Period January through December 2018

DIRECT TESTIMONY OF Lori J. Cross

May 1, 2019

Q. Please state your name and business address.

A. My name is Lori Cross. My business address is 299 First Avenue North, St.
 Petersburg, FL 33701.

Q. By whom are you employed and in what capacity?

A. I am employed by Duke Energy Business Services, LLC, as Strategy & Collaboration Director in the Customer Programs Department. Duke Energy Business Services and Duke Energy Florida, LLC ("DEF" or the "Company") are both wholly owned subsidiaries of Duke Energy Corporation.

10

11

1

2

3

4

5

6

7

8

9

Q. What are your duties and responsibilities in that position?

A. My responsibilities include regulatory planning, support and compliance of
 the Company's energy efficiency and demand-side management ("DSM")
 programs. This includes support for development, implementation and
 training, budgeting and accounting functions related to these programs.

16

1

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to compare DEF's 2018 actual energy conservation program costs with actual revenues collected through the Company's Energy Conservation Cost Recovery ("ECCR") Clause during the period January 2018 through December 2018. The Company relies upon the information presented in my testimony and exhibit in the conduct of its affairs.

8

9

18

19

20

21

22

23

Q. For what programs does Duke Energy Florida seek recovery?

A. DEF seeks recovery through the ECCR Clause for conservation programs approved by the Commission as part of the Company's DSM Plan, as well as for Conservation Program Administration (i.e., those common administration expenses not specifically assigned to an individual program). Notably, DEF seeks recovery of costs for conservation programs approved by the Commission on August 20, 2015 (see Order No. PSC-15-0332-PAA-EG), as follows:

- 17 H
 - Home Energy Check
 - Residential Incentive
 - Neighborhood Energy Saver
 - Low-Income Weatherization Assistance Program
 - Load Management (Residential and Commercial)
 - Business Energy Check
 - Better Business

1		Florida Custom Incentive
2		Standby Generation
3		Interruptible Service
4		Curtailable Service
5		Technology Development
6		Qualifying Facility
7		
8	Q.	Do you have any exhibits to your testimony?
9	Α.	Yes, Exhibit No(LJC-1T) entitled, "Duke Energy Florida, LLC Energy
10		Conservation Adjusted Net True-Up for the Period January 2018 through
11		December 2018." There are six (6) schedules included in this exhibit.
12		
13	Q.	Will you please explain your exhibit?
14	А.	Yes. Exhibit No(LJC-1T) presents Schedules CT-1 through CT-6.
15		Schedules CT-1 to CT-4 set out actual costs incurred for all programs during
16		the period from January 2018 through December 2018. These schedules also
17		illustrate variances between actual costs and previously projected values for
18		the same time period. Schedule CT-5 provides a brief summary of each
19		conservation program that includes a program description, program
20		accomplishments, annual program expenditures, significant program cost
21		variances versus projections, and a program progress summary over the
22		twelve-month period ending December 2018. Schedule CT-6 is DEF's capital
23		structure and cost rates.

- 3 -

2

3

4

1

Q. Would you please discuss Schedule CT-1?

 A. Yes. Schedule CT-1 line 14 shows that DEF's actual end-of-period ECCR true-up for December 31, 2018 was an under-recovery of \$2,335,393, including principal and interest.

5

6

Q. What does Schedule CT-2 show?

 A. The four pages of Schedule CT-2 provide an annual summary of conservation program revenues as well as itemized conservation program costs for the period January 2018 through December 2018 detailing actual, estimated and variance calculations by program. These costs are directly attributable to DEF's Commission-approved programs.

12

13

Q. Would you please discuss Schedule CT-3?

A. Yes. Page one of Schedule CT-3 provides actual conservation program
costs by month for the period January 2018 through December 2018. Page
two of Schedule CT-3 presents program revenues by month offset by
expenses, and a calculation of the end of period net true-up for each month
and the total for the year. Page three provides the monthly interest
calculation. Pages four and five of Schedule CT-3 provide conservation
account numbers for the 2018 calendar year.

- 21
- 22

Q. What is the purpose of Schedule CT-4?

1	А.	The five pages of Schedule CT-4 show monthly capital investment,
2		depreciation and return for each applicable conservation program.
3		
4	Q.	Would you please discuss Schedule CT-5?
5	Α.	Yes. Schedule CT-5 provides a brief summary of each conservation
6		program that includes a program description, program accomplishments,
7		annual program expenditures, significant program cost variances versus
8		projections, and a program progress summary for the 2018 calendar year.
9		
10	Q.	What is the purpose of Schedule CT-6?
11	Α.	Schedule CT-6 is the capital structure and cost rates used to calculate the
12		return for each applicable conservation program.
13		
13 14	Q.	What is the source of data used to calculate the true-up amount.
	Q. A.	What is the source of data used to calculate the true-up amount. The actual data used in calculating the actual true-up amounts is from DEF's

FPSC Docket No. 20190002-EG Duke Energy Florida, LLC Witness Lori J. Cross EXHIBIT NO. 1 (LIC-1T) SCHEDULE CT-4 PAGE 5 OF 5 May 1, 2019

Program Title: Home Energy Check Program

Program Description: The Home Energy Check Program is a residential energy audit program that provides customers with an analysis of their energy consumption as well as educational information on how to reduce energy usage and save money. The audit provides Duke Energy Florida, LLC (DEF) an opportunity to promote and directly install cost-effective measures in customer homes and educate and encourage customers to implement energy-saving practices. The Home Energy Check Program is the foundation for other residential demand side management programs and offers the following types of energy audits:

- Type 1: Free Walk-Through (computer assisted)
- Type 2: Customer Online (Internet Option)
- Type 3: Customer Phone Assisted
- Type 4: Home Energy Rating (BERS/HERS) Audit

The Home Energy Check Program provides residential customers with energy efficiency tips and examples of easily installed energy efficiency measures. The program promotes continued customer involvement by demonstrating sustainable and measurable reductions in energy usage through the implementation of low-cost energy efficiency measures and energy saving recommendations. Participants in the program may receive a residential Energy Efficiency Kit that contains energy saving measures that can be easily installed and utilized by the customer. Contents of this kit are evaluated periodically and may change over time.

Program Accomplishments - January 2018 - December 2018:

34,900 customers participated in the Home Energy Check Program.

Program Fiscal Expenditures - January 2018 - December 2018:

Expenses for this program were \$4,852,689.

Program Progress Summary:

946,505 participants have participated in the Home Energy Check Program since inception. DEF will continue to leverage this program to educate customers about cost-effective energy efficiency measures they can implement and incentives available for home energy improvements for which they may be eligible.

Docket No. 20190002-EG Duke Energy Florida, LLC Witness Lori J. Cross EXHIBIT NO. 1 (LJC-1T) SCHEDULE CT-5 Page 2 of 15

Program Title: Residential Incentive Program

Program Description: The Residential Incentive Program provides incentives to customers for energy efficiency improvements for both existing and new homes. The Residential Incentive Program includes incentives for measures such as duct testing, duct repair, attic insulation, replacement windows, high efficiency heat pump replacing resistance heat, high efficiency heat pump replacing a heat pump, and newly constructed Energy Star homes.

Program Accomplishments - January 2018 - December 2018:

26,201 measures were implemented through this program resulting in a savings of 7.8 Summer MW's, 15.3 Winter MW's and 11.2 GWH's.

Program Fiscal Expenditures - January 2018 - December 2018:

Expenses for this program were \$8,267,588.

Program Progress Summary:

1,040,726 measures have been implemented through this program. This program will continue to be offered to residential customers to provide opportunities for improving the energy efficiency of existing and new homes.

Program Title: Neighborhood Energy Saver Program

Program Description: DEF's Neighborhood Energy Saver program is designed to provide energy saving education and assistance to low income customers. This program targets neighborhoods that meet certain income eligibility requirements. DEF installs energy saving measures in approximately 4,500 homes and provides home energy reports to approximately 15,000 customers who have participated in the program. These home energy reports provide information about energy efficiency and continue the engagement with customers around low-cost energy saving measures that can deliver additional energy and bill savings.

Program Accomplishments - January 2018 - December 2018:

Energy efficiency measures were installed on 4,486 homes and home energy reports were provided to 16,420 customers.

Program Fiscal Expenditures - January 2018 - December 2018:

Expenses for this program were \$2,333,088.

Program Progress Summary:

Since program inception, DEF has installed energy efficiency measures on 38,002 homes and has provided 47,972 home energy reports to customers.

Program Title: Low-Income Weatherization Assistance Program

Program Description: The Low-Income Weatherization Assistance Program (LIWAP) is designed to integrate DEF's DSM program measures with assistance provided by the Florida Department of Economic Opportunity (DEO) and local weatherization providers to deliver energy efficiency measures to income eligible families. Through this partnership, DEF assists local weatherization agencies by providing energy education materials and financial incentives to weatherize the homes of low-income families.

Program Accomplishments - January 2018 - December 2018:

892 weatherization measures were installed on 204 residential homes.

Program Fiscal Expenditures - January 2018 - December 2018:

Expenses for this program were \$259,865.

Program Progress Summary:

25,285 measures have been implemented through this program. DEF participates in local, statewide and national agency meetings to promote the delivery of this program. Meetings with weatherization and other low-income agencies are conducted throughout DEF's territory to encourage customer participation in energy efficiency programs. This program was recently modified to align the eligibility with that of agencies who provide weatherization services. This change is intended to expand the network of agencies that DEF can partner with.

Program Title: Residential/Commercial Energy Management Program

Program Description: The Residential/Commercial Energy Management Program is a voluntary demand response program that provides monthly bill credits to customers who allow DEF to reduce peak demand by controlling service to selected electric equipment through various devices and communication options installed on the customer's premises. These interruptions are at DEF's option, during specified time periods, and generally coincident with hours of peak demand. Residential customers must have a minimum average monthly usage of 600 kwh's to be eligible to participate in this program.

Program Accomplishments - January 2018 - December 2018:

6,426 residential customers were added to the program in 2018. The commercial program has been closed to new participants since July 2000.

Program Fiscal Expenditures - January 2018 - December 2018:

Expenses for the residential/commercial energy management program were \$43,980,828.

Program Progress Summary:

There were approximately 435,000 residential participants and 58 commercial participants at yearend 2018.

Docket No. 20190002-EG Duke Energy Florida, LLC Witness Lori J. Cross EXHIBIT NO. 1 (LJC-1T) SCHEDULE CT-5 Page 6 of 15

Program Title: Business Energy Check Program

Program Description: The Business Energy Check Program is a commercial energy audit program that provides commercial customers with an analysis of their energy usage and information about energy-saving practices and cost-effective measures that they can implement at their facilities. The Business Energy Check Program serves as the foundation for the Better Business Program.

Program Accomplishments - January 2018 - December 2018:

668 commercial energy audits were completed in 2018.

Program Fiscal Expenditures - January 2018 - December 2018:

Expenses for this program were \$545,085.

Program Progress Summary:

42,862 non-residential customers have participated in the Business Energy Check Program since inception. This program continues to educate and inform commercial customers about cost-effective energy efficiency improvements.

Docket No. 20190002-EG Duke Energy Florida, LLC Witness Lori J. Cross EXHIBIT NO. 1 (LJC-1T) SCHEDULE CT-5 Page 7 of 15

Program Title: Better Business Program

Program Description: This umbrella efficiency program provides incentives to existing commercial, industrial and governmental customers for heating, air conditioning, ceiling and roof insulation upgrades, duct leakage and repair, demand-control ventilation, cool roof coating, high efficiency energy recovery ventilation and HVAC optimization qualifying measures.

Program Accomplishments - January 2018 - December 2018:

Incentives were provided to customers for 550 commercial energy efficiency measures through this program in 2018.

Program Fiscal Expenditures - January 2018 - December 2018:

Expenses for this program were \$3,168,858.

Program Progress Summary:

Incentives have been provided to customers for 21,514 commercial energy efficiency measures through this program since inception.

Program Title: Florida Custom Incentive Program

Program Description: The Florida Custom Incentive Program is designed to encourage commercial and industrial customers to make capital investments for energy efficiency measures which reduce peak demand and provide energy savings. This program provides incentives for individual custom projects which are cost effective, but not otherwise addressed through DEF's prescriptive incentive programs. Examples of energy efficient technologies that would be considered under this program include, but are not limited to, new construction measures and new thermal energy storage systems.

Program Accomplishments - January 2018 - December 2018:

Incentives were provided to 29 customers who participated in this program in 2018.

Program Fiscal Expenditures - January 2018 - December 2018:

Expenses for this program were \$762,982.

Program Progress Summary:

246 projects have received incentives through this program since inception. This program continues to target customer specific energy efficiency measures not covered through DEF's prescriptive commercial programs.

Docket No. 20190002-EG Duke Energy Florida, LLC Witness Lori J. Cross EXHIBIT NO. 1 (LJC-1T) SCHEDULE CT-5 Page 9 of 15

Program Title: Standby Generation

Program Description: The Standby Generation Program is a demand control program that allows DEF to reduce system demand by dispatching the customer's stand-by generator. This is a voluntary program available to commercial and industrial customers who have on-site generation capability.

Program Accomplishments - January 2018 - December 2018:

DEF added 12 customers to this program in 2018.

Program Fiscal Expenditures - January 2018 - December 2018:

Expenses for this program were \$4,619,809.

Program Progress Summary:

There were 178 participants at year-end 2018 providing 82 MW's of load control.

Docket No. 20190002-EG Duke Energy Florida, LLC Witness Lori J. Cross EXHIBIT NO. 1 (LJC-1T) SCHEDULE CT-5 Page 10 of 15

Program Title: Interruptible Service Program

Program Description: The Interruptible Service Program is a direct load control program that reduces DEF's system demand at times of capacity shortage during peak or emergency conditions.

Program Accomplishments - January 2018 - December 2018:

42 accounts were added to the program.

Program Fiscal Expenditures - January 2018 - December 2018:

Expenses for this program were \$36,963,144.

Program Progress Summary:

73 customers currently participate in this program providing 294 winter MW's and 310 summer MW's of load control.

Docket No. 20190002-EG Duke Energy Florida, LLC Witness Lori J. Cross EXHIBIT NO. 1 (LJC-1T) SCHEDULE CT-5 Page 11 of 15

Program Title: Curtailable Service Program

Program Description: The Curtailable Service Program is an indirect load control program that reduces DEF's system demand at times of capacity shortage during peak or emergency conditions.

Program Accomplishments - January 2018 - December 2018:

No accounts were added to this program.

Program Fiscal Expenditures - January 2018 - December 2018:

Expenses for this program were \$2,177,800.

Program Progress Summary:

There were 2 customers and 4 accounts participating in this program in 2018 providing 8.2 MWs of load control.

Program Title: Technology Development

Program Description: The Technology Development Program is designed to allow DEF to investigate technologies that support the development of new demand response and energy efficiency programs. This program includes, but is not limited to, technological research, field demonstration projects, research on load behavior and demand-side management measures and other market related research.

Program Accomplishments - January 2018 - December 2018:

Several research and development projects continued and/or launched in 2018.

- Continued a project for appliance energy efficiency and demand response using the CTA-2045 modular communications interface including field pilot projects for CTA-2045-enabled retrofit water heater switches, resistance and heat-pump water heaters, pool pumps, HVAC thermostats and electric vehicle chargers (EVSE). The purpose of the project is to understand the potential to utilize the CTA-2045 device to support load management programs. DEF plans to continue to collect and analyze field pilot data for the design of potential cost-effective demand response programs.
- Completed a project with the University of South Florida for commercial building energy efficiency and demand response utilizing control systems that interface with existing customer building management systems. A final report for this project was produced in 2018. Duke is investigating the cost-effectiveness of a potential Custom Program for this technology.
- Completed a demonstration of technologies that utilize Variable-Speed Heat Pumps with the potential of eliminating strip heat as a back-up heat source for heat pumps. Significant improvements in energy efficiency have been documented at these sites. A final report was produced in 2018. Preliminary cost-effectiveness proved to be marginal due to the high initial cost of the Variable Capacity Heat Pump systems.
- Completed the Renewable SEEDS project. This project consisted of two sites with PV systems integrated with energy storage. Both sites have demonstrated smoothing, energy shifting and demand response capabilities. A final report summarizing the results was completed.
- Continued a project with the University of South Florida to leverage customer-sited solar PV and energy storage at the USF 5th Avenue Garage Microgrid. The system provides load smoothing, islanding and demand response. A publicly available dashboard that shows live data, project specific facts and the capability of downloading data for further study is available for the site at https://dashboards.epri.com/duke-usfsp-parking. Results of this research may be used for design of a potential cost-effective demand response program.
- Continued the EPRI Solar DPV project for data collection to document customer solar resources with a focus on larger PV arrays with and without energy storage. This project also provides the data stream for the dashboard mentioned above.
- Continued participation in an EPRI project to study the potential of using customer demand response to compensate for variable loads and intermittent renewable generation resources.
- Continued the Energy Management Circuit Breaker Project. This project continued to explore the potential for developing a program for customer circuit breakers that includes communication, metering, and remote operation for potential applications including energy efficiency, demand response, and integration of distributed energy resources. A field pilot program has been installed and operational data is being collected from appliances in 10 customer homes. This data will be used to document the operation of these breakers and assess

the cost-effectiveness for potential EE and DR programs.

- Partnered with EPRI on a project to assess the demand response opportunities for new and existing variable capacity heat pump systems for potential future load management programs. We continued implementation of a pilot to use manufacturer cloud communications to control existing variable-capacity heat pumps. This pilot will assess the viability of communications and impacts of variable capacity heat pumps for demand response and energy efficiency.
- Launched a project to gather robust data about residential customers that drive electric vehicles. The project will determine what type of hardware the customer uses to charge their vehicle, where they do their charging (at home, work or public charging station, in/out of DEF service territory, etc.) and how much power and energy are consumed by EV charging. The project will also assess the capability of EVs to be a demand response resource.
- Launched a project that will provide knowledge in methods to utilize customer Wi-Fi infrastructure to develop a dedicated, durable and secure utility communication channel to connected devices. The project will also provide knowledge on the effectiveness of Wi-Fi signal strength improvement technology. This technology could lead to lower costs and improved cost-effectiveness for existing and future demand response and energy efficiency programs.
- Partnered with EPRI and other research organizations to evaluate energy efficiency, energy storage, and alternative energy / innovative technologies.

Program Fiscal Expenditures - January 2018 - December 2018:

Expenses for this program were \$437,800.

Program Progress Summary:

DEF continued to focus on researching and testing new technologies which have the potential to provide new programs and create new customer offerings.

Program Title: Qualifying Facility

Program Description: The purpose of this program is to meet the objectives and obligations established by Section 366.051, Florida Statutes, and the Commission's rules contained within Chapter 25-17, Florida Administrative Code, regarding the purchase of as-available energy and firm energy and capacity from Qualifying Facilities (QFs), including those that utilize renewable sources as defined in Section 366.91, Florida Statutes, pursuant to an as-available tariff, standard offer contract, or negotiated contracts.

Under the QF program, DEF facilitates and administers the power purchases from qualifying facilities and state jurisdictional interconnections. This Program develops standard offer contracts, negotiates, enters into, amends and restructures non-firm energy, and firm energy and capacity contracts entered into with qualifying cogeneration, small power producers, and renewable facilities.

Program Accomplishments - January 2018 - December 2018:

Avoided cost and interconnection service activity with renewable and distributed resource (DR) developers continued in 2018. DEF provided QF, renewable, or DR related information to many interested parties who are exploring distributed generation options in Florida. Numerous calls and meetings were held with parties interested in the advancement of these distributed resource technologies, their markets and pricing changes. DEF continued evolving its analytics and business processes that are required to support good faith QF purchased power negotiations and interconnection service.

Meetings were held with current QFs to discuss extending existing purchase agreements. The contracts under development are monitored for construction milestones, financing status, permitting, transmission studies and agreements, insurance and performance security.

DEF successfully administered all existing QF purchased power contracts that are in-service for contractual compliance. As of December 31, 2018, DEF had over 6,000 MW of solar projects in its various grid interconnection queues representing over 80 potential projects. The QF purchased power contracts produced more than 3 Million-MWhs for DEF customers during 2018. On April 20, 2018, the Commission approved DEF's petition for approval to terminate a QF PPA Agreement with Florida Power Development, LLC under Docket No. 20170274-EQ which is estimated to save customers between \$38 million and \$59 million in net present value. On October 30, 2018 the Commission approved DEF's petition for approval to terminate a QF Agreement with Ridge Generating Station under Docket No. 20180152-EQ which is estimated to save customers between \$35 million in net present value.

Program Fiscal Expenditures - January 2018 - December 2018:

Expenses for this program were \$1,201,302.

Program Progress Summary:

As of December 31, 2018, DEF administered total firm capacity contracts from in-service QFs of approximately 451 MW and five As-Available energy contracts with active deliveries to DEF. There is a placeholder of 250 MW of executed As-Available energy contracts for future

service. Finally, as of December 31, 2018, there were a total of 5,138 MW of potential QF preapplication interconnection requests completed for state jurisdictional interconnection service and a total of 293 MW of potential QF state jurisdictional interconnection requests in process.
