Additional Information

The additional information is provided pursuant to Rule 25-30.445(5), Florida Administrative Code:

(a) The purpose of this Limited Proceeding is for the Utility to recover the cost associated with installing AMR water meters consistent with what has been done with related-party utilities. See Order No. PSC-2017-0459-PAA-WS, issued in Docket No. 20160176-WS where the Commission found a similar meter replacement program to be appropriate and prudent. AMR meters remove all

human error aspects of meter reading. Further, almost all of the existing meters are the original meters and likely are not capturing all water usage. Installation is scheduled to begin in July, 2019, with an expected completion date by the end of September 2019.

(b) Not applicable.

(c) Please refer to Financial Schedules.

(d) N/A

(e) N/A

(f) Please refer to Financial Schedules.

(g) Please refer to Financial Schedules.

(h) 1. The Utility received no customer complaints regarding DEP secondary water quality complaints in the last five years.

2. A copy of the Utility's most recent secondary water quality standards test results is being provided with this Application.

The expense recovery sought is not offset by customer growth since its most recent rate case, nor will it be offset by future customer growth expected to occur within one year of the date new rates are implemented.

WHEREFORE, the Utility requests that the Florida Public Service Commission do the following:

1. Accept jurisdiction of this Application to grant an increase in water rates consistent with the Financial Schedules.
2. Provide such other and further relief as is fair, just and equitable.

Reporting Format 62-550.730
 Effective January 1995, Revised February 2010.

- * Qualifier Codes: U = indicates that the compound was analyzed for but not detected.
 I = the reported value is between the laboratory detection limit and the laboratory practical quantitation limit.
- ** If the result exceeds 5 pCi/L, a measurement for radium-226 is required. Uranium is reported separately under Contam ID 4006.
- *** If the results exceed 5 pCi/L, a measurement for radium-226 is required. If the results exceed 15 pCi/L, a measurement for Combined Uranium must be reported separately. The DEP/DOH will subtract the U value from the Gross Alpha (ID 4002) to determine compliance with MCL for Gross Alpha (Excl.U) of 15 pCi/L. If the result for ID 4002 Gross Alpha (incl.Uranium) does not exceed 15 pCi/L, Combined Uranium need not be measured nor reported.
- **** If using Uranium testing methods ASTM D5174 or EPA 200.8 only, then Analysis Error need not be reported.
