Subject: RE: Stop utilities from making it harder to save money on bills; Docket Nos. 20190015 to 20190021

Good Afternoon, Sandra Webb

We will be placing your comments below in consumer correspondence in Docket Numbers 20190015 to 20190021, and forwarding them to the Office of Consumer Assistance and Outreach.

Have a great day,

Public Service Commission

Subject: Stop utilities from making it harder to save money on bills; Docket Nos. 20190015 to 20190021

Dear Clerk Florida PSC Clerk,

I understand that you will be setting energy savings goals for the state's largest utilities that will dictate the scale of efficiency programs I and my neighbors are offered for the next TEN years. TEN years is too long. As you know, things can change overnight with hurricanes. I urge you to stand up for US - CUSTOMERS by adopting goals that will meaningfully help families cut energy waste and save money on bills.

NEW YORK STATE has pledged to do MUCH better than we have! Even ALABAMA is ahead of us in solar. We need to get with the program and get EVERYONE on board!

We all want to make our homes more efficient, comfortable and secure. Robust efficiency programs play a critical role to so many hard-working families in Florida that may not have the resources to upgrade their homes without the assistance of a utility program.

Efficiency helps lower bills for all customers through less fuel being burned and deferring costly future power plants. Yet, the most recent proposed utility goals continue an alarming trend of utilities abandoning customers on using energy smarter.

Florida already BADLY trails states nationally, including in the Southeast, in capturing energy savings for customers. Yet instead of proposing higher goals, many of the state's largest utilities have proposed goals of zero or close to zero. With some of the highest electric bills in the nation, the utilities proposed goals, if approved, will ensure unnecessarily higher bills for hard-working families.

Because many in Florida are older TAXPAYERS and VOTERS, we do not have the ability to just pick-up and move to some other state. Many of us can barely afford to pay for everything as it is - with medications going up (instead of DOWN, like

Trump promised), we need help with attic insulation, new double-paned, energy-efficient windows, and so forth. Those could be tacked onto the monthly bills, saving energy, and giving peace of mind. Solar panels on nearly every house and EVERY OTHER building - schools, strip malls, motels, government offices, would go a long way to creating GOOD NEW green jobs and SAVING ENERGY for years into the future!

That's why I'm asking you to please support goals that are in line with the energy savings captured by leading states, and that will spur investments in energy efficiency to as many customers as possible. Let's not leave savings on the table.

Thank you for your time and consideration, Sincerely,

Sandra (Sandy) Webb
2660 Ann Avenue
Kissimmee, FL 34744-6205

Sincerely,
