**Sent:** Saturday, August 10, 2019 2:32 PM  
**To:** Office Of Commissioner Graham  
**Subject:** Florida needs strong energy efficiency standards

Dear Mr. Graham,

Florida will be severely impacted if climate change isn't stopped. We're facing more flooding, compromised drinking water, and life-threatening heat waves as a result of rising temperatures and rising sea levels.

A cost-effective way to reduce harmful greenhouse gas emissions is through increasing energy efficiency standards for energy utilities. Investing in energy efficiency standards has the potential to reduce energy bills for Floridians and create quality manufacturing and construction jobs, all while reducing greenhouse gas emissions.

I urge you to set strong energy efficiency goals this year. Several utilities have proposed goals of zero or close to zero in energy savings through efficiency standards. These ridiculous "goals" are unacceptable.

Please prioritize the well-being of Floridians and work to lower energy bills and greenhouse gas emissions by setting energy efficiency savings goals of 2% for the state's utilities.

Sincerely,

Terry Bulla  
3257 Turtle Creek Rd  
Saint Augustine FL, 32086-5905

**Subject:** Florida needs strong energy efficiency standards

Dear Mr. Graham,

Florida will be severely impacted if climate change isn't stopped. We're facing more flooding, compromised drinking water, and life-threatening heat waves as a result of rising temperatures and rising sea levels.

A cost-effective way to reduce harmful greenhouse gas emissions is through increasing energy efficiency standards for energy utilities. Investing in energy efficiency standards has the potential to reduce energy bills for Floridians and create quality manufacturing and construction jobs, all while reducing greenhouse gas emissions.

I urge you to set strong energy efficiency goals this year. Several utilities have proposed goals of zero or close to zero in energy savings through efficiency standards. These ridiculous "goals" are unacceptable.

Please prioritize the well-being of Floridians and work to lower energy bills and greenhouse gas emissions by setting energy efficiency savings goals of 2% for the state's utilities.

Sincerely,

Jennifer Scott  
17280 Whitewater Court  
Fort Myers Beach FL, 33931-5307

**Sent:** Saturday, August 10, 2019 1:39 PM  
**To:** Office Of Commissioner Graham  
**Subject:** Florida needs strong energy efficiency standards

Dear Mr. Graham,

Florida will be severely impacted if climate change isn't stopped. We're facing more flooding, compromised drinking water, and life-threatening heat waves as a result of rising temperatures and rising sea levels.

A cost-effective way to reduce harmful greenhouse gas emissions is through increasing energy efficiency standards for energy utilities. Investing in energy efficiency standards has the potential to reduce energy bills for Floridians and create quality manufacturing and construction jobs, all while reducing greenhouse gas emissions.

I urge you to set strong energy efficiency goals this year. Several utilities have proposed goals of zero or close to zero in energy savings through efficiency standards. These ridiculous "goals" are unacceptable.

Please prioritize the well-being of Floridians and work to lower energy bills and greenhouse gas emissions by setting energy efficiency savings goals of 2% for the state's utilities.

Sincerely,

Catherine McNamara  
2152 Torchwood Drive  
Orlando FL, 32828-7324

**Subject:** Florida needs strong energy efficiency standards

Dear Mr. Graham,

Florida will be severely impacted if climate change isn't stopped. We're facing more flooding, compromised drinking water, and life-threatening heat waves as a result of rising temperatures and rising sea levels.

A cost-effective way to reduce harmful greenhouse gas emissions is through increasing energy efficiency standards for energy utilities. Investing in energy efficiency standards has the potential to reduce energy bills for Floridians and create quality manufacturing and construction jobs, all while reducing greenhouse gas emissions.

I urge you to set strong energy efficiency goals this year. Several utilities have proposed goals of zero or close to zero in energy savings through efficiency standards. These ridiculous "goals" are unacceptable.

Please prioritize the well-being of Floridians and work to lower energy bills and greenhouse gas emissions by setting energy efficiency savings goals of 2% for the state's utilities.

Sincerely,

Stevie Shatkin  
2200 S Ocean Ln Apt 705  
Ft Lauderdale FL, 33316-3830

**From:** honey4086=comcast.net@mg.gospringboard.io on behalf of Cheryl Gross <honey4086@comcast.net>  
**Sent:** Saturday, August 10, 2019 11:42 AM  
**To:** Office Of Commissioner Graham  
**Subject:** Enact strong energy efficiency standards for utilities

Dear Mr. Graham,

Florida is already experiencing the impacts of climate change. These impacts will only increase, meaning flooding, storms, salt water intrusion into aquifers, and life-threatening heat waves as temperatures and sea levels rise. To help avoid these disasters, we must achieve 100% renewable energy no later than 2035.

Increasing energy efficiency standards is critical, reducing emissions contributing to climate change, as well as lowering energy bills, creating jobs and protecting natural resources. Unfortunately, some utilities have chosen to ignore Florida's needs and have proposed ridiculously low efficiency standards that will continue unacceptable levels of climate impact from their operations.

Please prioritize the well-being of Floridians and work to lower energy bills and greenhouse gas emissions by setting energy efficiency savings goals of 2% for the state's utilities.

Sincerely,

Cheryl Gross

Dear Mr. Graham,

THE TRUMP GOP IS MAKING ME ASHAMED TO BE A REPUBLICAN!

LOOK AT THE BIG PICTURE FOR THE GOOD OF THE PLANET. OUR FAILURE TO ELIMINATE DEPENDENCE ON COAL AND OIL AND NUCLEAR POWER IS A MAJOR INTERNATIONAL SECURITY PROBLEM. IT IS IMPORTANT TO THE PLANET AND TO INTERNATIONAL SECURITY TO MAKE ENERGY EFFICIENCY AND SUSTAINABILITY A PRIORITY. WE MUST STOP DESTROYING OUR ENVIRONMENT AND CONVERT TO SUSTAINABLE ENERGY. SUSTAINABLE ENERGY IS THE ANSWER. NO COAL. NO OIL. NO NUCLEAR. THERE IS NO SUCH THING AS CLEAN COAL OR CLEAN OIL OR CLEAN, SAFE NUCLEAR POWER. WE HAVE TO BREATHE THIS AIR AND DRINK THIS WATER; WE DON'T WANT IT POLLUTED! WE SHOULD BE LEADING THE WORLD IN THIS EFFORT, NOT DRAGGING OUR FEET! WE NEED TO STOP ALL FAVORS, SUBSIDIES AND TAX BREAKS FOR NUCLEAR, COAL, AND OIL COMPANIES! END SEISMIC BLASTING, FRACKING, AND OIL PIPELINES!

Florida will be severely impacted if climate change isn't stopped. We're facing more flooding, compromised drinking water, and life-threatening heat waves as a result of rising temperatures and rising sea levels.

A cost-effective way to reduce harmful greenhouse gas emissions is through increasing energy efficiency standards for energy utilities.
