Docket Nos. 20190015 to 20190021

Good Morning, Nancy Wacha

We will be placing your comments below in consumer correspondence in Docket Numbers 20190015 to 20190021, and forwarding them to the Office of Consumer Assistance and Outreach.

Have a great day,

Public Service Commission

Ereecy McNeal Commission Deputy Clerk I
P. (850)413-6656

Subject: Don't let monopoly utilities make it harder for customers to control our energy use; Docket Nos. 20190015 to 20190021

Dear Florida Public Service Commission,

I am a Florida utility customer and solar energy supporter. I am concerned about the effort by public utilities to limit my ability to produce my electricity from non-carbon based sources. Utilities' request to further gut energy efficiency standards is terribly wrong for humankind. I urge you to stand up for our energy rights by adopting goals that will meaningfully help families cut energy waste and carbon emissions and save money on bills.

Efficiency helps lower bills for all customers through less fuel being burned and deferring costly future power plants. Yet, the most recent proposed utility goals continue an alarming trend of utilities abandoning customers on using energy smarter.

Florida already badly trails other states in capturing energy savings for customers. Now, many of the state's largest utilities have proposed goals of zero or close to zero. We already pay some of the highest electric bills in the nation. Hard-working families will see their bills go even higher if this plan is accepted.

Please support goals that are in line with the energy savings captured by leading states, and that will spur investments in energy efficiency to as many customers as possible. Let's do the right thing for the residents of Florida.

Thank you for your consideration,

Sincerely,

Nancy Wacha
