MEK

**ISSUE 4:** What are the total conservation cost recovery amounts to be collected during the period January 2020 through December 2020?

**FPUC:** FPUC seeks to recover \$834,848 over the period January 2020 through December 2020.

**ISSUE 5:** What are the conservation cost recovery factors for the period January 2020 through December 2020?

**FPUC:** The Company asks for approval of a consolidated levelized conservation cost recovery factor for this period of \$.00132 per KWH.

**ISSUE 6:** What should be the effective date of the new conservation cost recovery factors for billing purposes?

**FPUC:** The factor should be effective beginning with the specified conservation cost recovery cycle and thereafter for the period January 2020 through December 2020. Billing cycles may start before January 1, 2020 and the last cycle may be read after December 31, 2020, so that each customer is billed for twelve months regardless of when the adjustment factor became effective.

**ISSUE 7:** Should the Commission approve revised tariffs reflecting the energy conservation cost recovery amounts and energy conservation cost recovery factors determined to be appropriate in this proceeding?

FPUC: Yes. The Commission should approve revised tariffs reflecting the energy conservation cost recovery amounts and establishing energy conservation cost recovery factors determined to be appropriate in this proceeding. The Commission should direct staff to verify that the revised tariffs are consistent with the Commission's decision.

RESPECTFULLY SUBMITTED this 28<sup>th</sup> day of August, 2019.
