Subject: RE: Stop utilities from making it harder to save money on bills; Docket Nos. 20190015 to 20190021

Good Morning, Ms. Weissman.

We will be placing your comments below in consumer correspondence in Docket Numbers 20190015 to 20190021, and forwarding them to the Office of Consumer Assistance and Outreach.

Thank you!

Toni Hover

Subject: Stop utilities from making it harder to save money on bills; Docket Nos. 20190015 to 20190021

Dear Florida Public Service Commission,

Hi my name is Nancy Weissman and I live in Miami.

Florida, The Sunshine State, should be transitioning to solar power. All Florida utilities **MUST** be required to show at least 15 - 20 % increased energy efficiency for the next 5 years. To demand less would be an affront to Florida consumers. We are ranked near the bottom in the nation in terms of energy efficiency. **WHY?** Increasing energy efficiency helps fight climate change & since Florida is one of the states on the front line of climate change we need all the energy efficiency we can get. **DEMAND** that energy companies increase energy efficiency starting **NOW!!!**

I am writing to urge you to reject the request by Florida utilities to have a goal of zero (or nearly zero) on energy efficiency for the next ten years.

I am concerned that if the energy efficiency goals are abandoned, the utilities will stop providing the kinds of services that help people lower their power bills. People shouldn't have to choose between paying for food, medicine, or rent and being comfortable in their own homes.

Florida is ranked near the bottom of the nation in terms of energy efficiency — we should be increasing energy efficiency measures, not abandoning them. We know that increasing energy efficiency is one of the cheapest and easiest ways to fight the global warming that's causing neighborhood flooding and other serious problems in Florida.

When this issue comes back before you, I ask you please to vote to strengthen our energy efficiency goals.

Regards,
Nancy Weissman
