RE: Florida Power and Light's Solar Together Program

Public Service Commission

I would like to voice my support of Florida Power and Light's (FPL's) Solar Together Program. In January 2019 the City adopted its first Climate Action Plan (CAP), a Joint CAP with its neighboring City of Wilton Manors. Goal 4 of the CAP is Energy and Fuel:

Reduce consumption of electricity and fuel and increase renewable energy capacity to increase regional resilience, reduce greenhouse gas emissions, and improve emergency management and disaster recovery.

Oakland Park was an early signee to FPL's Solar Together Program (January 2019) and looks forward to using this and other renewable energy sources to reduce its greenhouse gas emissions and help reach its CAP Goal 4.

Additionally, as a resident of Southeast Florida which is at the epicenter of climate change and sea level rise, I support efforts in Southeast Florida to combat rising temperatures and sea levels. The Solar Together Program is a good example of local, regional and state coordination in the mitigation and resiliency efforts to reduce the future impacts of climate change.

Again, I fully support FPL's Solar Together Program.

Sincerely,

Albert J Carbon III, P. E.
