Re: Docket No. 20200007-EI

Dear Mr. Teitzman:

I attach for electronic filing in the above docket (i) Florida Power & Light Company's ("FPL") Petition for Approval of Environmental Cost Recovery True-Up for the Period Ending December 2019, (ii) the prepared testimony and exhibits of FPL witnesses Renae B. Deaton and Michael W. Sole. Mr. Sole's exhibits include FPL's Supplemental CAIR/MATS/CAVR Filing.

Please contact me if you have or your Staff has any questions regarding this filing.

Sincerely,

s/ Maria Jose Moncada

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Environmental Cost Recovery Clause

Docket No: 20200007-EI

Filed: April 1, 2020

**PETITION FOR APPROVAL OF ENVIRONMENTAL COST
RECOVERY TRUE-UP FOR THE PERIOD ENDING DECEMBER 2019
AND PROPOSED POWER PLANT INTAKE PROTECTED SPECIES PROJECT**

Florida Power & Light Company (“FPL”) hereby petitions this Commission for approval of FPL’s actual End-of-Period Environmental Cost Recovery Clause (“ECRC”) true-up over-recovery amount of \$21,205,754, including interest, for the period January 2019 through December 2019 and an over-recovery of \$14,087,943 as the adjusted net true-up amount for the same period. FPL also petitions the Commission for approval of a new project, the Power Plant Intake Protected Species Project (the “Protected Species Project”), such that prudent costs incurred after the date of this Petition may be recovered as environmental compliance costs through the ECRC. In support of this petition, FPL incorporates the prepared written testimony and exhibits of witnesses Renae B. Deaton and Michael W. Sole.

1. The calculation and the supporting documentation for FPL’s actual End-of-Period ECRC true-up amount for the period ending December 2019 are contained in the prepared testimony and exhibit of FPL witness Renae B. Deaton, which is being filed together with this Petition and incorporated herein.

2. In Order No. PSC-2019-0500-FOF-EI, dated November 22, 2019, the Commission approved an over-recovery of \$7,117,811, including interest, as the actual/estimated ECRC true-up for the period January 2019 through December 2019.

3. The net true-up for the period January 2019 through December 2019 is an over-recovery of \$21,205,754.

4. Pursuant to Order No. PSC-14-0643-FOF-EI, FPL is providing its Supplemental CAIR/MATS/CAVR filing as Exhibit MWS-1, which is being filed together with this Petition and incorporated herein. Exhibit MWS-1 is sponsored by FPL witness Michael W. Sole.

5. Mr. Sole's testimony also addresses a proposed new project, the Protected Species Project. Mr. Sole's testimony describes the environmental regulations requiring FPL to develop solutions to prevent unauthorized interactions between protected species and power plant intake facilities, the directives from state and federal agencies instructing FPL to comply with the regulations, and the activities FPL is required to perform as a result.

WHEREFORE, Florida Power & Light Company respectfully requests the Commission to approve an actual End-of-Period Environmental Cost Recovery true-up over-recovery amount of \$21,205,754, including interest and an over-recovery amount of \$14,087,943 as the adjusted net true-up for the period January 2019 through December 2019. FPL also requests that the Commission approve the Protected Species Project as an environmental compliance activity,

such that prudent costs incurred by FPL in connection with the Project after the date of this Petition may be recovered through the ECRC.

Respectfully submitted,

R. Wade Litchfield, Esq.

Florida Bar No. 0773301

1 **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**

2 **FLORIDA POWER & LIGHT COMPANY**

3 **TESTIMONY OF RENAE B. DEATON**

4 **DOCKET NO. 20200007-EI**

5 **APRIL 1, 2020**

6

7 **Q. Please state your name and address.**

8 A. My name is Renae B. Deaton. My business address is Florida Power & Light
9 Company, 700 Universe Boulevard, Juno Beach, Florida 33408.

10 **Q. By whom are you employed and in what capacity?**

11 A. I am employed by Florida Power & Light Company (“FPL” or the “Company”) as
12 Director of Clause Recovery and Wholesale Rates, in the Regulatory & State
13 Governmental Affairs Department.

14 **Q. Please describe your educational background and professional experience.**

15 A. I hold a Bachelor of Science in Business Administration and a Master of Business
16 Administration from Charleston Southern University. Since joining FPL in 1998, I
17 have held various positions in the rates and regulatory areas. Prior to my current
18 position, I held the positions of Senior Manager of Cost of Service and Load
19 Research and Senior Manager of Rate Design in the Rates and Tariffs Department. I
20 am a member of the Edison Electric Institute (“EEI”) Rates and Regulatory Affairs
21 Committee, and I have completed the EEI Advanced Rate Design Course. I have
22 been a guest speaker at Public Utility Research Center/World Bank International

1 Training Programs on Utility Regulation and Strategy. In 2016, I assumed my
2 current position, where my duties include providing direction as to the
3 appropriateness of inclusion of costs through a cost recovery clause and the overall
4 preparation and filing of all cost recovery clause documents including testimony and
5 discovery. As part of the various roles I have held with the Company, I have testified
6 before this Commission in base rate and clause recovery dockets.

7 **Q. What is the purpose of your testimony?**

8 A. The purpose of my testimony is to present for Commission review and approval the
9 Environmental Cost Recovery Clause (“ECRC”) final true-up amount associated with
10 FPL’s environmental compliance activities for the period January 2019 through
11 December 2019.

12 **Q. Have you prepared or caused to be prepared under your direction, supervision
13 or control an exhibit in this proceeding?**

14 A. Yes, I have. My Exhibit RBD-1 consists of nine forms.

- 15 • Form 42-1A reflects the final true-up for the period January 2019 through
16 December 2019.
- 17 • Form 42-2A provides the final true-up calculation for the period.
- 18 • Form 42-3A provides the calculation of the interest provision for the period.
- 19 • Form 42-4A provides the calculation of variances between actual and actual/
20 estimated costs for O&M activities for the period.
- 21 • Form 42-5A provides a summary of actual monthly costs for O&M activities in
22 the period.

- 1 • Form 42-6A provides the calculation of variances between actual and
2 actual/estimated revenue requirements for capital investment projects for the
3 period.
- 4 • Form 42-7A provides a summary of actual monthly revenue requirements for the
5 period for capital investment projects.
- 6 • Form 42-8A provides the calculation of depreciation expense and return on
7 capital investment for each capital investment project. Pages 66 through 69
8 provide the beginning of period and end of period depreciable base by production
9 plant name, unit or plant account and applicable depreciation rate or amortization
10 period for each capital investment project for the period.
- 11 • Form 42-9A presents the capital structures, components and cost rates relied
12 upon to calculate the rate of return applied to capital investments and working
13 capital amounts included for recovery through the ECRC for the period.

14 **Q. What is the source of the data that you present by way of testimony or exhibits**
15 **in this proceeding?**

16 A. Unless otherwise indicated, the data are taken from the books and records of FPL.
17 The books and records are kept in the regular course of FPL's business in accordance
18 with Generally Accepted Accounting Principles and practices, and with the
19 provisions of the Uniform System of Accounts as prescribed by this Commission.

20 **Q. Please explain the calculation of the net true-up amount.**

21 A. Form 42-1A, entitled "Calculation of the Final True-up Amount" shows the
22 calculation of the net true-up for the period January 2019 through December 2019, an

1 over-recovery of \$14,087,943, which FPL is requesting be included in the calculation
2 of the ECRC factors for the January 2021 through December 2021 period.

3

4 The actual end-of-period over-recovery for the period January 2019 through
5 December 2019 of \$21,205,754 (shown on Form 42-1A, Line 3) minus the
6 actual/estimated end-of-period over-recovery for the same period of \$7,117,811
7 (shown on Form 42-1A, Line 6) results in the net true-up over-recovery for the period
8 January 2019 through December 2019 (shown on Form 42-1A, Line 7) of
9 \$14,087,943.

10 **Q. Have you provided a schedule showing the calculation of the end-of-period true-**
11 **up amount?**

12 A. Yes. Form 42-2A, entitled “Calculation of the Final True-up Amount,” shows the
13 calculation of the end-of-period true-up over-recovery amount of \$21,205,754 for the
14 period January 2019 through December 2019. The \$20,291,401 over-recovery shown
15 on line 5 plus the interest provision of \$914,353 shown on line 6, which is calculated
16 on Form 42-3A, results in the final over-recovery of \$21,205,754 shown on line 11.

17 **Q. Are all costs listed in Forms 42-4A through 42-8A attributable to environmental**
18 **compliance projects approved by the Commission?**

19 A. Yes, they are.

20 **Q. How did actual project O&M and capital revenue requirements for January**
21 **2019 through December 2019 compare with FPL’s actual/estimated amounts as**
22 **presented in previous testimony and exhibits?**

1 A. Form 42-4A shows that the variance in total actual project O&M was \$9,791,983 or
2 23.9% lower than projected, and Form 42-6A shows that the variance in total actual
3 revenue requirements (return on capital investments, depreciation and income taxes)
4 associated with the project capital investments were \$1,229,243 or 1.0% lower than
5 projected. Individual project variances are provided on Forms 42-4A and 42-6A.
6 Actual revenue requirements for each capital project for the period January 2019
7 through December 2019 are provided on Form 42-8A, pages 14 through 63.

8 **Q. Please explain the reasons for the significant variances in project O&M and**
9 **capital revenue requirements.**

10 A. The significant variances in FPL's 2019 actual O&M expenses and capital revenue
11 requirements from actual/estimated amounts are associated with the following
12 projects:

13

14 **O&M Variance Explanations**

15

16 **Project 1 Air Operating Permit Fees**

17 Project expenditures were \$49,115 or 21.8% higher than previously projected. The
18 annual Title V fee projection calculation is based on fuel consumption projections
19 and the Department of Environmental Protection's ("DEP") fee for pollutant tons
20 emitted. FPL pays permit fees based on the actual tons of pollutants emitted. The
21 variance is primarily due to higher than originally projected gas and oil fuel usage
22 that results in increased permit fees.

23

1 **Project 5 Maintenance of Stationary Above Ground Fuel Storage Tanks**

2 Project expenditures were \$83,814 or 13.1% higher than previously projected. The
3 variance is primarily due to costs associated with required maintenance of the
4 Lauderdale tanks 2 & 3, which were initially incorrectly charged to base and
5 subsequently corrected and charged to ECRC in December 2019. This variance was
6 partially offset by savings resulting from the use of robotic inspections rather than
7 tank draining.

8

9 **Project 8a Oil Spill Clean-up**

10 Project expenditures were \$439,743 or 241.1% lower than previously projected. The
11 variance is primarily due to a credit for the sale of excess oil spill response equipment
12 in 2019 that was originally projected to occur over the 2019 – 2021 period.

13

14 **Project 19a Substation Pollutant Discharge Prevention and Removal –**
15 **Distribution**

16 Project expenditures were \$1,236,415 or 41.0% higher than projected. The variance
17 is primarily due to the ability to obtain more equipment clearances (i.e., de-energize
18 equipment) than planned, which resulted in a higher than projected number of
19 transformers being repaired.

20

21

22

1 **Project 19b Substation Pollutant Discharge Prevention and Removal –**
2 **Transmission**

3 Project expenditures were \$227,995 or 27.4% higher than projected. The variance is
4 primarily due to the ability to obtain more equipment clearances (i.e., de-energize
5 equipment) than planned, which resulted in a higher than projected number of
6 transformers being repaired.

7

8 **Project 21 St. Lucie Turtle Nets**

9 Project expenditures were \$66,142 or 18.6% higher than previously projected. The
10 variance is primarily due to increased costs associated with inspections and net
11 cleaning related to higher than anticipated amounts of algae at the St. Lucie Plant.
12 The higher amounts of algae required the implementation of new protocols for more
13 frequent cleaning and quicker response to high net loading to reduce potential sea
14 turtle injury or mortality.

15

16 **Project 23 SPCC – Spill Prevention, Control and Countermeasure**

17 Project expenditures were \$82,846 or 10.8% higher than previously projected. The
18 variance is primarily due to estimates for June-December 2019 not being included in
19 the actual/estimated filings for 2019. The estimates were primarily related to SPCC
20 quarterly inspections and diversionary structure (curb) repairs.

21

22

23

1 **Project 24 Manatee Plant Reburn**

2 Project expenditures were \$77,760 or 35.5% lower than previously projected. The
3 variance is primarily due to the postponement of the completion of Manatee Unit 1
4 inspection and maintenance work, which was originally planned to occur during an
5 October 2019 outage. The required inspection and maintenance work on the Manatee
6 Unit 1 reburn system will now be performed during the unit’s planned outage
7 scheduled to begin in March of 2020.

8
9 **Project 28 CWA 316(b) Phase II Rule**

10 Project expenditures were \$119,307 or 10.5% lower than previously projected. The
11 variance is primarily due to reductions in the required horseshoe crab monitoring and
12 release program, which became effective in the second half of 2019, after FPL had
13 filed its 2019 Actual/Estimated True-Up filing. Additionally, required studies at Fort
14 Myers Plant were postponed until 2020 due to permitting delays.

15
16 **Project 29 SCR Consumables**

17 Project expenditures were \$57,490 or 10.4% lower than previously projected. The
18 variance is associated with the anhydrous ammonia tank maintenance at the Martin
19 site originally planned for 2019 being deferred to 2020. Additionally, the anhydrous
20 ammonia use was lower than projected due to reduced plant operations. These
21 reductions were partially offset by additional valve work performed at the Manatee
22 site.

23

1 **Project 37 DeSoto Solar**

2 Project expenditures were \$137,643 or 22.2% higher than previously projected. The
3 variance is primarily due to additional reliability improvement and maintenance
4 activities at the site.

5

6 **Project 39 Martin Solar**

7 Project expenditures were \$520,698 or 15.5% higher than previously projected. The
8 variance is primarily due to the unplanned corrective maintenance issues in the solar
9 tracking assemblies and for the heat transfer fluid pump rotating elements
10 maintenance in 2019.

11

12 **Project 42 Turkey Point Cooling Canal Monitoring Plan**

13 Project expenditures were \$10,762,593 or 53.8% lower than previously projected.
14 The variance is primarily due to lower than projected costs associated with a new
15 lower cost strategy for cooling canal maintenance, which involved dredging using
16 FPL equipment on an “as needed” basis, rather than the entire system being dredged
17 every four years. Additionally, a new system associated with remote monitoring
18 equipment was installed, which switched from satellite communications to cellular
19 equipment, resulting in lower O&M costs. Other activities that contributed to the
20 variance included lower than projected costs associated with underground injection
21 well testing, modifications to the nutrient management process and hiring field staff
22 to replace contractors for monitoring and reporting.

- (a) Applicable to reserve salvage and removal cost
(b) Applicable beginning of period and end of period depreciable base by production plant name(s), unit(s), or plant account(s). See Form 42-8A, pages 66-69.
(c) The Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%. The Equity Component for the Jan. – Jun. 2019 period is 4.7156%, based on May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. – Dec. 2019 period is 5.0206% based on the May 2019 Earning Surveillance Report and reflects a 10.55% return on equity.
(d) The Debt Component for the Jan. – Jun. 2019 period is 1.3297% is based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. – Dec. 2019 period is 1.3507% based on the May 2019 Earning Surveillance Report.
(e) Applicable depreciation rate or rates. See Form 42-8A, pages 66-69.
(f) Applicable amortization period(s). See Form 42-8A, pages 66-69.
(g) Dismantlement only applies to Solar projects - DeSoto (37), NASA (38) & Martin (39).
(h) For solar projects the return on investment calculation is comprised of two parts:
Return on the Average Net Investment: See footnotes (b) and (c).
Return on the Average Unamortized ITC Balance:
Equity Component: Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%; the Equity Component for the Jan. – Jun. 2019 period of 6.480% based on the May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. – Dec. 2019 period of 6.604% based on the May 2019 Earning Surveillance Report reflects a 10.55% return on equity.
Debt Component: the Debt Component for the Jan. – Jun. 2019 period of 1.670% based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. – Dec. 2019 period of 1.661% based on the May 2018 Earning Surveillance Report.

(a) Applicable to reserve salvage and removal cost
(b) Applicable beginning of period and end of period depreciable base by production plant name(s), unit(s), or plant account(s). See Form 42-8A, pages 66-69.
(c) The Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%. The Equity Component for the Jan. – Jun. 2019 period is 4.7156%, based on May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. – Dec. 2019 period is 5.0206% based on the May 2019 Earning Surveillance Report and reflects a 10.55% return on equity.
(d) The Debt Component for the Jan. – Jun. 2019 period is 1.3297% is based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. – Dec. 2019 period is 1.3507% based on the May 2019 Earning Surveillance Report.
(e) Applicable depreciation rate or rates. See Form 42-8A, pages 66-69.
(f) Applicable amortization period(s). See Form 42-8A, pages 66-69.
(g) Dismantlement only applies to Solar projects - DeSoto (37), NASA (38) & Martin (39).
(h) For solar projects the return on investment calculation is comprised of two parts:
Return on the Average Net Investment: See footnotes (b) and (c).
Return on the Average Unamortized ITC Balance:
Equity Component: Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%; the Equity Component for the Jan. – Jun. 2019 period of 6.480% based on the May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. – Dec. 2019 period of 6.604% based on the May 2019 Earning Surveillance Report reflects a 10.55% return on equity.
Debt Component: the Debt Component for the Jan. – Jun. 2019 period of 1.670% based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. – Dec. 2019 period of 1.661% based on the May 2018 Earning Surveillance Report.

(b) Applicable beginning of period and end of period depreciable base by production plant name(s), unit(s), or plant account(s). See Form 42-8A, pages 66-69.
(c) The Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%. The Equity Component for the Jan. – Jun. 2019 period is 4.7156%, based on May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. – Dec. 2019 period is 5.0206% based on the May 2019 Earning Surveillance Report and reflects a 10.55% return on equity.
(d) The Debt Component for the Jan. – Jun. 2019 period is 1.3297% is based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. – Dec. 2019 period is 1.3507% based on the May 2019 Earning Surveillance Report.
(e) Applicable depreciation rate or rates. See Form 42-8A, pages 66-69.
(f) Applicable amortization period(s). See Form 42-8A, pages 66-69.
(g) Dismantlement only applies to Solar projects - DeSoto (37), NASA (38) & Martin (39).
(h) For solar projects the return on investment calculation is comprised of two parts:
Return on the Average Net Investment: See footnotes (b) and (c).
Return on the Average Unamortized ITC Balance:
Equity Component: Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%; the Equity Component for the Jan. – Jun. 2019 period of 6.480% based on the May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. – Dec. 2019 period of 6.604% based on the May 2019 Earning Surveillance Report reflects a 10.55% return on equity.
Debt Component: the Debt Component for the Jan. – Jun. 2019 period of 1.670% based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. – Dec. 2019 period of 1.661% based on the May 2018 Earning Surveillance Report.

| 9. Total System Recoverable Costs (Lines 7 & 8) | | <u>\$62,163</u> | <u>\$61,946</u> | <u>\$61,728</u> | <u>\$61,511</u> | <u>\$61,294</u> | <u>\$61,077</u> | <u>\$62,345</u> | <u>\$62,116</u> | <u>\$61,887</u> | <u>\$61,658</u> | <u>\$61,428</u> | <u>\$61,199</u> | <u>\$740,353</u> |

(a) Applicable to reserve salvage and removal cost

(b) Applicable beginning of period and end of period depreciable base by production plant name(s), unit(s), or plant account(s). See Form 42-8A, pages 66-69.

(c) The Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%. The Equity Component for the Jan. - Jun. 2019 period is 4.7156%, based on May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. - Dec. 2019 period is 5.0206% based on the May 2019 Earning Surveillance Report and reflects a 10.55% return on equity.

(d) The Debt Component for the Jan. - Jun. 2019 period is 1.3297% is based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. - Dec. 2019 period is 1.3507% based on the May 2019 Earning Surveillance Report.

(e) Applicable depreciation rate or rates. See Form 42-8A, pages 66-69.

(f) Applicable amortization period(s). See Form 42-8A, pages 66-69.

(g) Dismantlement only applies to Solar projects - DeSoto (37), NASA (38) & Martin (39).

(h) For solar projects the return on investment calculation is comprised of two parts:

Return on the Average Net Investment: See footnotes (b) and (c).

Return on the Average Unamortized ITC Balance:

Equity Component: Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%; the Equity Component for the Jan. - Jun. 2019 period of 6.480% based on the May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. - Dec. 2019 period of 6.604% based on the May 2019 Earning Surveillance Report reflects a 10.55% return on equity.

Debt Component: the Debt Component for the Jan. - Jun. 2019 period of 1.670% based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. - Dec. 2019 period of 1.661% based on the May 2018 Earning Surveillance Report.

(a) Applicable to reserve salvage and removal cost

(b) Applicable beginning of period and end of period depreciable base by production plant name(s), unit(s), or plant account(s). See Form 42-8A, pages 66-69.

(c) The Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%. The Equity Component for the Jan. - Jun. 2019 period is 4.7156%, based on May 2018

Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. - Dec. 2019 period is 5.0206% based on the May 2019 Earning Surveillance Report and reflects a 10.55% return on equity.

(d) The Debt Component for the Jan. - Jun. 2019 period is 1.3297% is based on the May 2018 Earning Surveillance Report and the Debt Component for

the Jul. - Dec. 2019 period is 1.3507% based on the May 2019 Earning Surveillance Report.

(e) Applicable depreciation rate or rates. See Form 42-8A, pages 66-69.

(f) Applicable amortization period(s). See Form 42-8A, pages 66-69.

(g) Dismantlement only applies to Solar projects - DeSoto (37), NASA (38) & Martin (39).

(h) For solar projects the return on investment calculation is comprised of two parts:

Return on the Average Net Investment: See footnotes (b) and (c).

Return on the Average Unamortized ITC Balance:

Equity Component: Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%; the Equity Component for the Jan. - Jun. 2019 period of 6.480% based on the May 2018 Earning Surveillance Report

and reflects a 10.55% return on equity, and the Equity Component for the Jul. - Dec. 2019 period of 6.604% based on the May 2019 Earning Surveillance Report reflects a 10.55% return on equity.

Debt Component: the Debt Component for the Jan. - Jun. 2019 period of 1.670% based on the May 2018 Earning Surveillance Report and the Debt Component for the

Jul. - Dec. 2019 period of 1.661% based on the May 2018 Earning Surveillance Report.

| 9. Total System Recoverable Costs (Lines 7 & 8) | | \$2,876 | \$2,868 | \$2,860 | \$2,852 | \$2,844 | \$2,836 | \$2,915 | \$2,907 | \$2,898 | \$2,890 | \$2,881 | \$2,873 | \$34,499 |

- (a) Applicable to reserve salvage and removal cost
- (b) Applicable beginning of period and end of period depreciable base by production plant name(s), unit(s), or plant account(s). See Form 42-8A, pages 66-69.
- (c) The Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%. The Equity Component for the Jan. - Jun. 2019 period is 4.7156%, based on May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. - Dec. 2019 period is 5.0206% based on the May 2019 Earning Surveillance Report and reflects a 10.55% return on equity.
- (d) The Debt Component for the Jan. - Jun. 2019 period is 1.3297% is based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. - Dec. 2019 period is 1.3507% based on the May 2019 Earning Surveillance Report.
- (e) Applicable depreciation rate or rates. See Form 42-8A, pages 66-69.
- (f) Applicable amortization period(s). See Form 42-8A, pages 66-69.
- (g) Dismantlement only applies to Solar projects - DeSoto (37), NASA (38) & Martin (39).
- (h) For solar projects the return on investment calculation is comprised of two parts:
Return on the Average Net Investment: See footnotes (b) and (c).
Return on the Average Unamortized ITC Balance:
Equity Component: Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%; the Equity Component for the Jan. - Jun. 2019 period of 6.480% based on the May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. - Dec. 2019 period of 6.604% based on the May 2019 Earning Surveillance Report reflects a 10.55% return on equity.
Debt Component: the Debt Component for the Jan. - Jun. 2019 period of 1.670% based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. - Dec. 2019 period of 1.661% based on the May 2018 Earning Surveillance Report.

(a) Applicable to reserve salvage and removal cost
 (b) Applicable beginning of period and end of period depreciable base by production plant name(s), unit(s), or plant account(s). See Form 42-8A, pages 66-69.
 (c) The Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%. The Equity Component for the Jan. – Jun. 2019 period is 4.7156%, based on May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. – Dec. 2019 period is 5.0206% based on the May 2019 Earning Surveillance Report and reflects a 10.55% return on equity.
 (d) The Debt Component for the Jan. – Jun. 2019 period is 1.3297% is based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. – Dec. 2019 period is 1.3507% based on the May 2019 Earning Surveillance Report.
 (e) Applicable depreciation rate or rates. See Form 42-8A, pages 66-69.
 (f) Applicable amortization period(s). See Form 42-8A, pages 66-69.
 (g) Dismantlement only applies to Solar projects - DeSoto (37), NASA (38) & Martin (39).
 (h) For solar projects the return on investment calculation is comprised of two parts:
 Return on the Average Net Investment: See footnotes (b) and (c).
 Return on the Average Unamortized ITC Balance:
 Equity Component: Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%; the Equity Component for the Jan. – Jun. 2019 period of 6.480% based on the May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. – Dec. 2019 period of 6.604% based on the May 2019 Earning Surveillance Report reflects a 10.55% return on equity.
 Debt Component: the Debt Component for the Jan. – Jun. 2019 period of 1.670% based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. – Dec. 2019 period of 1.661% based on the May 2018 Earning Surveillance Report.

- (a) Applicable to reserve salvage and removal cost
- (b) Applicable beginning of period and end of period depreciable base by production plant name(s), unit(s), or plant account(s). See Form 42-8A, pages 66-69.
- (c) The Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%. The Equity Component for the Jan. - Jun. 2019 period is 4.7156%, based on May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. - Dec. 2019 period is 5.0206% based on the May 2019 Earning Surveillance Report and reflects a 10.55% return on equity.
- (d) The Debt Component for the Jan. - Jun. 2019 period is 1.3297% is based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. - Dec. 2019 period is 1.3507% based on the May 2019 Earning Surveillance Report.
- (e) Applicable depreciation rate or rates. See Form 42-8A, pages 66-69.
- (f) Applicable amortization period(s). See Form 42-8A, pages 66-69.
- (g) Dismantlement only applies to Solar projects - DeSoto (37), NASA (38) & Martin (39).
- (h) For solar projects the return on investment calculation is comprised of two parts:
Return on the Average Net Investment: See footnotes (b) and (c).
Return on the Average Unamortized ITC Balance:
Equity Component: Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%; the Equity Component for the Jan. - Jun. 2019 period of 6.480% based on the May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. - Dec. 2019 period of 6.604% based on the May 2019 Earning Surveillance Report reflects a 10.55% return on equity.
Debt Component: the Debt Component for the Jan. - Jun. 2019 period of 1.670% based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. - Dec. 2019 period of 1.661% based on the May 2018 Earning Surveillance Report.

(a) Applicable to reserve salvage and removal cost

(b) Applicable beginning of period and end of period depreciable base by production plant name(s), unit(s), or plant account(s). See Form 42-8A, pages 66-69.

(c) The Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%. The Equity Component for the Jan. - Jun. 2019 period is 4.7156%, based on May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. - Dec. 2019 period is 5.0206% based on the May 2019 Earning Surveillance Report and reflects a 10.55% return on equity.

(d) The Debt Component for the Jan. - Jun. 2019 period is 1.3297% is based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. - Dec. 2019 period is 1.3507% based on the May 2019 Earning Surveillance Report.

(e) Applicable depreciation rate or rates. See Form 42-8A, pages 66-69.

(f) Applicable amortization period(s). See Form 42-8A, pages 66-69.

(g) Dismantlement only applies to Solar projects - DeSoto (37), NASA (38) & Martin (39).

(h) For solar projects the return on investment calculation is comprised of two parts:

Return on the Average Net Investment: See footnotes (b) and (c).

Return on the Average Unamortized ITC Balance:

Equity Component: Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%; the Equity Component for the Jan. - Jun. 2019 period of 6.480% based on the May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. - Dec. 2019 period of 6.604% based on the May 2019 Earning Surveillance Report reflects a 10.55% return on equity.

Debt Component: the Debt Component for the Jan. - Jun. 2019 period of 1.670% based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. - Dec. 2019 period of 1.661% based on the May 2018 Earning Surveillance Report.

- (a) Applicable to reserve salvage and removal cost
- (b) Applicable beginning of period and end of period depreciable base by production plant name(s), unit(s), or plant account(s). See Form 42-8A, pages 66-69.
- (c) The Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%. The Equity Component for the Jan. – Jun. 2019 period is 4.7156%, based on May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. – Dec. 2019 period is 5.0206% based on the May 2019 Earning Surveillance Report and reflects a 10.55% return on equity.
- (d) The Debt Component for the Jan. – Jun. 2019 period is 1.3297% is based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. – Dec. 2019 period is 1.3507% based on the May 2019 Earning Surveillance Report.
- (e) Applicable depreciation rate or rates. See Form 42-8A, pages 66-69.
- (f) Applicable amortization period(s). See Form 42-8A, pages 66-69.
- (g) Dismantlement only applies to Solar projects - DeSoto (37), NASA (38) & Martin (39).
- (h) For solar projects the return on investment calculation is comprised of two parts:
Return on the Average Net Investment: See footnotes (b) and (c).
Return on the Average Unamortized ITC Balance:
Equity Component: Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%; the Equity Component for the Jan. – Jun. 2019 period of 6.480% based on the May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. – Dec. 2019 period of 6.604% based on the May 2019 Earning Surveillance Report reflects a 10.55% return on equity.
Debt Component: the Debt Component for the Jan. – Jun. 2019 period of 1.670% based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. – Dec. 2019 period of 1.661% based on the May 2018 Earning Surveillance Report.

(a) Applicable to reserve salvage and removal cost

(b) Applicable beginning of period and end of period depreciable base by production plant name(s), unit(s), or plant account(s). See Form 42-8A, pages 66-69.

(c) The Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%. The Equity Component for the Jan. - Jun. 2019 period is 4.7156%, based on May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. - Dec. 2019 period is 5.0206% based on the May 2019 Earning Surveillance Report and reflects a 10.55% return on equity.

(d) The Debt Component for the Jan. - Jun. 2019 period is 1.3297% is based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. - Dec. 2019 period is 1.3507% based on the May 2019 Earning Surveillance Report.

(e) Applicable depreciation rate or rates. See Form 42-8A, pages 66-69.

(f) Applicable amortization period(s). See Form 42-8A, pages 66-69.

(g) Dismantlement only applies to Solar projects - DeSoto (37), NASA (38) & Martin (39).

(h) For solar projects the return on investment calculation is comprised of two parts:

Return on the Average Net Investment: See footnotes (b) and (c).

Return on the Average Unamortized ITC Balance:

Equity Component: Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%; the Equity Component for the Jan. - Jun. 2019 period of 6.480% based on the May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. - Dec. 2019 period of 6.604% based on the May 2019 Earning Surveillance Report reflects a 10.55% return on equity.

Debt Component: the Debt Component for the Jan. - Jun. 2019 period of 1.670% based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. - Dec. 2019 period of 1.661% based on the May 2018 Earning Surveillance Report.

(a) Applicable to reserve salvage and removal cost
 (b) Applicable beginning of period and end of period depreciable base by production plant name(s), unit(s), or plant account(s). See Form 42-8A, pages 66-69.
 (c) The Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%. The Equity Component for the Jan. – Jun. 2019 period is 4.7156%, based on May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. – Dec. 2019 period is 5.0206% based on the May 2019 Earning Surveillance Report and reflects a 10.55% return on equity.
 (d) The Debt Component for the Jan. – Jun. 2019 period is 1.3297% is based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. – Dec. 2019 period is 1.3507% based on the May 2019 Earning Surveillance Report.
 (e) Applicable depreciation rate or rates. See Form 42-8A, pages 66-69.
 (f) Applicable amortization period(s). See Form 42-8A, pages 66-69.
 (g) Dismantlement only applies to Solar projects - DeSoto (37), NASA (38) & Martin (39).
 (h) For solar projects the return on investment calculation is comprised of two parts:
 Return on the Average Net Investment: See footnotes (b) and (c).
 Return on the Average Unamortized ITC Balance:
 Equity Component: Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%; the Equity Component for the Jan. – Jun. 2019 period of 6.480% based on the May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. – Dec. 2019 period of 6.604% based on the May 2019 Earning Surveillance Report reflects a 10.55% return on equity.
 Debt Component: the Debt Component for the Jan. – Jun. 2019 period of 1.670% based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. – Dec. 2019 period of 1.661% based on the May 2018 Earning Surveillance Report.

| d. Property Expenses | | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 |
| e. Other | | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 |
| 9. Total System Recoverable Costs (Lines 7 & 8) | | <u>\$521</u> | <u>\$520</u> | <u>\$519</u> | <u>\$518</u> | <u>\$517</u> | <u>\$516</u> | <u>\$536</u> | <u>\$535</u> | <u>\$534</u> | <u>\$533</u> | <u>\$532</u> | <u>\$531</u> | <u>\$6,314</u> |

(a) Applicable to reserve salvage and removal cost
(b) Applicable beginning of period and end of period depreciable base by production plant name(s), unit(s), or plant account(s). See Form 42-8A, pages 66-69.
(c) The Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%. The Equity Component for the Jan. – Jun. 2019 period is 4.7156%, based on May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. – Dec. 2019 period is 5.0206% based on the May 2019 Earning Surveillance Report and reflects a 10.55% return on equity.
(d) The Debt Component for the Jan. – Jun. 2019 period is 1.3297% is based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. – Dec. 2019 period is 1.3507% based on the May 2019 Earning Surveillance Report.
(e) Applicable depreciation rate or rates. See Form 42-8A, pages 66-69.
(f) Applicable amortization period(s). See Form 42-8A, pages 66-69.
(g) Dismantlement only applies to Solar projects - DeSoto (37), NASA (38) & Martin (39).
(h) For solar projects the return on investment calculation is comprised of two parts:
Return on the Average Net Investment: See footnotes (b) and (c).
Return on the Average Unamortized ITC Balance:
Equity Component: Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%; the Equity Component for the Jan. – Jun. 2019 period of 6.480% based on the May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. – Dec. 2019 period of 6.604% based on the May 2019 Earning Surveillance Report reflects a 10.55% return on equity.
Debt Component: the Debt Component for the Jan. – Jun. 2019 period of 1.670% based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. – Dec. 2019 period of 1.661% based on the May 2018 Earning Surveillance Report.

| b. Amortization (f) | | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 |
| c. Dismantlement (g) | | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 |
| d. Property Expenses | | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 |
| e. Other | | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 | \$0 |
| 9. Total System Recoverable Costs (Lines 7 & 8) | | \$403,026 | \$564,195 | \$572,690 | \$586,850 | \$585,384 | \$581,618 | \$621,040 | \$632,804 | \$644,993 | \$657,531 | \$671,751 | \$722,316 | \$7,244,199 |

(a) Applicable to reserve salvage and removal cost

(b) Applicable beginning of period and end of period depreciable base by production plant name(s), unit(s), or plant account(s). See Form 42-8A, pages 66-69.

(c) The Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%. The Equity Component for the Jan. - Jun. 2019 period is 4.7156%, based on May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. - Dec. 2019 period is 5.0206% based on the May 2019 Earning Surveillance Report and reflects a 10.55% return on equity.

(d) The Debt Component for the Jan. - Jun. 2019 period is 1.3297% is based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. - Dec. 2019 period is 1.3507% based on the May 2019 Earning Surveillance Report.

(e) Applicable depreciation rate or rates. See Form 42-8A, pages 66-69.

(f) Applicable amortization period(s). See Form 42-8A, pages 66-69.

(g) Dismantlement only applies to Solar projects - DeSoto (37), NASA (38) & Martin (39).

(h) For solar projects the return on investment calculation is comprised of two parts:

Return on the Average Net Investment: See footnotes (b) and (c).

Return on the Average Unamortized ITC Balance:

Equity Component: Gross-up factor for taxes is 1/0.74655, which reflects the Federal Income Tax Rate of 21%; the Equity Component for the Jan. - Jun. 2019 period of 6.480% based on the May 2018 Earning Surveillance Report and reflects a 10.55% return on equity, and the Equity Component for the Jul. - Dec. 2019 period of 6.604% based on the May 2019 Earning Surveillance Report reflects a 10.55% return on equity.

Debt Component: the Debt Component for the Jan. - Jun. 2019 period of 1.670% based on the May 2018 Earning Surveillance Report and the Debt Component for the Jul. - Dec. 2019 period of 1.661% based on the May 2018 Earning Surveillance Report.

1 **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**

2 **FLORIDA POWER & LIGHT COMPANY**

3 **TESTIMONY OF MICHAEL W. SOLE**

4 **DOCKET NO. 20200007-EI**

5 **APRIL 1, 2020**

6
7 **Q. Please state your name and address.**

8 A. My name is Michael W. Sole and my business address is 700 Universe Boulevard,
9 Juno Beach, Florida 33408.

10 **Q. By whom are you employed and in what capacity?**

11 A. I am employed by NextEra Energy, Inc. (“NEE”) as Vice President of
12 Environmental Services.

13 **Q. Please describe your educational background and professional experience.**

14 A. I received a Bachelor of Science degree in Marine Biology from the Florida Institute
15 of Technology in 1986. I served as an Officer in the United States Marine Corps
16 from 1985 through 1990, attaining the rank of Captain. I was employed by the
17 Florida Department of Environmental Protection (“FDEP”) in multiple roles from
18 1990 to 2010 and served as the Secretary of the FDEP from 2007-2010. I have been
19 employed by NEE or its subsidiary Florida Power & Light Company (“FPL” or the
20 “Company”) since 2010. In November 2016, I assumed the position of Vice
21 President of Environmental Services for NEE. In that role, I am responsible for
22 FPL’s environmental licensing and compliance efforts for the Company. In May

1 2017, I was appointed by Governor Scott to the Florida Fish and Wildlife
2 Conservation Commission (“FWC”).

3 **Q. What is the purpose of the testimony that you are filing at this time?**

4 A. The purpose of my testimony is to present for Commission review and approval
5 FPL’s request for recovery through the Environmental Cost Recovery Clause
6 (“ECRC”) of a new project, the Power Plant Intake Protected Species Project (“the
7 Protected Species Project”). Additionally, my testimony presents for Commission
8 review and approval FPL’s 2020 Supplemental CAIR/MATS/CAVR Filing.

9 **Q. Have you prepared, or caused to be prepared under your direction,
10 supervision, or control, any exhibits in this proceeding?**

11 A. Yes, I am sponsoring the following exhibits:

- 12 • Exhibit MWS-1 – FPL Supplemental CAIR/MATS/CAVR Filing
- 13 • Exhibit MWS-2 – June 12, 2019 NOAA Letter to FPL
- 14 • Exhibit MWS-3 – March 25, 2020 USFWS Letter to FPL

15 **Q. Please briefly describe your Exhibit MWS-1.**

16 A. Exhibit MWS-1 provides FPL’s 2020 Supplemental CAIR/MATS/CAVR Filing.
17 Per Order No. PSC-07-0922-FOF-EI, issued in Docket No. 070007-EI on
18 November 16, 2007, this filing provides FPL’s current estimates of project
19 activities and associated costs related to its Clean Air Interstate Rule (“CAIR”),
20 now the Cross State Air Pollution Rule (“CSAPR”), Mercury and Air Toxics
21 Standards (“MATS”), which was formerly the Clean Air Mercury Rule (“CAMR”)
22 and Clean Air Visibility Rule (“CAVR”)/ Best Available Retrofit Technology

1 (“BART”) projects. In Exhibit MWS-1, FPL provides a summary of the activities
2 and costs approved by the commission for CAIR (Project 31), MATS/CAMR
3 (Projects 33 and 45) and CAVR (Project 32). FPL has completed all capital projects
4 associated with installation of controls for compliance with these rules. Ongoing
5 O&M and Capital parts replacement for these projects on existing units will
6 continue in order to ensure compliance. Accordingly, FPL requests authority to
7 address all ongoing CAIR/CAMR/CAVR projected and actual costs in FPL’s
8 annual ECRC filings, similar to all other environmental projects approved by the
9 Commission, rather than filing a Supplemental CAIR/CAMR/CAVR report.

10 **Q. Please briefly describe FPL’s proposed Protected Species Project.**

11 A. Under the United States Endangered Species Act (“ESA”) (16 U.S.C. § 1531 et
12 seq.), FPL is required to avoid the “take” of species listed as endangered or
13 threatened. FPL is also required to avoid the “take” of a species listed as threatened
14 under Chapter 68A-27 of the Florida Administrative Code. In the event FPL
15 “takes” a species without authorization provided by the appropriate federal
16 regulatory authority, it constitutes an unauthorized take. In the event of an
17 unauthorized take, the appropriate federal and state wildlife agencies may require
18 FPL to develop solutions that avoid interaction between listed species and intake
19 structures, or apply for an incidental take permit that would require FPL to
20 minimize or mitigate interaction between listed species and intake structures. Once
21 a solution is developed, FPL is required to implement the solution at the designated
22 facility.

1 **Q. Please describe the environmental law or regulation requiring the Protected**
2 **Species Project.**

3 A. At the Federal level, the ESA prohibits any action that causes the “taking” of any
4 species of fish or wildlife listed as threatened or endangered. (16 U.S.C.
5 §1538(a)(1)). A “take” under the ESA means to harass, harm, pursue, hunt, shoot,
6 wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.
7 (16 U.S.C. § 1532 (19)). The Marine Mammal Protection Act (“MMPA”) also
8 prohibits the “take” of marine mammals, such as the Florida manatee, in U.S.
9 waters (16 U.S.C. § 1361-1407).

10

11 Additionally, at the state level, Chapter 68A-27, Florida Administrative Code
12 (F.A.C.), prohibits the “take” of any federally-designated endangered and
13 threatened species listed pursuant to the ESA, as well as state-designated threatened
14 species listed pursuant to the Florida Endangered and Threatened Species Act
15 (Section 379.2291, Fla. Stat.).

16 **Q. Please describe why FPL needs to initiate activities to prevent the interaction**
17 **of ESA listed species with power plant intake structures.**

18 A. FPL is required to prevent any further take of smalltooth sawfish at its Fort Myers
19 Plant. The specific solution has not yet been determined, and will first require FPL
20 to hire a consultant to develop the best approach to prevent entrapment and/or injury
21 of this species. Once an approach has been selected and approved by the National
22 Oceanic and Atmospheric Administration National Marine Fisheries Service

1 (“NOAA Fisheries”), FPL will be required to implement the approved project at
2 the facility.

3
4 FPL has also experienced interactions with the Florida manatee at its Cape
5 Canaveral Energy Center’s intake facilities. FPL has had discussions with the
6 United States Fish & Wildlife Service (“USFWS”) and FWC concerning these
7 interactions and FPL is required to take steps to avoid further take of this species.

8 **Q. Please describe why FPL has to conduct activities to stop interaction of the**
9 **smalltooth sawfish with the Fort Myers intake canal.**

10 A. Recently, FPL’s Fort Myers Plant has had interactions with the smalltooth sawfish
11 at the Plant’s intake facilities. Because the smalltooth sawfish is listed under the
12 ESA as an endangered species, FPL notified NOAA Fisheries, which has federal
13 jurisdiction to enforce the ESA. FPL also notified FWC, which is the state agency
14 NOAA Fisheries consults concerning smalltooth sawfish in Florida. On March 7,
15 2019, FPL met with those agencies on-site to initiate discussions on the smalltooth
16 sawfish interaction with the operations of FPL’s Fort Myers Plant. On June 12,
17 2019, FPL received a letter from NOAA Fisheries stating that pursuant to the ESA,
18 FPL must undertake measures to address the unauthorized take of the smalltooth
19 sawfish at FPL’s Fort Myers Plant. In its letter, NOAA Fisheries recommends that
20 FPL address the take by installing a physical structure that would exclude
21 smalltooth sawfish from entering the plant’s intake canal. While this is an option
22 that will be explored, FPL will also consider other non-traditional “barriers,” such

1 as visual or auditory deterrents, that may be effective in keeping smalltooth sawfish
2 from entering the intake canal. The June 12, 2019 letter is included with my
3 testimony as Exhibit MWS-2.

4 **Q. Please describe why FPL has to conduct activities to stop interaction of the**
5 **Florida manatee with the intake structure at FPL's Cape Canaveral Plant.**

6 A. FPL has experienced interactions with the Florida manatee at its Cape Canaveral
7 Energy Center's intake facilities. The Florida manatee is listed under the ESA as a
8 threatened species and is protected under the Marine Mammal Protection Act. On
9 February 11, 2020, FPL hosted a site visit with USFWS, which has federal
10 jurisdiction to enforce the ESA and the Marine Mammal Protection Act, and with
11 the FWC, which is the state agency USFWS consults concerning manatees in
12 Florida. During this visit, FPL and the agencies discussed options that could reduce
13 or avoid interactions with manatees and the plant's intake facilities. On March 25,
14 2020, the USFWS sent a letter to FPL stating that pursuant to the ESA, FPL must
15 undertake measures to avoid further takes of the threatened Florida manatee. The
16 March 25, 2020 letter is included with my testimony as Exhibit MWS-3.

17 **Q. What activities related to the Protected Species Project does FPL need to**
18 **conduct?**

19 A. FPL needs to evaluate options for preventing any further take of the smalltooth
20 sawfish at FPL's Fort Myers Plant. In order to prevent further take of the species,
21 FPL needs to hire a consultant to evaluate and recommend design solutions. Once
22 FPL has completed an evaluation of various options, FPL will consult with NOAA

1 Fisheries to discuss future activities including implementation of the agreed upon
2 solution.

3
4 FPL also needs to evaluate options for preventing any further take of the Florida
5 manatee at FPL's Cape Canaveral Energy Center. In order to prevent further take
6 of the species, FPL needs to hire a consultant to evaluate and recommend design
7 solutions. Once FPL has completed an evaluation of various options, FPL will
8 consult with USFWS and FWC to discuss options and the implementation of the
9 agreed upon solution.

10 **Q. Is FPL currently required to conduct this type of project at any of its other**
11 **facilities?**

12 A. Yes. At the St. Lucie Nuclear Power Plant ("PSL"), FPL was required to design,
13 test and install an excluder device to keep large marine animals, including sea
14 turtles, out of the intake canal. This was required, per a Biological Opinion that
15 NOAA Fisheries directed to PSL after consultation with the Nuclear Regulatory
16 Commission. These costs are being recovered under FPL's PSC approved Project
17 34 - the St. Lucie Cooling Water System Inspection & Maintenance Project. The
18 projects discussed in this testimony are different from the St. Lucie Cooling Water
19 System Inspection & Maintenance Project because the facilities listed as part of the
20 Protected Species Project are not covered under the Biological Opinion.

21

22

1 **Q. Has FPL estimated how much will be spent on the proposed Protected Species**
2 **Project in 2020?**

3 A. FPL estimates that, following the filing of this petition, approximately \$75,000 to
4 \$150,000 of O&M expenses will be incurred in 2020 for consultant fees related to
5 the analysis, evaluation, recommendations and preliminary design of proposed
6 solutions for the Fort Myers Plant and Cape Canaveral Energy Center.

7 **Q. Has FPL estimated the total cost of the proposed Protected Species Project?**

8 A. Since the ultimate solution is yet to be determined, total projected costs are not
9 known. The associated agencies will review proposals developed by FPL's
10 consultants. FPL and the agencies will work together to determine which solution
11 and design is appropriate at each facility. Once that is determined, additional
12 Capital investment costs and O&M expenses will be incurred. FPL will provide
13 updated estimates in its regular filings once they are available.

14

15 If a physical structure is selected as the most appropriate solution at either facility,
16 it is anticipated that FPL will incur capital costs associated with design, permitting,
17 testing, and construction of such a structure. Preliminary estimates of capital costs
18 associated with such a structure range from \$500,000 to \$2 million at Plant Fort
19 Myers and from \$2.0 million to \$7.0 million at Cape Canaveral Energy Center.
20 These estimates are based on costs expended for the horseshoe crab wall
21 constructed at the Cape Canaveral Energy Center. This is a very preliminary
22 estimate of total capital expenses.

1 Depending on what solution is selected, FPL may incur additional O&M expenses
2 associated with the design, permitting, testing, and implementation of that solution.

3 **Q. Please describe the measures FPL is taking to ensure that the costs of the**
4 **Protected Species Project are reasonable.**

5 A. In general, FPL competitively bids the procurement of materials and services. FPL
6 benefits from strong market presence allowing it to leverage corporate-wide
7 procurement activities to the specific benefit of individual procurement activities.
8 However, consistent with applicable practices and procedures, single or sole source
9 procurement may also be used. All initial commitments and contract change orders
10 will be appropriately authorized. FPL’s Project Controls group maintains the
11 project scope, budget, and schedule and tracks project costs through various
12 approval processes, procedures, and databases. FPL will also use its prior
13 experience and lessons learned with wildlife protection and construction of intake
14 structures to ensure a cost-effective procurement selection and implementation
15 process.

16 **Q. Did FPL anticipate that it would need to conduct these activities at the time it**
17 **prepared the Minimum Filing Requirements for its 2016 rate case?**

18 A. No. Those MFRs were prepared in late 2015 and early 2016. As noted above, the
19 letter from NOAA Fisheries was received in 2019 and the letter from the USFWS
20 in 2020.

21

1 **Q. Is FPL recovering through any other mechanism the costs for the Protected**
2 **Species Project for which it is petitioning for ECRC recovery?**

3 A. No.

4 **Q. Does this conclude your testimony?**

5 A. Yes.

FLORIDA POWER & LIGHT COMPANY
DOCKET NO. 20200007-EI
ENVIRONMENTAL COST RECOVERY CLAUSE
FPL SUPPLEMENTAL CAIR/MATS/CAVR FILING
APRIL 1, 2020

The discussion below provides FPL's current estimates of project activities and associated costs related to its Clean Air Interstate Rule ("CAIR") now the Cross State Air Pollution Rule ("CSAPR"), Mercury and Air Toxics Standards ("MATS"), which was formerly the Clean Air Mercury Rule ("CAMR") and Clean Air Visibility Rule ("CAVR")/Best Available Retrofit Technology ("BART") projects. FPL has completed all capital projects associated with installation of controls for compliance with these rules. Ongoing O&M and Capital parts replacement for these projects on existing units will continue in order to ensure compliance. Accordingly, FPL intends to address all ongoing CAIR/CAMR/CAVR projected and actual costs in FPL's annual ECRC filings, similar to all other environmental projects approved by the Commission, rather than filing a Supplemental CAIR/CAMR/CAVR report.

CAIR Compliance Project Update:

Status of CAIR (now CSAPR) Rule - On November 16, 2015, the EPA proposed the CSAPR Update Rule ("Update Rule") to address interstate transport of air pollution under the 2008 Ozone National Ambient Air Quality Standards ("NAAQS"). The proposed rule became final on September 7, 2016, significantly reducing ozone season nitrogen oxide ("NOx") emissions in many states using revised air quality data and updates based on reductions from use of cost-effective emission controls. In the final Update Rule, the EPA removed Florida from the cap-and-trade program because emissions from the State's utility units are now below the significance threshold for impacts to downwind ozone nonattainment areas. Several states have challenged

the EPA rule and the D.C. Circuit remanded the rule to EPA on October 1, 2019. FPL will continue working with the EPA to ensure that Florida and FPL are treated fairly in any proposed changes to CSAPR. Operation of controls installed under the CSAPR project that are required for compliance with other federal and state rules (e.g., Georgia Multi-Pollutant Rule) are ongoing as needed. Operations and maintenance of equipment associated with CSAPR are still required for installed equipment on operating units. Therefore, FPL continues to incur associated O&M project costs, as described below.

St. Johns River Power Park (“SJRPP”) Selective Catalytic Reduction Systems (“SCR”) and Ammonia Injection Systems - In January 2018, both SJRPP units were retired from service. Therefore, there will be no further operating expenditures on this activity.

Scherer SCR and Wet Flue Gas Desulfurization (“FGD”) –While installation of the Scherer SCR and FGD controls have been completed, ongoing capital part replacements and O&M will continue to ensure continued operation of these emission controls to comply with the federal and state rules. FPL estimates its share of the Scherer Unit 4 CSAPR capital costs for projects planned in 2020 to be \$5.536 million for replacement of the SCR.

For 2020, FPL has estimated its share of ongoing O&M expenses for operation of the SCR, FGD, and common plant facilities supporting the controls needed to comply with CSAPR to be \$5.5 million. The O&M activities for the SCR include incremental operating staff, ammonia consumption, maintenance of the SCR ammonia injection skid and SCR auxiliary equipment. O&M activities for the FGD include limestone consumption, limestone and by-product (gypsum)

handling operation, FGD operations, FGD tower and auxiliary equipment maintenance.

800 MW Unit Cycling Project - The 800 MW Cycling Project was implemented to allow FPL the ability to cycle the 800 MW units off-line when not needed to supply energy to meet system demand allowing FPL to reduce NOx emissions. FPL completed construction work associated with this project in 2011 at its Martin and Manatee plants. On December 31, 2018, FPL retired the Martin plant 800 MW units and no further expenditures are required for those units. For 2020, ongoing O&M expenses are \$0.13 million for treatment of condenser tube fouling and maintenance of associated equipment at the Manatee 800 MW units.

Continuous Emissions Monitoring System (“CEMS”) Plan for Gas Turbines (“GT”) – There are no future projected capital or operating costs for the GT CEMS associated with this project. In December 2016, FPL completed the construction of peaking combustion turbines at the Lauderdale and Fort Myers plants, which replaced the generating capacity of the gas turbine peaking units at those plants. The 12 peaking gas turbines at Port Everglades have been decommissioned along with 22 gas turbines at Lauderdale and 10 gas turbines at Fort Myers plants. The remaining units are not subject to CEMS monitoring requirements. Accordingly, CEMS use has been discontinued.

Purchases of Allowances - To comply with the CSAPR and Acid Rain Program requirements, FPL must evaluate whether it holds sufficient allowances for compliance or needs to purchase additional allowances. FPL has determined that it holds sufficient Acid Rain sulfur dioxide (“SO₂”) allowances in perpetuity for all of its fossil generating units. To a very limited extent, FPL

has been able to occasionally find a buyer for some of its excess allowances and has sold an immaterial amount of SO₂ Acid Rain allowances. Currently FPL's Plant Scherer Unit 4 is an affected unit under the CSAPR Rule for Georgia. FPL has determined that it has sufficient excess allowances to meet its annual compliance surrender obligations.

Actual CAIR/CSAPR capital costs through 2019 were \$514.99 million.

| CAIR/CSAPR CAPITAL COST (\$Millions) | | |
|--------------------------------------|---------------|------------------|
| Project | Total Project | 2020 Projections |
| SJRPP-SCR/Ammonia Injection System | \$55.02 | \$0.00 |
| Scherer-SCR/FGD | \$365.244 | \$5.536 |
| 800 MW Unit Cycling – Martin | \$58.56 | \$0.00 |
| 800 MW Unit Cycling – Manatee | \$36.16 | \$0.00 |

Actual CAIR/CSAPR O&M expenses through 2019 are \$37.17 million.

| CAIR/CSAPR O&M EXPENSE (\$Millions) | | |
|--|----------------------|-------------------------|
| Project | Total Project | 2020 Projections |
| SJRPP-SCR/Ammonia Injection System | \$1.57 | \$0.00 |
| Scherer-SCR/FGD | \$31.07 | \$5.51 |
| 800 MW Unit Cycling – Martin | \$4.44 | \$0.00 |
| 800 MW Unit Cycling – Manatee | \$3.82 | \$0.13 |
| CEMS at GTs | \$0.46 | \$0.00 |
| Allowances | (\$4.18) | (\$2.40) |

Mercury Air Toxics Standards (“MATS”) Compliance Project Update (formerly CAMR):

FPL is complying with the Mercury (or “Hg”) reduction requirements of the Georgia Multipollutant Rule and the EPA’s MATS rule by implementing the following projects identified previously under the CAMR project:

1. Installation of Fabric Filter Baghouse and Mercury Sorbent Injection System on Scherer Unit 4 (completed 2010).
2. Installation of HgCEMS on Scherer Unit 4 (completed 2009).
3. Installation of HgCEMS on SJRPP Units 1 and 2 (completed in 2008 and Units 1 and 2 retired in January, 2018).

Construction of the mercury monitoring equipment and mercury emission controls (Plant Scherer)

was completed in 2010. For 2020, FPL's share of costs for capital replacement parts for the projects at Scherer Unit 4 is estimated to be \$1.106 million as capital replacement of components and controls. For 2020, FPL's share of ongoing MATS O&M expenses for Plant Scherer are projected to be \$2.65 million, primarily for purchase and disposal of sorbents and replacement of bags as well as operation and maintenance of the Hg monitors.

In EPA's December 21, 2011 final MATS rule, oil-fired electric steam generating units were required to meet specific emission standards during oil combustion and demonstrate compliance through quarterly testing or continuous particulate emission monitoring systems. The rule's emission limits for oil operation had the effect of requiring electrostatic precipitators ("ESPs") for FPL's 800 MW oil-fired units. Construction of the ESPs was completed in 2014 with total capital costs for construction of the ESPs through 2018 at \$209.82 million. As discussed earlier FPL's retirement of the Martin plant 800 MW units also removes the MATS compliance requirements and O&M costs for those units. For 2020, there are no forecasted capital costs for the Manatee plant 800 MW units but there is a planned maintenance outage of the Manatee Unit 1 ESP that was deferred from 2019.

Actual MATS capital costs through 2019 are \$325.90 million.

| MATS CAPITAL COSTS (\$Millions) | | |
|--|---------------|------------------|
| Project | Total Project | 2020 Projections |
| Scherer-Sorbent Injection/Baghouse/ HgCEMS | \$116.09 | \$1.106 |
| 800 MW ESP PMT | \$209.82 | \$0.00 |

*FPL's share of the project costs

Actual MATS O&M expenses through 2019 are \$23.48 million.

| MATS O&M EXPENSE (\$Millions) | | |
|--|---------------|------------------|
| Project | Total Project | 2020 Projections |
| SJRPP-Mercury CEMS | \$0.33 | \$0.00 |
| Scherer-Sorbent Injection/Baghouse/ HgCEMS | \$19.90 | \$2.65 |
| 800 MW ESP PMT | \$3.25 | \$0.26 |

CAVR / BART Project Update:

There are no future projected capital or operating costs for this project.

EPA's promulgation of the Clean Air Visibility Rule (CAVR) to address regional haze required affected sources to reduce visibility impacts to many of the U.S. National Parks and Monuments. FPL's retirement of Turkey Point Units 1 and 2, retirement of both combined cycle units at the

Putnam plant and installation of ESPs on the 800 MW units resulted in the Florida DEP finding that FPL had complied with the requirements of EPA's Regional Haze requirements.

F/SER31:AB

Kristin Eaton
Florida Power and Light Company
700 Universe Boulevard
Juno Beach, FL 33408

Dear Ms. Eaton:

On March 7, 2019, representatives from Florida Power and Light (FPL), the National Oceanic and Atmospheric Administration (NOAA Fisheries), and Florida Fish and Wildlife Conservation Commission (FWC) met to initiate discussion about the Fort Myers plant. As you are aware, the plant's operation has caused the deaths of five smalltooth sawfish (*Pristis pectinata*) over the past two years. The smalltooth sawfish is listed as endangered under the Endangered Species Act and it is unlawful for any person to take¹ the species within the United States (16 U.S.C. § 1538(a)(1)). It is therefore critical that FPL undertake measures to address the ongoing take at the plant and prevent future violation of the Act.

NOAA Fisheries wishes to collaborate with FPL to develop a solution. Building upon our discussions at the meeting, we believe the best way to prevent interactions with sawfish is to block their access to the intake canal. We recognize FPL's concerns that adding a structure at the canal entrance (e.g., something analogous to the grizzly bars currently in use at the pumps) could necessitate another system to keep the new structure free from debris. However, we believe that with proper design and placement of this structure along the edge of the river (away from the greatest intake velocity associated with the pumps), natural river or tidal flow could aid in keeping the structure clear.

We would like to further discuss this idea, or others, with FPL in order to prevent any further sawfish take. We appreciate your reporting the mortalities to FWC and look forward to your continued cooperation. To schedule the next meeting or conference call, please contact Mr. Adam Brame, NOAA Fisheries Sawfish Recovery Coordinator, at 727-209-5958 or adam.brame@noaa.gov.

Sincerely,

BERNHART.DAVID.M.10661

IN REPLY REFER TO:

March 25, 2020

Mr. Sean Chase
Florida Power and Light
6000 US1 North
Cocoa, FL 32927

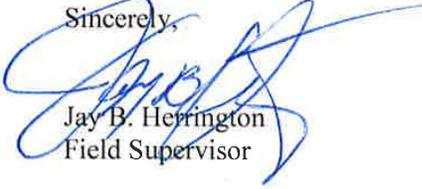

Dear Mr. Chase:

On January 26 and February 10, 2020, the U.S. Fish and Wildlife Service's North Florida Ecological Services Office (NFESO) was notified of two additional Florida manatee (*Trichechus manatus latirostris*) carcasses that had been discovered in the intake wells at Florida Power and Light's (FPL) Cape Canaveral Energy Center (CCEC) in Port St. John, Florida. In the last four months, four manatee carcasses have been discovered in or near the intake wells. From 2013 through November 2019, there have been 31 other carcasses reported in or near the intake wells (FWC-FWRI manatee mortality database, 2020). While in some cases, it was unclear if the manatee died within the intake well or if the carcass was carried into the intake by water movement at the plant, the Florida Fish and Wildlife Conservation Commission's (FWC) Marine Mammal Pathobiology Laboratory was able to confirm that at a minimum, the intake suction was a likely causal factor for some of the manatees discovered in the wells.

We appreciate the efforts by FPL since 2013, to eliminate Florida manatee mortality at this plant; however, these efforts have not been successful. Florida manatees are protected under the Endangered Species Act (1973) and the Marine Mammal Protection Act (1972), and it is very important that this issue be addressed. There have been a number of meetings and teleconferences between FPL, FWC, and NFESO staff (most recently on February 11, 2020) in a continuing effort to identify a solution to this issue. It is critical that FPL continue to evaluate and implement corrective measures to address the take at the plant.

FPL has been a significant partner in Florida manatee conservation efforts, and I urge your continued support as our staffs work together to resolve this issue. Terri Calleson of my staff is the point of contact for my office and her number is (904) 731-3286.

Sincerely,

Jay B. Herrington
Field Supervisor
