Subject: FL Residents Demand Lower Electric Rates

When I moved to the Tampa St Pete area seven years ago, I was shocked by the high electric rates. Why does FL continue to give monopoly power to for-profit energy companies? When I lived in hot deregulated state like Texas, my electric rate was half that of FL. If Duke, TECO has FPSC and politicians approving past rate increases, please now lower rates in lockstep w the fuel market. The Florida Public Service Commission has on its website that it approved not charging late fees during covid crisis. A ridiculous drop in the bucket from Duke, TECO and the other investor-owned FL power company monopolies, profiting exponentially from fuel price decline. Duke built a marble office building in downtown St Pete a year ago, and yesterday changed out my home electric meter when the previous one was working fine. These are outrageous examples of how utilities are allowed to waste FL resident dollars.

If Governor DeSantis and FPSC want to truly help Floridians economically in these terrible times, please start w substantially lowering electric rates!

Thank you,
Helen Wu
