Dear Commissioners,

DO NOT scale back the proposed energy efficiency programs for the state's biggest power companies – including efficiency programs for low-income customers. Given the economic fallout from the COVID-19 crisis and the high energy burden our low income neighbors are suffering, we must place an even greater value on cutting energy waste. In this time of crisis, we should SCALING UP these programs, not scaling them back. We are in Hurricane season, people are being asked to shelter in place and economic crises continue to plague our communities.

Please reject your staff's recommendation and ensure that each utility is putting forth robust efficiency programs – especially for its most vulnerable customers.

thank you

Olivia Collins
