Dear PSC Commissioners,

On July7 you will consider proposed energy efficiency programs for the state's biggest power companies, including energy efficiency programs for low income customers.

I strongly oppose PSC staff recommendations to scale back proposed efficiency programs, especially efficiency programs for low income families and individuals.

With the COVID-19 pandemic and the deep economic recession, all customers, but especially low income families and individuals need help dealing with unaffordable energy bills.

I urge you to reject your staff's recommendations and require robust energy efficiency programs for all power utilities. Please support hard working Florida families and individuals by your actions.

Thank you for considering my views.
