Dear Commissioners:

Regarding the upcoming decision before you on July 7th when you consider approval of proposed energy efficiency programs for Florida's large power companies, I would request that you approve it, or a modified version of it.

Energy efficiency makes a lot of sense at any time, to save residents money and limit any possible damage to our environment. As many Floridians and businesses are struggling economically at the present time, any current or even future energy savings would be very well received. Many other states have already approved similar programs and Florida is already behind them. I would urge you not to delay any energy efficiency programs for the utilities.

Thank you for your consideration,

Robert Reeves
