**Re: Docket No. 20200051-GU – Petition for rate increase by Peoples Gas System
Docket No. 20200166-GU-Petition for approval of 2020 depreciation study
by Peoples Gas System**

Dear Mr. Teitzman:

We enclose for filing with the Commission:

1. The original and seven (7) copies of Peoples Gas System's Notice of Intent to Request Confidential Treatment which was filed on August 17, 2020; and
2. A single unredacted copy of the response to item 24 of the Response to Staff's Third Set of Interrogatories in which the sensitive information for which confidential treatment is sought has been highlighted.

Attached as Exhibit A to the original and all seven (7) "public" copies of the Notice of Intent to Request Confidential Treatment identified above, is a redacted response to Item 24 excluding the sensitive information for which Confidential Treatment is sought.

Thank you for your usual assistance.

Sincerely,

Andrew M. Brown

Docket No. 20200051-GU

In re: Petition for approval of 2020
depreciation study by Peoples Gas
System.

Docket No. 20200166-GU

Submitted for Filing: August 17, 2020

**PEOPLES GAS SYSTEM'S
NOTICE OF INTENT TO REQUEST CONFIDENTIAL TREATMENT**

Pursuant to Sections 366.093 and 119.07, *Florida Statutes* and 25-22.006, *Florida Administrative Code*, Peoples Gas System ("Peoples") submits the following Request for Confidential Treatment of Number 24 of Peoples' Response to Staff's Third Set of Interrogatories To Peoples Gas System dated July 28, 2020 (the "Response").

1. In its Response to Interrogatory No. 24, Peoples includes a table which contains certain information regarding the assets and customers in the Counties and Communities Peoples serves (the "Material").

2. Accordingly, the Material (for which confidential classification is sought) is intended to be and is treated as private by Peoples because it contains proprietary confidential business information under Section 366.093(3), *Florida Statutes*.

3. Peoples requests that the information for which it seeks confidential classification not be declassified until 18 months after the date of the Commission's order granting this request (see Section 366.093(4), *Florida Statutes*). The time period requested is necessary to protect the competitive information regarding the pricing of Peoples' proposals for the installation and operation of LNG facilities. The period of time requested will ultimately protect Peoples and its customers.

4. As a result of the foregoing, Peoples has attached hereto, as Exhibit A, a copy of the Response with portions redacted.

WHEREFORE, Peoples submits the foregoing as its request for confidential treatment of the information identified in Exhibit A to this request.

Respectfully submitted,

Andrew M. Brown

**PEOPLES GAS SYSTEM
DOCKET NO. 20200051-GU
DOCKET NO. 20200166-GU
STAFF'S THIRD SET OF
INTERROGATORIES
INTERROGATORY NO. 23
PAGE 1 OF 1
FILED: AUGUST 17, 2020**

23. Referring to witness Buzard's direct testimony, page 5, line 10 through page 6, line 11, PGS is proposing to increase the Maximum Allowable Construction Cost (MACC) from four to ten times the estimated annual revenue to be derived from the facilities less the cost of gas, due to construction cost increases. Please discuss how the company determined that the appropriate increase to MACC should be ten times the estimated annual revenue and how this amount would benefit PGS's customers?

A As indicated on page 4, line 14 through 16 of Witness O'Connor's testimony, Peoples customer growth over the last 2 years has been 3.5%. Natural gas is affordable, reliable and an environmentally friendly fuel and the demand for natural gas has increased; however, significant cost increases in extending natural gas service can be a deterrent to a customer when obtaining service. Furthermore, as indicated on page 17, line 12 through 19 of witness Wall's testimony, transmission and distribution main construction costs have increased significantly since 2009. These cost increases are even greater specifically relating to service line installations but vary based on the conditions of the service installation (i.e., length, ground condition, permitting, etc.).

When determining the appropriate increase to the MACC, the Company determined the approximate average increase in the cost of a residential service line and meter set by comparing the historic base year total cost in MFR Schedule E-7 which was \$763 in 2007 to \$1,790 in 2019, resulting in an increase of \$1,027, or, an additional 135%. In order to accommodate these cost increases, the MACC would need to increase an additional 5.4 years (4 years X 1.35) to equal 9.4 years of revenue. Peoples rounded up to 10 years to reflect the 2020/21 annual cost increases and believes this is a fair adjustment to the MACC to properly accommodate construction cost increases.

The general body of ratepayers benefit when additional customers are added to the existing system through sharing in total system costs which lowers the customer's share of costs to operate and maintain the system. All of this contributes to keeping the cost per customer low.

- 24.** Witness Buzard states in his direct testimony on page 3, line 24 through page 4, line 5 (Territory Served) and page 6, line 21, through page 7, line 2 (Counties and Communities Served), that PGS has updated the service territory map and the list of communities being served to reflect PGS's expansion of its natural gas service in response to customer demand. MFR Schedule E-9, pages 16 through 28 (Revised tariff sheets 6.101 through 6.101-6), lists several newly added counties and municipalities/communities as being served by PGS. For each county and municipality/community newly added to the list, please state the type of service being provided by PGS.
- A.** See Bate Stamped Numbers 1-9. Additionally, Peoples has reviewed MFR Schedule E-9, pages 16 through 28 (Revised tariff sheets 6.101 through 6.101-6) Counties and Communities filed in this case and has modifications that are identified in the attached table. Peoples will refile this updated tariff sheet along with other updated tariff sheets reflecting any changes when approved by the Commission.

- 25.** Revised tariff sheet number 6.101-2 lists City of Sebring as being served by PGS. However, the City of Sebring's natural gas provider is Sebring Gas System pursuant to Sebring's tariffs. Please discuss.
- A.** Peoples provides gas transportation service to the supplier/gas marketer supplying natural gas to customers on Sebring's gas distribution system in accordance with the terms of the territorial agreement with Sebring.

PAGE 1 OF 1
FILED: AUGUST 17, 2020**

- 26.** Referring to Witness Buzard's testimony, page 9, line 18 through page 10, line 5, the company is proposing a new Virtual Pipeline Natural Gas Service (VPNGS) tariff. Please discuss if there has been customer interest for this proposed tariff.
- A.** Yes, customers from refuse, isolated industrial facility, transportation, and waste water treatment plant have expressed interest in securing natural gas via VPNG services from Peoples where their facility is not in close proximity to a natural gas pipeline or do not have sufficient natural gas demand to justify the cost to build a new natural gas pipeline.

- 28.** The proposed tariff indicates that PGS will need to design and construct facilities required for the provision of VPNG service. Please describe all the steps in the process to construct and operate the facilities.
- A.** Under the CNG approach, there would be minimal facilities to construct and operate in order for PGS to provide VPNG services. Specifically, a Peoples CNG trailer would be loaded with CNG at a compression terminal. The CNG compression terminal company would be responsible for loading CNG into the trailer in coordination with the trucking firm. After the CNG is loaded onto the CNG trailer, Peoples would arrange for that trucking firm to deliver the CNG to the customer. Upon arriving at the customer's location, a Peoples technician would be responsible for connecting the trailer to a decanting and regulation station to lower the pressure of the CNG to that required by the customer. The decanting would be connected to a meter and the customer's natural gas piping.

- 29.** Proposed tariff sheet number 7.407 states that service fee will be designed to recover the costs of the VPNG service facility. Please list items and costs associated with a VPNG service facility and how the company will ensure the full cost of the facility is recovered through the associated service fee.
- A.** The monthly services fee is designed to recover the incremental costs to serve a customer via a virtual pipeline versus a traditional pipeline application. These items include the installation of capital equipment such as vaporizers, trucks and trailers, pump stations and decanting equipment. The monthly services fee will also be designed to recover O&M for items such as the trucking of the fuel between locations, losses that occur from boil-off, and O&M similar to what is typical with any pipeline operations. Peoples expects these costs to typically range from \$0 up to \$6 million depending upon the customer's volume and other unique customer characteristics. The total installed costs of these facilities would be recovered through a cost of service model.

- 30.** Does the company anticipate serving multiple customers from a single VPNG facility? If so, how many customers can be served by a single facility?
- A.** While it is likely that Peoples will service a single customer from a single facility, it is possible that Peoples could serve a defined group of customers from a single facility. Each VPNG location will be designed based on the demand for that location and will have assets specific to that demand.
