Good Afternoon, Mr. Cummings.

We will be placing your comments below in consumer correspondence in Docket No. 20200181, and forwarding them to the Office of Consumer Assistance and Outreach.

Thank you!

Toni Hover

Subject: Docket No. 20200181; Fix FEECA Now

Dear Clerk Florida PSC Clerk,

We have a second home in the small town of Sterling Massachusetts. The difference from Florida power companies is staggering. In Sterling we have a large portion of our electricity from Renewable energy. We have storage capacity to power the town for several days in case of an outage. Significant financial rebates are available in Massachusetts for taking steps toward energy efficiency. And the result is significantly lower cost.

We know efficiency is the quickest, cheapest, and cleanest way to meet our energy needs and tackle climate change – but outdated practices in setting state energy efficiency goals are holding us back. It's past time for Florida to remove all roadblocks to energy savings and to provide more and better energy efficiency programs to customers.

If a small Massachusetts town can provide high quality product and service while keeping costs down, surely Florida can make serious improvement through better rule making.

Thanks for considering my thoughts.

Sincerely,
Frank Cummings
