Subject: A Solar Choice is utility stability - Docket: 2020-0000

Dear Clerk Florida PSC Clerk,

I am in support of continued net metering in FL. In times like these of uncertainty, what Floridians need is more methods of energy production; which include solar power.

If we look at other countries, solar, wind, nuclear, and natural gas provide a multi-modal solution to energy production and in the USA we should follow that example, and ultimately we will be the leader.

Transition to a cleaner energy source cannot happen overnight. Most people are aware of this. But Florida has the opportunity to be and is one of the leaders of solar energy production and it should continue to do so. As others have said, energy security is economic security for millions of Floridians. Thank you for your service.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,
Marc Wigder
