Subject: I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Clerk Florida PSC Clerk,

As a 40 year resident of the Sunshine State, I have done my best to minimize my carbon foot print by adopting a solar system for my home for more than 5 years, all thanks to the net metering policy instituted by the Florida PSC. As a pioneer in my neighborhood. I have been instrumental in introducing my solar contractor to several of my friends in my subdivision of more than eighty homes to sustain job opportunities for many up and coming solar contractors.

As we struggle with a global pandemic, an economic crisis, and an active hurricane season, it is not the time to create more uncertainty by signaling a change in solar policies that are helping to make our state a leader in clean solar power and providing good paying local jobs.

The economic downturn has already put many of these jobs and future solar development at risk - we don't need sudden regulatory changes in solar policies to create even more uncertainty here in Florida.

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners like me to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,  
Ramesh Krishnaiyer  
Coral Springs, FL 33071
