Subject: Protect our solar rights! Docket: 2020-0000

Dear Florida Public Service Commission,

Net metering is essential to taking Florida into the 21st century of energy generation. If solar energy is not adopted, there will be even greater pressure to drill for oil off of Florida's coast, which in turn will hurt our tourist economy. Florida is the ideal place for solar energy, but without net metering, it just is not feasible.

It is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Failure to require equitable net metering in Florida will deprive the state of one of the fastest-growing industries in the nation.

PLEASE DO NOT LET FLORIDA FALL BEHIND THE REST OF THE NATION AND LOSE THESE JOBS.

Sincerely,  
Bill Voorhees  
5632 Baxter Lake Dr Jacksonville, FL 32258-5375
