Subject: Protect our solar rights! Docket: 2020-0000

Dear Florida Public Service Commission,

I got solar panels last year, so I have net metering. From what I understand from FP&I, I get \$0.01 for electricity that FPL charges \$0.04 for. So basically, they are making a \$0.03 profit on every extra kilowatt of electricity that I generate. I don't understand why they want to stop this. Are they so desperate for profits that they have to take my one cent away as well? you're probably aware of the fact that, in spite of what our President says, global warming is real, and the more people that go solar, the less pollutants we emit the atmosphere. Please, encourage solar don't discourage it. there is no justifiable reason for getting rid of net metering other than that flicker power and light wants even more profits.

Sincerely,
Tammy Frsnk
Hollywood, FL 33021
