Subject: Protect our solar rights! Docket: 2020-0000

Dear Florida Public Service Commission,

I power my home and electric car with free sunshine in the Sunshine state. I generate and transport my power, 100% of my needs no more than 100 feet, and send the excess to the grid for my neighbors.

My solar system was built and installed by a company headquartered in Florida, employing Floridians.

My solar system and others like it, reduce the need for more power plants that belch pollutants into the air

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,

Robert Winfield
