**Sent:** Monday, September 14, 2020 7:17 AM  
**To:** Office of Commissioner Graham; Office of Commissioner Polmann; Office of Chairman Clark; Office of Commissioner Brown; Office of Commissioner Fay  
**Subject:** please protect net metering

Dear commissioners:

Ahead of Thursday's hearing related to net metering, I ask you to maintain the ability of Florida's residents and businesses to access solar energy by protecting our ability to utilize net metering. Florida is moving toward renewable energy, and we must do so as rapidly as possible in order to avoid the worst impacts of climate change. When we support energy freedom for Floridians we will get to renewable energy faster, and we will have a more resilient system by having diversified sources of energy.

I want to put solar panels on my rooftop one day so that I can better support my family. Net metering helps to make that viable. Please protect net metering!

**Sent:** Monday, September 14, 2020 1:03 AM  
**To:** Office of Commissioner Graham  
**Subject:** Protect our solar rights! Docket: 2020-0000

Dear Chairman Art Graham,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,  
Lynn Dils  
Key Largo, FL 33037

**To:** Office of Commissioner Graham  
**Subject:** I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Commissioner Chairman Art Graham,

As we struggle with a global pandemic, an economic crisis, and an active hurricane season, it is not the time to create more uncertainty by signaling a change in solar policies that are helping to make our state a leader in clean solar power and providing good paying local jobs.

At the start of 2020, Florida was ranked 4th in the nation for solar energy production, employing thousands of people and powering the Sunshine State with clean, affordable, homegrown energy. The economic downturn has already put many of these jobs and future solar development at risk - we don't need sudden regulatory changes in solar policies to create even more uncertainty here in Florida.

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,  
Etta Juge  
Winter Springs, FL 32708

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

In addition, FPL only reimburses customers less than 2 cents per kilowatt hour for excess energy produced from rooftop solar- then resells it for 11 cents. Solar customers should be fairly compensated and not penalized for making clean energy choices. Voters rejected Amendment 1 in 2016, the last time the utilities tried to eliminate net metering and discourage roof top solar. Why is this subject being revisited?

Sincerely,  
Chris Bromfield

**Sent:** Monday, September 14, 2020 4:39 AM  
**To:** Office of Commissioner Graham  
**Subject:** Protect our solar rights! Docket: 2020-0000

Dear Chairman Art Graham,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,  
Richard Zawadski  
533 Sunrise Dr Orlando, FL 32803-6730

**Subject:** I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Commissioner Chairman Art Graham,

As we struggle with a global pandemic, an economic crisis, and an active hurricane season, it is not the time to create more uncertainty by signaling a change in solar policies that are helping to make our state a leader in clean solar power and providing good paying local jobs.

At the start of 2020, Florida was ranked 4th in the nation for solar energy production, employing thousands of people and powering the Sunshine State with clean, affordable, homegrown energy. The economic downturn has already put many of these jobs and future solar development at risk - we don't need sudden regulatory changes in solar policies to create even more uncertainty here in Florida.

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,  
Jean Greene

**Subject:** I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Commissioner Chairman Art Graham,

As we struggle with a global pandemic, an economic crisis, and an active hurricane season, it is not the time to create more uncertainty by signaling a change in solar policies that are helping to make our state a leader in clean solar power and providing good paying local jobs.

At the start of 2020, Florida was ranked 4th in the nation for solar energy production, employing thousands of people and powering the Sunshine State with clean, affordable, homegrown energy. The economic downturn has already put many of these jobs and future solar development at risk - we don't need sudden regulatory changes in solar policies to create even more uncertainty here in Florida.

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,  
Kenneth Eberly
