Subject: Protect net metering

Dear Commissioner Art Graham,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Regards,
Luis Correa

Subject: Protect our solar rights! Docket: 2020-0000

Dear Commissioner Art Graham,

Time and time again, Florida's voters have made their support for policies meant to encourage the spread of rooftop solar clear. In 2016 voters rejected the utility-driven "Amendment 1", which would have prohibited the subsidization of solar energy, and approved 'Amendment 4', which provided tax exemptions for rooftop solar customers.

Florida is in the middle of a public health and economic crisis. Undermining the rights of solar customers to receive full compensation for the power they produce will hurt jobs and take money out of people's pockets. Now is not the time to create more uncertainty by changing the fundamental economic landscape of the solar industry.

Before COVID-19, the Sunshine state produced the fourth most electricity from solar panels in the country, led the country in new solar jobs, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could threaten up to 125,000 of these jobs across the United States. Florida is struggling with an above 10% unemployment rate since May and the economic hardship could get worse if you end retail-rate net metering.

People and businesses across the state rely on commonsense solar policies to take control of their own energy. Solar benefits Floridians' safety too. Solar panels and batteries contribute to the resilience of the electric grid. As we progress through hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, homeowners, and our environment from additional uncertainty by preserving retail compensation for net metering here in Florida.

Thank you,
Richard Franco

Subject: Protect our solar rights! Docket: 2020-0000

Dear Chairman Art Graham,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,
Robert Howell
15638 Mahoney Dr Spring Hill, FL 34610-5486

Subject: I support Net Metering - Docket: 2020-0000

Dear Commissioner Chairman Art Graham,

We have been generating 90% of the power we need for our home using rooftop solar since 2016.

Net Metering is the regulatory policy that makes this solar system possible. When we generate electricity that we cannot immediately use, we sell it onto the grid for others who need it. And at night, when we cannot generate our own power, we buy that electricity back from the utility.

Eliminating Net Metering would create an unfair and unsustainable condition where we would be giving away energy during part of the day, but still paying full price to buy it back later.

Our decisions to buy solar equipment in the first place were entirely based on the fair system of being able to sell power during the day to buy it back at night. Without Net Metering, we never would have purchased our solar equipment to begin with: the cost of ownership would then be too high.

Please protect the opportunity for Floridians to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Dear Chairman Art Graham,

Greetings Commissioners,

People and businesses across the state rely on common sense solar policies to take control of their own energy future and choose how they power their lives with an abundant source of renewable energy.

Solar tech has allowed for good return on investment but battery tech is still not there yet. The idea that monopolies will treat their customers poorly is not new but you have the power to see that fairness is afforded. We the people that have gone solar or will go solar know that net metering is fair, logical, and when looked at objectively, mutually beneficial. The power transmission system can be stranded by long distances but generating power on your own roof or your neighbor's roof just makes sense. As they say, all things in moderation. If we lived this motto we can make the world a better place.

Please defend solar workers, business owners, and homeowners, and all those looking to go solar from uncertainty by preserving net metering here in Florida.

Sincerely,
Naret Teran

Dear Chairman Art Graham,

I am a homeowner in the Winter Haven area. I've very successfully operated my 10kW rooftop photovoltaic system for several years.

A tremendous number of homes in Florida also could employ roof top systems, for the benefit of our environment and for their personal economic benefit, too.

Through NET METERING please help me retain my economic benefit. And likewise continue to provide incentive for other homeowners, like me, to go solar, and benefit our environment, too.

Thank You Sincerely,
Marc V. Hurst

Dear Chairman Art Graham,

In our previous home, my husband and I had solar installed, at our own expense. That is NOT a complaint! We wanted to solar!!! We took ourselves off the grid and added to it. Seems like a win/win for all!! But why would the Commission want to reduce the net metering? It's the only fair way for homeowners to feel that we are addressing one problem that is plaguing our planet. Instead, taking away net metering would only increase profits to the utility companies. And that...is just not right. This ability to 'take a load off' our energy consumption, is what we feel in our hearts is the RIGHT thing to do.

PLEASE, do not penalize us. There is plenty of energy to go around. And quite frankly, I don't think that we would have even had a credit on our account at the end of the year. So, the energy company used our produced energy all year. And then, if we had any credits built up, our pay back was, what, 5% of what we would have been charged.

This should be an incentivized program!!

And then there is this:

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Dear Chairman Art Graham,

Fair is fair. I produce more power from solar during the day than I can use, it goes on the grid because I'm connected, FP&L sells my excess to a neighbor for a profit and I get couple cents back on top of paying FP&L a base rate of almost \$10 a month for that privilege. To do away with net-metering is petty and unfair.

I applaud FP&L for installing big solar farms. But there are transmission power losses in the distribution of that power. There is very little loss when power goes from my house to a neighbor. This is a good thing.

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Subject: Protect our solar rights! Docket: 2020-0000

Dear Commissioner Art Graham,

Time and time again, Florida's voters have made their support for policies meant to encourage the spread of rooftop solar clear. In 2016 voters rejected the utility-driven "Amendment 1", which would have prohibited the subsidization of solar energy, and approved 'Amendment 4', which provided tax exemptions for rooftop solar customers.

Florida is in the middle of a public health and economic crisis. Undermining the rights of solar customers to receive full compensation for the power they produce will hurt jobs and take money out of people's pockets. Now is not the time to create more uncertainty by changing the fundamental economic landscape of the solar industry.

Before COVID-19, the Sunshine state produced the fourth most electricity from solar panels in the country, led the country in new solar jobs, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could threaten up to 125,000 of these jobs across the United States. Florida is struggling with an above 10% unemployment rate since May and the economic hardship could get worse if you end retail-rate net metering.

People and businesses across the state rely on commonsense solar policies to take control of their own energy. Solar benefits Floridians' safety too. Solar panels and batteries contribute to the resilience of the electric grid. As we progress through hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, homeowners, and our environment from additional uncertainty by preserving retail compensation for net metering here in Florida.

Thank you,

The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Dear Commissioner Art Graham,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Subject: Protect our solar rights! Docket: 2020-0000

Dear Commissioner Art Graham,

Time and time again, Florida's voters have made their support for policies meant to encourage the spread of rooftop solar clear. In 2016 voters rejected the utility-driven "Amendment 1", which would have prohibited the subsidization of solar energy, and approved 'Amendment 4', which provided tax exemptions for rooftop solar customers.

Florida is in the middle of a public health and economic crisis. Undermining the rights of solar customers to receive full compensation for the power they produce will hurt jobs and take money out of people's pockets. Now is not the time to create more uncertainty by changing the fundamental economic landscape of the solar industry.

Before COVID-19, the Sunshine state produced the fourth most electricity from solar panels in the country, led the country in new solar jobs, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could threaten up to 125,000 of these jobs across the United States. Florida is struggling with an above 10% unemployment rate since May and the economic hardship could get worse if you end retail-rate net metering.

People and businesses across the state rely on commonsense solar policies to take control of their own energy. Solar benefits Floridians' safety too. Solar panels and batteries contribute to the resilience of the electric grid. As we progress through hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, homeowners, and our environment from additional uncertainty by preserving retail compensation for net metering here in Florida.

Thank you,
