Subject: Protect our solar rights! Docket: 2020-0000

Dear Florida Public Service Commission,

Greetings Commissioners,

People and businesses across the state rely on common sense solar policies to take control of their own energy future and choose how they power their lives with an abundant source of renewable energy.

Solar tech has allowed for good return on investment but battery tech is still not there yet. The idea that monopolies will treat their customers poorly is not new but you have the power to see that fairness is afforded. We the people that have gone solar or will go solar know that net metering is fair, logical, and when looked at objectively, mutually beneficial. The power transmission system can be stranded by long distances but generating power on your own roof or your neighbor's roof just makes sense. As they say, all things in moderation. If we lived this motto we can make the world a better place.

Please defend solar workers, business owners, and homeowners, and all those looking to go solar from uncertainty by preserving net metering here in Florida.

Sincerely,
Naret Teran
921 Dartmouth St Orlando, FL 32804-5723
