Subject: Protect our solar rights! Docket: 2020-0000

Dear Florida Public Service Commission,

Please preserve net metering. We bought our solar system with the understanding that we could sell our electricity back at the retail price. The unit was kind of expensive but we figured we were doing something good for the environment but if net metering goes away then it will become a real economic burden to us. I imagine other people will lose the motivation to install solar which means my local provider could go out of business, which will make it very hard to get mine fixed.

I don't mean to couch everything in my own interest. I think net metering and solar is great for our state and our country's national security. Thank you Charles .

Sincerely,
Charles Reith
