Subject: I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Florida PSC Commissioners,

We chose solar to help eliminate dependence on fossil fuels such as coal and natural gas and energy sources reliant on nuclear energy with its long term disposal issues. If enough of us take advantage of sun power, the state benefits by cleaner air and water, and the utilities companies benefit from not having to increase capacity for population growth with expensive construction projects. Solar also creates thousands of jobs in these times of economic uncertainty.

Florida is a leader in solar production. That's due in part to the State's forward-thinking policies about solar. Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,
Herbert Stevens
