Subject: Protect our solar rights! Docket: 2020-0000

Dear Florida Public Service Commission,

One building at my church has received power from solar panels since April 2007. Since they City of Tallahassee residential and commercial customers have installed more than 2000 kW DC of solar. Solar installations have been at a record rate since the beginning of 2019 employing many installers. Systems are larger than 10 years ago now averaging over 9kW per installation.

We in Tallahassee are looking for continued growth and even more jobs created.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,
Steve Urse
1118 Waverly Rd Tallahassee, FL 32312-2815
