Re: Docket no 20200139-Ws
Utilities Rate Increase

I received from Utilities a notice that they are requesting another rate increase. Based upon the request they are requesting about a 35% increase across the board. The commission has allowed them to put in place about a 6% increase across the board. A reminder that in 2018 you approved a huge rate increase for this same company. This rate increase in some cases tripled people's rates. I know in my case it was about a 85% increase. I attend the hearing about this rate increase no one was in favor of it even our state senator spoke out against it but in spite of this you allowed this huge increase. It was said at that time by you and Utilities that this increase was needed to bring the water service in to compliance with the state requirements and another rate increase was not expected to be needed in the near future.

I am as all my neighbors are completely against any increase for this company based on the recent huge increase you just gave them. This company is owned by a Canadian investment company that they pay fees to and borrow money from at high rates they also use sister companies to handle repairs up grades and etc,

I request you look after the citizens of Florida and not foreign companies.

George Hammer
