Subject: Protect our solar rights! Docket: 2020-0000

Dear Florida Public Service Commission,

The recommended changes to net metering could hurt jobs and reduce income to people who have been leading the effort to find and create reusable energy. With mostly sunny days each year, Florida's solar industry has been growing, which has not only created employment for 250,000 people, but provided a back-up energy solution during catastrophic weather events that impact the power grid.

The COVID-19 crisis is creating unparalleled economic uncertainty and continues to cut employment opportunities in every industry, including this one.

Please consider carefully changes to solar policies that may further limit employment, reduce access to solar choices and take money out of the pockets of clean energy supporters. And please support policies that preserve net metering here in Florida.

Sincerely,
Teresa Potter
3614 W Vasconia St Tampa, FL 33629-8739
