<cthaell@everyactioncustom.com>  
**Sent:** Tuesday, September 15, 2020 7:53 AM  
**To:** Office of Commissioner Polmann  
**Subject:** Protect our solar rights! Docket: 2020-0000

Dear Commissioner Donald J. Polmann,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,  
Clifford I. Thuell  
9601 Miccosukee Rd Lot 59 Tallahassee, FL 32309-9664

**Subject:** Protect our solar rights! Docket: 2020-0000

Dear Commissioner Donald J. Polmann,

I power my home with solar because I care about climate change and believe we should be doing everything possible to combat it. Now is not the time to dispense with the net metering rule. Even with tax incentives and net metering parity, rooftop solar only barely makes economic sense for people who live paycheck to paycheck. We should be encouraging rooftop solar, not penalizing those who have invested in it for the good of the community and the protection of the environment.

Sincerely,  
Jan Allyn

**From:** Michael Ebner <Michael.Ebner.231730590@p2a.co>  
**Sent:** Tuesday, September 15, 2020 3:50 PM  
**To:** Office of Commissioner Polmann  
**Subject:** Protect our solar rights! Docket: 2020-0000

Dear Commissioner Donald Polmann,

Time and time again, Florida's voters have made their support for policies meant to encourage the spread of rooftop solar clear. In 2016 voters rejected the utility-driven "Amendment 1", which would have prohibited the subsidization of solar energy, and approved 'Amendment 4', which provided tax exemptions for rooftop solar customers.

Florida is in the middle of a public health and economic crisis. Undermining the rights of solar customers to receive full compensation for the power they produce will hurt jobs and take money out of people's pockets. Now is not the time to create more uncertainty by changing the fundamental economic landscape of the solar industry.

Before COVID-19, the Sunshine state produced the fourth most electricity from solar panels in the country, led the country in new solar jobs, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could threaten up to 125,000 of these jobs across the United States. Florida is struggling with an above 10% unemployment rate since May and the economic hardship could get worse if you end retail-rate net metering.

People and businesses across the state rely on commonsense solar policies to take control of their own energy. Solar benefits Floridians' safety too. Solar panels and batteries contribute to the resilience of the electric grid. As we progress through hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, homeowners, and our environment from additional uncertainty by preserving retail compensation for net metering here in Florida.

Thank you,

<quicksilver@everyactioncustom.com>  
**Sent:** Tuesday, September 15, 2020 7:52 AM  
**To:** Office of Commissioner Polmann  
**Subject:** Keep Net Metering for solar!

Dear Commissioner Donald Polmann,

We made the large investment in solar for our home with a clear understanding that net metering existed in Florida. Changing the rules would have a negative economic impact on my family. It would also discourage others from going solar in the future, which is the opposite of what we need to do to combat climate change!

As we struggle with a global pandemic, an economic crisis, and an active hurricane season, it is not the time to create more uncertainty by signaling a change in solar policies that are helping to make our state a leader in clean solar power and providing good paying local jobs.

At the start of 2020, Florida was ranked 4th in the nation for solar energy production, employing thousands of people and powering the Sunshine State with clean, affordable, homegrown energy. The economic downturn has already put many of these jobs and future solar development at risk - we don't need sudden regulatory changes in solar policies to create even more uncertainty here in Florida.

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,  
Stacey Churchill

Dear Commissioner Donald Polmann,

STOP catering to these ceaseless & dishonest attacks by the Investor-owned utilities against residential and commercial solar! Studies have repeatedly shown that residential solar customers ADD tremendous value to the grid that benefits everybody! These attacks are blatant attempts to protect [the profits of] the regulated utility monopoly in FL. Their business model is being disrupted, and rather than take advantage of the MANY new opportunities that exists for THEM in solar, efficiency, etc, they instead lies and use shady front groups to quash fair competition.

Time and time again, Florida's voters have made their support for policies meant to encourage the spread of rooftop solar clear. In 2016 voters rejected the utility-driven "Amendment 1", which would have prohibited the subsidization of solar energy, and approved 'Amendment 4', which provided tax exemptions for rooftop solar customers.
