Subject: Customer Owned Renewable Generation workshop 9-17-2020

My wife and I would like to add our voices AGAINST allowing the program that benefits consumers to be reduced or cancelled. Co-generation of power and selling it to the power company is crucial for the expansion of renewable energy that directly benefits consumers, NOT the power companies.

If our state and Federal governments don't get moving faster on reducing climate impact, hurricanes and fires will only get worse in years to come. We trust the scientists.
