Dear Florida Public Service Commission:

I live in Fort Myers and went solar this past May 15th. The panels were placed on my roof by March 3rd. It was very difficult to continue paying an average of \$ 171.00 monthly for my electric power. (and that was budget) I am writing this letter to keep net metering for my energy needs and keep my electricity affordable. It certinally is the present and wave of the future. It is free energy and clean energy, which obviously is so important in keeping global warning to a minimum to help save the earth from weather extremes, ocean rises, glacier reduction, and a host load of other potential problems erupting in the near future. I want to become as carbon free as I can be and drive hybrid vehicles to help in that area as wll. Please as you cotinue your comission jobs, think of us who are being responsible in helping the environement and keep net metering alive !!

sincerely,

Kent & Freda Confeld
