Subject: Please defend solar workers, business owners, and Florida residents by preserving net metering here in Florida.

Dear FL PSC Commissioners,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools "not less" in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and Florida residents from additional uncertainty by preserving net metering here in Florida

Sincerely,

Andre Ayub

Subject: Please defend solar workers, business owners, and Florida residents by preserving net metering here in Florida.

Dear FL PSC Commissioners,

Florida should be a leader in solar power in the US: its implementation , jobs, manufacturing, and environmental impact, etc. Net metering helps homeowners and businesses recoup some of their investment in solar.

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Sent: Thursday, September 17, 2020 9:34 AM
To: Consumer Contact
Subject: Keep Net Metering

I understand there is a workshop today to discuss the fate of net metering in our state. As a constituent and a proponent of solar energy, I very much support maintaining the net metering program. It in no way puts a burden on low income or moderate income families as has been falsely disseminated. In fact I feel like it evens the playing field and provides alternative energy solutions for many people and takes the burden off the overall grid. We cannot possibly promote cleaner energy in the "sunshine state" if we don't maintain programs such as this.

I would encourage you in fact to do everything you can on this commission to promote more access to solar power, reduce the state's reliance on dirty fossil fuel and make alternative energy more available across-the-board. Please remember, the name of your commission is the public service commission, not the power company commission. Your job is to represent the citizens and what is best for us, not the utilities.

Please maintain, and in fact do what you can to improve, the net metering program. Thank you.

Vivienne Handy
