**Subject:** Please defend solar workers, business owners, and Florida residents by preserving net metering here in Florida.

Dear FL PSC Commissioners,

Diversity, options, and stability matter. Let's move forward for the future, not backward. Decoupling would still allow for a profitable energy provider. The Tampa Bay Region as created jobs and supported sustainable businesses and non-profits helping our citizens.

Hello PSC,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, solar installer was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools not less in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and Florida residents from additional uncertainty by preserving net metering here in Florida

Sincerely,

Sharon Wright

**Subject:** Maintain Florida's Fair Net Metering Rules

Dear Commissioners,

I encourage you to maintain Florida's fair net metering rules. As the Sunshine State, solar should be expanded and incentivized to encourage growth of this much needed future energy source.

Power generated on my property and with my equipment, is for my complete benefit. Anything less than, "Fair Net Metering," is stealing from the owners of these systems. It will halt the use of solar by private property owners and dry up the solar investment in Florida. The cottage Solar Industry would be deiminated and force hundreds of small businesses and contractors that install and maintain these systems for our power pioneers to close.

Please, maintain, and even enhance, FAIR Net Metering Rules to expand solar not limit it or allow others to unfairly profit, er steal, from those who have made these investments.

Thank you for Florida's Fair Net Metering Rules and your continued service for our great state and Florida rate payers. I am always,

Yours very truly,

Gene Wells  
601 W Hillsborough Ave, Tampa, FL 33603
