**Subject:** Please defend solar workers, business owners, and Florida residents by preserving net metering here in Florida.

Dear FL PSC Commissioners,

Solar is the way of the future, not ONLY for OUR planet - but for the future of good paying jobs - right here in Florida! The sun is our natural resource that we can turn in to cash, for our state and for our citizens!

I must write to say that we are right in the middle of a public health crises, which has in turn put us right in the middle of a large economic crisis - do you really think that this would be the right time to sow doubts and create even MORE uncertainty? If you make these changes to OUR solar rights, it will have one major change - it WILL hurt people who have good paying jobs and will absolutely take money out of people's pockets - that they need in this VERY hard time to feed themselves and their families!

Prior to COVID-19, the Sunshine state WAS ranked as 4th in the production of electricity from solar panels - IN THE COUNTRY, with over 12,000 (THOUSAND) people employed in this industry! Prior to this crisis - ?Solar Installer? was THE fastest growing job in our country, as well as employing over 250,000 people!

The COVID-19 crisis could put half (approximately 125,000) of these jobs at risk in communities across the United States! Are you aware that our state of Florida has ALREADY lost about 22% of its workforce - ALL DUE to economic uncertainty? Your actions will decide if this even gets WORSE!

People and businesses across our state are relying on you making common sense solar policies - so that we can take control of our own energy, and how we choose to "power" our lives. You may or may not be aware of the fact that Solar panels - and batteries - are large contributing factors to the resiliency of our electric grid!

As we go in to an already rather busy hurricane season, Floridians need MORE tools ? NOT LESS ? in order to "weather" ALL of these storms that are coming for us!

Defend Floridian solar workers and business owners, and defend ALL Florida residents from any additional uncertainty by preserving net metering here in Florida!

Thank You!

Sincerely,

S. Reizburg

Dear FL PSC Commissioners,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, solar installer was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools not less in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and Florida residents from additional uncertainty by preserving net metering here in Florida

Sincerely,

Dear FL PSC Commissioners,

I don't know what is wrong with Florida, but for a state that depends on its coastline and tourism for revenue you would think solar would be first on your mind.

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, 'solar installer' was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools 'not less' in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and Florida residents from additional uncertainty by preserving net metering here in Florida
