Subject: Preserve and extend net metering - Docket: 2020-0000

Dear Florida PSC Commissioners,

Florida homeowners have spent many millions of dollars counting on the value of net metering. Of course, utilities find this inconvenient.

As an electrical engineer, I can unequivocally state the advantages of local PV power generation are obvious. It is far more beneficial to the citizens and state of Florida than centralized power production, especially fossil fuel sourced power.

Please extend and embrace net metering and other policies friendly to local, citizen sourced power. It is the future.
