Subject: Please defend solar workers, business owners, and Florida residents by preserving net metering here in Florida.

Dear FL PSC Commissioners,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and Florida residents from additional uncertainty by preserving net metering here in Florida

Sincerely,

Pat Wentz

Subject: Comments for the Customer-Owned Renewable Generation Workshop September 17, 2020

I installed a home solar system to help the country and the planet. My system is american made and installed and maintained with local labor.

Net metering was the law and a promise made to the pioneers of home solar to help justify the initial capital expense, especially since Florida provides no other incentives.

A home solar system is also contributing infrastructure that the utility does not have to budget to maintain. I have had to replace the inverter and several misc parts in the 5 years that I have had my system. The parts may be covered but the labor and lost solar days are not.

The \$11 line charge paid to Duke, regardless of my total bill, seems a sufficient contribution to maintain my share of the grid.

Please continue to keep net metering in place for owners of home solar systems.

Dear FL PSC Commissioners,

I'm drained with decisions being made that do not support the pursuit of happiness for the people. If you want to follow your political principles, if you remove the net metering, you demonstrate that you do not care about constituents having the ability to take care of their families, and freedom and reflect that corporate and shareholder rights have more value for them than the people that are pursuing their happiness and prosperity.

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Dear FL PSC Commissioners,

This is a vital issue for Florida. We, the Sunshine State, cannot be the place where regressive thinking takes hold. The old mentality of greed, selfishness, over-consumption, destruction of our planet must die and we must fight for the rights of the generations that will follow us. What will be this generation's legacy if we don't? At minimum, one of cowardice.

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.
