Subject: I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Commissioner Donald Polmann,

DO NOT roll back net-metering! The profits of a monopolizing entity should NEVER come at the cost of the Americans footing the bill! I'm tired of padding the pockets of corporations and utilities just because they know we don't have any other company to choose from! Just for the fact that we cannot shop around and negotiate the cost of our electricity; we should be allowed to use whatever means necessary to save money and limit the impact on our environment! The power companies profit is NO REASON to roll back anything! The voters chose net-metering and the voters should be the ONLY ones to change it! Americans can barely pay their bills as it is and the power companies only concern is a little dip in their profits!?! LOOK UP AND SEE WHAT THE CEO'S of Floridas power companies make! It's disgusting! We make less than \$40k and manage to survive!!!

As we struggle with a global pandemic, an economic crisis, and an active hurricane season, it is not the time to create more uncertainty by signaling a change in solar policies that are helping to make our state a leader in clean solar power and providing good paying local jobs.

At the start of 2020, Florida was ranked 4th in the nation for solar energy production, employing thousands of people and powering the Sunshine State with clean, affordable, homegrown energy. The economic downturn has already put many of these jobs and future solar development at risk - we don't need sudden regulatory changes in solar policies to create even more uncertainty here in Florida.

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,
Tina Burke

Subject: Protect our solar rights! Docket: 2020-0000

Dear Commissioner Donald J. Polmann,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,
Duane Crowley

Dear Commissioner Donald Polmann,

Its time to move forward with renewable energy projects and production in Florida. We should be a leader among the states in utilizing solar power at the residential level.

The current net metering rule was good policy when it came into play and remains so now. Let's not mess this up. Let's grow this segment of the solar market by allowing citizens to choose to power their homes and businesses with Florida's number one natural resource, sunshine.

There is a reason that the ballot initiative in 2016 was broadly supported. Florida citizens support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Dear Commissioner Donald Polmann,

As a house with solar, and investing tens of thousands of dollars to add to my home, the benefits of net metering were heavily considered when making this purchase. Taking away net metering would put myself and thousands of others in a tough financial position.

As we struggle with a global pandemic, an economic crisis, and an active hurricane season, it is not the time to create more uncertainty by signaling a change in solar policies that are helping to make our state a leader in clean solar power and providing good paying local jobs.

At the start of 2020, Florida was ranked 4th in the nation for solar energy production, employing thousands of people and powering the Sunshine State with clean, affordable, homegrown energy. The economic downturn has already put many of these jobs and future solar development at risk - we don't need sudden regulatory changes in solar policies to create even more uncertainty here in Florida.

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,
Roberto Mezquia
