**Subject:** I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Commissioner Donald Polmann,

As we struggle with a global pandemic, an economic crisis, and an active hurricane season, it is not the time to create more uncertainty by signaling a change in solar policies that are helping to make our state a leader in clean solar power and providing good paying local jobs.

At the start of 2020, Florida was ranked 4th in the nation for solar energy production, employing thousands of people and powering the Sunshine State with clean, affordable, homegrown energy. The economic downturn has already put many of these jobs and future solar development at risk - we don't need sudden regulatory changes in solar policies to create even more uncertainty here in Florida.

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,  
Randall Braaksma  
Sebastian, FL 32958

**Sent:** Saturday, September 19, 2020 5:47 PM  
**To:** Office of Commissioner Polmann  
**Subject:** Protect our solar rights! Docket: 2020-0000

Dear Commissioner Donald J. Polmann,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,  
Olivia Nedd

**To:** Office of Commissioner Polmann  
**Subject:** Please keep Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Commissioner Donald Polmann,

Being the sunshine state, encouraging renewable energy investment, means supporting floridians purchase of solar panels. We should be able to put power on the grid and receive payment. A watt is a watt, doesn't matter who generates it.

Seems like people buying solar is good for the state for any number of reasons.

Why let an industry prevent advancement? Their profits should not be a factor.

Your careful consideration is appreciated.

Thanks,

Shawn

**From:** Carmen Blakely <Carmen.Blakely.71252120@p2a.co>  
**Sent:** Saturday, September 19, 2020 7:21 PM  
**To:** Office of Commissioner Polmann  
**Subject:** Protect our solar rights! Docket: 2020-0000

Dear Commissioner Donald Polmann,

Time and time again, Florida's voters have made their support for policies meant to encourage the spread of rooftop solar clear. In 2016 voters rejected the utility-driven "Amendment 1", which would have prohibited the subsidization of solar energy, and approved 'Amendment 4', which provided tax exemptions for rooftop solar customers.

Florida is in the middle of a public health and economic crisis. Undermining the rights of solar customers to receive full compensation for the power they produce will hurt jobs and take money out of people's pockets. Now is not the time to create more uncertainty by changing the fundamental economic landscape of the solar industry.

Before COVID-19, the Sunshine state produced the fourth most electricity from solar panels in the country, led the country in new solar jobs, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could threaten up to 125,000 of these jobs across the United States. Florida is struggling with an above 10% unemployment rate since May and the economic hardship could get worse if you end retail-rate net metering.

People and businesses across the state rely on commonsense solar policies to take control of their own energy. Solar benefits Floridians' safety too. Solar panels and batteries contribute to the resilience of the electric grid. As we progress through hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, homeowners, and our environment from additional uncertainty by preserving retail compensation for net metering here in Florida.

Thank you,  
Carmen Blakely

**Importance:** Low

Dear Commissioners,

Florida homeowners needs a permit-less path for DIY rooftop PV solar. Unreasonable permit requirements double the cost of solar. One inspection by the electric utility if it's grid tied is all that should be required.

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. **Sent:** Saturday, September 19, 2020 5:47 PM  
**To:** Office of Commissioner Polmann  
**Subject:** Protect our solar rights! Docket: 2020-0000

Dear Commissioner Donald J. Polmann,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,  
tami schreurs

Dear Commissioner Donald J. Polmann,

As the former president of the Florida League of Women Voters and the chair of our statewide Solar committee, we ask that you protect the net metering rights that Floridians have today. We should be working together to improve the appeal of solar and electric cars together, not making solar more expensive.

Florida is the poster child for encroaching oceans and we must do everything we can to slow this process by increasing solar and electric transportation. Do all you can for this. Your children's and grandchildren's future is what is at stake.

Sincerely,

**Subject:** I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Commissioner Donald Polmann,

As we struggle with a global pandemic, an economic crisis, and an active hurricane season, it is not the time to create more uncertainty by signaling a change in solar policies that are helping to make our state a leader in clean solar power and providing good paying local jobs.

At the start of 2020, Florida was ranked 4th in the nation for solar energy production, employing thousands of people and powering the Sunshine State with clean, affordable, homegrown energy. The economic downturn has already put many of these jobs and future solar development at risk - we don't need sudden regulatory changes in solar policies to create even more uncertainty here in Florida.

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,  
Joel Templo  
Winter Garden, FL 34787

**Subject:** Protect our solar rights! Docket: 2020-0000

Dear Commissioner Donald J. Polmann,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,  
Deb Miller

**Subject:** Protect our solar rights! Docket: 2020-0000

Dear Commissioner Donald J. Polmann,

I'm not going to paste in a bunch of pre-prepared statements from our solar advocacy organization, I'm writing my own here.

You know why I'm writing, I'm in support of solar and net metering.

Keep the clean energy jobs rolling.

Don't allow the big investor-owned utilities give you a snow-job during this pandemic, now is not the time.

Rooftop solar is contributing to the resiliency of our power grid, and helping us be more energy independent. We need as much renewables contributing to climate improvement as we can get right now.

Also, it doesn't make sense to repeal net metering in order for the investor-owned utilities to buy the excess power that I generate at wholesale rate, only to sell it to my neighbor at retail rate. I don't want the profit, I don't want a payout for excess, I just want to net out what I use at my home.

Public Service Commission, please represent the people, not the investor-owned utilities!

thank you!

Sincerely,  
Dean Lester
