Subject: I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Florida PSC Commissioners,

I see 2 reasons for continuing with net metering. The first which is obvious and is reduced emissions. Cleaner Air, less foreign energy dependence.

The second and not so obvious is reduced infrastructure for the power companies. The savings are in transmission lines. It takes less transmission lines to move excess power down the block rather than from a nuclear power plant on the other side of the state, or from another state. Reduced transmission lines also reduces line losses making more revenue for the power companies. And if it is true reduced cancer rates from having less high voltage power lines.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,
Michael OHafa
