Subject: Protect net metering

Dear Commissioner Art Graham,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Regards,
Robert McLean

Subject: I am in support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Commissioner Chairman Art Graham,

It is my fervent desire that the Public Service Commission represent the consumers of Florida by encouraging individuals and small businesses to invest in solar energy for Florida. For those of us who have already made the investment, please protect our return on capital by maintaining the current net metering rule. This will help me personally, help others consider solar for their homes and businesses, and help to reduce the need for further power company infrastructure.

Please hear the individuals and small businesses of Florida and keep the net metering policy. I have seen the lengths that Florida power companies will go to make more money off of the citizens of Florida while touting it as good for us when it is not.

We are the Sunshine State. Let the citizens recoup the investment they have made or may make in the future of our state by tapping our namesake, sunshine. I am not alone as Florida citizens overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for the citizens of Florida by preserving our successful net metering rules here in Florida.

Sincerely,
Gerald Becker

To: Office of Commissioner Graham
Subject: I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Commissioner Chairman Art Graham,

As we struggle with a global pandemic, an economic crisis, and an active hurricane season, it is not the time to create more uncertainty by signaling a change in solar policies that are helping to make our state a leader in clean solar power and providing good paying local jobs.

At the start of 2020, Florida was ranked 4th in the nation for solar energy production, employing thousands of people and powering the Sunshine State with clean, affordable, homegrown energy. The economic downturn has already put many of these jobs and future solar development at risk - we don't need sudden regulatory changes in solar policies to create even more uncertainty here in Florida.

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,

Dear NARUC Members,

It is my honor to share a farewell note below from Commissioner Butch Howard as he completes his service on the South Carolina PSC. I would like to thank Commissioner Howard for his extensive public service to the citizens of South Carolina, and for his support for NARUC. Commissioner Howard serves on NARUC's Board of Directors, and has served as Chair of NARUC's Committee on Water, and Subcommittee on Education and Research.

Please join me in wishing Commissioner Butch Howard all the very best in any and all future endeavors.

Sincerely,

Greg

NARUC

Greg,

It is with a degree of sadness that I will be leaving the SC Public Service Commission on September 23. Pat & I have had a remarkable and wonderful experience meeting and becoming friends with some of the greatest people in the world. You will all be our life-long friends and I hope my post PSC life will keep me involved with you.

As for NARUC - absolutely one of the most remarkable organizations ever assembled. The knowledge and professionalism that you displayed is unsurpassed.

I would be remised if I did not personally thank Michelle and Erin for their help and support while having to deal with this strange tongue.

Our best to you & Junru.

Butch & Pat
