Florida PSC PSC PSC
FL

Dear Florida PSC PSC,

We are in the middle of a pandemic with unemployment rampant in our state. Right now, Floridians need help making ends meet paying day-to-day expenses, including rising healthcare costs and prescription drug prices, as well as increasing rents and food costs.

What Floridians do not need now is to pay for services that benefits no more than 5 percent of ratepayers.

Docket number 202 00 092 - E1

As Duke Energy being my provider of electric service during the storm situation their response is already in place to hook up electricity 2 homes and businesses because if we are not on the grid they are not getting paid. I have been in Florida for 40 years and through quite a few hurricanes I have been without power for 3 6 and 8 days and probably a few more during these storms recently a tornado tore my neighborhood apart on August 18th and my service was restored on August 20th. There is nothing they could do to remove debris quicker the debris on the road was removed by the county in this case to allow Duke Energy access to repair telephone poles and no way ever could it have been done any faster had I had been paying this extra fee that they are asking for. Please do not pass this document as I see it as a fraud for more profit for Duke Energy.
