Subject: Stop the Electric Utilities' Boondoggle (Docket 20200092-E1)

Sep 22, 2020

Florida PSC PSC PSC  
FL

Dear Florida PSC PSC,

We are in the middle of a pandemic with unemployment rampant in our state. Right now, Floridians need help making ends meet paying day-to-day expenses, including rising healthcare costs and prescription drug prices, as well as increasing rents and food costs.

What Floridians do not need now is to pay for services that benefits no more than 5 percent of ratepayers.

As a taxpayer and homeowner, I am concerned and outraged that these electric companies are receiving such excessive subsidies to pay for services that do not benefit the vast majority of those of us who

(will) end up paying the bill for these services. I feel that the public would be better served by investing in solar power and other more economically viable sources. Florida is experiencing a tremendous growth as people retire and move here to take advantage of our climate, no state income tax, and relatively lower housing prices. The result is that within the next 5 years or less, there will be tremendous stress on our electric grid, which will create electric shortages/outages for the average consumer unless proactive measures are created now to utilize more economical measures and offset the coming overload. This will allow everyone to benefit, rather than just a privileged few.

Sincerely,

Ms. Marsha Curry
