Subject: RE: Protect our solar rights! Docket: 2020-0000

Good Afternoon, Mr. Jackson.

We will be placing your comments below in consumer correspondence in Docket No. 20200000, and forwarding them to the Office of Consumer Assistance and Outreach.

Thank you!

Toni Hover

Subject: Protect our solar rights! Docket: 2020-0000

Dear Florida Public Service Commission,

Florida should be a leader in expanding solar energy. I am a voting citizen of this state. As such, I have the right to generate solar energy on my property and offer any excess energy to go back on the power grid. I am opposed to electric utility companies and organizations dictating what I can and cannot do. The United States was founded on the principle of freedom and individual rights to all citizens. It was not founded to pander to corporations. You can check that out by reading history books.

Amid a public health and economic crisis, it's clear that Florida's electric utilities should be doing a whole lot more to promote rooftop solar - a known job creator that keeps money in families' pockets.

Before COVID-19, "solar installer" was the fastest growing job in the country, and the solar industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. In the Sunshine state, before this crisis began, the solar industry employed over 12,000 Floridians. Now, over 1 million Floridians are unemployed, and Florida has already lost 22% of its workforce.

People and businesses across the state rely on common sense solar policies to take control of their own energy, save money, and choose how they power their lives.

Not only does solar create jobs and save us money, but when paired with batteries, solar panels can contribute to the resilience of the electric grid and provide back-up power in emergencies. As we face another intense hurricane season, Floridians need more tools – not fewer – in order to weather all the storms that are coming our way.

Thank you for defending solar workers, business owners, and residents by protecting our bedrock solar policies here in Florida.

Sincerely,

Jim Jackson
