Subject: Protect our solar rights! Docket: 2020-0000

Dear Florida Public Service Commission,

My family's home is powered by solar energy, and Florid's net metering provisions are therefore critical to maintaining the economics of our household.

But, it's not just important to my family. Before COVID-19, "solar installer" was the fastest-growing job in the country, and the solar industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. In the Sunshine state, before this crisis began, the solar industry employed over 12,000 Floridians. Now, over 1 million Floridians are unemployed, and Florida has already lost 22% of its workforce.

People and businesses across the state rely on common sense solar policies to take control of their own energy, save money, and choose how they power their lives.

Not only does solar create jobs and save us money, but when paired with batteries, solar panels can contribute to the resilience of the electric grid and provide back-up power in emergencies. As we face another intense hurricane season, Floridians need more tools – not fewer – in order to weather all the storms that are coming our way.

Thank you for defending solar workers, business owners, and residents by protecting our bedrock solar policies here in Florida.

Sincerely,  
John Alber  
240 6th St Apalachicola, FL 32320-1304
