Ref: Docket No. 20200139-WS, Utilities, Inc. of Florida

Dear Sir,

On August 3, 2017, you approved a rate increase that more than doubled our previous rate. Now, Utilities, Inc: is asking for another increase. This is unreal. How can you even consider Such an increase?

The people of Florida expect your commission to look after us and not the developers of new Housing and business areas. They should pay all the cost of laying new water lines, Sewer and Waste water pipes. Not the public. As the population increases, (a thousand a day) developers Should pay these charges.

After all, we are the voters who you should be concerned with.

Please do not approve this request for a rate increase.

Thank you,

D.E. Mathis
